Smith; 3d 90½ and 2 specials, F. A. Wood. Pullets: 1st 91½, F. A. Ware, Jr.; 2d 91½, A. S. Record; 3d 91 and 1 special, C. F. A. Smith. Pen: 1st 181½, C. F. A. Smith; 2d 181½, F. A. Wood; 3d 178½ and 1 special, F. A. Ware, Jr.

WHITE WYANDOTTES.—Cock: 1st 91½, C. H. Johnson; 2d 89½, J. D. Donavon, Jr.; 3d 88½, Chas. F. Dow. Hen: 1st 92, J. D. Donavon, Jr.; 2d 91½, Chas. F. Dow; 3d 91½ and specials, C. F. A. Smith. Cockerel: 1st 92, C. F. A. Smith; 2d 91, J. D. Donavon, Jr.; 3d 90½, E. D. Wood. Pullet: 1st 92, E. D. Wood; 2d 93, E. D. Wood; 3d 92, E. D. Wood. Pen: 1st a tie, 182½, Chas. F. Dow; 2d 132 1-8, C. H. Johnson; 3d 181½, Chas. F. Dow.

GOLDEN WYANDOTTES.—Cock: 1st 90, George W. Felton; 2d 89, F. A. Wood. Hen: 1st 90½, F. A. Wood; 2d 88, F. A. Wood. Cockerel: 1st 91½, George W. Felton; 2d 91, F. A. Wood. Pullets: 1st 92½, and 2d 90½, George W. Felton. Pen: 1st 132½ and 3 specials.

BUFF WYANDOTTES.—Cock: 1st F. S. Tenney

Mt. Carmel, Ill.

The Wabash Valley Poultry Association closed its seventh annual exhibition in Mt. Carmel, Ill., on Saturday, Dec. 30. All the former shows of this society have been first-class, but the one just closed was superior to any previous one. It was an unqualified success in every respect. The hundreds of birds of rare merit were a surprise to all who saw the show.

Barred Plymouth Rocks led in numbers, about 100 being on exhibition. That they were a very even lot is shown by the fact that on cockerels there were six ties for 1st, seven ties for 2d, and seven ties for 4th premiums.

Light Brahmas were second in numbers, there being about 80 shown, and it is safe to say a finer lot of birds were never before exhibited at a local show.

In Black Javas, Black Langshans, and S. C. B. Leghorns there were about 30 entries each, and the quality was equal to anything on exhibition. The Brown Leghorns won the silver cup offered by Judge Marshall.

White Plymouth Rocks, White and P. Cochins, W. F. Black Spanish, Buff Leghorns, and S. S. Hamburgs were out in creditable numbers. S. G. Dorkings, Blue Andalusians, and American Dominiques were also shown.

The Bronze Turkey class was especially fine, there were about 30 entries. There were also W. H. Turkeys and Pekin Ducks.

A very pleasant feature of the show was the presentation, by the Association, of an elegant easy chair to the secretary, C. C. Harper, for his services.

Financially the show was a success, there being a snug little sum left in the treasury after paying all expenses.

The following is the awards:

BARRED PLYMOUTH ROCKS.—Hen, 1st 91, J. H. Asher, Oakton, Ind.; 2d 90 1-2, Albion Poultry Yards, Albion, Ill.; 3d 90, W. W. Buchanan, Friendsville, Ill.; 4th 89 (tie), Asher and Buchanan. Cockerel, 1st 91 (tie), O. H. Wood, Friendsville, Ill.; J. H. Asher, Albion Poultry Yards, and W. W. Buchanan; 2d 90 1-2 (tie), J. M. Ramsey, Mt. Carmel, Ill.; Wood, Buchanan, and Samuel Weaver, Albion, Ill.; 3d 90 (tie), Wood, Asher, and Buchanan; 4th 89 1-2 (tie), Asher, Ramsey, Wood, and Buchanan. Pullet, 1st 92, 2d 91 1-2, Albion Poultry Yards; 3d 91 (tie), Albion Poultry Yards and Buchanan; 4th 90 1-2 (tie), Albion Poultry Yards, Asher, Ramsey, Weaver, Wood, and Wm. Risley, Mt. Carmel, Ill. LIGHT BRAHMAS.—Cock, 1st 92 1-2, Albion Poultry Yards; 2d 91 1-2, John F. Woods, Princeton, Ind.; 3d 90 1-2, S. S. Seiler, Mt. Carmel, Ill. Hen, 1st 94, 2d 93, Albion Poultry Yards; 3d 91, J. F. Woods; 4th 90 1-2, Seiler. Cockerel, 1st 93, Seiler; 2d 92 1-2, Albion Poultry Yards; 3d 92, Woods; 4th 91 1-2 (tie), Ivia Trippett, Hazelton, Ind., and Woods. Pullet, 1st 94 1-2, Woods; 2d 93 1-2 (tie), Woods and Albion Poultry Yards; 3d 92 1-2 (tie), Woods, Trippett, and Albion Poultry Yards; 4th 92 (tie), Woods, Seiler, and Trippett. Pen, 1st 185 1/2, Albion Poultry Yards; 2d 185 1/2, 4th 183 1/2, Woods; 3d 183 1/2, Seiler.

WHITE PLYMOUTH ROCKS.—Cockerel, 1st 92 1-2, Albion Poultry Yards; 2d 91 1-2, Trippett. Pullet, 1st 95 (tie), Trippett and Albion Poultry Yards; 2d 94, Albion Poultry Yards; 3d 93 1-2, Trippett; 4th 93 (tie), Trippett and Albion Poultry Yards. Pen, 1st 187, Albion Poultry Yards; 2d 185 1-2, Trippett.

BLACK JAVAS.—Cock, 1st 89 1-2, hen, 1st 95 1-2, 2d 95, 3d 94 1-2, cockerel, 1st 94 1-2, 2d 94, 3d 91 1-2, H. Hodgson; 4th 90, Risley. Pullet, 1st 96, 2d 94 1-2, 3d 94, Hodgson; 4th 93 1-2 (tie), Hodgson and Risley. Pen, 1st 190 1/2, 2d 188 1/2, 3d 185 1-2, 4th 182 1-2, Hodgson.

BLACK LANGSHANS.—Hen, 1st 94, Trippett. Cockerel, 1st 92 1-2, Ramsey. Pullet, 1st 94 1-2 (tie), Trippett and Ramsey; 3d 90, Ramsey.

WHITE COCHINS.—Hen, 1st 92, 2d 90 1-2, 3d 90, 4th 88 1-2, cockerel, 2d 88 1-2, pen, 1st 178 3/4, Trippett.

PARTRIDGE COCHINS.—Cockerel, 1st 93, 2d 80, pullet, 1st 91 1-2, 2d 91, 3d 90 1-2, 4th 89 1-2, pen, 1st 183 1/2, J. J. Stone, Mt. Carmel, Ill.

S. G. DORKINGS.—Hen, 1st 92 1-2, 2d 90 1-2, cockerel, 1st 92 1-2, Stone.

W. F. BLACK SPANISH.—Cockerel, 1st 93 1/2, pullet, 1st 96, 2d 95 1-2, 3d 95, pen, 1st 189, Albion Poultry Yards.

BUFF LEGHORNS.—Cockerel, 1st 2d, pullet, 1st 2d, 3d, 4th, pen, 1st, Hodgson.

S. C. B. LEGHORNS.—Cockerel, 1st 94, 2d 93, 3d 92, pullet, 1st 94 1-2, 2d 94, 3d 93 1-2, 4th 93, pen, 1st 188 1/2, 2d 186 1-2, 3d 186 1/2, 4th 184, Albion Poultry Yards.

S. S. HAMBURGS.—Hen, 1st 94 1-2, cockerel, 1st 93 1-2, 2d 91, pullet, 1st 94 1-2, 2d 93 1-2, 3d 92, 4th 91 1-2, pen, 1st 186 1/2, Stone.

BLUE ANDALUSIANS.—Cock, 1st 91 1-2, hen, 1st 93, pullet, 1st 93, Hodgson.

AMERICAN DOMINIQUE.—Cockerel, 1st, pullet, 1st, 2d, John Goodart, Friendsville, Ill.

BRONZE TURKEYS.—Cock, 1st 97, Seiler; 2d 96 1-2, Risley; 3d 93, hen, 1st 94 1-2, 2d 88, Asher; 3d 95, young cock, 1st 95 1-2, 3d 94 1-2, 4th 93, Seiler; 2d 95, Asher. Young hen, 1st 96, 2d 95 1-2, 4th 93, Seiler; 3d 95 (tie), Seiler and Asher.

PEKIN DUCKS.—Male, 1st 96, female, 1st 97, Risley.

The silver cup offered by the judge (F. J. Marshall) for 15 highest scoring birds of one variety by one exhibitor, none to score under 90, was won by Albion Poultry Yards on S. C. B. Leghorns; average score, 93 17-30.

The Shelton Show.

The second annual exhibition of the Huntington and Shelton Poultry Association closed Friday evening, Jan. 5th, after a very successful three days exhibit.

The attendance was very large every day, and the meeting is fairly successful, financially. The classes were well filled, 108 Barred Plymouth Rocks being shown. The Whites came out in strong numbers making a class of over 150 Plymouth Rocks.

The Brahma, Cochins, Polish and Game classes were well filled while the Bantam class showed some very fine specimens, especially the Game Bantams of Pierce Bros., of Winchester, N. H.

The celebrated Mann bone cutters were in full working order, while the Monitor Incubator of Bristol, Ct., made a fine hatch of chickens. The awards were made by judges Seeley and Pratt. The following are the awards:

HAS NO EQUAL.

Your paper is "immense", giving us fresh news weekly. As an advertising medium it has no equal, nearly all my sales are made through it, and I have made excellent ones at that.

G. W. NITRAUER.

BUFF COCHINS.—Cock, 1st 91 1-2, 2d 90 1-2, 3d 88 1-2, Hen, 1st 93, 2d 91 1-2, 3d 91 1-2, Cockerel, 1st 90 1-2, Pullet, 1st 93, 2d 91, 3d 90 1-2, Pen, 1st 182 1-2, 2d 181 1-2, A. E. Myers, Akron, O.

BLUE LANGSHANS.—Cockerel, 1st, Pullet, 1st Reese.

S. C. BROWN LEHIGHNS.—Cock, 1st 93, Sterling; 2d 90, J. M. Saffer, Akron, O. Hen, 1st 93, 2d 93, Sterling; 3d 92, Ed. A. Reed, Canton, O. Cockerel, 1st 93, 2d 93. Pullet, 1st 94, Reed; 2d 89 1-2, Saffer.

BLACK LEHIGHNS.—Cockerel, 1st 92 1-2, 2d 91 1-2, Pullet, 1st 95, William Markwalder, Akron, O.

BUFF LEHIGHNS.—Cockerel, 1st, Pullet, 1st and 2d, Pen, 1st, J. H. Stoye, Mount Vernon, Ohio.

S. C. WHITE LEHIGHNS.—Cock, 2d Strole. Hen, 1st 95 1-2, 2d 95, F. H. Martin, Cleveland, O.; 3d 90, Strole. Cockerel, 1st 94, Martin; 2d 91 1-2, Strole. Pullet, 1st 94 1-2, 2d 93 1-2, Martin; 3d 93, Strole. Pen, 1st 188 3/4, Martin; 2d 181 3/4, Strole.

BLACK MINORCAS.—Cock, 1st 91, Robert Merritt, Akron, O. Hen, 1st 91, W. B. Metlin, Akron, O.; 2d 89, Merritt. Cockerel, 1st 93 1-2, 2d 92, Geo. Bissel, Akron, O.; 3d 91 1-2, Mrs. W. C. Warner, Akron, O. Pullet, 1st 94, 2d 93, 1-2, 3d 93 1-2, Pen, 1st 186 3/4, 2d 184 3/4, Bissel.

GOLDEN POLISH (PLAIN).—Cock, 1st 91, Strole; 2d 89 1-2, H. Fletcher, Akron, O.; 3d 89, D. Benson, Akron, O. Hen, 1st 92, Fletcher; 2d 91 1-2, Pullet, 1st 87 1-2, Benson; 2d 87, Fletcher. Pen, 1st 178 3/4, Benson; 2d 178 3/4, Fletcher.

WHITE POLISH.—Hen, 1st 92 1-2, 2d 90 1-2, Strole.

W. C. BLACK POLISH.—Cock, 1st 92 1-2, W. M. Scanton, Ravenna, O.; 2d 88 1-2, S. T. Gulliford, Akron, O. Hen, 1st 95, Gulliford; 2d 93 1-2, Cockerel, 1st 93, 2d 93. Pullet, 1st 94, 2d 94, 3d 93 1-2, Scanton.

W. F. BLACK SPANISH.—Cock, 1st 92 1-2, Hen, 2d 89 1-2, Cockerel, 1st 93, Pullet, 1st 93 1-2, M. W. Houshalter, Akron, O.

BLACK HAMBURGERS.—Cock, 1st 92 1-2, Hen, 1st 93, 2d 92 1-2, W. A. Orr, Akron, O.; 3d 92 1-2, H. S. Baish, River Styx, O. Cockerel, 1st 92 1-2, Pullet, 1st 90, Pen, 1st 184 1/4, Orr.

GOLDEN PENCILLED HAMBURGERS.—Cock, 1st 91, Hen, 1st 93 1-2, 2d 92 1-2, 3d 92, Pen, 1st 183 3/4, J. H. Dague, Wadsworth, O.

GOLDEN SPANGLED HAMBURGERS.—Cock, 1st 92 1-2, 2d 92 1-2, Strole; 3d 92, Julius Frank, Akron, O. Hen, 1st 93, 2d 93, 3d 92 1-2, Frank. Cockerel, 1st 94 1-2, 2d 92 1-2, Strole; 3d 92, Frank. Pullet, 1st 93, Pen, 1st 186 3/4, Strole; 2d 184 3/4, Frank.

SILVER SPANGLED HAMBURGERS.—Cock, 1st 93, 2d 92, 3d 91 1-2, Hen, 1st 94, 2d 92 1-2, 3d 92 1-2, Cockerel, 1st 94, 2d 93, 3d 92 1-2, Pullet, 1st 94, 2d 93 1-2, 3d 93 1-2, Pen, 1st 187 1/4, 2d 185 3/4, Frank.

WHITE HAMBURGERS.—Cock, 1st 94, Hen, 1st 93, Cockerel, 1st 92 1-2, 2d 91 1-2, Pullet, 1st 95 1-2, 2d 95, 3d 93 1-2, Pen, 1st 188 1/4, Frank.

HOUDANS.—Cock, 1st 91 1-2, 2d 91, Hen, 1st 92 1-2, 2d 89 1-2, Cockerel, 1st 91 1-2, 2d 89, Pullet, 1st 90, 2d 89, Pen, 1st 182 3/4, 2d 180 3/4, A. D. Olin, Ravenna, O.

BLUE ANDALUSIANS.—Cockerel, 1st 91, Pullet, 1st 91 1-2, Reese.

B. B. RED GAMES.—Cockerel, 2d 87 1-2, Pullet, 2d 89, Dague.

BROWN RED GAMES (STANDARD).—Cock, 1st 90 1-2, Hen, 1st 90 1-2, N. S. Munson, Akron, O. Cockerel, 1st 91, Dague. Pullet, 1st 92, Munson; 2d 91, Dague; 3d 88 1-2, Pen, 1st 180 1-2, Munson.

BLACK SUMATRAS.—Cock, 1st 90 1-2, Hen, 1st 94, Cockerel, 1st 93 1-2, Pullet, 1st 92 1-2, Pen, 1st 186 1/4, A. Rastner, Akron, O.

MALAYS.—Cock, 1st, Hen, 1st and 2d Stoye.

INDIAN GAMES.—Cock, 1st John H. Stoye, Mount Vernon, O.; 2d J. H. Dague, Wadsworth, O.; 3d H. F. Peck, Akron, O. Hen, 1st John H. Stoye, Mount Vernon, O.; 2d J. H. Dague, Wadsworth, O.; 3d H. F. Peck. Cockerel, 1st James Leonard, Canton, O. Pullet, 1st James Leonard, Pen, 1st J. H. Stoye; 2d H. F. Peck.

PIT GAMES.—Cock, 1st 95, Otto Wagner, Cockerel, 1st 95, Wagner; 3d 94 1-2, Wagner. Cockerel, 1st 95 1-2, Wagner; 2d 95, Wagner; 3d 93, George Hansch, Akron, O. Pen, 1st Geo. Hansch.

GINGER RED PIT GAMES.—Cock 1st 95 1-2, Wagner; 2d 93 3/4, George Hansch; 3d 92 3/4, Hansch. Cockerel, 1st 94 1-2, F. D. Kidder; 2d 90 1-2, Geo. Hansch; 3d 89, Geo. Hansch. Pen, 1st George Hansch.

RED QUILL PIT GAMES.—1st 93 1-2, George Hansch. Cockerel, 1st 90 1-2, Hansch. Pen, 1st Hansch.

B. B. R. PIT GAMES.—Cock, 1st 95, L. Seffler, Akron, O. Cockerel, 1st 94 1-2, John Dun, Akron, O.; 2d 94, F. D. Kidder; 3d 93 1-2, John Dun.

BROWN RED PIT GAMES.—Cockerel, 1st 92 1-2, John Dun; 2d 92, F. D. Kidder; 3d 91 3/4, Kidder. SPANGLED PIT GAMES.—Cock, 1st 93, Wagner. RED PYLE PIT GAMES.—Cock, 1st 93 1-2, Wagner.

DERBY PIT GAMES.—Cock, 1st 93, Wagner. Cockerel, 1st 90 1-2, Hansch.

SPOONEY PIT GAMES.—Cock, 1st 91 1-2, F. D. Kidder. Cockerel, 1st 91 1-2, Wagner.

IRISH GRAY PIT GAMES.—Cockerel, 1st 91 1-2, John Dun; 2d Otto Wagner.

DUCKWING PIT GAMES.—Cock, 1st, 90 1-2, Dun.

GRIST CHAMPION PIT GAME.—Cockerel, 1st 92 1-2, H. S. Bash, Riverstyx, O.

BLUE BOTTOM PIT GAMES.—Cockerel, 1st 92 1-2, S. Seffler; 2d 91, Seffler.

PHOENIX.—Cock, 1st, A. Kastner, Akron, O. Hen, 1st Kastner.

FRIZZIES.—Cock, 1st Rottman, Benton, O. Hen, 1st S. Rottman.

SILKIES.—Hen, 1st 92 1-2, Kastner. Cockerel, 1st 92 1-2, Kastner; 2d 91, Kastner. Pullet, 1st 95, Kastner.

MALAYS BANTAMS.—Cock, 1st Rottman. Hen, 1st Rottman.

SILVER SEBRIGHT BANTAM.—Cock, 1st 91 1-2, S. F. Gulliford, Akron, O. Hen, 1st 93 1-2, Rottman; 2d 93, Gulliford. Cockerel, 1st 94 1-2, Rottman; 2d 92 1-2, Gulliford; 3d 92, Kastner. Pullet, 94 1-2, Gulliford; 2d 93, Gulliford; 3d 93, Gulliford. Pen, 1st 185 3/4, Gulliford.

ROSE COMBED WHITE BANTAMS.—Cock, 1st 91, Seffler. Pullet, 1st 92 1-2, Seffler.

ROSE COMBED BLACK BANTAM.—Cock, 1st 95, Rottman. Hen, 1st 96, Rottman; 2d 95 1-2, Rottman; 3d 95 1-2, Rottman.

PEKIN OR COCHIN BANTAM.—Cock, 1st 94 1-2, Rottman; 2d 93 1-2, G. H. Stickney, Akron, O. Hen, 1st 93 1-2, Rottman. Cockerel, 1st 95 1-2, Rottman; 2d 93 1-2, Stickney. Pullet, 1st 94 1-2, Rottman; 2d 94, Stickney; 3d 93 1-2, Stickney. Pen, 1st 187, Stickney.

B. B. R. GAME BANTAM.—Cock, 1st 94 1-2, E. F. Blood, Kent, O. Hen, 1st 96, Blood; 2d 95, Blood; 3d 94, Blood. Cockerel, 1st 95 1-2, Rottman. Pullet, 1st 95 1-2, Rottman. Pen, 1st 188 3/4, Blood.

WHITE GAME BANTAM.—Cockerel, 2d 87, S. Seffler.

BROWN RED GAME BANTAM.—Cockerel, 1st 96, Rottman.

JAPANESE BANTAM.—Pullet, 1st 96 1-2, Rottman.

GOLDEN SEBRIGHT BANTAM.—Hen, 1st 93 1-2, Gulliford. Cockerel, 1st 94, Rottman. Pullet, 1st 93, Rottman.

RED PYLE BANTAM.—Hen, 1st 92, Kastner.

PIGEONS PER PAIR.—Red Fans Plain, 1st; Yellow Fans Plain, 1st; Yellow Fans Plain, 2d; S. F. Red Tumblers, 1st; S. F. Almon Tumblers, 1st; S. F. Red Tumblers, 2d; S. F. Silver Tumblers, 1st; Stars Plain, 1st; Stars Crested, 1st; Red Winged Turbids, 1st; Black Barbs, 1st; Blue Swallows Crested, 1st; Blue Swallows Plain, 1st; Black Swallows Plain, 2d, Geo. Hansch. Black Pouters, 1st and 2d; Red Pied, 1st, Dr. Seberman. Dun Antwerps, 1st; Silver Antwerps, 1st, Clyde Orr. Silver Antwerps, 2d, N. S. Munson. Akron, O. Birmingham Rollers, 1st, Harry Orr. Yellow Antwerps 1st; Black Antwerps 1st, Munson. Black Pied Pouters 1st; Black Pied Pouters 2d, Wm. Kastner. Blue Pied Pouters 1st, Kastner. Silver Pied Pouters 1st, Dr. Seberman. Silver Pied Pouters 2d, Kastner. Chequered Pied Pouters 1st, Kastner. White Fantails 2d, Kastner; 1st Hansch. Crested Black 1st, Hansch; 2d Kastner. Black Nuns 1st, Black Swallows 1st, Yellow Jacobins 1st, Blue Owls 1st, Kastner. Blue Antwerps 1st, Sam Hibbs; 2d Munson. White Trumpeters 1st, Kastner. Blue Chequered Antwerps 1st, Hibbs; 2d Munson. Red Chequered Antwerps 1st, Hibbs; 2d Munson. Blue Fantails 2d, Hansch; 1st Munson. Black Fans Plain 1st, Munson; 2d Hansch. Black Oriental Rollers 1st, Red Oriental Rollers 1st, S. F. Black Tumblers 1st, Booted 1st, Red Spashed 1st, Munson. White Pouters 1st, Henry Shuwacher, Akron, O. Red Jacobins 1st, Black Fans Crested 1st Hansch.

AWARDS AT AUBURN, NEBRASKA,
December 19 to 21.

TO THE AMERICAN FANCIER:

I am pleased to announce to you that our first annual poultry show was a complete success in every sense. There were 430 specimens entered. The attendance of visitors was good, and we distributed nearly four hundred dollars in premiums. In Mr. L. P. Harris, our judge, we find a fair, unbiased, competent gentleman for the work in which he is engaged. He gave universal satisfaction, and in the midst of his work was stopped to listen to a few remarks by Mr. Watson of Reserve, Kansas, in presentation of a gold medal, suitably inscribed, as a token of appreciation of his services from the association. At the annual meeting during the show, action was taken to at once establish an office of registration of thoroughbred poultry. Mr. O. H. Kent, publisher of the *Poultry and Bee Journal*, at this place, was elected recorder, and the books, blanks, &c., will be ready for entries by January 1st, 1894. This register is intended to take in the territory west of the Mississippi River. Being something new to us I will try from time to time to let you know how it prospers. A number of fine birds changed hands during the show, and the poultry boom now on here will create a demand for more poultry literature as well as fine birds. Following are the awards:

Awards at Auburn, Nebraska, December 19 to 21.

BLACK LANG

PIGEONS.

Queries and Answers.

[All reasonable questions of interest to the fancy, pertaining to the care, management and health of fancy Pigeons will be answered in this column. The department is conducted by C. W. Butts, 1070 Madison Avenue, Columbus, Ohio, to whom all communications should be addressed.—ED.]

Query.—Will you kindly inform me what I can do to cure my Fans of the sore throat, or canker? I have a fine lot of Fans, but for some time I have been unable to raise any young ones on account of the disease I have among them. After the young ones are from ten days to two weeks old, something hard and yellow begins to form in the throat, and in three or four days it's so large that the old ones are unable to feed them. Some of them have a sort of cancer down by the tail. Now do you think that this is bred from the old ones, or is it just a disease, and can it be cured? I feed my birds on corn, wheat and peas. Can the disease come from the feed?

F. B. B., Charleston, S. C.

Answer.—A similar case to yours has been reported once before—a short time ago. The disease is probably contracted from the parents, or the latter being disordered in their crops, through unwholesome feed and water. Remove all the matter with a thin piece of wood and swab the throat out thoroughly with a very strong solution of alum water, using a camel's hair brush for the purpose; care should be taken not to get too much of the fluid down the bird's throat. If this treatment does not affect a cure, take carbolic acid one part to glycerine ten parts, apply with camel's hair brush. Treat the cancer at root of tail in same manner.

Query.—I have a White Jacobin that coughs a great deal in the morning and evening, but don't cough during the day or night, eats and drinks well, but it seems to be very dumpish; does not seem to pay attention to its mate or any other birds. What is the matter? I also have birds that have the diarrhoea. What do you prescribe for it? I feed corn, Canada peas and wheat.

A. J. C., Norwich, Conn.

Answer.—Your White Jacobin has a bad cold; remove to a dry warm pen (free from draughts) and give one drop of tincture of aconite in a teaspoon of water; a little quinine will also be beneficial (say $\frac{1}{2}$ grain morning and evening). Bathe the feet in warm water and dry well daily. (2) For diarrhoea administer a purge of castor oil ($\frac{1}{2}$ of a teaspoonful), should it pass into dysentery one to three drops of laudanum may be given in a teaspoon of boiled milk.

Pigeon Notes.

BY JOHN HOPEWELL.

Among the ailments of pigeons, if I may so term it, are creased beaks. This is a trouble that all varieties are subject to and one that begins soon after birth, and is consequently almost impossible to prevent. It is no doubt caused by the manner of the young bird taking its food from the parent bird, by which the mandibles are strained out of their natural shape while soft and pliable, and becoming fixed as the beak hardens produces the creased beak. Careful attention to the disfigurement, by paring it to as near a natural condition as possible with a sharp knife is a benefit to the appearance as well as the comfort of the bird; to neglect it allows it to become not only unsightly, but a hindrance to the bird in picking up its food, although we have seen birds with neglected bills of this kind become very expert in picking grain, especially corn, from the floor or ground, and getting it into their mouths. But a man who loves his pigeons and gives them proper attention never will neglect to keep a deformity of this kind as much under control as possible. As I have said a sharp knife frequently applied, trimming the bill each time as near the natural shape as possible without cutting

into the quick will make the pigeon presentable in appearance and at least comfortable. Short-faced birds are particularly subject to this trouble and the knife needs to be frequently applied to keep them in order.

* * *

The claws or nails of some pigeons, especially old birds are inclined to grow long and need trimming as well as the beaks. Sometimes when neglected they gather the offal from the floor of the loft little by little, until balls collect on these nails as large as marbles, and the pigeon goes clattering around as though shod with hob-nailed shoes. This is rarely seen where pigeons have their liberty and fly out and in at will. But where pigeons are confined and not carefully tended, it frequently occurs. The only way to do is to catch the afflicted one and remove the balls and I have seen them so hard, caused by the constant pounding, as to have to be broken with a hammer before they could be removed.

* * *

No doubt ere this time all young pigeons have developed to such an extent, as to show whether desirable to retain as breeders or not. As fast as any young bird proves that it is so deficient in quality as to unfit it for breeding purposes it should be made way with. Many breeders have so much love for their pets that they cannot kill them for the table, and so send them in a body to some dealer to be sold and scattered promiscuously about the country. This does not tend to improve the demand for fancy pigeons, nor to elevate the standard of the different varieties, and is positively a detriment to the pigeon interests. If I could have my way every poor fancy pigeon would be decapitated, and then every one with a taste for such pets would be obliged to purchase good ones, and not take the chances of breeding from the rif-raff continually thrown upon the market. A poor bird eats as much as a good one, and consequently costs as much to keep as a good one. So, except in the matter of first cost, there is nothing gained by purchasing refuse stock, and a cheap bird of this kind is too cheap for a true fancier to invest in. Many foully marked birds are bought up by unscrupulous persons, nicely plucked and trimmed, and sold to unsuspecting fanciers as clean and perfect specimens. Time develops the swindle, and the whole fancy suffers in a measure from such deceptions. If my plan was carried out there would be no foul-marked birds to pluck and consequently no chance to swindle.

* * *

The temptation to pluck out foul feathers is a great one, where the pigeon is almost perfect in other particulars, and I cannot say I consider it wronging anyone for a breeder to do so, when a pigeon is not kept for sale and only for breeding purposes and one's own pleasure. Some excellent stock birds in a natural condition show foul feathers, and to remove these and so improve the appearance of the flock is not to be condemned. Still, many conscientious breeders will not allow foul feathers to be removed on any consideration. And I call to mind a visiting fancier who was unceremoniously hustled out of a loft for such an act. He had called upon a breeder of high class swallows to view his stock, and was given some of the finer specimens to handle for a closer view, as all know is customary. In the breast of one was a black feather, and under the impulse of the moment he quickly "jerked" it out, which so incensed the owner of the bird that he turned on the visitor with fury in his eyes and fairly drove him from the loft. Moral: When you visit a fancier's loft don't see any foul feathers.

A Correction.

Through an error of the compositor in the list of awards at the Baltimore show, Ryan & Gould were credited with winning 1st, 2d, 3d and 4th on Red Turbit hens. Wm. T. Levering won 1st, 2d and 4th, winning 1st with an 1893 bird of his own breeding. She was a beauty and won easily.

The White Fantail Pigeon.

A Monograph

BY JESSE M. RUTTER.

[Written for THE AMERICAN FANCIER.]

In replying to one man who really wishes to invest but \$5, the blindfold seller prices a \$20 pair; to a second applicant seeking to perhaps put \$25 into his purchase the misled vendor offers a \$10 couple. Neither party is further heard from, and all possibility of a satisfactory trade is at end. If posted upon the probable outlay of each writer, the fancier could have met the wants of both, or answered briefly that he was unable to supply the quality desired. By telling plainly what he is willing to pay, and putting the burden of selection upon the seller, any beginner will get square treatment from an honorable fancier. To rely upon an honest name is far wiser than to pay some shifty party unduly for the sake of flaunting a self-betraying self-sufficiency.

The second plan of starting Fantail breeding is to choose certain points as parent stems upon which further essentials are to be grafted. It is futile to write for Fantails "good in all points" These *rara-avis* specimens are the before-mentioned show birds upon which no novice is justified in lavishing heavy sums. His ignorance of pigeon practice may lead to loss, and if the dead Fantail happens to be an expensive prodigy, his ardor is likely to get a fatal chill. The Fantail family divides into two branches. One section is small, slender, graceful; dainty in outline, and proud in step—a true pigmy, wonderful in stylish action, but often lacking the Standard spread. The second offshoot shows a sharp contrast in organism, being big in body and lazy in motion. This larger sort is loosely muffled in feather, and is specially noted for the tremendous breadth of its circular tail. As these two diverse types will be carefully compared further on it is needless to here enlarge upon their peculiar points. Enough has been noted to teach the beginner how widely separate are the extremes of choice. But a seeker after truth says: "Why not take the happy medium?" Well, the coveted "happy medium" is either a grand show Fantail, or an ordinary specimen free from startling defects. The average fancier follows the same rut year after year chiefly because he uses tidy looking pairs which "match in the pen." These lukewarm—neither good nor bad—couples breed offspring equally passable, and no decided headway is ever made. By starting with Fantails strong in a few leading points, the breeder may justly hope to so augment the primary traits that the sought for "all-round excellence" will finally appear. But the first selections must be about perfect in the settled points, even if faulty in others. A man can safely begin at either end in building up his model Fantail.

If he decides to take body properties as his breeding basis, regular "Shakers," nearly faultless in shape should be sought. He must secure smoothly feathered tails even though they are narrow. Scraggy spreads formed of feathers erratically stuck into circular shapes are worthless. Such raggedly arranged tails resemble the half-open slats of a swivel-blind, and as a clever fancier says "lack system." During the past year I have had exceptional chances to visit many Fantail lofts, and to inspect strains which were said to be noted for broad, flat tails. Among a few solidly filled spreads were numbers of the irregular, useless stamp which their owners actually thought valuable. In face view, these ill-arranged fans looked fairly well, but from other positions it was possible to see clear through the tails, just as one gazes between the pickets of a fence. The feathers did not touch each other in clinging overlaps, but stood huddled around the circle at all sorts of angles. An even "tunnel" tail, as a breeding factor, is far ahead of this jumbled order. If the strain builder does not at the start admire the shaking Scottish body, he can stock his loft with the big tailed variety, and try to reduce the bulky flesh without losing the broad feather. The Standard Fantail is an artificial mean between two normal extremes, and nature ever tends towards

The domestic fowls have been bred almost entirely from the Leghorns. No effort, however, has been made to keep the breed pure, and the result is a mixed breed, which is nevertheless admirably adapted to the exigences of the climate. The fowls are uniformly of a medium size, showing almost invariably white or brown bodies, with occasionally black feathers about the neck; but more frequently extending from the neck along the back and upper portion of the wings. Yellow, featherless legs and yellow skin predominate; a few are found with black legs, but they are considered inferior, both as egg-producers and for food purposes. The cocks have extremely brilliant red combs of more than usual proportions; the combs are single and very long and high and are highly esteemed as a culinary delicacy.

None of the fowls here breed true to type and color. A very few gentlemen in the district amuse themselves in breeding pure breeds of fowls as a pastime. Their number is, however, very small, and most of the fowls are of imported stock. There is to be held next spring at Palermo a "chicken show," where all the best fowls bred in Italy will be exhibited.

The common variety of domestic fowls are non-sitters. Turkeys are sometimes impressed into service as sitters.

The fowls are principally kept for their eggs, immense quantities of which are annually exported to England. They are of good size and uncommonly white.

There are no particular or peculiar breeds of fancy fowls here.

Artificial incubation is not employed, except in a few rare instances where chickens are bred solely for amusement.

During the months of December, January, and February the weather is cold—uniformly and unvaryingly cold—the mercury ranging from 10 degrees F. at night to 34 degrees or 36 degrees during the day. There are usually a few days each winter when the mercury falls below zero. A few heavy snowstorms usually occur during the winter. November and March are not so cold. In April, May, September, and October the temperature is pleasantly warm. During the first two months named more or less rain usually falls. June, and particularly July and August, are for the most part very hot.

PERCY McELRATH.

Commercial Agent.

Turin, June 30, 1893.

MALTA.

Poultry is, in no sense, an industry in these islands. Very many fowls are kept by private individuals and small farmers, but no special pride or care is taken in their breeding. Nearly every family throughout the islands keeps a few fowls. In the large towns they are kept in coops, or allowed to run about in the limited spaces of the terraces or flat stone roofs of the dwellings. Fowls are never seen in the fields or gardens, being raised and fed in the coops. The price of eggs is from 12 to 20 cents per dozen and the price of chickens, dressed, from 12 to 16 cents.

Information kindly supplied by the acting chief secretary of the government goes to show that the Malta fowl is not a large bird, but is a good layer. The feathers are either jet black, white, spotted, or gray. It is crested, has an upright comb, but no feathers on legs.

The only fancy fowls bred are Bantams, Dorkings, and a variety of Cattaro. All fowls, including turkeys, peacocks, ducks, geese, and Guinea, Barbary, and Odessa fowls, are kept both for their eggs and flesh.

JOHN WORTHINGTON,

Consul.

Malta, October 10, 1893.

[To be Continued.]

Transfer.

TO THE AMERICAN FANCIER:

I have this day sold my entire stock of Black Rose Comb Bantams, which includes all my prize birds at Camden, Philadelphia and New York, to Mr. Emil Garnjost, Yonkers, N. Y., and would recommend him to parties wanting Bantams.

W. J. ANDRUS.

Hackensack, N. J., Jan. 8, '94.

one or the other of her chosen borders. The stylish little body rarely carries a correct spread, and scientific mating constantly struggles to unite the two properties which nature usually parts.

Between the plan of confiding entirely to the seller for the first purchase, and that of stating the exact points wanted by the buyer, there is less difference than appears on the surface. Every Fantail fancier finds his strain always swaying towards broad tails, or shaking style. His flexible material is never quite still. When an epistle comes putting the burden of selection upon the specialist himself, he naturally sends Fantails strong in points most common among his lot at that time. The novice thus gets a good grip upon the most permanent properties of another strain, and can add others by careful culture. "Only old blood will tell," must be kept clearly in mind. Likely looking accidentals picked from a crowd of inferior companions are utterly unreliable. Barring away cases of prepotency, each fine looking exception to its humble family will breed young closely patterned after those despised relations. To ensure permanent success, good visible points must be backed by an invisible pedigree equally good. This "pedigree" question has been roughly handled in the past, and covered with ridicule by careless carpers. Still, a descriptive pedigree, recording the exact points which have been bred in line, is a safe guide to steady progress. Certainly no competent strain-builder fails to keep a private register reciting the salient features of each individual Fantail in his reserve. Reference to his word pictures will explain just why that split feather keeps cropping out, or what ancestor is probably responsible for the sudden coming of an extra heavy count. Grand Fantails are seldom bred by men who work in the dark. By slightly twisting an old saying, one may assert that "their note-book often reveals the hidden reason with pitiless candor."

Thus far the question of price has been ignored, but well-bred stock Fantails can seldom be flooded with Fantails unknown in ancestry, and uncertain in breeding ability. Money is about thrown away when invested in these ill-bred mongrels. From \$10 prices mount up to \$50 or \$75 per pair in America, and across the water a few picked specimens are said to have sold at \$100 each. If the novice feels able to pay more than \$10 per pair, the extra expense will profit him in the end. Judiciously placed, every added dollar should stand for an adequate amount of points and pedigree. Neither extravagance, nor stinginess ought to govern the first purchase. Make the pigeons fit your purse, and remember the adage, "Well begun is half done."

(To be Continued.)

Transfer of Stock.

TO THE AMERICAN FANCIER:

From loft of J. H. Kuhn, Louisville, Ky., to Edwin Loker, Frasier Park, St. Louis, 1 pair Blondinettes, cock 1st, N. Y. 92; 1 pair Owls, cock 1st, N. Y., 92

I have disposed of my entire stock of Oriental Frills to Mr. H. L. Hayden, Plymouth, Mass. HENRY E. OWEN.

No. 40 West 56th street, New York, Jan. 8th, 1894.

From J. H. Kuhn, Louisville, Ky., Priest and Shelled Trumpeters in all colors, to H. T. Klusmeyer, Jr., Easton, Pa.

From F. A. Roumell, of Baltimore, Md., to same, entire stud of Shelled Trumpeters in black, red, yellow, silver and checkers.

From Oscar Seifert, of Newark, N. J., to same, 1st prize cock, Yellow Shelled Trumpeter, and 1st hen, Yellow Shelled; also 1st cock and hen Homing Pigeons, at Baltimore show.

From W. Moore, to same, entire stud of Short Faced Tumblers in all colors; also entire stud of Jacobins in all colors.

From H. Tiemann, Baltimore, Md., 1 pair Black Magpies, 1 pair B. Mottled Russian Trumpeters, 3 pair Swallows, 1 pair Jacobins.

From H. T. Klusmeyer, Jr., to H. Tiemann, Baltimore, Md., entire stud of Pouters in all colors.

H. T. KLUSMEYER, JR.
Easton, Pa., Jan. 3, '94.

Human Pouters.

TO THE AMERICAN FANCIER:

This is no new breed, as many might imagine by the heading, but a breed that has always been and it seems to me always will be. It seems a pity a man cannot write on some subject without blowing his horn. If these writers wish to give the public some of their experience in breeding and showing fowls and pigeons, I give them credit for it, but when you read their article and begin to think the matter over, it looks very much like an account of a coming show in the newspaper marked at the bottom of it, ad. If some of these writers had been breeders of the Pouter (pigeon), I could readily have forgiven them, but, so far, they are not. Being a novice in writing, I do not wish to rain a hornet's nest of wrath, so for the present, seek the shelter of a *nom de plume*.

AJOSE.

600 Dollars Worth of Pigeons Sold.

Enclosed find check in payment for one quarter of a year's advertising. I have disposed of near six hundred (600) dollars worth of birds since the World's Fair, so you see I have been right "in it," and have plenty of inquiries.

I have transferred to Mr. J. C. Norris, of Concord, N. H., 4 pairs Blue Laced Blondinettes, 4 pairs Satinettes, and 1 pair Black Laced Blondinettes, all A-No. 1 birds. R. S. GROVES.

Philadelphia, Pa., Jan. 6, '94.

Pouter Lost.

TO THE AMERICAN FANCIER:

Would you kindly inform the readers of your paper that I have lost a red pointer hen at the Baltimore show? Most likely the bird was placed in some other exhibitor's coop as I did not receive her.

If any of the exhibitors of the Baltimore show are in receipt of the above pigeon I would be very much obliged if he would return the same to me.

The band number of the pigeon is 29. I am very sorry that such a mistake should occur, as I am a young fancier. Such a mistake is enough to discourage me about going to other shows.

CHR. WAGNER.

No. 116 Willis ave., west, Detroit, Mich.

Pigeon Flying.

Notice to Subscribers.

Our subscribers are informed that we have arranged that all inquiries relating to the breeding, training and management of homing pigeons, and upon all questions bearing upon the history of pigeon flying, both at home and abroad, will be answered by "Fritz" through his columns in THE AMERICAN FANCIER weekly, and at the earliest possible opportunity, and should be addressed to

MR. T. FRED. GOLDMAN,

832 Herkimer Street,

Brooklyn, N. Y.

[All matter that he deems of general and practical interest, or of value to the young and inexperienced fancier, will be embodied in his weekly notes, while other matter will be sent direct by mail. —ED. A. F.]

Points in the Flying Fancy.

A Weekly Review of Events in the Homing World.

BY FRITZ.

Whenever I have had occasion to refer to that most contemptible of thieves, the *Homing Pigeon thief*, and his nefarious practice, I invariably denounce him in the strongest language at my command, for none but a thorough fancier of our game pets can realize the amount of serious damage done to an active flying loft by such robbery, nor the serious set-back and disarrangement which invariably follows them, even when some of the stolen birds return. Some lofts rarely

recover from such misfortune, and the labor and study of years can be ruthlessly wiped out in a single night by these vampires.

It seems to me that, heretofore, far more attention has been paid to the actual perpetrations of such robberies in bringing them to justice, than to the mediums whereby the proceeds become converted into cash—a very great mistake. The old adage that "the receiver is as bad as the thief" would seem to be forgotten, and for this reason I touched upon the important point in recent notes, whereby it devolved upon all flying fanciers to *caution the local dealers* and other likely sources visited by the contemptible thieves to dispose of their ill-gotten gains, against making such purchases in the absence of satisfactory explanation of ownership and sale.

* * *

It is particularly gratifying to me, therefore, to learn that our friends in Philadelphia are taking active steps towards the suppression of these robberies and striking in the right direction.

At the hearing before Magistrate Eisenbrow recently, Albion R. Stain, bird dealer of 229 Callowhill street, was held under five hundred dollars bail for his appearance at court, to answer the charge of buying the pigeons stolen from the loft of Arthur McGinn. An additional count in the indictment charges Stain with the *detention of marked Homers*, which is a misdemeanor under the law.

It appears that as soon as the robbery was committed, the defendant was one of a number of bird dealers who were furnished with a full description of the birds, many of which bore the owner's name and address on the flight feathers, and requested to place any one who offered them for sale under arrest.

In spite of the warning, Private Detective C. H. Jones (Federation race secretary), who had the case in charge, found the birds in the defendant's possession, and under the advice of the owner, at once had him arrested on the charges named.

Counsel for the defense claimed there was no case, as the defendant had not been notified personally, but the magistrate held that Stain was *undoubtedly answerable for the acts of the man in charge of his establishment*. This is highly important. In alluding to the increase in the number of pigeon-loft robberies, a prominent official of the National Organization of American Homing Pigeon Fanciers stated yesterday that his body intended "to take a hand in such cases in future, and by the employment of detective C. H. Jones, discover the thieves and not let up on them until brought to justice. In the present instance Pigeon dealer Stain has only himself to blame for his predicament, as had the slightest precaution been exercised in the purchase, the fact would have been disclosed that many of the birds were marked in both wing and leg."

Good, and I hope the flying sections outside of the Quaker City will be equally watchful and energetic in going for the rascals. If they do, these thefts will soon cease, as they won't warrant the risk.

* * *

I am pleased to chronicle the establishment of the Hamilton Homing Club, of Philadelphia, an organization of well-known Homing pigeon fanciers, mostly resident in West Philadelphia, with Arthur M. Wood as president; James A. Storell, vice-president; Perry E. Clarke, secretary and treasurer; race committee, John G. Hunt, J. H. Milligan and W. S. Torkington, Jr.—certainly a good combination. The following well-known flying fanciers are also identified with the new club: John D. Munro, Mark Smith, A. B. Shull, S. Brook Thomas, George Connell, C. R. Torkington, Howard Avil and possibly H. B. Stites, should that gentleman receive the birds that were stolen from him recently, several of which returned, but in miserable condition. In making comment upon this new club of pigeon flyers, the *Item*, of January 4th, remarks:

"As an indication of the way the wind is blowing, it may be stated that the Hamilton Homing Club, which was organized a few days ago in West Philadelphia, is composed of fanciers prominent in the councils of both League and

Federation, and the alliance thus formed is a sure indication of a speedy settlement of the difficulties which have kept the membership of these two prominent pigeon flying organizations apart for the past two years."

I hail with pleasure this new combination, and wish the club an enjoyable and successful flying season during 1894.

* * *

I am also very pleased to learn that our old friend, A. C. Butts (of Albright fame) has, together with Mr. A. C. Saunders, Mr. Chas. W. Clark and others, just organized the No. 1 Fulton County Pigeon Flying Club, of Gloversville, N. Y., and will fly under the rules and for the honors of the national organization during 1894. This club will surely grow.

From various points I am in receipt of advices conveying the pleasing intelligence of the formation of various new clubs for the 1894 season, and perhaps one of the most pleasing to me was a communication from our old friend, Mr. H. V. Lansdale, of Washington, D. C., who writes me that they have recently organized the South Washington Homing Club, with H. V. Lansdale, president; R. B. Youngs, race and recording secretary; treasurer, Geo. W. Phillips; and Messrs. Wm. Reagan and D. Tabler as members also.

The club will fly under the rules and for the honors of the national organization, and with such excellent fanciers in the management, cannot fail to be a success.

I feel sure that the excellent material which constitutes the makeup of the other large and influential associations of pigeon flyers in Washington, whom I recorded in recent notes as determined to fly under their own independent rules and management for the year, will yet be induced to enroll themselves as members in the national organization, and all fly in equitable competition for its honors, as it should be.

* * *

A correspondent from the far west, writes me as follows: "Our fanciers read your weekly notes in the AMERICAN FANCIER with great interest, and we have gathered much valuable knowledge from them. A short time ago you mentioned that the celebrated loft of Monsieur Offermans was to be sold, and included the celebrated *Eleven flighted strain* of birds, which is a puzzler to us, and beg an explanation from you at your convenience as to what you mean by *Eleven flighted strain*," etc. It was my intention to write the correspondent by mail, as I frequently do in replying to scores of queries which reach me, but which I deem of but personal interest to the parties submitting the queries; but it occurred to me that there possibly may be many in the fancy to whom the term *Eleven flighted strain*, is equally unintelligible, as used by me in my notes about the celebrated fancier of Antwerp, Belgium, and for this reason make the explanation a public one.

* * *

The strain of the Eleven flighted of M. Gustave Offerman, originated from M. Ulen's strain of birds.

From a red cock and blue chequered hen of M. Ulen's, Offerman got the dam of his celebrated Eleven flighted strain. She had *eleven distinct primal flight feathers*.

Two blue chequered hens from this pair did considerable flying work, and winning many prizes for him.

Out of one of these young hens, paired to a dark chequered cock, which being a late batch M. Offerman had subsequently sent to his father, who was in America, and which had been a time in the loft of Wm. Verrinder, Jr., he found that that pair gave him superb youngsters which never missed gaining a prize, so he wrote to his father here, to send him that cock back, which he did. Out of a young hen from this pair, mated to a Mealy cock of M. Ulen's strain, he bred his celebrated *Eleven flighted* hen, which flew three 250 miles races when only 4 months old.

She flew when a year old, two 150 mile races, and one 400 miles race. Always with great success. She was mated to a blue chequered cock, which won the 10th prize of honor from Tours, (390 miles) 890 birds competing, and when only 3 months old. This cock I have in my loft

now, having received him from abroad some years ago, and he is the sire of many grand birds I have flown 100 to 500 miles. From this pair of birds M. Offerman bred every year stock which was always between the six first birds home, in races of 250 to 300 miles, and always 1000 to 1500 birds competing.

Apropos of this popular-fancier and the sale of his birds, I learn from recent articles, that it was his intention to move from his present residence after January 1, and wished to dispose of all of his crack birds, intending to start afresh early in 1895, business interests demanding his sole attention during 1894.

But he could not realize the high price demanded by him for his choicest specimens, and sold but 21 out of his stock of 52. He therefore retains his best for future breeding and work, but it is questionable whether he continues active during this year. There are many like him in this respect, but he will bob up serenely by-and-by, just like many others in this respect.

I have been fairly besieged with letters of inquiry, during the past week, from members of the league and others, upon the questions of seamless bands for 1894 youngsters, and the prospect of unity between the League and Federation. It is needless for me here to dwell at any length upon the subject, for the columns of the present issue of the AMERICAN FANCIER supply all the necessary information.

I will remark, however, that although I can scarcely claim to be fully and completely satisfied with the situation, still I personally accept the ultimatum, because of the impetus given towards a certain and glorious unity of the entire fraternity in the near future.

A unity that must necessarily result in equitable and correct pigeon flying, as laid down in the constitution and by-laws and rules of the League of American Homing Club, and a conducting of the sport on correct lines.

This individual pigeon flying on different dates and under different flying conditions, and the picayune competition that has characterized much of the American sport, will surely fade out of sight, and national honors, will in the near future, be placed where they belong. The laurel wreath which has adorned the diplomas of the past, will unquestionably, attain a higher distinction and deeper significance in the eyes of American flying men, and be valued for itself alone, and the honor it implies, and not for the notoriety it may bring to the winner as a valuable medium for the sale of stock, legitimate though it be, for it will at least possess the virtue now, of having been bravely and equitably gained.

I now call upon all American flying fanciers, to bury all the issues of the past, and to remind those admirers of the League principles that their united membership and presence in the National organization—call it by what name you please—cannot but make itself felt, and become important factors in its future councils.

Remarkable Flying.

On December 28th, Mr. E. W. Birkby, of Leesburg, Va., made the following remarkable fly from the city of Baltimore, Md., under the auspices of the Pigeon show, then in progress at that point. Distance air line 53 miles; time of liberation, 1:03 P. M.; time of arrival 2 P. M., making 53 miles in 57 minutes, or an average speed of 1636.50 yards per minute.

The bird making this fly was a grand Blue Checker cock, bred by Mr. Birkby, its only previous training being from Washington, D. C., which is south-east from Leesburg, while Baltimore is north-east making the fly all the more creditable.

The prize offered by the Pigeon show was \$10, which was won by this youngster, with nearly 1000 yards per minute.

Leesburg, Va.

An Open Letter.

To the Members of the League of American Homing Clubs:

I was entrusted with the proxy vote of the entire League membership in the recent conference between the representatives of League and Federation in Philadelphia towards amalgamation, and as I informed you at its termination did not feel warranted in enrolling you as members of the proposed National organization upon the lines laid down by the Federation committee and representatives at that time. Subsequent negotiation between the adherents of the proposed consolidation (knowing that the great majority of American flying men favored the unity) has, I am very pleased to say, not only rendered the question as possible of solution—but now an assured fact.

In this issue of THE AMERICAN FANCIER is submitted a copy of the rules, etc., which will govern the work during 1894. The rules which are now being remodelled to suit the changes made in the general rules will be published shortly.

The basis upon which an agreement has been reached is found in the concession of the following three points by the Federation representatives:

First—An increase in the Executive Committee to make room for seven representative League men—who will be appointed.

Second—The arrangement of sectional flying so as to prevent the disruption of any club at present established.

Third—The encouragement of sectional flying in competition for distinct hours by the adoption of a rule calling for a meeting of secretaries about three months after the annual meeting to arrange a date for the season's flying from the various distances for old and young birds, with proviso as follows:

If twenty or more fanciers in a district do not want to fly their birds on the dates named by the district meeting, such fanciers in the district shall have the opinion of naming other dates upon which to fly their birds for first-class record.

Any district shall have the power to name two dates provided Sunday has been named and fanciers in the district have objection to flying their birds on that day.

The provision for the naming of two sets of dates is made for the protection of sections in which the fanciers are few in number and a small number are opposed to Sunday flying.

The incorporation of these rules in the by-laws should remove all points of difference between Federation and League.

While individual flying will be allowed the awards for speedy returns which flights will be so insignificant in comparison with those made in sectional competition that it is difficult to imagine a fancier who has the opportunity to fly in competition neglecting the same in order to try his hand alone.

The first-class diplomas go to sectional competition only, and each independently. Now with regard to the title or name of the National organization.

The joint committee had no power to amend the name of the organization, but the committee from the Federation on amending the rules pledged themselves as a committee to recommend to the Executive Committee that the name be so changed that the rules as amended, and the name of the organization be the same as was fully reported by both organizations at the conference—"The National Union of American Homing Pigeon Fanciers," or "The League and Federation of American Homing Pigeon Fanciers," or some such title.

The recent annual meetings of both League and Federation being now passed the name of either cannot now be changed until due notice and at the next annual meetings.

This at first seems to me a serious obstacle and stumbling block towards the successful carrying out of the consolidation. But I am pledged by the Federation President, Treasurer, Secretary and Rec. Secretary, that the change in name will be made at the first meeting that is qualified to make the change.

This seems to be the shortest end to a successful termination of this vexed ques-

tion. There is no backing down on the one side, nor advantage taken upon the other, but only a fair and manly settlement without any friction.

All that I have corresponded with are for consolidation in a kind and fraternal spirit, and that is the feeling of the great majority. Those that are opposed to such means are but an insignificant few, and will be swept aside with indifference.

All that remains now is to forward to Mr. C. H. Jones, Rec. Secretary, to So. Broad street, Philadelphia, Pa., your dues for 1894, one dollar per member, and follow your by-laws. You can also at once order from Mr. Jones the official seamless band for 1894 young birds; money for same to accompany order.

As you are aware the League has duly elected a board of officers for 1894, who will at the earliest possible moment render to its members an official statement and such diplomas due the various sections.

At present this cannot be done owing to the books, stationery, diplomas and necessary detail being still incompetent, and a portion still in the possession of the late Secretary Bowerman, and which from a recent letter to me is claimed as inaccessible, being stowed with his household furniture and effects in Newark, N. J., and through business reverses likely to remain so for a while, himself and family now residing in the East.

There will be no dues collected by the League for 1894, nor any seamless band issued.

In case the unity of Federation and League into one National organization proves successful and satisfactory to all concerned during this 1894 season, then during December, 1894, both organizations will be replaced by the one new National Association of Fanciers.

In case, however, things don't work smoothly during this year on the lines now drawn up, then the friends and supporters of the League of American Homing Clubs can assemble in convention and reorganize for 1895, and aided by the experience of the past three years.

The same equally applies to the followers of the Federation but I anticipate no such serious division in case the points conceded by the Federation are seriously and fully lived up to.

I have nothing further to add beyond to thank you all for the kind and respectful consideration you have always extended to whatever I have advanced for the interests of the sport, and for your proxy vote entrusted to me in the recent conference.

I now leave it with you to enroll yourselves as members of the National organization for 1894, and recommend such membership and seamless bands to you, feeling assured that the gentlemen of the Federation of American Homing Pigeon Fanciers with whom I have been in conference will conscientiously and to the letter carry out all that has been agreed upon between us and for the good of the sport.

If there exists any point upon which you desire information I shall be pleased to explain.

Respectfully and fraternally,
T. FRED GOLDMAN.

832 Herkimer st., Brooklyn, N. Y.

The New Constitution and Rules of the National Association for 1894.

ARTICLE 1. *The object of the Association*—The breeding, training, and flying of Homing pigeons, that the greatest degree of intelligence, speed, and endurance may be developed in the birds.

And that through association intercourse, and fraternity the best methods of breeding, training and shipping birds may be imparted.

Bringing the fanciers of Homing pigeons into a closer fellowship, and instructing the new beginner in the fancy as to the best methods of organizing clubs, procuring reliable strains of birds, and such other information as shall promote the sport and save the novice much loss and vexation.

And through a few plain rules so legislate for both veteran and novice that the sport may be popularized and placed along the front line of American sports.

ARTICLE 2. The affairs of the organization shall be administered by an executive committee consisting of the following officers: president, two vice-presidents, a secretary and treasurer, and race secretary, and nine other members, to be elected at the annual meeting, and whose term of office shall be for one year, or until their successors are elected. The manner of electing these officers shall be as follows: On the second Thursday of December of each year, after the business of collecting dues, the meeting shall immediately proceed to the nomination of officers for the ensuing year, and on the nominations being closed shall proceed to vote for president, two vice-presidents, secretary, treasurer, and race secretary, and nine members of the executive committee, and the persons receiving the highest number of votes for the several offices shall be declared elected for one year, or until their successors are elected.

No person shall be eligible to vote whose dues have not been paid for the ensuing year.

Votes may be recorded by proxy provided the names of the officers to be voted for are plainly written upon the face of the proxy, by the sender of the proxy.

ARTICLE 3. The president shall preside at all meetings and exercise the usual functions of the presiding officer of a deliberative body. In the absence of the president, or his inability to act, the first vice-president shall preside, and in his absence the second vice-president shall preside. The secretary shall conduct the general correspondence of the organization and have the custody of the same; shall keep the minutes of the meetings, and have charge of all matters, books, papers, etc., pertaining to this office; shall keep a correct list of members, and date of their election. The treasurer shall be the custodian of the funds belonging to the organization, and shall pay all the bills and expenses when approved by the executive committee; shall notify members when dues are to be paid, and shall receipt for the same when paid. Shall have books, papers and accounts always open for the inspection of the executive committee or any of its members.

ARTICLE 4. It shall be the duty of the race secretary to have all birds flying for record properly countermarked, to select reliable persons to liberate birds, to receive returns of the same, to make record of the distance flown, rate of speed made, etc., the same to be entered in a book kept for that purpose only, and the same to be subject to the consideration and confirmation of the executive and race committees at meetings conjointly held for that purpose (as provided in Article 8). The race secretary shall receive three-quarters of all sums paid for annual dues for services rendered, and shall keep memoranda of, and be reimbursed for, all amounts paid for stationery, postage, telegrams, etc.

ARTICLE 5. The Federation of American Homing Pigeon Fanciers shall be divided in districts. Each district having full power to frame its own laws for self government, provided such laws do not conflict with the general laws and rules of the organization.

ARTICLE 6. *The formation of districts*—Whenever clubs are established outside of, and not near to a district, such clubs can make application to the race secretary for the formation of a district, giving the number of clubs, total number of members in each club, and such other information as shall give the race secretary a clear understanding of their situation.

Sec. 1. In all applications for the establishment of a district, as many clubs and as much territory should be embraced within the district as practicable, so that race rules from 8 to 11, inclusive, can be fully complied with.

Sec. 2. In regard to the size of a district, more regard should be paid to the number of fanciers within its limits than to its territorial dimensions.

Sec. 3. The race secretary, with the approval of the president, shall have power to establish districts but all applications for the establishment of a district must be made in writing, and all facts fully set forth.

Such application to be filed for future

reference. Should any dispute arise in regard to the formation of a district, such dispute shall be referred to the executive committee and their action shall be final.

Sec. 4. In the event of district lines being formed that shall shut out any member belonging to any club at present established, such member shall have full power to fly his birds in the district in which his club is located.

Sec. 5. On or before the second Monday in March of every year the race representatives of each district shall meet and prepare a race schedule for their district. And whenever there are twenty fanciers who do not want to fly their birds on the day set by the district meeting, such fanciers shall have the option of naming a day on which they will fly their birds for the district diplomas.

Any district shall have power to name two dates for flying their birds for diplomas, provided the district meeting has named Sunday as the day upon which the race is to be flown; so that those objecting to fly birds on Sunday shall have a day to fly their birds for diplomas.

Sec. 6. The race committee elected or appointed by a district shall, in conjunction with the race secretary, have full charge of and manage all races flown for records, and a full report of such races must be made to the national race secretary within twelve days from the day the race was flown or no record of the race will be made on the record book, or diplomas issued in the race.

Sec. 7. The charge of five cents per bird shall not be paid by the district to the race secretary for countermarking, providing that the countermarking, shipping and arranging with liberator is done by the race committee of the district. This applies only to districts that can not be controlled by the race secretary.

ARTICLE 7. *District Diplomas.*—There shall be a line of diplomas issued to each district for the best speed made in competitive flights from 100, 200, 300, 400 and 500 miles, old bird races. Old bird flights to close not later than Aug. 15.

Sec. 1. Also diplomas for best speed from 100, 200, 300, 400 and 500 mile flights for young birds. Such flights for record to close prior to November 1st.

ARTICLE 8. The race committee shall conjointly with the race secretary receive, mark, and ship birds to be flown for record, and shall give instructions to liberators as to time and method of liberating, and such other instructions as will insure prompt, safe, and careful liberation, but in no case shall birds be shipped until a fee of five cents per bird and the express and liberator's charges are paid, the race representative under whose direction the birds are shipped being responsible for the prompt payment of these charges. Provided that so much of the rule relating to the duties of the race secretary shall not be binding upon the members of a district where provision is made for a local race representative.

ARTICLE 9. The executive committee shall have full power to determine all questions in regard to a fair interpretation of the By-laws and Rules of the organization, and conjointly with the race secretary and race committee shall correctly determine all distances flown, speed made, such being final, unless a written appeal be made at the annual meeting. Five members of the executive committee shall constitute a quorum.

ARTICLE 10. The Executive Committee shall investigate any written report of a member being guilty of dishonorable conduct or fraud, and if it recommends a vote to be taken at the next meeting, the member so offending shall be deprived of the benefits of membership in the organization if a majority of the black balls appear in the ballot.

ARTICLE 11. Any homing pigeon fancier in America in good standing shall be eligible as a member of the organization, provided his application be signed by at least one member of the organization.

ARTICLE 12. Any homing pigeon fancier desiring to become a member of the organization may do so by sending his name and address with one dollar to the secretary, together with the endorsement or signature of a member in good standing. This payment to entitle him to all the privileges of membership from the

date of payment to the time of holding the next annual meeting. Any one desiring to have birds entered upon the register of the organization, or to enter birds for competition, or for record for journeys under organization, or to enter birds for competition, or for record for journeys under organization management must first become a member of the organization.

ARTICLE 13. Each member shall pay to the Secretary in advance \$1.00 per annum as dues; the year to date from the annual meeting of the year. At this meeting no member is to be allowed to vote until his dues for the ensuing year are paid. Any member three months in arrears, after being notified, shall be dropped from the roll.

ARTICLE 14. The regular meeting of the organization shall be held on the second Thursday of December of each year and notice given by the Secretary to each member, and be it known as the annual meeting. At this the officers for the ensuing year shall be elected, the reports of the officers and committees be made, and any business transacted.

ARTICLE 15. Four members of the organization, if it shall include either the president, a vice-president, treasurer, and one other member of the executive committee, shall constitute a quorum at any meeting regularly announced and held, such meeting to be subject to the call conjointly of the president and secretary.

ARTICLE 16. In the event of the organization being dissolved, which it cannot be without a majority vote of the entire membership in favor, the money in the treasury, and whatever may result from the sale of the effects, shall be equally divided among the members.

ARTICLE 17. These By-Laws may be altered or repealed at the annual meeting by a majority vote of the members of the organization, provided the proposed change or repeal be publicly announced in the official paper of the organization at least fifteen days from the date of issue to the date of proposed action and each member notified by the secretary. Thus giving him the opportunity to vote by mail or telegram.

At the annual meeting the order of business shall be as follows: Roll call, addresses and reports of retiring officers and committees, collection of dues, election of officers, unfinished business, new business, adjournment.

ARTICLE 18. A full set of diplomas will be given to the birds making the best speed from 200, 300, 400 and 500 miles during the old bird flying season in non-competitive flights.

ARTICLE 19. *Interstate National Blue Ribbon Diploma.*—There shall be issued annually a full set of Royal Blue National Diplomas to the birds making the best first and second speed from 100, 200, 300, 400, and 500 miles. The records to be made in competitive flights, and, as far as practicable, the 400 and 500 mile flights to be flown in interstate contests in which prizes may be given.

A special Blue Ribbon Diploma to be given to the bird making the best average speed in the 200, 300, 400, and 500 mile competitive races.

A special diploma shall be issued to all birds breaking previous records. Royal Blue Ribbon National diplomas shall be issued for young bird flights from 100, 200, 300, 400, and 500 miles.

In flying birds for Blue Ribbon diplomas, all entries must be plainly marked, *Contest for National Blue Ribbon Diploma.* No fancier can fly his birds more than once from any station in contests for national diplomas. No diplomas can be awarded unless the entry is so marked and forwarded to the race secretary on the day preceding the shipping of the birds.

Race rules will be published later after remodelling to agree with the changes made in By-laws, etc.

Westfield Homing Club.

To THE AMERICAN FANCIER:

At the first meeting of the year 1894 the following officers were elected: Pres., E. B. Woodruff; Vice-Pres., Wm. H. Winter; Treas., Frederick Brunner; Sec'y, George W. Peek, Jr.

The club, I am happy to say, presents a very favorable and flourishing condition, as this is only the second year of its existence. We have laid out a course up to 400 miles, and expect to put 250 birds in training as soon as the weather settles. GEO. W. PEEK, JR., Sec'y. Westfield, N. J., Jan. 6, 1894.

Miscellaneous.

Ringlets Scored.

TO THE AMERICAN FANCIER:

I read "Ringlets" on corn in one of your recent issues. It will be a surprise to some to know that all that is required to rear show birds is to give them *no* care, and feed only corn. Of all things I ever saw in a poultry paper that article takes the cake. It's a stunner and I don't know just what he means. Does he want us to understand that choice fowls can clean their own coops, keep their water pure and fresh and dishes clean? Keep themselves free from lice? Cure their own diseases, and grow into fine show birds from chicks, fed on corn *only*? If he can do this he is a dandy. I can't, and I don't believe any one else can. I have seen birds in the show room and in breeder's yards, that I thought had tried the above method, but I didn't want to try it myself. I don't believe that "Ringlets" wants poultry breeders to try the above method; still just what he does mean I am at a loss to know. Corn in its place is all right, but to feed *all* corn is way off. I have bred Brahmas, Cochins and Rocks for about 12 years, and am a heavy feeder of corn in fall, winter and spring, but I watch my birds closely and as soon as any of them get fat, no more corn is fed until fat is worked off. Corn is a bad thing to feed old birds of the Asiatic and American breeds in any quantity; it will ruin them if fed largely. Try it and see. What is a beginner going to do when one man tells him corn is *the* thing to feed his birds, and some one else tells him it won't do at all, and it will ruin his birds if he does? I am not telling what *others* say or what I have read, I am giving *only* my own experience and I have reared birds that won in some of the largest shows in the United States. A breeder and judge once told me he never saw a man that could put birds in a fall fair in as *good* condition as I could. My whole aim has been *condition*; without it *no* birds can win. I give them good care every day in the year, am a heavy feeder of a *variety*. I feed a good deal of soft feed, wet up with milk when possible. Middlings are a great thing with me; it is the *best* of feed on earth to grow chicks. I mix bran and some ground corn and oats with it. As a whole feed wheat is the best thing, then corn next. Understand me, I feed lots of good sound corn to young birds, but to old ones I use it very carefully. If fed too much it will make them fat and good for nothing. I mean here birds after they are *full* grown; you can ruin pullets by getting them too fat as well as hens. Male birds will stand more corn than females without injury. My experience tells me as plain as the nose on your face, that extra *good care all the time*, good feed of a *variety* and good blood tells the whole story. The *best* of blood with poor care *never* will do anything. Am I wrong? After 12 years of hard work; will poor care and nothing fed but corn bring the best of show birds? What say you fanciers? Let us hear from you. This is an interesting subject.

F. M. BRONSON.

Vermontville, Mich., Dec. 12th, '93.

BEATS THEM ALL.

Your paper brings more inquiries than any paper I have ever advertised in. It improves with each issue. Long may it live.

Remainder are Homers, bred from Fred. Bowers and Blue Line lofts; smooth head and point crested Light Bronze Archangels, Pouterloft and imported strains; English Boated, high-flying Tumblers, etc. First check for \$75 takes the lot. The prize-winners alone are worth double this amount. All good birds, and many imported. Closing out. 2120
KARL BJURMAN, Box 136, Wilmette, Ill.

A RARE CHANCE to buy Orientals of the finest strain; Laced Blondinettes, Barred Blondinettes, Satinettes, Silverettes and Bluettes. Having bought out the entire loft of Dr. Henry E. Owner, of New York, which was considered one of the largest and finest lofts in this country; these added to my own collection, which are also of the best obtainable, I have, without doubt, one of the finest collections in the world. These are grand in both head and facing, so eagerly sought for, without any Owl or Turbit blood being infused for many years. I will sell 40 pairs of fine specimens and guarantee them as represented, or money refunded. A special low price to anyone taking the lot. *4220
H. L. HAYDEN, Plymouth, Mass.

HOWARD MEHRING, Littlestown, Pa.—For sale, 2 pairs Red Pied, 2 pairs White Pouters, 1 pair Ice Pigeons, \$5 a pair; 1 pair Black Nuns, \$2; also Eng. Carriers, Fantails, Turbits and Homers. Stamp for reply. *4219

FIVE PAIRS of Birmingham Rollers, bred from Red and Black Saddles and Badges; all good flyers and nice performers, and fairly well marked. Will be sold very low if taken in a lot. CHARLES LIENHARD, 438 W. Court St., Cincinnati, O. *4219

HIGH-CLASS FANCY PIGEONS for sale.—Closing out sale of Fans, Jacobins and Trum-peters, \$2 per pair. Also high-class Black Minorca fowls for sale, or will exchange Minorcas or the above varieties of pigeons for Pied Pouters. *4218
F. E. HOOKWAY, Wooster, Ohio.

HOMERS FOR SALE CHEAP.—Having more birds than I care to handle, I will dispose of about a dozen—all trained. Address WM. BOOK, JR., 130 Magazine St., Newark, N. J. 1317

HOMING PIGEONS.—Owing to my being overstocked, I will part with a few first-class birds at a ridiculous low figure; birds that have worked well, and flown by me in the Empire City Flying Club. Address ELI MORETON, 410 S. 10th Street, Newark, N. J. 4217

THE HOMERS I use as breeders are: Eight 582-milers, sixteen 451-milers, twenty-two 300 and 507-milers, all my own breeding and training. Youngsters and record birds for sale at all times. Descriptive circular describing my record breeders new ready for distribution. *4217
O. F. CONNELLY, Carlisle, Pa.

FOR SALE CHEAP.—A very fine lot of Boated Tumblers, in black, red, yellow, black mottles, blue and white solid color; also dealer in all other varieties of pigeons. M. SCHEIN, 610 S. Charles Street, Baltimore, Md. 1313

MORRIS PARK COLUMBARY.—Jacobins only. Having bred quite a number of fine birds the past season, I am compelled to sell some at a sacrifice to make room. These birds are bred from best imported and domestic stock and fit to show in any company. For particulars, address C. A. KOEHLER, 17 DeKalb Ave., Brooklyn, N. Y. *1312

WHITE PIGMY POUTERS. Homers. African Owls and close performing Tumblers. These birds are all solid white, sold for room only. J. GEO. NAGELE, 501 S. 20th St., Philadelphia, Pa. *1312

TURBITS.—Mr. GEORGE TURNER, Mich-nelchurch, Ross, Herefordshire, England, Turbit specialist, breeder of winners of Premier awards at all important English shows and at the largest American shows, has show and stock Turbits for sale. It is an acknowledged fact that several of the most successful English exhibitors owe their success to birds obtained from these lofts. Ex-president of the Turbit Club. tf6

FOR SALE.—About thirty White Fantail pigeons, surplus stock. I am compelled to close these birds out at once, therefore offer them very cheap. Prices from three to ten dollars per pair. *1310
W. P. HOWE, 121 N. Vine St., Nashville, Tenn.

FOR SALE.—Twelve pair White Fantails, at \$5 to \$10 per pair. They are from the best stock obtainable in America and England. tf9
P. F. HAGER, Nashville, Tenn.

HAVING been very successful in raising young this season, to make room I offer for sale a choice lot of Turbits and Owls, all colors, out of the best and most noted strains. Also Bald-head Tumblers, "Gaddey" strain. This is a rare chance to get first-class birds at a reasonable price. CHARLES SCHMENNER, 511 W. Bid-dle St. Baltimore Md. 1310

POUTERS.—All my birds for sale excepting several pairs. Everyone of them Geo. Ure strain. Only blacks, reds, yellows. A rare opportunity to buy good birds cheap. Better write quick. Have only thirty for sale. *2610
H. A. BUDDE, 113 Market St., St. Louis, Mo.

R. B. YOUNGS, 612 G St., S. W., Washington, D. C., breeder and flyer of the Fast Flying Virginia Strain of Homing Pigeons. Also breeder of Fancy White Pouters. Surplus stock for sale. tf1

THE KENNEL.

COLLIE DOGS.—Here I am, with the hand-somest golden sable Collies in the country, from registered stock. Dogs for sale at farm-ers' prices. Write for what you want. *4220
C. H. KENT, Windsor, N. Y.

FOR SALE.—A thoroughbred Fox Terrier. "Wordsley Patch," whelped August 25th, 1892, Gamey and a fine looker; sold for no fault. Pedigree and certificate of registry furnished. *4219
Address JESSE K. WEBSTER, Norwalk, O.

COLLIE PUPPIES for sale. Black and Tan, from imported stock. Price \$8 for dog puppies. tf12
C. R. TEARS, Walden, N. Y.

EXCHANGE.

FOR SALE OR EXCHANGE.—Beautiful St. Bernard dog, registered, 31 inches tall, weighs 160 lbs., two years old, perfect marked orange and white, dark shadings, very rough coated, magnificent head and wonderful expression; will sell cheap, or exchange for either first-class pneumatic tired Safety bicycle, Plymouth Rock pullets, Brown Leghorn pullets, sable and white registered Collie bitch, or best offers. Look Box 15, Hempstead, Queens Co., N. Y. 1220

WILL EXCHANGE one Perfect Hatcher Incubator, 364-egg capacity, upper, tank and boiler, everything complete and in order, for thoroughbred poultry or offers. H. B. NOTTINGHAM, 1120 E. Genesee St., Syracuse, N. Y. *4218

WILL EXCHANGE the following varieties, viz: Buff, White and Partridge Cochins, Black Langshans, Barred Plymouth Rocks, S. L. Wyandottes, S. C. Brown Leghorns and Toulouse geese, for offers. My stock are standard bred, and not raised in cities and towns in small lots, but have the run of a hundred acre lot. Send for testimonials. This will only appear twice.
2120 W. H. BRAY, New-Berne, N. C.

WILL EXCHANGE a genuine Rice, 10 gauge, double-barrel, breech-loading, hammerless, \$60 shot gun, weight 10½ pounds, for best offers in poultry. Gun taken on a debt, is nearly new and in perfect condition.
2118 W. M. GRANT, Johnstown, N. Y.

INCUBATORS.

600-EGG MONARCH INCUBATOR, for sale, or exchange for Light Brahmas or White Wyandottes; good as new. Reason for selling, have two more same size. A bargain to anyone wanting a good incubator. Address ORR'S MILLS POULTRY YARDS, Orr's Mills, N. Y. 4120

INCUBATOR FOR SALE.—An 1893 model, improved Excelsior 200-egg incubator; used one season only. I will guarantee that this machine hatched 93 per cent. fertile eggs. Price \$15, cost \$25. Must be sold quick.
3120 C. W. DAVIDSON, Cooperstown, N. Y.

HOG AND CHICKEN CHOLERA.

I HAVE A SURE, TRIED, PROVED AND guaranteed cure for Hog and Chicken Cholera, which has stood the test of six years in thousands of cases without a single failure. My father (the originator) is, and has been for forty years, one of the leading farmers and hog raisers of this county, and has lost a great many hogs and chickens with cholera, but has never lost a single one since the discovery of this remedy. One dollar will buy enough of the ingredients at any drug store to cure from 50 to 75 hogs. I will send the recipe and a family right for 50 cents, (the price is \$1.00). This is nothing, compared to its real value. Send now and use the remedy and you will never lose a hog or chicken with cholera. Send within 20 days, and will send you a book worth \$1.00, that should be in the hands of every farmer and poultryman in the land. References: My postmaster, express agent, or any business house or good citizen in this town. Agents wanted. Write for terms. Address

MRS. RACHEL V. THOMAS, Cowarts, Ala.

"Duke of Lancaster"

Game Bantam Yards.

"DUKE OF LANCASTER" was the finest Black Red Bantam male bred and shown last year; the mate scoring 97½ points. They were from my yards, and I have about 75 like him to sell—some as GOOD, some BETTER and ALL extra fine in standard characteristics. My stock is pedigreed from Thornton's imported "CHAMPION," (1890 and 1891), the greatest winner in ENGLAND and AMERICA ever shown. I claim this to be the grandest lot of Black Red Game Bantams ever reared by one breeder in one season. My RED PYLES are as good as my Black Reds. Write at once.

SPRATTS PATENT
POULTRY MEAL.

THE GREATEST EGG PRODUCING FOOD. For getting fowls into Exhibition form it has no equal. The best food for assisting fowls through the Moulting. The best and the cheapest Food. It is a staple food, not a condiment, spice or medicine. For rearing young chicks it has no equal, reducing mortality to a minimum. Try a sample bag or write for circular.

The Common Sense of Poultry Keeping, 10c. "CARDIAC," a tonic powder for poultry; excites a healthy action of the stomach, strengthens and invigorates the young chicks; 50c. per packet, or \$1 per 5 lb. bag. Granulated Prairie Meat "Crissel." Takes the place of Insect Life and Ants' Eggs. Bone Meal for Poultry and Chicks. Roup Paste, 50c. Tonic Condition Paste, 50c. Gape Cure for Chicks, 50c.

5211 SPRATTS PATENT, (America) LIMITED, 239 to 245 E. 56th St., New York, N. Y.

Poultry

Yards,

Doylestown, Pa.

WE Breed Twenty-nine varieties of Thoroughbred Fancy Poultry, best suited for pleasure and profit, headed by SHERWOODS, the best general purpose fowl ever introduced.

Stocks well mated and not akin. We ship birds or eggs.

Burpee's Manual of Thoroughbred Live Stock and Fancy Poultry tells all. We will cheerfully send a copy free to anyone interested.

Address always,

W. ATLEE BURPEE & CO.,

5211 475 North Fifth Street, Philadelphia, Pa.

THE THING.

My ENTIRE STOCK of DUCKWING GAME BANTAMS, consisting of One Cock, Seven Hens, and Twenty-five Young Birds of this year's breeding, for sale. A low price will be named for the lot.

The Reason of the Thing.

My other duties are so encroaching upon my time that I must reduce the stock I keep.

The Advantages of the Thing.

Are all with the buyer, for he can at once obtain a stock from which he will be able to select some remarkably fine birds, at a price which is way below the market quotations.

The Conditions of the Thing

Are that the lot be taken by the buyer and the order be received within a short time. If I sell the birds in small lots I shall expect much better prices than if they go in one lot. Cash with order. ORDER NOW.

BREEDER OF CHAMPION

African Owls,

Tail Turbits

and Jacobins.

Intending only to breed African Owls, in all colors, and Tail Turbits, I will offer for sale an exceptionally fine stud of Jacobins, comprising about 40 elegant birds, in reds, blacks and yellows. These birds are all bred Peer, Ward and Ewald stock, and are grand in hood, mail and chain, extra long and close feathers. Will sell in pairs at \$5 to \$20 per pair, or the lot at a low price. You will miss it if you don't secure a few pairs. Have also a few African Owls and Tail Turbits to spare. Pair of Black Tail Turbits, cock 1st and hen 2d at Louisville show, price \$15. Postals not answered; stamp for reply if convenient.

HARVEY SEED CO., BUFFALO, N. Y.

POUTERS EXCLUSIVELY.

I have made a specialty of the above for a great many years past; while I do not wish to indulge in pretentious claims, I hope I may be pardoned for feeling proud of the reputation gained by my large display at all the principal shows in this country for the last five years.

With a great deal of pleasure and satisfaction, I wish to inform my friends and patrons of my good success in raising Pouters during the last season; as a consequence, I am offering at prices abreast of the times, **ONE HUNDRED** splendid specimens of great individual merit, and bred in the purple. Old breeders know, and beginners soon learn, the necessity of breeding only from birds of the best established strains, if they aim at the production of the Pouter to its highest degree of perfection.

Believing that my reputation for honest dealings is so firmly established as to render further comments unnecessary, I will simply add that I shall, as in the past, willingly refund the money should the stock prove unsatisfactory, if returned within two weeks from time of shipping. This is considered the best guarantee of fair and square dealing.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price.....\$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price.....\$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price.....\$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. P. H. Jacobs, Henry Hale, James Rankin, J. H. Drevenstedt and others. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. A collection of the most valuable articles on poultry ever written. Cloth.....\$1.00
Paper......40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. An illustrated companion to the "Standard," by which the amateur can readily pick out the best birds in his flock for exhibition or breeding. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price.....\$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price......50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price......50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price......50

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price......50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price......25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Practical Pigeon Keeper.

Lewis Wright. A most excellent practical and valuable book. \$1.50

Hints to Beginners.

F. M. Gilbert. Illustrated. A most practical, timely, and comprehensive work. Indispensable to the amateur. Price, Paper......50
Cloth.....\$1.00

PET STOCK.

Birds and Bird Keeping in Cage and Aviary.

A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price......75

Show Calendar.

POULTRY.

From the Editor's Perch.

We received an interesting communi-
cation from H. P. Clarke, in which he
kindly explains the difference between
Campines and Hamburgs, and inti-
mates that if he had been present at the
A. P. A. meeting at Chicago, the "fool
enthusiast" who proposed the Campines
for admission to the Standard, would not
have had such an easy time of it. Mr.
Clarke would have Campines called Sin-
gle Combed Hamburgs.

His communication was intended for
publication in the AMERICAN FANCIER, but
we declined to publish it, for the simple
reason that it was an advertisement for
Mr. Clarke. The latter was to spend the
winter in Belgium and France and kind-
ly offered to purchase Campines and
other French and Belgium fowls for any
or all fanciers who would favor him with
their orders. We have no objection to
any writer who wishes to pitch into any
new breed, provided he does not use his
articles to advertise himself.

As to what Mr. Clarke would have done
had he been present at the A. P. A., is a
matter of little importance. The first
thing such a brilliant and learned writer
and fancier should do, is to join the A. P.
A. The latter is hardly capable of trans-
acting its business, or formulating a
standard without such help as Mr. Clarke
can give. That's the impression we get
when reading H. P. Clarke's communica-
tion.

We have received the information from
headquarters that a young "Ringlets"
has made his appearance at the home of
Edward B. Thompson. The happy father
claims that the youngster yells "blue
bars" already.

The great poultry show at Atlanta,
Ga., was a financial success, thanks to
the good management of its projectors.
The attendance was good, and several
thousand dollars worth of birds changed
hands.

Scott Maxwell, of Vancluse, S. C., was
most successful in disposing of exhibits,
and went home minus three-quarters of
his cock birds. The prices paid in most
instances were large.

A poultry, pigeon, dog and pet stock
show, of tremendous dimensions, will be
held in the fall of 1895, at Atlanta. It
will be held in connection with the great
Southern Cotton Exposition. Some five
million dollars will be subscribed by the
progressive and hustling citizens of At-
lanta, and it is safe to say that the entire
affair will be a success from inception.

One of the officials of the enterprise in-
formed us that, particular pains will be

taken to make the poultry, pigeon, and
dog exhibition the largest ever held. It
is proposed to offer cash prizes on cocks,
cockerels, hens and pullets, amounting to
25 to 50 dollars in each class. The com-
petition will be open to the world,

This will be an opportunity for the best
fanciers in the United States, Canada
and Europe, to come together and furnish
the exhibition with the choicest speci-
mens of the feathered tribe in existence.
As the show will be held in November,
there is no reason why birds should not
be shown in good condition.

Atlanta itself is an attraction. It is
the wonderful city of the great south, and
to-day offers unsurpassed inducements
in the way of hotel accommodations,
besides containing many points of his-
torical interest, beautiful drives, and a
delightful climate.

Macon, Ga., is another city that will
help the poultry industry of the south, to
judge by the remarks of some of its lead-
ing citizens and fanciers. A fine poultry
show is promised for next winter, with
liberal cash prizes.

The value of poultry shows to the south
is attested by the fact, that since the first
great exhibition at Charleston, the qual-
ity of the fowls exhibited has improved
to a remarkable degree, but what is more,
hundreds of new fanciers have sprung
up, and many southern planters are be-
coming interested in practical poultry
culture. We believe it is only a question
of a few years when the south will equal
if not surpass the north in raising fine
poultry.

The advantages of the climate are with
the southern breeder. The winters are
mild and early chickens are easily had.
Hens lay when eggs are high in price,
and it seems to us that the south should
be able to supply thousands of dozens of
fresh eggs to the large cities of the north,
when the hens in the latter section are
battling against blizzards and extreme
cold. There are thousands of acres of
magnificent land to be had in the south
that are well adapted for all kinds of
stock farming, and it is a mystery to us
why so few seekers after new fields should
ignore this section.

The exhibit of Black Langshans at At-
lanta, was the finest we ever saw, and it
is questionable if another such will be seen
in a long time in point of quality. There
was not a poor bird on exhibition. The
three winning cockerels were gems.

We might say the same of the Silver
Wyandottes. These were, with the ex-
ception of the grand class at Philadelphia
last year, the best lot ever shown. Wyand-
ottes are unusually popular in the
south.

Dr. S. T. Lea will probably enter the
second prize cockerel and first prize pul-
let, Langshans, at the New York show.

We understand that Dr. A. T. Beckett
sent a few Barred Plymouth Rocks to
Westchester, Pa., and waltzed off with a
blue ribbon or two. Now that the doctor
has started on Rocks it will do well to
keep an eye on him.

Colonel "Tom" Ware, of East Point,
Ga., the veteran Pit Game breeder thinks

seriously of going to the New York show
in 1895 with a big string of his famous
birds.

The Indian Game is becoming very
popular in the south, and to judge by the
fine exhibit at Atlanta of this breed,
northern breeders will have to look sharp
or they will not "be in it." We never
saw a healthier and stronger lot of Indian
Games than those shown at the show
above referred to.

We regret that P. H. Scudder, one of
the judges at the the Atlanta show, was
taken seriously ill on the first day and
unable to leave his bed. He will remain
in the south under the care of Dr. Tuggle
and hope he will recover his health com-
pletely.

The Poultry Association of Ontario.

To THE AMERICAN FANCIER:

I have sent you under separate cover
by this mail list of prize winners of the
Ontario Poultry show, held at New
Hamburg, Ontario, Canada, on January
1 to 6, 1894.

The following is a synopsis of the
proceedings of the meeting of the
association: C. F. Ernst, Hamburg,
president; Allen Bogue, London, first
vice-president; O. S. Oldrieve, Kingston,
second vice-president; directors, William
McNeil, London; Fred Goebel, Hamburg;
R. E. Kent, Kingston; D. C. Trew,
Lindsay; Thos. Rice, Whitby; M. T.
Burn, Tilsonburg; Wm. Barber, Toronto;
John Colson, Guelph; and John Cole,
Hamilton; Geo. G. McCormick, London,
treasurer; Thomas A. Browne, London,
secretary; H. B. Donovan, Thos. A.
Duff, Toronto, auditors; delegates
Industrial Exhibition, Toronto, Messrs.
J. Dilworth and William Barber.

A very interesting and instructive
meeting was held, at which quite a few
essays and addresses were given by
prominent members of the association.

About 80 members and 100 visitors
were present. The Hon. John Dryden,
Minister of Agriculture for this Province,
and Mr. J. L. Livingston, M. P., were
also present and addressed the meeting
at some length.

A banquet was given to the members
and their friends at the Royal hotel, at
which the honorable gentlemen before
mentioned were present; also Senator
Merner. The guests numbered nearly
one hundred. Speeches, songs, etc.,
were the order of the evening.

It was decided to hold the meeting
again at New Hamburg in 1895.

Yours very truly,

THOS. A. BROWNE, Sec'y.
London, Ont., Jan. 9th, 1894.

America's Leading Show.

To THE AMERICAN FANCIER:

Will you kindly say in your next issue
that the premium list of the New York
Poultry and Pigeon Association is now
ready, and all who have not received
same can do so by addressing the
secretary. H. V. CRAWFORD, Sec'y.
Montclair, N. J.

P. S.—Will you also kindly state that
I will not be an exhibitor in the open
classes for Jacobins. H. V. C.

Burned Out.

To THE AMERICAN FANCIER:

Mr. Rudolph Smidt, one of the largest
Capon breeders of our section, had the
misfortune to be burned out the 2d inst.,
losing over eight hundred Capons and
his entire building, 24 by 300 feet long,
making a loss to Mr. Smidt of some 1,500
dollars, and it was no doubt incendiary.
But Mr. Smidt, being one of those
untiring and enterprising poultrymen,
has decided to rebuild.

JNO. W. FLENNIKEN,
Sec. East Tenn. Poultry Ass'n.
Knoxville, Tenn., Jan. 8th, 1894.

Sternberg's Sallies.

Bright and Pithy Sayings
From the Great West.

BY THEODORE STERNBERG.

[Written For THE AMERICAN FANCIER.]

I see *Partridge Veteran* gently takes me to task for suggesting that the Partridge Cochin be given a separate Standard and a different shape than the Buff Cochin. The fact is I quit breeding Partridges because of this very lack of Cochin feathering. Our judges so generally having made color the chief point, it was quite impossible to win with good shape over anything with color. But more than anything else, I wished to bring out plainly this question of shape and of feather in Partridge and sound breeders on the subject. Get them to express themselves, and let's find out if Partridge breeders themselves wish their birds to be fuller feathered or not. The whole thing is in the hands of breeders. The breeders should form a club or come into our Cochin Club of America, which favors ample feather in all Cochins, and by making a stand for feather, judges will be compelled to come to the breeders.

One thing is certain, there can be no more magnificent show bird than a 13 pound broad chested, full feathered orange hackle and saddle, Partridge Cochin cock. The reference to the late lamented Mr. Crosby touched me. I too knew him, but only by letter. Mr. Crosby was one of the very first of the really prominent breeders of Cochins to write me and thank me for the stand I had taken for the full feathered Cochin. He wanted all the feathers which could be got and preferred to have his culls, culls, because of vulture hock than culls, because of too scanty feathers.

A friend writes me and asks me to criticise the address of Mr. Felch, before the Rhode Island society and published in THE AMERICAN FANCIER. Now there are some things in that address I agree with; for instance I firmly believe in the crossing of two kinds of thoroughbreds as being good business for the market poulterer, but these cross breeds should never be bred from. Then again as the editorial extract puts it, Mr. Felch is a genius, and we all know geniuses are not to be measured by the same rules other men are to be measured by. Mr. Felch has the genius of making statements of which he has no bottom knowledge whatever. He never bred full feathered Cochins. He cannot personally know whether they be less prolific in egg than scanty feathered ones. He has never made any personal experiments as to the effect of hock feather on egg production or on the grain of the meat, but being a genius, he assumes that to be true, which he does not know to be true, and which other men as good as Mr. Felch, know to be untrue, but these other men not being geniuses, their practical personal knowledge don't count.

Therefore Mr. Felch starts with an assertion, begs the whole question and by his genius stamps as a fact, that which is not a fact. When these little pleasantries of Mr. Felch are shown up, he claims to be personally attacked and his gushing friends answer for him that he is a genius, and is not to be called down while he is chiseling. Now this whole question of feather and its effect or non effect on the productive qualities of fowls, Mr. Felch and myself fully debated in the *Fanciers' Journal*, verdict against Felch, so far as this question is concerned. Mr. Felch has added nothing new to the subject in his Rhode Island address, he has simply reiterated what he said before and I answered him. Mr. Clemens of Ohio in a little side tilt with Mr. Felch, stated that his English Brahmas kept side by side with Felch Brahmas, out-laid the Felch. This is the statement of a fact, but Mr. Clemens not being a genius his fact don't stand a minute with the bare, naked assertion of one who never bred an English Brahma, nor does my statement of a simple truth, that my English Cochins lay vastly better than any Ameri-

can Cochin of the type Mr. Felch admires, I ever owned, go for anything when confronted by the bare assertion, the hearsay testimony of an acknowledged genius who chisels.

Mr. Felch has the genius of putting into his antagonist's mouth words he never used; of putting his opponent on ground he never occupied, and then laughing his aforesaid opponents to scorn and of tearing his substitutions into metaphorical fragments. Mr. Felch says: "My warfare is only against the extremists who are striving to make vulture hocks a feature." No one but a genius could make such a statement. No Cochin fancier is trying to do that. At no time even in the heat of the Cochin controversy did I occupy any such position, but on the contrary, time and again I repudiated it. This Mr. Felch knows, but being a genius he is not bound by anything but the imaginary facts of his own creation.

I once read of a man who testified that a horse was sixteen feet high. When asked if he did not mean sixteen hands high, he asked, "Did I say sixteen feet?" Upon being assured by the court that he did, he stoutly replied them, "be gorra, I'll stick to it." I have always thought that that man was a genius, for an ordinary man would have admitted his mistake. And then there was that famous lady who kept saying scissors, scissors, until the end. This whole Cochin business is amusing.

Mr. Felch, for some reason peculiar to himself has taken a certain position and he will stick to it to the end, meanwhile the Cochin fancy will go on as usual, and breed their beautiful full feathered birds and sell them also to those who admire beauty, unmindful of and in open contempt of Mr. Felch and his pet hobbies, and the future antiquarian, in looking up antique inscriptions on the walk of Cochin literature, will come to one of these chiselings of Mr. Felch, and upon submitting the hieroglyphic stone to the Tittlebat society for decipherment, the antiquarian world will be wild over the valuable discovery, until some plain practical man shall come along and point out that it is only another case of Bil Stamps, his mark.

In regard to Standard changes, the position of Mr. Felch is untenable. If a Standard is to be like the laws of the Medes and Persians unalterable, then the first Standard of the A. P. A. should be the unaltered Standard of to-day. For if the principle be correct, it was correct when the first Standard was adopted. Now Mr. Felch does not now, and never did, believe in his own rules he so solemnly enunciates. I have before me many of the annual reports of the meetings of the A. P. A. These reports are full of suggested changes in the Standard made by Mr. Felch, changes which were adopted and made Standard. No longer ago than the Charleston meeting, Mr. Felch as chairman of the committee on changes in the Standard, reported a large number of changes which were adopted and the laws of the Medes and Persians did not bother Mr. Felch at all. One is forced to the conviction, that all Mr. Felch means by a Standard like the laws of the Medes and Persians, unalterable is, except by Mr. Felch, he being a genius can safely chisel at it.

A Standard should not be easily or rashly altered, but as fast as it is discovered that it needs amending, it should be amended. New breeds should be admitted whenever proper. Now all that was done at Chicago was similar in character to former actions of the society on the recommendation of Mr. Felch. Of course Mr. Felch in this Rhode Island address had to run in an advertisement for his decimal card; he would have been a chump and not a genius if he had neglected his opportunity and I have yet to hear the charges made against Mr. Felch, that he ever was known even in the highest flights of his genius to neglect Felch.

Mr. Felch wishes to see every fancier a market poulterer and *vice versa*. Now

this is simply impossible. The great body of fanciers are those who have other avocations in life, who turn to the fancy for pleasure, for rest, for recreation, and to them beauty to the eye is the main thing for which they keep fowls. To such the rules suitable alone to the market poulterer are of no value.

It is from this great class of fanciers that the poultry press, that the whole fancy poultry interests as such, receive their entire support. These men have tastes and feeling, likes and dislikes, which no one but a genius would trample on. They have the right to follow their fancies for fancies' sake without insult, and they will not stand patiently for genius to chisel on them.

I had hoped that this whole subject which Mr. Felch and I have fully discussed before could rest. I am sorry Mr. Felch could not have made his address without stirring up the old embers, but he has seen fit to use that occasion to run in on the Rhode Islanders his old writings. He should have given them something new. He is capable of it. There is another thing. I ask the fancy this question—Do you note the tones of contempt towards all who do not agree with Mr. Felch running all through this Rhode Island address? I will give a chromo to anyone who will find a paragraph, a sentence, yes a word, in all of Mr. Felch's published writing, which treats with the slightest respect the views and opinions and experiences of any one who differs from Mr. Felch. I have on more than one occasion taken especial pains to speak highly of certain characteristics of Mr. Felch which I admire. In fact on one subject I feel very warmly towards him. His repeated attacks on the full feathered Cochins has called the attention of discerning minds towards them to that extent, that the full feathered beauties have paid the mortgage which was on my house. There may be those who can appreciate this, if so they will agree with me when I say that I always touch my hat to the Cochin with the crinoline.

And yet sometimes I do feel that a letter from one of the oldest and most respected judges of poultry in the land received this morning, states the truth when it says, "Felch has done much good to poultry, but he has done more harm."

I note that a son of the Sage of Natick, never heard of Silver Campines. There is possibly several things in this world the aforesaid son never heard of, but that don't do any harm to the Campines. They never heard of Felch & Son. If Felch read French, and subscribed to the *Mentor Agricole*, a large and well supported poultry paper published at Antwerp, Belgium, he would not have been so ignorant. Belgium is a country in Europe. It can be found on the map, so possibly it may be assumed that there is such a place, even if young Felch never saw it, or heard of it. Well, if young Felch had read the poultry literature of the European continent, he would have learned that the Silver Campine was a thoroughbred fowl, bred so before he was hatched and thoroughbred before the senior Felch broke the shell. That it has a written Standard. But I'll admit the one who only reads Felch, while he will read a vast number of pages, will have but a limited vision of what is going on outside the Felch family. But of course matters outside of that are of no moment. The Campine is a useful fowl. It is a handsome fowl, and it can get along without the help of any of the Felch brood.

A Correction.

TO THE AMERICAN FANCIER:

Please correct the awards in your next issue on Black Tail Japanese Bantams at Canajoharie show. You should have said: Hen, 1st, cockerel, 1st, B. W. Mosher, Johnstown, N. Y.

The Ontario Show.

TO THE AMERICAN FANCIER:

The twentieth annual exhibition of the Ontario Poultry Association was held at New Hamburg on January 1st to 6th. It was, without question, the most successful winter exhibition ever held in Canada. The Ontario is the oldest association holding annual exhibitions in America. It is the New York show of Canada, and it is satisfactory to note that there was a considerable increase in the entries over last year.

The building in which the show was held was not at all adapted to the purpose; the roof was too low and the light very poor.

Mr. Fred. Goebel was superintendent, and discharged his duties to the satisfaction of all. He worked hard to keep the birds well watered and fed, and so far no complaint has been made of the manner in which his department was managed; he had a good word for all.

The judges on poultry were, Messrs. Sharpe Butterfield, Windsor; T. H. Smelt, Woodstock; L. G. Jarvis, London; on pigeons and pet stock, Mr. I. B. Johnson, Toronto. With the exception of the Games and Bantams the poultry was all scored.

The annual meeting of the association was held on the afternoon of Thursday the 4th January, the president Mr. L. G. Pequegnat, in the chair. There was a large attendance of members from all parts of the province. In addition a number of spectators graced the meeting by their presence. Valuable papers were read by Messrs. J. E. Meyer, Kossuth; G. G. McCormick, London; C. J. Daniels, Toronto; C. F. Ernst, New Hamburg, and others. These essays were discussed at considerable length by the members present, and much useful information imparted. It would, I think, be well if other associations would set apart a day for the reading and discussion of essays as much good could be done by hearing well-known breeders give their experience and knowledge; there is no better place to do this than at a large exhibition.

Addresses were delivered by the Hon. John Dryden, Provincial Minister of Agriculture; John D. Moore, M. P. P., and Messrs. Bogue, Plumb, Dilworth and others which were well received.

Hon. M. Dryden was warmly received. He opened his address by congratulating the association upon the success they had achieved as breeders and exhibitors at the World's Columbian Exposition. He said it was now an established fact that Ontario held a foremost rank in this regard, as well as in many other of her products. He pointed out, however, that the common poultry of the province was very far below the standard of these exhibition birds. It was badly bred; badly housed, and badly looked after, and, as a general rule, brought in very bad returns as well. He said that the end and aim of the association was not attained merely by the holding of an exhibition of prize poultry, useful as that undoubtedly was. As head of the Department of Agriculture in the province, he had the interests of the farmer prominently before him. He wished to see the average poultry product of the country improved, and that could be brought about only by the infusion of superior blood, such as was to be seen at these shows.

But before any advancement could be made in this direction, it was necessary, he said, that the interest of the farmers should be aroused—that they should become more enthusiastic for the improvement of their poultry. He said it was the office of that association to awaken that interest, and that it could be done in two ways; first, by the inspiration that the association's annual show must create, and secondly by the dissemination among the farmers of the association's report through the department.

No one who was at all interested in poultry could see such a splendid display of birds as these exhibitions brought together, without it being an incentive to him to improve his own stock. These exhibitions, therefore, presented to the farmer and poultry raiser the ideal that he must strive to attain to, and without which but little progress could be made.

In order that the farmer might be successful in his efforts to improve his poul-

try it was necessary that he should have sufficient information on the subject at his command. This, Mr. Dryden said, he was anxious to supply through the medium of the report that the association presented to his department. To be useful this report should contain the papers and essays read at the annual meeting by the members of the association on all subjects connected with poultry raising, and also the discussions thereon.

Just as much care and attention, Mr. Dryden said, should be exercised by the farmer in the management of his poultry as would be devoted to the other stock of the farm. Improvement should be aimed at by the judicious selection of birds most suitable for the purpose intended. They should be properly housed, carefully attended to, and given such food as would bring about the most satisfactory results. This was the kind of practical kind of information the farmer wanted—information that those present had at their finger ends, and could readily be elicited through discussion and interchange of opinions.

By these means he hoped to be able to stimulate the poultry industry, and then increase the wealth of the farmer, the poultry breeder and the province as a whole.

Mr. Dryden then adduced statistics to show the present dimensions of the industry, and pointed out to the meeting its future possibilities. He said many people considered it a small matter and altogether unworthy of attention, but he assured his hearers that it was already too great to remain unnoticed, and was worthy of the best efforts that could be put forth to advance it and develop it still further.

At the close of Mr. Dryden's address there was keen bidding for the next annual exhibition, the competing places being New Hamburg, Guelph and Port Hope. On the third ballot New Hamburg was again selected as the place for holding the exhibition of 1895.

The election of officers resulted as follows:

President, C. F. Ernst, New Hamburg; First Vice-President, A. Bogue, London; Second Vice-President, G. S. Oldrieve, Kingston. Directors, Messrs. William McNeil, London; F. Goebel, New Hamburg; D. C. Trew, Lindsay; M. T. Burn, Tilsonburgh; W. Barber, Toronto; Thomas Rice, Whitby; John Cole, Hamilton; R. E. Kent, Kingston, John Colson, Guelph. Delegates to Industrial Exhibition, Messrs. J. Dilworth and W. Barber, Toronto. Delegates to Western Fair, Messrs. J. H. Saunders and G. G. McCormick, London. Auditors, Messrs. H. B. Donovan and Thomas A. Duff, Toronto.

A meeting of the newly-elected board of directors was held after the annual meeting when Mr. T. A. Browne, London, was again elected secretary, and Mr. G. G. McCormick, London, treasurer.

The New Hamburg Poultry Association tendered the visiting exhibitors a banquet in the evening, at which about 150 sat down and partook of an elegant spread. Short and pithy speeches, songs and recitations were the order of the evening. It was well on in the "we sma' hours" when the gathering broke up.

Considerable discussion was indulged in by the exhibitors relative to showing at New York in February, but no definite conclusion was arrived at. I understand, however, that Messrs. McNeil, Bogue, McCormick, McCurdy, Goebel, Barber and Duff have the matter under their consideration, and it is not unlikely that there will be a fair Canadian exhibit.

BROWN RED:

The following report is from the pen of Sharp Butterfield:

The 20th Ontario show has passed and gone, and it was considered by far the best collection of birds ever brought together in Canada. And from my own memory, for I have judged at the Ontario show since its inception, I must say I have noticed the classes of birds, and the improvement is so marked that one would almost think he was at Crystal Palace or Birmingham show, and nearly in every class there were birds which would not pass unnoticed even at those two leading shows of England. Of course, the American Light Brahma and the English Light Brahma, according to American and English fanciers, are much

at variance. While we don't require the heavy leg and toe feathering our cousins do, nor yet the length and fluffiness of feather and short backs; still, mine eyes have become so educated that I think I see more beauty in a first class American Light Brahma than I do in our cousins' type. The American Light Brahma has filled the bill for a long time as the best general purpose fowl in this country, and at present may not be in the lead, but still it maintains its popularity amongst fanciers, that its beauty is worth quite a consideration, while the English Brahma would require considerable more care to keep the feet and leg feathering in show shape, and probably would not be so good for practical purposes, and still to be an A No. 1 Light Brahma the feet require graceful middle toe feathering, which hides the toe, and which adds finish to our artistic Brahma. All the winning Light Brahmas were really grand specimens, especially the first prize cock and hen. The cock lacked foot feathering and would have been better if the striping in neck ran higher up towards the head, and a little heavier striping would make him rank pretty high. The first hen was a model Light Brahma, with no Cochins cushion or fluff. Her plumage was grand, the white as white as snow, no creamy tinge, though she is not standard requirements for flights, but has got a really good wing, so good that several judges have scored her one for wing; tail just about perfect in color, with beautiful black tail coverts and finely banded; her hackle very glossy and well defined, but feathers hardly pointed enough or would call it a perfect neck. What a lovely low comb, with distinct serrations; had to cut one because was not standard size. But, oh! her feet; of course it would take a lady's foot to be more perfect. Second was a good hen, but more after the English type, too loose in feather. Third a grand hen, but a little lighter in tail and not so good in neck; still they looked like three sisters, for they were all full in breast and body and beautiful concave sweep from shoulders to tail. Oh! if George Purdue had been there, he would have talked of entering an action for infringement of tail and tail coverts. The first cockerel was a very large young bird and so much resembled first prize hen that one would feel sure it was his dam. The second prize cockerel the most perfect model I ever passed upon. Had his neck been a little heavier in the black striping I could have pronounced it perfect; tail was an ideal both in color and shape, and probably as perfect coverts as we shall ever see. Third prize cockerel grand in surface color, but not so good in shape of body and breast, nor yet so good in hackle and tail, and lacked finish in foot feathering, still a good bird. Several fairly good birds had to be left out of the prizes.

Dark Brahmas.—First prize cock a beautiful bird both in shape and color, and he lacked for want of more dense striping in hackle and saddle, but the whiteness of his plumage was very fine. Same fault with the second and third prize birds. I only noticed one bird with any red in wing, and that one was very slight. The hens, especially first prize hen, was grandly pencilled all over, and the pencilling ran well up in throat. Second prize hen good, but much smaller in appearance. Third prize hen a good hen, but lacking in size. I noticed one cockerel with a crooked back, so had to disqualify him. One of the standers by said that was first prize cockerel at the World's Fair. I said it might not have been so prominent then as now, and the cockerel got the benefit of the doubt. First, second, and third looked much alike in color, but the best developed birds got the premiums. First pullet was grand surface color, lacked evenness of pencilling on back, but she was good Brahma shape and nicely furnished feet. Second prize pullet a grand young bird, but the pencilling on breast was cloudy and near the throat looked like small spangles. Third prize pullet was grandly pencilled, but lacked ground color. I am sure the Dark Brahma class, as a whole, was the best I ever judged at the Ontario show, and about the most of that variety.

Buff Cochins.—First and second cocks in great shape; both looked as if they

had come from some first class milliner, for the length of tail coverts was so immense that one would think they had cut a few feet of ribbon too much and they were bound to use it up, so they used it on coverts and sickles, and the color was one better than the standard. It was a rich, clear, deep golden buff, with immense foot and leg feathering. Third prize bird good, but much shorter in feather. The first and second prize hens were immense in size and very sound in color—just about standard color. They were clear buff, with grand Cochins shape. Third prize hen a good bird a year or two ago, but too small to go into such large and good company. First prize cockerel similar to the 1st and 2nd prize cocks in every particular. The 2nd and 3rd prize cockerels were great birds to score for color, and if they had been more massive in appearance I think I should have had to award three first prizes. I noticed a beautiful model for a Cochins cockerel, but most of his tail was gone, which marred his beauty. Pullets, 1st, 2d, and 3d, large and about perfect in color, and there is not much wanting in them, only a little higher in cushion would make them nearer perfection. Oh! if Theodore Sternberg had been at New Hamburg he would have spent one day sure looking at the Buffs, for I am sure our Ontario show never held so many good ones before.

Partridge Cochins.—Cocks made rather a poor showing, still there was one pretty good old cock, but the remainder only medium. Cockerels much better. First prize bird the best in shape, but a little too dark in color. The best colored cockerels were lacking in shape, hence had to take second and third places. Hens, one fairly good old hen, balance of class only medium. Pullets, 1st was a grand shaped Cochins and was well pencilled on cushion, and that is nearly always a weak place in Partridge Cochins. Second and third good pullets, but not distinct enough. I noticed quite a lot of light shafting on a good many of the pullets' breasts, and one pullet I had to disqualify for vulture hocks, a very unusual thing in Partridge Cochins, but no doubt bred to our Partridge Cochins it will help us much in getting good leg and toe feathering. Though she be disqualified for vulture hocks, she is worth much more than a bare middle toed Cochins, for in the New Standard bare middle toe on Cochins is a disqualification, and ought to have been so always. I think we find to-day that the Partridge suffers more for light leg and toe feathering than any other Cochins.

Black Cochins.—Cocks were fairly good. The prize winning cocks very high in color and very good in shape, and while one had almost too much feather on legs and feet the other one was lacking; still quite an improvement as a whole. Hens, first prize hen was rich in color and very large, but almost getting too old to do much winning, and if a little higher in cushion would take a real good one to beat her. Second and third prize hens looked small compared to her, still they were better in shape but not so high in color. Cockerels, the winning cockerels were good in shape and very highly colored, but lack looseness of feather, still they were good birds and may yet develop, for they looked quite young. Pullets, the same about them as cockerels, 1st, 2d, and 3d all very much alike. Taking the Blacks as a whole, they were much higher colored birds than we usually see.

White Cochins.—First prize cock Cochins all over and pearly white plumage, with grand leg and toe feathering, and if larger in size would be hard to beat. Second prize cock not so good in shape, but very fair in color. Hens, first prize hen Cochins from feet up, but lacks size. Second very good; third fairly good in size, but lacks Cochins shape. First prize cockerel a good Cochins, but loses all over for color, being of a yellowish tinge. Second prize cockerel much better in color, but away off in shape. First prize pullet, I think I judged her at the World's Fair, and Mr. Sternberg made the remark that she was Cochins from feet up. She is certainly a gem, neat head, short in neck, and grand in breast and back shape. Second prize pullet very similar, and third prize pullet close up. Third was not quite so good in beak

color as the other two, but she was really fine.

Barred Plymouth Rocks.—74 in number makes quite a Plymouth Rock display. First prize cock a very good bird, with a nice medium sized comb, but lacked enough serrations; still he was a really good bird except deficiency in tail, being short of barring, his breast was very even and very straight in barring, each feather ending with a nice bar. Second prize cock was a good bird all over excepting breast, being a little on the light side, tail very good for an old cock. Third prize cock very evenly barred, but the bars did not run so parallel as first and second. In most old cocks their weakness lays in tail color, and in balance of class showed their tail was the worst deficiency. Hens, first prize hen was very straight in barring and very clear in color, and showed none of the brown tinge so commonly seen on Plymouth Rocks; she would have been better if black bars had been a little narrower. Second prize hen very similar, but not so clean in color. Third prize hen grand in barring, but whether from age or being out of condition her feathers showed a slight brownish tinge. There were lots of good barred hens, but the greatest fault lay in the brown and grey tinges. Cockerels, first prize cockerel grand in shape, nice comb, and probably one of the best barred birds in Canada, barred right to the skin, and as parallel in barring as was ever seen on a Plymouth Rock cockerel. If he keeps healthy and well, he is a bird that will often be heard of when shown. Second prize cockerel probably the best combed bird in the show, about perfect in body, back, and tail shape, but too light on surface color, still very parallel in barring, and from outside appearances don't look near the first prize cockerel. Third prize cockerel a very similar bird to first prize, but lacked the cleanness of surface color the first prize bird possessed and not so good in comb. A good many nice cockerels I noticed, and birds their owners need not be ashamed of though they did not win. Pullets, probably the best one of the three winners was the third prize one, but the cockerel had so mused and broke her back feathers that she got a cut of one more than she ought to have had had her back feathers not been damaged. However, first prize pullet was right up, and having lost one for weight she had to make the weight or might have been very near a dead heat. I think there were three or four in the 92 1-2 class, and on looking them over by comparison it was a hard matter to tell which was the best or which to give the preference. The same can be said of the pullets as has been said of hens. Lots of good ones left out, some showing the brown and others the greyish tinge instead of bluish tinged plumage.

In Games, the first prize Black Red cock away ahead, probably one of the best cocks ever shown in Canada. What a pleasure to look at him. The moment he caught your eye he became a statue. His neck would straighten out and his eye would look you right in the eye, with his wings tucked up to his body, his tail like a whip, and his great breast and the wing fronts quite prominent, and his stern was so well cut away that it seemed it was made to be in harmony with his tail; he was a beauty. Second a fairly good bird, and same the third. First prize hen one of the grandest of bodies, nicely cut away in stern, and tucks her wings grandly to her body, fine in tail, a little on the short side in leg and head, but a grand, good colored Black Red hen. Second prize hen not as good. Third prize hen was getting too short on leg, but she had grandly shaped breast and body. I think I made a mistake on hens. One unnoticed hen ought to have been second, which belonged to Mr. Main, and but for the light been so bad I don't think it would have occurred. I noticed in looking over my awards to see if they were all right the second day after judging, that the hen mentioned had only one bad fault, and that was her wings crossing on her back. Cockerels, first prize cock's description would suit him all over, only cockerel was not quite so good in color. Second prize cockerel lacks breast and body shape and too long in back, and not hard enough in feather. The third very similar to second. In

pullets, first prize a gem. Same description of her as about the first cock and cockerel. I think her the best pullet I have ever judged. Second and third prize pullets both narrow in breast compared to the first prize one, still rare good pullets, but legs too slender. Golden Duckwings much better than last fall. I saw some new faces which will make quite a mark, health permitting. I liked the second prize cock better than the first, but he had not got quite over his sea sickness. First prize hen very good in style, reachy, and good color. Second fairly good hen, but lacks breast. Third very similar. Cockerels and pullets were really grand, and even some of them that did not win will probably win some other day or produce winners. Pyles nothing remarkably good; fair to medium. Brown Reds, one grand old cock; the others fairly good. Hens, first prize hen right up. I noticed one hen. I have placed a great many first prizes on her coop. Her legs are getting played out, and she has to give way to something younger. Cockerels, first prize just about as high as he ought to go. Pullets very good both in color and style, and had they been in better light and on a lower tier I could have been more explicit.

In Game Bantams quite a lot of new faces in chicks, and some really good ones won the prizes. In Black Red cocks the second prize cock should have been first but for his mottled breast and body. Second prize cock quite as small, but lacked style. Third prize cock close up. First, second, and third prize hens real good ones, excepting third prize being a little dark in color of back and wing. Cockerels and pullets, cockerels not hardly finished their plumage, otherwise good; lots of style and fashion. First prize pullet a little too thick in stern, and second prize pullet should have won but she had a slight concave back. Third prize a gem, but a little off in color. Duckwings, first and second both good birds, and third not so good in color. Hens, all the winners were good in color and style. First Duckwing cockerel a walk over both in color and make up. Second a good bird, but lacked in wing and back color. Third lacks style. The three winning pullets all good, and will be heard of later. Brown Reds, old birds pretty good. Chicks, first prize cockerel being more developed caused him to win over the second, though, if all goes well, the second will take the first place later. Pyles, the 1st, 2d, and 3d prize birds all about equal, and with different judges would probably all get first in their turn. Pullets, winners all good ones.

In Hamburgs, the most good birds ever seen together on this Continent. The World's Fair was not in it on Hamburgs, though probably one-half of them won first prizes there.

Spanish, a really grand class both in old and young, and lots to choose from. Polands, ever getting better, and lovers of Polands can see them at New York, where all will exclaim they never saw so good before.

White Plymouths grand in color, but probably not so good in shape, still lots of grand birds to choose the winners from.

Leghorns right up in G, and many good birds could not get the red tickets. Langshans in great force, and I would like some of our Langshan breeders to try their strength in New York.

Wyandottes, all had birds of great merit, especially Golden cockerels, of which several had perfect striped saddle feathers without any mousing and very distinct in striping, and grand, well opened, even breasts.

Houdans, heavy classes and show a marked improvement. I might say the poorest specimens would have been called good ones a few years ago. Premiums will show those who got the lion's share.

In Ornamental Bantams, suffice to say when Mr. McNeil and Richard Oke meet there is always a strong tussle for supremacy, and it always takes good ones to get first places.

The following are the awards:

BARRED PLYMOUTH ROCKS.—Cock (9), 1st 92½, J. E. Bennet, Toronto; 2d 91½, 3d 90½, hen (17), 1st 93, Haycock & Kent, Kingston; 2d 92½, Hiram Bander, Niagara Falls; 3d 91, Bennet, Cockerel (25), 1st 93½, Haycock & Kent; 2d 92, Bander; 3d 91½, E. H. Donnelly, Sandwich. Pullet (23), 1st 92½, T. A. Duff & Co., Toronto; 2d 92½, Donnelly; 3d 92½, Haycock & Kent.

WHITE PLYMOUTH ROCKS.—Cock (7), 1st 94½, Bender; 2d 92½, H. H. Wallace, Woodstock; 3d 92½, W. H. Reid, Kingston. Hen (11), 1st 97, Wallace; 2d 96½, 3d 95½, Bender. Cockerel (18), 1st 96, 2d 95½, Thomas Rice, Whitty; 3d 94½, Bender. Pullet (17), 1st 97, 2d 97, Rice; 3d 96½, Geo. Bogue, Strathroy.

SILVER WYANDOTTES.—Cock (6), 1st 93½, J. E. Meyer, Kossuth; 2d 91, J. K. Katzeminer, Hamburg; 3d 91, hen (8), 1st 92½, Meyer; 2d 92½, S. M. Clemo, Guelph; 3d 92, Meyer. Cockerel (11), 1st 94½, G. Bogue; 2d 93, 3d 93, pullet (12), 1st 95, 2d 94½, 3d 93½, Meyer.

GOLDEN WYANDOTTES.—Cock (5), 1st 92½, Haycock & Kent; 2d 92, 3d 89½, Thomas H. Scott, St. Thomas. Hen (4), 1st 92½, 2d 92½, 3d 91, Haycock & Kent. Cockerel (9), 1st 93½, Scott; 2d 94, Haycock & Kent.

BLACK WYANDOTTES.—Cock (2), 1st, hen (4), 1st, Duff & Co.; 2d, 3d, Webber & Robertson, Guelph. Pullet (2), 1st, 2d, Duff & Co.

WHITE WYANDOTTES.—Cock (4), 1st 95½, 2d 92½, Geo. G. McCormick, London; 3d 90, E. B. Cale, Stratford. Hen (9), 1st 95½, Haycock & Kent; 2d 95, 3d 94½, cockerel (6), 1st 96, 2d 96, 3d 94, pullet (7), 1st 97, 2d 96½, McCormick; 3d 95½, Geo. Bogue.

DOMINIQUE.—Cock (2), 1st 91½, G. Bogue; 2d 88, W. R. Knight. Hen (3), 1st 93½, Haycock & Kent; 2d 92½, R. Oke; 3d 89½, cockerel (3), 1st 94, G. Bogue; 2d 90½, 3d 86, pullet (2), 1st 92, Haycock & Kent; 2d 92, G. Bogue.

BLACK JAVAS.—Cock (5), 1st 93, H. M. Henrich, Hamburg; 2d 92½, C. J. Daniels; 3d 92, McCormick. Hen (6), 1st 96½, Daniels; 2d 95½, 3d 94½, cockerel (7), 1st 96½, McCormick; 2d 94½, Cale; 3d 94, pullet (9), 1st 96, 2d 96, McCormick; 3d 95½, Cale.

ANY OTHER COLOR JAVAS.—Cock (1), 1st, hen (2), 1st, 2d, cockerel (2), 1st, Daniels; 2d, Wm. Coon, Guelph. Pullet (2), 1st, 2d, Daniels.

LIGHT BRAHMAS.—Cock (7), 1st 91½, J. Cole & Co., Hamilton; 2d 91, Haycock & Kent; 3d 90½, J. H. Saunders, London. Hen (5), 1st 96, 2d 94, Donnelly; 3d 92½, Haycock & Kent. Cockerel (11), 1st 93½, 2d 92½, Donnelly; 3d 92½, Haycock & Kent. Pullet (10), 1st 95½, 2d 95½, 3d 95, Donnelly.

DARK BRAHMAS.—Cock (4), 1st 92½, 2d 92, Thorpe & Scott, London; 3d 91½, W. H. Readwin, Guelph. Hen (4), 1st 93, Saunders; 2d 91, Thorpe & Scott; 3d 89, Readwin. Cockerel (7), 1st 94, Thorpe & Scott; 2d 91½, Daniels; 3d 91½, C. S. Benson, Toronto. Pullet (8), 1st 94, Saunders; 2d 94, Thorpe & Scott; 3d 93, Benson.

BUFF COCHINS.—Cock (4), 1st 94½, 2d 92½, McCormick; 3d 92, F. C. Hare, Whitty. Hen (4), 1st 94½, 2d 94, McCormick; 3d 93, Hare. Cockerel (9), 1st 96, McCormick; 2d 94, 3d 93½, pullet (7), 1st 96, 2d 96, Hare; 3d 95½, McCormick.

PARTIDGE COCHINS.—Cock (1), 1st 91, L. G. Pequeguat, Hamburg. Hen (3), 1st 91, 2d 87½, Pequeguat & Chamberlain, Berlin. Cockerel (5), 1st 94, 2d 90½, L. G. Pequeguat; 3d 89½, A. Bogue, London. Pullet (8), 1st 94½, L. G. Pequeguat; 2d 92½, A. Bogue; 3d 92, L. G. Pequeguat.

BLACK COCHINS.—Cock (3), 1st 93½, McCormick; 2d 91, W. H. Reid, Kingston; 3d 91, McCormick. Hen (3), 1st 95½, Cole & Co.; 2d 92½, 3d 91, cockerel (2), 1st 93½, 2d 92, pullet (2), 1st 94½, 2d 93½, McCormick.

WHITE COCHINS.—Cock 1st 94½, hen, 1st 93½, Wm. McNeil, London; 2d 90, G. D. Smith, Preston. Cockerel, 1st 92, McNeil; 2d 89, Andrew McMeans, Brantford; 3d 85½, Smith. Pullet, 1st 96½, 2d 96, McNeil; 3d 94, Hy Emerick, International Bridge.

LANGSHANS.—Cock (6), 1st 94½, Robert McCurdy, London; 2d 93½, G. Bogue; 3d 93, J. M. Gneyerbiehl, Guelph. Hen (11), 1st 95½, McCurdy; 2d 94½, 3d 94, Fred Goebel, Hamburg. Cockerel (10), 1st 94½, Duff & Co.; 2d 94½, Goebel; 3d 94, McCurdy. Pullet (10), 1st 96, 2d 96, 3d 96, Goebel.

S. C. WHITE LEGHORNS.—Cock (6), 1st 95½, Rice; 2d 94, D. C. Trew, Whitty; 3d 94, John Pletsch, Shakespeare. Hen (9), 1st 97½, 2d 97, Rice; 3d 95, J. A. Laird, Brampton. Cockerel (13), 1st 96, Rice; 2d 95½, J. Lovegrove, St. George; 3d 94, Pletsch. Pullet (12), 1st 98, 2d 97½, Rice; 3d 96½, Pletsch.

S. C. BROWN LEGHORNS.—Cock (3), 1st 95, Rice; 2d 91½, Saunders; 3d 91, Ernst Frank, Hamburg. Hen (4), 1st 95½, Saunders; 2d 94½, Rice; 3d 94, Pletsch. Cockerel (10), 1st 95, 2d 94½, Rice; 3d 94, pullet (10), 1st 95½, Pletsch; 2d 95½, 3d 95½, Rice.

S. C. BLACK LEGHORNS.—Cock (4), 1st 92½, R. B. Puddicombe, Hamburg; 2d 92, J. A. Daniels, Haysville; 3d 91, John Schuler. Hen (6), 1st 95, Clemo; 2d 94, 3d 93½, cockerel (9), 1st 94½, Schuler; 2d 94½, Puddicombe; 3d 94, L. G. Pequeguat. Pullet (10), 1st 96, J. A. Daniels; 2d 96, Schuler; 3d 95½, Puddicombe.

R. C. BROWN LEGHORNS.—Cock (3), 1st 94, Haycock & Kent; 2d 91½, C. J. Daniels. Hen (5), 1st 94½, Haycock & Kent; 2d 93½, C. J. Daniels; 3d 93½, Haycock & Kent. Cockerel (6), 1st 95, 2d 93½, James Brown, Sackville St., Toronto; 3d 93, pullet (5), 1st 95½, Haycock & Kent; 2d 95, Greyerbiehl; 3d 94½, Haycock & Kent.

R. C. WHITE LEGHORNS.—Cock (3), 1st 93½, W. J. Bell, Angus; 2d 93½, Reid. Hen (6), 1st 96, Bell; 2d 95, Reid; 3d 94, Saunders. Cockerel (6), 1st 96½, Bell; 2d 95½, Saunders; 3d 93½, C. J. Daniels. Pullet (5), 1st 97, Bell; 2d 96, T. J. Keiley, London; 3d 95½, Reid.

ANDALUSIANS.—Cock (2), 1st 94½, W. H. Dustan, Bowmanville; 2d 92½, hen (3), 1st 95½, W. R. Knight, Bowmanville; 2d 95, 3d 93½, Dustan. Cockerel (5), 1st 95½, Knight; 2d 93½, C. J. Daniels; 3d 93½, C. Stockwell, London. Pullet (5), 1st 93½, Dustan; 2d 93, Knight; 3d 93, Dustan.

BLACK SPANISH.—Cock (3), 1st 94½, Hare; 2d 90½, Cale. Hen (8), 1st 94½, Hare; 2d 94½, Emrick; 3d 93½, Alex Fraser, Hamburg. Cockerel (5), 1st 94, Hare; 2d 94, Emrick; 3d 94, pullet (5), 1st 96, Hare; 2d 95, Fraser; 3d 94½, Hare.

BLACK MINORCAS.—Cock (2), 1st 90½, Clemo. Hen (5), 1st 95, T. J. Senior, Hamilton; 2d 94, C. W. Wood, Toronto; 3d 94, J. S. Munro, Goderich. Cockerel (13), 1st 96½, Rice; 2d 95½, Senior; 3d 95½, pullet (12), 1st 98, 2d 96½, Rice; 3d 95, McCurdy.

WHITE MINORCAS.—Cockerel (3), 1st 94, C. J. Daniels; 2d 92½, 3d 91½, Senior. Pullet (3), 1st 94½, C. J. Daniels; 2d 94½, 3d 94, Senior.

G. S. HAMBURGS.—Cock (3), 1st 93, McNeil; 2d 92, Oke; 3d 91½, Emrick. Hen (3), 1st 94½,

McNeil; 2d 93½, Emrick. Cockerel (4), 1st 96, McNeil; 2d 95½, Oke; 3d 94, Greyerbiehl. Pullet (4), 1st 97, McNeil; 2d 95, Oke; 3d 94½, A. Bogue.

S. S. HAMBURGS.—Cock (3), 1st 95, McNeil; 2d 90, J. Brown. Hen (4), 1st 96, McNeil; 2d 95, Oke; 3d 93½, A. Bogue. Cockerel (2), 1st 95½, McNeil; 2d 93½, A. Bogue. Pullet (2), 1st 96, McNeil.

G. P. HAMBURGS.—Cock (3), 1st 94½, McNeil; 2d 94, Oke; 3d 93½, A. Bogue. Hen (3), 1st 95½, McNeil; 2d 92½, Oke; 3d 92, A. Bogue. Cockerel (4), 1st 96, McNeil; 2d 94½, A. Bogue; 3d 93½, Emrick. Pullet (3), 1st 95½, McNeil; 2d 95, A. Bogue; 3d 93½, Emrick.

S. P. HAMBURGS.—Cock (2), 1st 93, A. Bogue; 2d 93, hen (2), 1st 95½, McNeil; 2d 92½, A. Bogue. Cockerel (3), 1st 96½, McNeil; 2d 93, Oke; 3d 93, A. Bogue. Pullet (3), 1st 97, McNeil; 2d 93, A. Bogue; 3d 93, Oke.

BLACK HAMBURGS.—Cock (4), 1st 96½, Oke; 2d 96½, McNeil; 3d 93, Emrick. Hen (5), 1st 96½, Oke; 2d 95, McNeil; 3d 94½, Emrick. Cockerel (9), 1st 96, 2d 96, McNeil; 3d 95½, Haycock & Kent. Pullet (7), 1st 96½, McNeil; 2d 95, Oke; 3d 95, Munro.

SILVER GRAY DORKINGS.—Cock (1), 1st 93½, hen (1), 1st 94½, cockerel (3), 1st 94, 2d 93½, pullet (1), 1st 95, 2d 92, A. Bogue.

COLOR DORKINGS.—Cock (1), 1st 93½, hen (2), 1st 96, 2d 94½, cockerel (3), 1st 93½, 2d 92½, A. Bogue; 3d 92, Reid. Pullet (3), 1st 95, 2d 94½, A. Bogue; 3d 93½, Reid.

WHITE DORKINGS.—Hen (2), 1st 96, 2d 94½, cockerel (2), 1st 94, 2d 93, pullet (2), 1st 95½, 2d 94, A. Bogue.

HOUDANS.—Cock (6), 1st 95, D. C. Trew, Lindsay; 2d 93, A. Bogue; 3d 92, hen (9), 1st 96, 2d 95½, Trew; 3d 95, Knight. Cockerel (8), 1st 94, Stockwell; 2d 94, A. Bogue; 3d 94, pullet (8), 1st 96½, 2d 96½, 3d 94½, Trew.

CREVE COEURS.—Cock (1), 1st 96½, hen (2), 1st 94½, 2d 91½, cockerel (1), 1st 92, pullet (2), 1st 96½, 2d 94, Oke.

LA FLECHE.—Cock (1), 1st 97½, Roke. Hen (2), 1st 95, Wm. McNeil; 2d 94, Roke. Cockerel (1), 1st 95½, McNeil. Pullet (2), 1st 90½, Roke.

W. C. B. POLANDS.—Cock (2), 1st 96, McNeil; 2d 94, A. Bogue. Hen (3), 1st 97, A. Bogue; 2d 96, McNeil. Cockerel (3), 1st 97, McNeil; 2d 95, A. Bogue. Pullet (2), 1st 95, Bogue; 2d 92, McNeil.

GOLDEN POLANDS.—Cock (3), 1st 94, Bogue; 2d 94, McNeil; 3d 90½, Jas. Brown. Hen (3), 1st 94, McNeil; 2d 93½, Bogue; 3d 91, Brown. Cockerel (2), 1st 94, McNeil; 2d 90½, A. Bogue. Pullet (2), 1st 95, McNeil.

SILVER POLANDS.—Cock (3), 1st 91, W. R. Knight; 2d 90½, McNeil; 3d 88½, A. Bogue. Hen (3), 1st 96, A. Bogue; 2d 93½, McNeil; 3d 92, W. R. Knight. Cockerel (2), 1st 90½, McNeil; 2d 90½, A. Bogue. Pullet (2), 1st 93½, A. Bogue; 2d 91, McNeil.

WHITE POLANDS.—Cock (3), 1st 96, A. Bogue; 2d 94½, McNeil; 3d 92, Andrew McMeans, Brantford. Hen (3), 1st 96½, McNeil; 2d 95, A. Bogue; 3d 94, McMeans. Cockerel (1), 1st 91, McNeil. Pullet (2), 1st 96, A. Bogue; 2d 92, McNeil.

G. AND S. UNBEARDED POLANDS.—Cock (2), 1st 91½, A. Bogue; 2d 91½, McNeil. Hen (2), 1st 93, Cockerel (2), 1st 94½, McNeil; 2d 91, A. Bogue. Pullet (2), 1st 95½, McNeil; 2d 92½, A. Bogue.

WHITE UNBEARDED POLANDS.—Cock (3), 1st 94½, A. Bogue; 2d 94, McNeil; 3d 90, McMeans. Hen (3), 1st 94½, A. Bogue; 2d 94, McNeil; 3d 93½, McMeans. Cockerel (2), 1st 93, A. Bogue; 2d 92½, McNeil. Pullet (1), 1st 94, McNeil.

BUFF LACED POLANDS.—Cock (2), 1st 92½, 2d 90, hen (2), 1st 93, 2d 89½, cockerel (2), 1st 92, 2d 92, pullet (2), 1st 93, 2d 92½, McNeil.

RED CAPS.—Cock (4), 1st 94½, S. H. Rowlin, Hamilton; 2d 93½, C. J. Daniels; 3d 91, Haycock & Kent. Hen (4), 1st 91½, Daniels; 2d 91½, Rowlin; 3d 88, Haycock & Kent. Cockerel (5), 1st 94, Haycock & Kent; 2d 94, J. S. S. Niven, M. D. London; 3d 93½, Haycock & Kent. Pullet (8), 1st 94½, Niven; 2d 94, Rowlin; 3d 93½, Haycock & Kent.

GAMES B. B. RED.—Cock (3), 1st Oldueni & Nicol, Kingston; 2d Wm. McLeod, London; 3d Wm. Barber, Toronto. Hen (6), 1st Wm. Barber; 2d McLeod; 3d Oldueni & Nicol. Cockerel (15), 1st Oldueni & Nicol; 2d W. J. James, St. Thomas; 3d Wm. Main, Milton. Pullet (15), 1st Barber; 2d James; 3d Main. Pullet (15), 1st Barber; 2d James; 3d Wm. Main, Milton.

GAME BROWN B. RED.—Cock, 1st Oldueni & Nicol; 2d Wm. Barber & Co.; 3d Tho. A. Duff. Hen, 1st Barber; 2d Duff & Co.; 3d Oldueni & Nicol. Cockerel, 1st, 2d Barhen. Pullet, 1st Barber; 2d Oldueni & Nicol; 3d Barber.

GAME DUCKWING.—Cock, 1st, 2d Barber. Hen, 1st, 2d Barber; 3d O. dueni & Nicol. Cockerel, 1st, 2d Barber. Pullet, 1st Oldueni & Nicol; 2d, 3d Barber.

GAME PYLE.—Cock, 1st, 2d Barber & Co.; 3d Oldueni & Nicol. Hen, 1st Barber & Co.; 2d Oldueni & Nicol; 3d Barber & Co. Cockerel, 1st Barber. Pullet, 1st, 2d Barber.

A. O. S. V. GAMES.—Cock, 1st, hen, 1st, 2d, cockerel, 1st, pullet, 1st, C. J. Daniels.

B. B. RED GAME BANTAMS.—Cock, 1st Barber & Co.; 2d Chas. Crowe, Guelph; 3d McLeod. Hen, 1st Barber & Co.; 2d McLeod; 3d Crowe. Cockerel, 1st Oldueni & Nicol; 2d Barber & Co.; 3d Crowe. Pullet, 1st Crowe; 2d Barber; 3d Crowe.

BROWN RED GAME BANTAMS.—Cock, 1st Oldueni & Nicol; 2d Barber & Co.; C. J. Daniels. Hen, 1st Oldueni & Nicol; 2d Barber & Co.; 3d Daniels. Cockerel, 1st Oldueni & Nicol; 2d Barber & Co. Pullet, 1st Oldueni & Nicol; 2d, 3d Barber & Co.

DUCKWING BANTAMS.—Cock, 1st Barber; 2d Oldueni & Nicol. Hen, 1st Oldueni & Nicol; 2d Barber. Cockerel, 1st Barber; 2d McLeod; 3d Oldueni & Nicol. Pullet, 1st, 2d Barber; 3d McLeod.

PYLE BANTAMS.—Cock, 1st Barber, hen, 1st Barber. Cockerel, 1st Oldueni & Nicol; 2d Barber & Nicol; 3d, 4d Barber.

GOLDEN SEBRIGHT BANTAMS.—Cock, 1st 94½, Oke; 2d 94½, McNeil. Hen, 1st 95, McNeil; 2d 91½, Oke, Cockerel, 1st 94, McNeil; 2d 94, Oldueni & Nicol; 3d 92½, Oke. Pullet, 1st 95, McNeil; 2d 93½, E. B. Cale, Stratford; 3d 93, Oke.

SILVER SEBRIGHT BANTAMS.—Cock, 1st 94½, McNeil; 2d 94, Oke; 3d 90, Reid. Hen, 1st 96½, McNeil; 2d 95, Oke. Cockerel, 1st 93, McNeil; 2d 92½, Oke. Pullet, 1st 95½, Oke; 2d 93½, Wm. McNeil.

WHITE OR BLACK ROSE COMB BANTAMS.—Cock, 1st 95, McNeil; 2d 93½, Oke; 3d 92½, E. B. Cale. Hen, 1st 94½, Oke; 2d 93½, McNeil; 3d 93,

Cale. Cockerel, 1st 97, Oke; 2d 94½, Cale; 3d 93½, McNeil. Pullet, 1st 94½, McNeil; 2d 93½, Oke; 3d 93, Cale.

PEKIN BANTAMS.—Cock, 1st 94, McNeil; 2d 88, C. J. Daniels. Hen, 1st 93½, McNeil; 2d 93, C. J. Daniels. Cockerel, 1st 93½, McNeil; 2d 92, Benson; 3d 91½, Pequeguet. Pullet, 1st 94½, McNeil; 2d 93½, C. J. Daniels; 3d 93, Oke.

COCHIN BANTAMS.—Cock, 1st, C. J. Daniels; 2d H. B. Donovan, Toronto. Hen, 1st Donovan; 2d C. J. Daniels. Cockerel, 1st McNeil; 2d, 3d, Donovan. Pullet, 1st Donovan; 2d C. J. Daniels; 3d H. B. Donovan.

WHITE BOOTED BANTAMS.—Cock, 1st 94½, hen, 1st 95, 2d 94, cockerel, 1st 92½, pullet, 1st 94½, Oke.

JAPANESE BANTAMS.—Cock, 1st 96, McNeil; 2d 91½, C. J. Daniels. Hen, 1st 95½, McNeil; 2d 93½, Oke; 3d 92½, C. J. Daniels. Cockerel, 1st 96, McNeil; 2d 94½, Oke; 3d 91, C. J. Daniels. Pullet, 1st 94½, McNeil; 2d 94½, Oke.

POLISH BANTAMS.—Cock, 1st 91½, Oke. Hen, 1st 96½, 2d 95, Donovan. Cockerel, 1st 94½, McNeil; 2d 93½, Oke. Pullet, 1st 96½, Oke; 2d 95, McNeil.

ANY OTHER VARIETY FOWLS.—Cock (4), 1st Oke; 2d C. J. Daniels; 3d Donovan. Hen (3), 1st C. J. Daniels; 2d Donovan; 3d C. J. Daniels. Cockerel (3), C. J. Daniels. Pullet (3), 1st C. J. Daniels; 2d Donovan; 3d C. J. Daniels.

CROSS BRED.—Cockerel (6), 1st C. H. Thornton, St. Thomas; 2d Webber & Robertson, Guelph; 3d A. Bogue. Pullet (8), 1st Pletsch; 2d Webber & Robertson; 3d Thornton.

BRONZE TURKEYS.—Cock (3), 1st W. J. Bell; 2d Wm. Main, Milton; 3d Thos. Somerville, Haysville. Hen (3), 1st Bell; 2d Main; 3d Somerville. Cockerel (3), 1st Bell; 2d Main; 3d Thos. Somerville. Pullet (3), 1st Main; 2d Bell; 3d Somerville.

TOULOUSE GEES.—Cock (2), A. Bogue; 2d Pletsch. Hen (2), 1st Pletsch. Cockerel (2), 1st, 2d, A. Bogue. Pullet (2), 1st, 2d, A. Bogue.

BREMEN GEES.—Cock (1), 1st, hen (1), 1st, cockerel (1), 1st, pullet (1), 1st, Wm. Main.

AYLESBURY DUCKS.—Cock, 1st 98½, 2d 96½, A. Bogue; 3d 95, Jas. McKee, Norwich. Hen, 1st 98, 2d 97½, A. Bogue; 3d 95, McKee. Cockerel, 1st 97½, A. Bogue; 2d 97, McKee; 3d 96, A. Bogue. Pullet, 1st 98½, 2d 98, A. Bogue; 3d 96½, H. H. Wallace, Woodstock.

ROUEN DUCKS.—Cock, 1st 96½, Main; 2

Atlanta's Great Show.

A Fine Display of Thoroughbred Fowls in the Sunny South.

When I arrived at Atlanta, Ga., at 5:30 A. M., Tuesday, January 9, and stepped into the corridor of the Kimball House, the first person to greet me was Geo. M. Downs, the editor of *Southern Fancier*. After exchanging the usual compliments chicken cranks are very apt to, the inner man was substantially satisfied by a rousing breakfast, and we proceeded to the Armory, where some 1,600 feathered beauties were imprisoned in Spratts cages, awaiting the admiring glances of visitors and fanciers. Here I found "Uncle Tom" Rackham busy as usual arranging the exhibits, and it is needless to say he is the same old Rackham, quiet, suave, polite, and gentlemanly as ever. In the pigeon aisles was Dr. T. W. Tuggle, the president of the association, a clever gentleman and genuine fancier, looking after the pigeons. Near him was the only original George Ewald, hale and hearty, with a joke or a criticism always in readiness. Dr. S. T. Lea hovered near his Langshans as if afraid something might inflame them. Scott Maxwell cast loving glances at his Silver Wyandottes, while Alfred Bertlandt couldn't keep away from his Cochins. A little gentleman with a linen duster and big badge and a voice as soft as the zephyrs of a quiet June day proved to be Loring Brown. Everybody in the south knows Mr. Brown and his birds. He is one of the oldest breeders there. Near the Pit Games stood the rugged and genial Colonel Tom Ware, and what he don't know about Pit Games isn't worth knowing. In fact, nearly every exhibitor was present, and from all outward appearances everyone enjoyed the show. There was no kicking over the awards, and the best of humor prevailed. Dr. Tuggle, G. M. Downs, R. O. Campbell, and Mr. Kennedy did everything in their power to entertain the judges and exhibitors, and the latter will always look back to the Atlanta show as a pleasant and profitable epoch in their lives. The only regrettable feature of the show was the illness of Mr. Scudder, one of the judges, who was stricken down the first day of the show and unable to leave his bed. I am glad to state that he is sufficiently recovered to go to Columbus, where under the care of Dr. Tuggle he will soon be able to regain his health. Mr. Scudder is deservedly a favorite here, and his qualifications as a judge so favorably known that kind words of sympathy and regret were plentiful.

As to the show itself, it was a financial and artistic success, and had Secretary Kuhn had the faintest conception of what his duties were to be, there could have been no complaint made, but Mr. Kuhn was rather slow in handling the cards and books, and gave the impression that he did not care whether school kept or not. I have no desire to do him any injustice, and if outside business prevented his giving entire attention to the show, he should have provided himself with an assistant. Mr. Downs did all he could to help the exhibitors and the judges, as did Dr. Tuggle.

The feature of the entire show was the Langshan exhibit. Some 80 birds competed, and I doubt if a better lot ever entered a show room. Although Dr. Lea won the principal honors with his magnificent team of Black Langshans, his competitors were by no means disgraced. So close was the competition that condition in a number of instances decided the prizes. In cockerels there were three birds that were simply superb. The first cockerel was almost perfect in comb, magnificent in style, grand in plumage, and shown in fine fettle; the second was an imported bird from the yards of Miss A. C. Croad. He was so close to the winner that only 1-2 point separated them; the third cockerel was the World's Fair winner, a grand styled bird, losing to the others in comb, wattles, and leg feathering only. Hens were nearly up to the above class in quality. In cocks, R. O. Campbell won with a beautiful bird in plumage and

style. In pullets the competition was very strong, although the first prize bird outclassed all others in style. She carried herself as a winner, and is probably one of the best pullets ever shown. Another grand pullet was disqualified for bare outer toes, otherwise would have hustled the winner.

White Langshans made a good class, the first pullet and hen being the best in class.

Light Brahmas a very strong class in quality and numbers, Oakland Farm, of Taunton, Mass., showing some grand birds, although Mr. Campbell pushed the winners hard with a very strong team of birds.

In Buff Cochins, Oakland Farm again won first honors with some beautiful specimens, but Alfred Bertlandt demonstrated that he knew what Cochins should be by showing a few excellent Buffs.

In Partridge Cochins Mr. Lloyd's pullet was a gem in color and the best in the class.

The American class was very strong. In Barred Plymouth Rocks the best bird was the first cockerel of R. Y. Hellams. He is a beauty in color and barring. The second was the Hagerstown, Md., winner, not as good as he was last fall. Dr. Tuggle won first and second with some very good pullets, which, if properly conditioned, should win anywhere. The first hen was a fine bird in shape, legs, beak, comb, and well barred, but the second should hustle the winner and beat her with a little more finish.

White Plymouths were very numerous, and I am inclined to think the best class I ever saw, quantity and quality considered. It was a hot fight between H. A. Kuhn and B. T. Smith, but the latter came out ahead. His birds showed splendid white plumage, good legs, and grand size. The absurd idea that white birds cannot be raised in the south without losing their whiteness has been thoroughly exploded. With a little more care in washing and conditioning fowls both Mr. Kuhn and Mr. Smith can win the highest honors at any show.

Silver Wyandottes were the best I ever saw in the south taken as a class, and it is refreshing to meet breeders like Scott Maxwell, who knows what a good Wyandotte should be like. The display of cocks and cockerels was a treat to Wyandotte fanciers. There was not a poor bird in the lot. In pullets the winners were magnificent specimens in lacing, but many of the others were far too dark. Over 300 dollars' worth of Wyandottes were sold during the show, and there is no question of the popularity of this grand fowl.

White Wyandottes made up a fairly good class, but were shown in poor condition.

Hamburgs and Polish small classes, but of good quality.

Leghorns quite strong in Whites and Browns, some very good pullets being shown of the latter variety and one excellent cockerel. Buff Leghorns rather weak in numbers and quality.

Black Minorcas an excellent class, judged by T. F. Rackham and well placed. Mr. Rackham also placed the awards on Dorkings by the score card, which caused him to lose his breath and his nerve, but he handled the pencil and the paste boards in good style.

Indian Games a splendid class, both the first and second cocks being grand specimens in style and plumage. The hens were equally good. In Exhibition Games only a few Black Reds were noticeable, but they were of high quality. In Pit Games there were many entries, but Loring Brown and Col. Ware scooped the deck with a lot of chickens, as they generally do when they show.

The Bantam exhibit was, excepting the Game variety, rather small. The winning B. B. Red Game Bantam cockerel was a good one, but the second came close to him. In pullets P. M. Orth's bird won first and outclassed all others.

The Red Pyle Games were good.

Turkeys made a grand showing, Bartie's Kentucky monsters scooping up ribbons easily, although B. T. Smith's Alabama birds were close seconds.

There was a fair display of ducks.

The awards will be published as soon as the secretary will find time to make them out and forward to us.

Poultry and Pigeons at Rochester, N. Y.

The first exhibition of the Rochester Poultry and Pigeon Association opened at Washington Rink on the 9th, the judges being J. Y. Bicknell, F. B. Zimmer, C. E. Rockenstyre and S. G. Jarvis, but the latter, owing to unavoidable reasons, did not show up. Mr. Bicknell could remain but one day and Zimmer and Rockenstyre really had the bulk of the exhibition to judge.

One word in reference to the officers and management of the Rochester Poultry and Pigeon Association.

Mr. W. J. Harrison, as president, is too well known in this section as an old poultry fancier. Mr. J. J. Sutton, vice-president, is the pigeon fancier of the society, and it was owing as much to his exertions that the pigeon department was so well filled with choice specimens as to any other one officer.

Frank Hilbert, the recording secretary, was enthusiastic and worked so hard that the last day he gave out and went home sick.

Mr. John F. Tallinger, secretary, was head and front of the whole exhibition, and from the day the show opened until it closed was found at his desk in the office. He even slept there and did not leave the rink from the commencing to the ending of the exhibition—his meals being brought into him. To his wonderful work is due the great success of this exhibition.

Fred Guenther, treasurer, every one knows "Happy Fred" as he is usually called, was always found at the desk selling tickets and taking in the cash, which kept him busy, for the Rochester Show paid all expenses and there was a handsome balance in the treasury toward helping the next exhibition.

There were about 1,000 fowls penned, and the classes were exceptionally good.

Am. Class—Barred Rocks, as a class, below the average. I noticed a fair cockerel and quite a nice pullet from Canada; two other quite good cockerels, but no world beaters; two quite nice hens.

White Rocks a class of twenty-five and about an average lot.

In Pea Comb Barred (3) I found the best cock I ever saw, and a good cockerel.

Silver Wyandottes, a small class, but quite creamy. O'Brien of Sherburne was there, and that is a guarantee enough that there was quality shown. Only a small class of Golden, but among them some really good birds.

Buff Wyandottes contained some bang up birds, in fact I came across as good a hen as I remember of seeing before. American Dominiques class not up in G as regards quality; some quite good Black Javas.

Light Brahmas a good class, and some good birds there too. Moore of Trenton Falls top of the heap as usual. Not satisfied with winning 11-12 of the prizes, he bought the winning cockerel to complete his string.

A small class of Dark Brahmas of fair merit.

A large display of Buff Cochins; quite a meritorious class. Several fine birds with pantalettes of the English order, and good even color.

The Partridge class, good in number and of fair quality.

White Cochins a small class, fair in quality.

The Langshans contained some good birds.

The Spanish class was a hummer close to 100 Brown Leghorns and some of them very creamy; over 70 White Leghorns and among them birds of high quality. I noticed among them the whitest cock I ever saw, and Mr. Cornell may well feel proud of him. He will be heard from at New York.

The Buff Leghorn class was the largest class I ever saw at any show; 40 single birds and 5 breeding pens; and Judge Bicknell pronounced the class the best by far ever seen in America. Mr. Ezra Cornell and Mrs. W. P. Wheeler's birds were the equal of most of the Cochins, and even superior in evenness of color to many. Mr. Cornell's Cochins, a fine exhibition color throughout, the buff extending even to the under web of primary wing and tail feathers. Neither black

nor white appears in any part of the plumage. He is a grand bird of the English Lesta Key type. The Buff breeders concede him to be the best exhibition bird which has yet appeared. I am glad to see so fine an American bred bird, and think he will make a hard fight against the imported prize winners if they meet at New York next month. The pullets were a fine lot throughout. Mrs. W. P. Wheeler's pullets scored as high as 93; Mr. Cornell's a close second. All a grand under color.

The Rose Comb White and Brown Leghorns were also out in force and a fairly good lot of birds.

Some first-class Black Leghorns and quite a large class. Only a fair Andalusian.

Black Minorcas nearly 100 and some of the very finest. There were several exhibits that spoke well of their owner's skill as breeders; birds of correct type and great size.

The Hamburg class was another very large class. The Silver Spangled variety were out in force, but Jimmy Hazard was there or rather his birds were, and that tells the tale as to where the prizes went. A nice display of Golden Spangled and a large and good class of both Silver Pencilled and Golden Pencilled. The Black class was a hot one, and a few good Whites.

Houdans was the only French representatives, and no extra good ones among them.

The Dorking class was represented by some good colored birds and a few Whites.

Polish, well yes there was some there. Bryant was on hand with a string of beautiful Whites, and a grand string of White Crested Blacks, and went home loaded (with prize cards). He also won a valuable special for largest exhibit. The Golden and Silver class were only a fair lot.

The Game class was not large, nor did it contain anything wonderful, but still there were a few good average birds in Ducklings, Red Pyles and Brown Reds. To us one grand feature of the show was that only five Pit Games reported for judgment.

The Bantam classes were represented by Golden and Silver Sebrights, Buff, White and Black Cochins, Rose Comb White and Black, White, Black and Black tailed Japs; and I noticed a grand old cock of the last named variety.

A pen of Dominique Bantams. In Game Bantams, were Pyles Brown Reds, and Black Reds, but nothing extra in quality.

The Pigeon class was very large, nearly 300 birds and of good quality.

Ducks, Geese and Turkeys out in force. Long Jim Seeley looked after the laurels on Toulouse and Pekins. I saw a Wolfe prowling around the Bronze Turkey coops and noticed some Turkeys of such proportions that it would take a Wolfe to get away with him.

A pair of White and a pair of Brown Leghorns donated by C. E. Howell for the state collection and mounted at Ward's Natural Science Establishment of Rochester was on exhibition in some of the coops and gave the boys lots of opportunities to laugh to see people reach in the coop to make them stir, and when they saw their mistake cast a glance around to see if anyone had noticed it, and the keepers who fed the birds also fed the mounted birds.

We noticed among the exhibitors and visitors at the show who are known to the fancy: B. D. Sarr, Will Fonda, Geo. Burgoth, C. E. Howell, W. L. Keyes, W. S. Moore, J. F. Knox, Mr. and Mrs. Wheeler, Ezra Cornell, G. M. Diven, John O'Brien, C. L. Miller, Geo. Wolfe, Jas. Seeley, A. A. Parker, M. Kleasen, T. C. Stanton, F. E. Becker, Preston & Newbold, O. E. Wheeler, Roath & Lane, C. Hammersmith, W. Brace, and others whose names we have forgotten at present writing.

THE AWARDS.

BARRED PLYMOUTH ROCKS.—Cock, 2d 88, N. S. Perkins, Fairport, N. Y.; 3d 86, G. M. Dwen, Box 108, Elmira, N. Y. Hen, 1st 92, Perkins; 2d 91½, T. & I. D. Van Wagonan, Greenwich, N. Y.; 3d 85½, 4th 85½, G. M. Dwen. Cockerel, 1st 91½, (tie), H. Emrick, International Bridge, Ont., and Perkins; 2d 90, G. Bateman, Ridge Road, N. Y.; 3d 89½, (tie), T. & I. D. Van Wagonan and J. Voss, Rochester; 4th 89, C. E. Remington, Rochester. Pullet, 1st 93½, Emrick; 2d 91, 3d 90, Bateman; 4th 89½, Perkins. Pen, 2d 172 5-16, D. M. Dwen.

WHITE PLYMOUTH ROCKS.—Cock, 1st 93, Geo. Geimer, Rochester; 2d 86½, Perkins. Hen, 1st 94, Geimer; 2d 93½, 3d 92, 4th 91½, Emrick. Cockerel, 1st 92½, 2d 90½, S. Sisco, Seneca Falls; 3d 90, (tie), Emrick and T. I. D. Van Wagonan; 4th 89½, Perkins. Pullet, 1st 95½, 2d 92, Sisco; 3d 91½, (tie), Sisco and Perkins; 4th 91, pen, 1st 185, Sisco; 2d 182, Emrick.

PEA COMB PLYMOUTH ROCKS.—Cock, 1st 91, cockerel, 1st 90½, 2d 88, Freeman & Button, Cottons, N. Y.

S. LACED WYANDOTTES.—Cock, 1st 91, J. O. Brian, Sherburne, N. Y.; 2d 87½, A. Broxholm, Rochester; 3d 87, Perkins. Hen, 1st 90½, Brian; 2d 89, Perkins. Cockerel, 1st 90, Brian; 2d 89½, D. L. Smith, Lestershire, N. Y.; 3d 87, Perkins. Pullet, 1st 94½, Brian; 2d 93½, Smith; 3d 91½, (tie), Smith and Brian; 4th 91, pen, 1st 183½, Brian; 2d 170½, Smith.

GOLDEN WYANDOTTES.—Cock, 2d 88½, hen, 1st 90, cockerel, 1st 90½, 2d 89½, pullet, 1st 92½, 2d 90½, 3d 90½, 4th 89½, pen, 1st 181½, A. P. Myer & Son, Mohawk, N. Y.

WHITE WYANDOTTES.—Cock, 1st 93, C. N. Mann, Rochester; 2d 91, J. F. Tallinger, Rochester; 3d 88, Perkins. Hen, 1st 93½, 2d 93, 3d 92½, Tallinger; 4th 92, Perkins. Cockerel, 1st 92, Broxholm; 2d 90, (tie), Perkins and Tallinger; 3d 88½, Tallinger. Pullet, 1st 95, Mann; 2d 93½, Perkins; 3d 92½, Tallinger; 4th 91½, (tie), Tallinger and Mann. Pen, 1st 183½, Tallinger.

BUFF WYANDOTTES.—Cock, 1st, W. H. Nicholas & Son, Newark, N. Y.; 3d, E. C. Hawkins, Batavia, N. Y. Hen, 1st, Nicholoy & Son; 3d, Hawkins. Cockerel, 1st, 2d, Nicholoy & Son; 3d, J. W. Caswell, Binghamton, N. Y.; 4th, Hawkins. Pullet, 1st, 2d, 3d, 4th, pen, 1st, Nicholoy & Son.

AMERICAN DOMINIQUE.—Cock, 3d 85½, hen, 2d 88½, J. B. Avery, Stittville, N. Y.; 3d 88, (tie), Avery and B. J. Dodge, Verona, N. Y. Cockerel, 1st 90½, 2d 89, Avery; 3d 86½, Dodge. Pullet, 1st 91½, 2d 89, 3d 87, pen, 1st 179½, Avery.

BLACK JAVAS.—Cock, 1st 93, hen, 1st 95½, 2d 95, 3d 94, 4th 93½, pen, 1st 187½, C. Hammer-schmidt, So. Buffalo.

LIGHT BRAHMAS.—Cock, 1st 91, G. S. Moore, Trenton Falls, N. Y.; 2d 90, Frank A. Tanner, Lyons, N. Y.; 3d 89½, 4th 88½, hen, 1st 94, 2d 92½, 3d 92½, Moore; 4th 90½, H. G. Hotchkiss, Jr., Lyons, N. Y. Cockerel, 1st 93, Hotchkiss; 2d 92½, L. S. Richardson, Newark, N. Y.; 3d 91½, 4th 90½, pullet, 1st 93½, Moore; 2d 92, (tie), Moore and Hotchkiss, Jr.; 3d 91, Moore; 4th 90½, Hotchkiss, Jr. Pen, 1st 184½, Moore; 2d 179½, Tanner.

DARK BRAHMAS.—Hen, 2d 89, 3d 88½, J. B. Huff, Tonawanda, N. Y. Cockerel, 1st 90, John Bidelman, Albion, N. Y.; 2d 87½, Huff; 3d 88½, Bidelman; 4th 88, pullet, 3d 87, 4th 86½, Huff.

BUFF COCHINS.—Cock, 1st 91½, R. C. Clark, Hurfville, N. Y.; 2d 90½, Hilbert & Brayer, Rochester; 3d 90, Clark; 4th 88½, F. Jockey, Rochester. Hen, 1st 94½, Clark; 2d 91½, (tie), Clark, Hilbert & Brayer and Jockey; 3d 90, Gus. Brishin & Co., Clyde, N. Y.; 4th 88, Hilbert & Brayer. Cockerel, 1st 92, Emrick; 2d 91, Clarke; 3d 87, T. & I. D. Van Wagonan. Pullet, 1st 92½, (tie), Jockey and Clarke; 2d 90½, A. W. Horn, Rochester; 3d 90, (tie), Jockey and T. & I. D. Van Wagonan.

WHITE COCHINS.—Cockerel, 1st 92, G. Plantz & Son, Johnstown, N. Y. Pullet, 1st 93, 2d 92½, Emrick.

BLACK LANGSHANS.—Cock, 2d 89½, W. W. Babcock, Addison, N. Y. Cockerel, 1st 94, 2d 88½, pullet, 1st 94, 2d 93, 3d 93, 4th 92½, pen, 1st 187½, Freeman & Button.

PARTRIDGE COCHINS.—Cock, 2d 89, hen, 1st 91, Clarke; 2d 89½, Plantz & Son; 3d 86½, R. F. Seeley, Waterloo, N. Y. Cockerel, 2d 89, Clarke; 3d 88, Seeley; 4th 87, L. Gordon, Brockport, N. Y. Pullet, 2d 89, Clarke; 3d 86, 4th 85, Gordon.

BLACK SPANISH.—Hen, 1st 94½, cockerel, 1st 93½, pullet, 1st 94, Emrick.

S. C. WHITE LEGHORNS.—Cock, 1st 95, E. Cornell, Ithaca, N. Y.; 2d 94, Bronson & Taylor, Albion, N. Y.; 3d 92, C. E. Howell, Elmira, N. Y.; 4th 91, hen, 1st 95½, 2d 94½, 3d 94½, Cornell; 4th 94, (tie), Cornell and J. H. Woodhead, Leicester, Mass. Cockerel, 1st 94, T. & I. D. Van Wagonan; 2d 93½, (tie), Cornell and Bronson & Taylor; 3d 93, (tie), Howell, Cornell and Hammerschmidt; 4th 92½, (tie), Emrick and C. E. Remington, Rochester. Pullet, 1st 96, Cornell; 2d 95½, 3d 95½, Emrick; 4th 95, (tie), Emrick, Howell and Hammerschmidt. Pen, 1st 190½, Cornell; 2d 187½, Emrick; 3d 187½, Cornell; 4th 187½, Howell.

S. C. BLACK LEGHORNS.—Cock, 1st 92½, Brace & Walling, Victor, N. Y.; 2d 92, M. Gabriel, Jr., Buffalo; 3d 90½, Brace & Walling; 4th 88½, J. F. Bryant, Johnson Creek, N. Y. Hen, 1st 94, Brace & Walling; 2d 92½, Howell; 3d 92, Brace & Walling; 4th 91½, (tie), Brace & Walling and W. Selmser, Johnstown, N. Y. Cockerel, 1st 95½, 2d 95, Brace & Walling; 3d 94½, (tie), Brace & Walling and Howell; 4th 94, pullet, 1st 96, 2d 95½, 3d 95, 4th 95, pen, 1st 190, 3d 189½, Brace & Walling; 3d 188½, Howell; 4th 184½, Selmser.

R. C. WHITE LEGHORNS.—Cock, 1st 90½, Bateman; 2d 90, hen, 1st 95, Hilbert & Brayer. Cockerel, 1st 93, (tie), Freeman & Button and G. Oliver, Rochester; 2d 92½, (tie), Oliver and Bateman; 3d 92, Ed. T. Hayward, Jr., Rochester; 4th 91½, Horn. Pullet, 1st 95, (tie), Freeman & Button, Oliver and Bateman; 2d 94½, Oliver; 3d 93, (tie), Hayward, Jr., and Horn; 4th 92, Oliver.

R. C. BLACK LEGHORNS.—Cock, 2d 89½, Perkins; 3d 87½, Brisbin & Co. Hen, 1st 92, (tie), Brisbin & Co., and Perkins; 2d 91, (tie), Freeman & Button and Perkins. Cockerel, 1st 92½, (tie), Freeman & Button and Perkins; 2d 91, pullet, 1st 90, 2d 90, Freeman & Button; 3d 89, Perkins.

BUFF LEGHORNS.—Cock, 4th 84½, hen, 2d 88, Rowe & Broughton, Syracuse. Cockerel, 1st 91½, Cornell; 2d 90, (tie), Mrs. W. P. Wheeler, Geneva, N. Y., and Rowe & Broughton; 3d 89, (tie), Mrs. Wheeler and T. E. Sherman, Franklinville, N. Y.; 4th 87, G. W. Randolph, Palmyra, N. Y. Pullet, 1st 93, (tie), Mrs. Wheeler and Rowe & Broughton; 2d 92½, (tie), Mrs. Wheeler and Rowe & Broughton; 3d 92, (tie), Mrs. Wheeler and Cornell; 4th 91½, (tie), Mrs. Wheeler, Randolph and Cornell. Pen, 1st 182½, Mrs. Wheeler; 2d 182, Cornell; 3d 181½, Rowe & Broughton; 4th 178½, Mrs. Wheeler.

BLACK LEGHORNS.—Hen, 1st 92½, 2d 91, Hilbert & Brayer. Cockerel, 2d 88½, 3d 88, pullet, 1st 94½, 2d 94½, W. C. Denny, Rochester; 3d 93,

4th 93, Hilbert & Brayer. Pen, 1st 181½, Denny; 2d 181½, Hilbert & Brayer.

ANDALUSIANS.—Cock, 1st 90, hen, 1st 94½, Babcock. Cockerel, 1st 94, H. Brantigan, Rochester. Pullet, 1st 97, Babcock; 2d 93, Brantigan.

BLACK MINORCAS.—Cock, 1st 93½, (tie), F. E. Becker, Vine Valley, N. Y., and Roath & Lane, Rochester; 2d 93, Cornell; 3d 90, J. F. Tobin, Rochester; 4th 89½, (tie), Hammerschmidt and Becker. Hen, 1st 95, (tie), Becker and Cornell; 2d 95, Becker; 3d 94½, (tie), Becker and Cornell; 4th 94, (tie), J. Jay Sutton, Rochester, and Tobin. Cockerel, 1st 96, Cornell; 2d 95, (tie), Cornell and Becker; 3d 95, Becker; 4th 94½, Herling. Pullet, 1st 97, Cornell; 2d 96½, (tie), Cornell and Herling; 3d 96, Herling; 4th 96, (tie), Becker, Cornell and Herling. Pen, 1st 192½, Cornell; 2d 190½, Becker; 3d 190½, Herling; 4th 189½, Becker.

W. C. BLACK POLISH.—Cock, 1st 92½, Bryant; 2d 92, 3d 90, Tallinger; 4th 89, 1-2, hen, 1st 94, 1-2, 2d 94, 1-2, 3d 94, Bryant; 4th 93, 1-2, Tallinger. Cockerel, 1st 94, 1-2, Bryant. Pullet, 1st 92, Tallinger. Pen, 1st 188, 1-2, Bryant; 2d 185½, Tallinger.

W. C. WHITE POLISH.—Cock, 1st 93, 1-2, 2d 91, 1-2, hen, 1st 95, 2d 95, 3d 95, 4th 94, pullet, 1st 93, 1-2, Bryant; 2d 92, 1-2, J. J. Hasenaver, Rochester. Pen, 1st 188½, Bryant.

BEARDED S. POLISH.—Hen, 1st 93, 2d 91, 1-2, cockerel, 2d 89, 1-2, 3d 89, 1-2, pullet, 1st 90, 2d 90, pen, 1st 180½, Plantz & Son.

BEARDED G. POLISH.—Hen, 1st 90, 1-2, 2d 89, 1-2, cockerel, 1st 90, 1-2, 2d 88, Emrick; 3d 87, pullet, 1st 92, 1-2, 2d 91, 1-2, Tallinger.

S. S. HAMBURGS.—Cock, 1st 92, 1-2, J. E. Hazard, Elmira, N. Y.; 2d 90, Seeley; 3d 89, (tie), Barbour & Son, Rochester, and Hilbert & Brayer. Hen, 1st 95, 1-2, 2d 92, 1-2, Hazard; 3d 91, 1-2, Seeley; 4th 89, 1-2, Hilbert & Brayer. Cockerel, 1st 93, 2d 91, 1-2, Hazard; 3d 90, 1-2, Seeley. Pullet, 1st 92, (tie), Hazard and Hilbert & Brayer; 2d 92, 3d 91, 1-2, Hilbert & Brayer; 4th 91, pen, 1st 185, Hazard; 2d 180½, Hilbert & Brayer.

S. L. HAMBURGS.—Cock, 1st 92, E. M. Crossman, Batavia, N. Y.; 2d 91, 1-2, hen, 1st 93, 1-2, Emrick; 2d 92, Crossman. Cockerel, 1st 92, 1-2, Hazard.

S. P. HAMBURGS.—Cock, 1st 92, 1-2, hen, 1st 94, Bert Heiser, Albion, N. Y. Cockerel, 1st 92, 1-2, Hazard; 2d 92, pullet, 1st 93, 1-2, Heiser.

G. P. HAMBURGS.—Cock, 1st 93, 1-2, Heiser; 2d 93, Newbold & Preston, Albion, N. Y. Hen, 1st 93, Heiser; 2d 92, 3d 91, 4th 91, Newbold & Preston. Cockerel, 1st 93, Heiser; 2d 92, 1-2, Newbold & Preston; 3d 92, Hazard; 4th 90, Emrick. Pullet, 1st 94, Heiser; 2d 93, Newbold & Preston; 3d 91, Emrick. Pen, 1st 184½, Newbold & Preston.

BLACK HAMBURGS.—Cock, 1st 95, 1-2, C. L. Miller, Addison, N. Y.; 2d 94, Emrick. Hen, 1st 96, (tie), Emrick and Newbold & Preston; 2d 95, 1-2, Miller; 3d 94, 1-2, Hazard. Cockerel, 1st 95, 1-2, Miller; 2d 94, (tie), Crossman and Newbold & Preston; 3d 93, 1-2, Emrick. Pullet, 1st 97, Newbold & Preston; 2d 96, (tie), Newbold & Preston and Miller; 3d 95, 1-2, Newbold & Preston; 4th 95, Crossman. Pen, 1st 190½, Newbold & Preston.

WHITE HAMBURGS.—Cock, 1st 90, 1-2, hen, 1st 93, 1-2, 2d 93, 3d 92, 4th 91, 1-2, Elm Place Poultry Yards. Cockerel, 1st 92, 1-2, pullet, 1st 93, 1-2, Crossman. Pen, 1st 183, Elm Place Poultry Yards.

RED CAPS.—Cock, 1st 90, 1-2, hen, 1st 91, 2d 89, 3d 89, pullet, 2d 88, pen, 179½, F. Guenther, Rochester.

HOUDANS.—Cock, 1st 92, 1-2, hen, 1st 93, Guenther; 2d 91, John Hobart, Chittenango, N. Y.; 3d 90, 1-2, 4th 90, 1-2, Guenther. Cockerel, 2d 89, 1-2, (tie), Hobart and Guenther. Pullet, 1st 92, Guenther; 2d 91, 1-2, 3d 91, 1-2, Hobart. Pen, 1st 184, Guenther; 2d 180, 1-2, Hobart.

WHITE DORKINGS.—Cock, 1st 91, 1-2, H. Hales, Ridgewood, N. J.

SILVER GRAY DORKINGS.—Cockerel, 1st 93, 2d 92, G. Hales, Ridgewood, N. J.; 3d 90½, Mrs. L. Goodell, Canastota, N. Y. Pullet, 1st 91½, 2d 91½, Hales.

COLOR DORKINGS.—Hen, 1st 93, 2d 91½, 3d 91, Mrs. L. Goodell. Cockerel, 1st 94, Mrs. L. Goodell; 2d 92, 3d 89½, Hales. Pullet, 1st 92½, (tie), Hales and Goodell; 2d 91½, Hales. Pen, 1st 186, Mrs. Goodell.

B. B. R. GAMES.—Cock, 2d 88½, J. A. Spraker, Sprakers, N. Y. Hen, 1st 89, 2d 88½, J. A. Spraker. Cockerel, 1st 93½, Pierce Bros., Winchester, N. H.; 2d 91½, H. Bently, Conewango Valley, N. Y., and N. S. Perkins, Fairport, N. Y.; 3d 91½, Bently. Pullet, 1st 94, Pierce Bros.; 2d 93½, Perkins; 3d 91, 4th 89, Bently.

BROWN B. R. GAMES.—Cock, 1st 91, hen, 1st 95, 2d 93, 3d 91½, 4th 92, cockerel, 1st 92½, pullet, 1st 95, pen, 1st 186½, H. H. Harms & Bro., Phillipsburg, N. Y.

G. DUCKWING GAMES.—Hen, 1st 93, cockerel, 1st 94½, 2d 93, pullet, 1st 95, 2d 95, 3d 95, 4th 93½, pen, 1st 188½, O. E. Wheeler, Orangeville, N. Y.

SILVER DUCKWING GAME.—Cock, 1st 91½, O. E. Wheeler.

RED PYLE GAMES.—Cock, 1st 94, hen, 1st 93½, 2d 93, Cockerel, 1st 94½, pullet, 1st 96, Pierce Bros.

BLACK GAMES.—Cock, 1st 95, Harms & Bro., and J. W. Lattin, Albion, N. Y. Hen, 1st 95½, Lattin; 2d 92, Harms & Bro. Cockerel, 1st 96, Harms & Bro.; 2d 94, Lattin. Pullet, 1st 97, 2d 96½, 3d 95½, 4th 95, pen, 192, 1-16, Harms & Bro.

WHITE GAMES.—Cock, 1st 94½, hen, 1st 97, Harms & Bro. Cockerel, 1st 94, Spraker; 2d 91½, Harms & Bro. Pullet, 1st 95½, Spraker and Harms Bros.; 2d 94, Harms & Bro., and Spraker; 3d 94, Harms & Bro.; 4th 93, Spraker. Pen, 1st 189½, Harms & Bro.; 2d 187½, Spraker.

PIT GAMES.—Cock, 1st, 2d, 3d, James Spencer, Rochester, N. Y. Cockerel, 2d M. M. Dodd, Milburn, N. J. Pullet, 1st Lattin.

AZEEL GAME.—Cock, 1st, hen, 1st, 2d, pullet, 1st, 2d, Dodd.

INDIAN GAMES.—Cock, 1st F. & J. D. Van Wagonan. Hen, 1st W. J. Ballard, Rochester, N. Y.; 2d Van Wagonan; 3d E. H. Van Atta, Waverly, N. Y.; 4th Ballard. Cockerel, 1st Van Wagonan; 2d Ballard. Pullet, 1st Van Wagonan; 2d Ballard.

DOMINIQUE GAMES.—Cock, 1st 94, Lattin. S. D. GAME BANTAMS.—Cock, 1st 91, H. T. Williams, Rochester; 2d 88, F. Guenther. Hen, 2d 89½, Guenther. Pullet, 2d 89½, Guenther; 3d 88, Williams.

 LIGHT BRAHMAS.—Cock, 1st 89½, Warbrinton; 2d 87½, Saylor. Hen, 1st 95, 3d 94, Saylor; 2d 94½, 4th 93, Chas. Nelson, Bloomingdale, Ind. Cockerel, 1st 93½, 2d 92, 3d 91, Nelson; 4th 91, Saylor. Pullet, 1st 93, Mrs. Bettie Clark, New Market, Ind.; 2d 93, Warbrinton; 4th 91, Saylor. Pen, 1st 93½, Nelson; 2d 91½, Saylor.
 BLACK LANGSHANS.—Cock, 1st 94, C. J. Stutler, Roachdale, Ind.; 2d 93, Nelson; 3d 92½, Frank Thomason, Roachdale, Ind. Hen, 1st 94½, 3d 94, 4th 94, Nelson; 2d 94½, Stutler. Cockerel, 1st 94½, 4th 92½, Nelson; 2d 94, 3d 93, Stutler. Pullet, 1st 95½, 2d 94½, 3d 94½, Stutler; 2d 94½, Thurston Pickett, Roachdale, Ind. Pen, 1st 94½, 3d 93½, Stutler; 2d 94½, 4th 93½, Nelson.
 S. C. BROWN LEGHORNS.—Hen, 1st 94, 2d 93½, H. C. Nelson, Bloomingdale, Ind.; 3d 93, Orville Collins & Bro., Bainbridge, Ind. Cockerel, 1st 93, H. C. Nelson; 2d 93, Orville Collins & Bro. Pullet, 1st 95, 2d 95, Nelson; 3d 94½, 4th 93½, Orville Collins & Bro. Pen, 1st 93 11-16, Nelson; 2d 93½, Orville Collins & Bro.
 BUFF COCHINS.—Hen, 1st 91½, Warbrinton. Cockerel, 1st 94, 2d 91½, Saylor; 4th, Warbrinton. Pullet, 1st 94, 4th 91½, Saylor; 2d 92½, Warbrinton; 3d 92½, Mrs. Bettie Clark. Pen, 1st 92 11-16, Saylor; 2d 91½, Warbrinton.
 PARTRIDGE COCHINS.—Cock, 1st 85, hen, 1st 90, cockerel, 1st 92, pullet, 1st 92½, 2d 90, Warbrinton.
 WHITE COCHINS.—Hen, 1st 93, pullet, 1st 94, Warbrinton.
 WHITE WYANDOTTES.—Hen, 1st 92½, 2d 92, cockerel, 1st 92½, 2d 91½, pullet, 1st 91, 2d 90, H. C. Nelson.
 HOUDANS.—Cock, 1st 94, hen, 1st 94, Nelson.
 BLACK A. BANTAMS.—Cock, 1st 93, Warbrinton.
 SILVER POLISH.—Cock, 1st 88½, hen, 1st 87½, Warbrinton.
 B. B. R. GAMES.—Cock, 1st 94, hen, 1st 93½, 2d 93, cockerel, 1st 94, 2d 93½, 3d 93, 4th 92½, pullet, 1st 95, 2d 94½, 3d 94½, 4th 94½, pen, 1st 94 5-16, J. A. Gwilliams, Fincastle, Ind.
 INDIAN GAMES.—Cockerel, 1st 90½, J. F. Edwards, Fincastle, Ind. Pullet, 1st 93, 2d 92½, Warbrinton; 3d 91½, A. R. Allison, Bainbridge, Ind.; 4th 91, Samuel Gardner, Fincastle, Ind. Pen, 1st 89 11-16, Edwards.
 GEESE.—Old pair Toulouse, 1st. Old pair Embden, 1st, Warbrinton.
 WHITE HOLLAND TURKEYS.—Old tom, 1st, 2d, young tom, 1st, 2d, hen, 1st, 2d, pullet, 1st, 2d, best collection turkeys, any variety, 1st, S. Gardner.
 BRONZE TURKEYS.—Old tom, 1st, William Hartman, Fincastle, Ind.; 2d, Milbert Saylor, New Market, Ind. Young tom, 1st, M. Saylor; 2d, W. T. Saylor. Pullet, 1st, W. T. Saylor; 2d, M. Saylor. Best collection turkeys, 2d, M. Saylor.
 PEKIN DUCKS.—Young pair, 1st, Gwilliams. P. J. Keller, Tiffin, Ohio, judge.

Additional Awards at Cleveland, O.

PIT GAMES (BLACK REDS).—Cock, 1st, hen, 1st, Ben. Campbell, Cleveland, O. Pen, 1st, M. Cook, Ashtabula, O.
 PIT GAMES (BROWN REDS).—Hen, 1st, 2d, 3d, pen, 1st, G. W. Carter, Geneva, O.
 PIT GAMES (TARTARS).—Cock, 1st, hen, 1st, pen, 1st, W. C. Schmidt, Cleveland, O.
 PIT GAMES (DOMINQUES).—Cock, 1st, pen, 1st, Ben. Campbell.
 PIT GAMES (DUCKWINGS).—Hen, 1st, Ben. Campbell.
 PIGEONS (WHITE TUMBLERS).—Cock, 1st, hen, 1st, Herman Goerss, Cleveland, O.
 INCUBATORS AND BROODERS.—1st, A. Essig, on complete incubator and brooder.

The "World's" Challenge Cup.

TO THE AMERICAN FANCIER:

Will you kindly state that the *New York World* has donated a silver cup, value \$100, to be awarded for best male and female Exhibition Games shown at the New York Poultry and Pigeon Association show, February 8 to 13, to be won three times before final ownership can be claimed, to be known as the *New York World* Challenge Cup.

Will you kindly say that the \$100 cup for the best display of Langshans, should be for the best display of Black Langshans, H. V. CRAWFORD, Sec'y. Montclair, N. J., Jan. 15, '94.

A Breeze From the West.

TO THE AMERICAN FANCIER:

The shows held at Nanaimo, B. C., and Seattle, Wash., were very good. Not so large as our shows in Missouri, Kansas and Nebraska, but stock that would be a credit to any part of the country, and the fanciers are a wide-awake, first class lot of fellows that one feels better after becoming acquainted with.

The new breed Buff Leghorns was well represented at Seattle. In fact, I have never seen as fine a display anywhere, good color, combs and lobes, with fine Leghorn shape. This new breed is making a good showing and will no doubt have quite a run as long as the Buff craze lasts. Whether they are better than the other varieties of the Leghorn family is more than I am able to say. They are handsome when well bred and will no doubt find many admirers.

Regardless of the fact that the editor fails to agree with Arthur Felch on the admission of new breeds, I am inclined to think he came very near preaching good doctrine in his article in the *American Stock-keeper*. There is a limit to all things and I am of the opinion that we went over the limit at our meeting in Chicago on the admission of new breeds. There is no use crying over spilt milk. It is too late now, *so let her go*. If they make a good showing all well and good, if not the breeders themselves are responsible. Irvin Crocker sits down hard on some one because they are not in favor of specialty clubs.

If you refer to me, friend Crocker, I will say that I have not changed my opinion in the least and I believe I have just as good an argument on my side as there is on yours. If there were ten different clubs and ten different shows and ten different styles of judging, you would all have the same Standard for your guide and that Standard is the law laid down by the American Poultry Association, and the birds that win the premiums are birds that conform to that law. That is the whole thing in a nut shell. If you can see where they profit you, all well and good. I fail to see where I can gain a single point unless we leave the Standard out and make a Standard to suit ourselves, which I don't believe any member of the present club would care to do.

I like harmony above all things, and so long as we recognize the A. P. A. as the head of the poultry business, I believe we should follow its teachings or come before it at the proper time and place and present our grievance and ask for an adjustment of what we consider wrong. I have bred Silver Wyandottes since 1880. They were then called the American Sebrights, and I will say that I have never seen the time that I could not sell all the good ones I could breed and that too without the aid of a specialty club.

Regardless of the hard times that are just now being felt all over the west, there are more and better shows this season than there ever were before. It is no uncommon thing to see 1000 birds on exhibition and sales are good in almost all the classes, especially the old varieties, and what is better still the attendance is good. Nearly all of the shows are coming out winners and are making grand preparations for next year. Some have already claimed their dates and contracted with their judges, while others are now figuring with the judges and will claim dates as soon as contracts are signed.

The quality of the stock shown so far this year is simply grand. Of course there are some eastern birds among the winners. I have seen, the feature of Ringlets in some blue ribbon coops of Plymouth Rocks, while that broad skull with I. K. F. stamped on it has flashed on 95 point Light Brahmas.

But those *lads* are not breeding all the good ones by a right smart, and I have handled several that would make them turn green with envy.

THEO. HEWES.

Trenton, Mo, Jan. 7th '94.

Transfer of Stock.

G. A. Fick all of his Barbs to Dr. W. W. White of Baltimore, Md. F. A. Rommell to C. F. Wagner of Mimico, Ont., one pair Black Russian Trumpeters. G. A. Fick to C. F. Wagner one pair of fine Black Swallows.

PIGEONS.

Queries and Answers.

[All reasonable questions of interest to the fancy, pertaining to the care, management and health of fancy Pigeons will be answered in this column. The department is conducted by C. W. Buttles, 1070 Madison Avenue, Columbus, Ohio, to whom all communications should be addressed.—ED.]

Query.—Noting that you have given quite a lot of good common sense advice in this department of THE AMERICAN FANCIER, I would like to ask you a few questions: 1st. Is inbreeding advisable, if so to what an extent? 2d. Should an old cock bird be mated to an old or young hen, to produce the strongest and most hardy youngsters? 3. What is the best general feed to use during the breeding season? A. H. B.

Answer.—I am glad you see a little good in my advice, and hope there are others of the same opinion. In regard to inbreeding, I do not think it is harmful if indulged in to a certain extent, but when that point is reached inbreeding should stop. I think that the best results from inbreeding are obtained in the breeding of Short Face Tumblers, African Owls and Scotch Fantails, where size cuts a great figure. If I had a point in view which could be gotten in no other way, I would mate a young bird to the parent, and young from these back again to the grand-parent. A strain of birds can soon be gotten in this manner which for uniformity of color, size and quality, can never be obtained in any other manner. Beware of introducing new blood, unless you are posted on the breeding of same. 2. An old cock mated to a young hen will produce good, strong youngsters, were the same bird mated to an old hen would produce very few youngsters, and those of an inferior quality. 3. I am aware that few fanciers will agree on a general diet for the breeding season, but I think you will not go far amiss by feeding mainly on good old sound wheat with Canada peas, a little millet, canary, hemp and cracked corn.

Pigeon Notes.

BY JOHN HOPEWELL.

January is the favorite month for exhibitions of poultry, pigeons and pet stock, but what must be a discouraging fact to the pigeon fancier is this, that pigeons as a general thing, receive such a meagre offer in way of premiums at most shows, as to hardly be an inducement for a good breeder to risk his birds, and send them any distance to compete. The fact is that the larger part of our committees, know but little about pigeons even in a gastronomic way; and not until their attention is particularly called to the beautiful features or attractions of fancy pigeons, does the average visitor at our poultry shows see anything in them to excite interest. There is a lamentable ignorance shown in the knowledge of attractive features and as a rule the pigeons are regarded as oddities rather than objects of beauty. Note the interest that the individual with experience shows in his examination of the pretty pets. He knows where to find the meritorious qualities and as he passes along the rows of cages his trained eye detects at once the defects and also the perfect points, and so a visit becomes a pleasure to him. This lack of knowledge is without doubt the reason that exclusive pigeon displays such as the Baltimore show was, are generally so poorly patronized. The thousands of people that visit our dog shows and poultry shows find something of interest there because all know something about dogs and fowls, and dogs are so full of life, animation and intelligence that they excite the sympathy and admiration even of strangers. Fowls, where tame, reciprocate attentions shown them by visitors, but the pigeon is cold and stolid, shrinking from any personal attentions and showing no affection for any one, not even its owner. Hence, visitors not versed in pigeons alone, pass uninterestedly by, their mind confused by the great variety, and their

visit unsatisfactory from a lack of knowledge of what constitutes the attractive features of fancy pigeons. One visit of this kind satisfies, and when the show season comes around again they anticipate no pleasure from a visit to the exhibition and so keep away from it. Exclusive pigeon shows have never yet, to my knowledge proved financial successes, and but for the liberality of a few able and enthusiastic fanciers, they would have been relegated to oblivion long ago. It is a pity that such a condition of things exists, and that pigeon breeding receives no more encouragement from the outside public than it does. But while it has been a matter of thought and study with me for years as to what could be done to make the love for fancy pigeons more general, I find myself getting no nearer the solution of the problem than when I first began. If it could once be made a fashionable "fad" and the wealthy and influential become interested in it, the fancy would have such a boom as it never yet saw. There is an infinite amount of pleasure to be derived from the breeding and keeping of fancy pigeons, but how to know and make the wealthy believe this is the question for consideration. The New York show is a means to this end, and consequently I hope the pigeon display here may be a large one, and the object lesson thus presented, bear good fruit in the right direction.

Pigeons intended for exhibition should be got into the best of condition before the time arrives, and should reach the show room in as clean and unruffled a condition as it is possible for them to be. The washing if one has but few to show can be done by hand, using water about 85 to 90 degrees in temperature, and using the best of castile soap. A little bluing added to the water has a good effect on the after color of the plumage. After first washing they should have a thorough rinsing to remove all traces of soap, and then carefully dried before a fire, the bird taken in the hand and gradually turned and dried. This is a tedious and slow process, and requires some experience to be done satisfactory, but pays when well done. If one intends to exhibit a number where the washing by hand would be too tedious a process. I would advise providing a warm room if in the winter time, and allowing them to take a daily bath in tepid water for a few days before sending to the show. In this way much of the dust that causes the dull look in the plumage, particularly of dark colored birds, will be removed, and the plumage show more richness and glassiness. Carriers and Barbs used to have the wattles of the nose and eyes carefully washed and looked after to remove all gum and dirt that naturally accumulates in those localities. Some fanciers after washing apply a little olive oil, but I should prefer after washing thoroughly, drying with a soft cloth, leaving the wattles thin in a clean and natural condition. The dust or "bloom" I have mentioned above can also be removed by slightly moistening the hands and gently rubbing the plumage downwards or with the course of the feathers. In shipping, as far as possible have your shipping crates arranged so as to keep each bird by itself. This can be done by making partitions of stout cloth, or paste board running them diagonally across the box or basket thus making the apartment or space narrower at one end than the other, conforming to the shape of the pigeon, and so preventing it from turning around and breaking its plumage. Boxes, if used, should be furnished with plenty of air holes, else the pigeon will sweat and its appearance be spoiled. If one has not baskets properly made for shipping, champagne baskets can be fitted as I have described. The bottom should be covered with hay seed chaff, this being dry, absorbent, soft, elastic and sweet; and means should be provided for fastening the lid securely. The custom adopted by some of crowding a quantity of pigeons together in broad shallow boxes is a representative one as birds shipped in such a manner are apt to crowd in the corners pecking and dirtying one another, and arriving in no presentable condition for exhibition. The plan of providing watering cups to the birds while a humane one is against the chances of the bird arriving in good

condition, but if sent on long journeys it seems cruel not to supply something for them to drink from. Still especially as is often the case if the birds travel by night, it is not absolutely a necessity especially if the owner is with them and sees that they have a drink as soon as they are caged in the exhibition pen. Food can always be provided so that a bird need not suffer from this cause. But where possible to ship without water I would advise doing so. Attendants need to be provided who understand handling pigeons when taken from boxes or baskets, as proper handling is another secret of success in the appearance of the exhibition bird. There can no better pens be provided than Spratts exhibition pens and if birds do not show well in them, there is no hope for them in anything.

Honest Illustrations.

TO THE AMERICAN FANCIER:

May I have a word in plea for honesty in the line of illustration? We would pass no censure on the pen and ink sketches of C. W. Buttles' president of the Owl club. His picture shows great care and a commendable degree of skill in delineation. If he does not own just such birds we are glad to see the ideal pictures, they are a stimulus to us all, and they show a standard which is of educational value. Let the *American Stock-keeper* show better pictures, rather than ridicule Mr. Buttles' sketches. Are we to condemn a drawing simply because it shows better birds than ours, and to declare without seeing the originals that the representative is not just?

I trust our Columbus friend will "do so again," and give us his idea of the English owl and the African owl, side by side, if he does not have specimens that come up to his standard.

But for one thing we have no measure of toleration. It is to go to an old work already in the hands of many fanciers, certainly one which every fancier has read many times and long studied, deliberately copy an engraving or wood cut and reproduce it over the words, "Winner at the World's Fair, Chicago, 1893," bred and owned by—Ann Arbor, Mich.

Mr. Editor, whose fault was this? I am sure you did not intend to misrepresent in this glaring manner, in your issue of October 28th. One has simply to turn to "Fulton's Book", and he will find the same "Blue Fantail Cock" identical even to the separating of hairs on a feather and spots on the paper. Moreover the reproduction is by no means a good one and shows the scissor marks where it was separated from its surroundings in the large page. We can say nothing against the use of "The Magpie Pigeon" cut, a like reproduction in the issue of September 2d, for there it is not declared to be the winner of any prize or owned and bred by any fancier.

If one is determined to reproduce in this way, credit should always be given, as carefully as in a reproduced article.

It is also perfectly apparent to any one that the illustration in December 30th of "Black Jacobin Cock", owned and bred by — is a like appropriation although the source we do not now remember. The oriental scenery through the window which is so manifestly ideal, forces to the conclusion that the hood and mane are also ideal. To be sure we do not expect THE AMERICAN FANCIER to be familiar with all the standard illustrations, ten years in print, but we do cry, "Enough", to the man who sends you such reproduced plates as birds of his owning or breeding.

Can we not have a series of original photo-engravings of prize birds? They are not expensive, and the owner of the bird will no doubt be willing to bear half or all the expense, with privilege of keeping the plate. If I were in a city where some first class show is in progress, it would be a simple matter to take snap-shot photographs of the winners, letting the owners get each bird into the best possible position at the instant of the exposure. A dozen such birds could be shown in one cut the size of your first page illustration at an inconsiderable expense. It would be instructive to have specialists indicate with such life-pictures the points where there is a divergence from the ideal standard.

St. Louis.

A. L. LOVE.

The Pouter Again.

TO THE AMERICAN FANCIER:

I have written so much about the Pouter in the last six months that I am "out of stock" on the subject. I don't see why some of our other Pouter men don't favor the lovers of the bird with an article now and then. What great reading it would be to have the Messrs. Acton, Ward, Heroux, Heing, Muehlig, Kuhn, Campbell, Hazeldine, Martin, McClure, and other prominent breeders tell us all they know about that incomparable bird, the Pouter. A few of the above named parties sell hundreds of dollars worth of birds yearly. I think, in justice to the many young fanciers to whom they sell, if for no other reason, they ought give their views occasionally about things concerning the big fellow. But aside from this it is a duty they owe to the fancy to propagate the love of their hobby; to increase the interest in it, and in no way can this be accomplished any better than by good articles on the subject. I am personally acquainted with some of the above and have corresponded with some of the others, and I know if their views were disseminated freely it wouldn't be long until the Pouter ranks would be swelled to double the number of the friends of the bird at present. In fact an article from each one of the above would be as valuable to a young fancier as a copy of Fulton's book would be. And while speaking of the advancement of the fancy and the duty of the fancier, etc., I think it would be a winning card for your paper to give a diagram each week of one variety of pigeons. I don't mean a photograph or a picture of a bird, but a diagram with an explanatory key accompanying it.

If Acton would tell us how he raised those wonderful Reds and Blacks that carried everything before them at the last great show held at Cincinnati; if Heroux would tell us how he raised that long-legged fellow, Rex; if Ward would tell us how he raised that grand Yellow cock that has never been beaten in the show room; if Campbell would tell us how he raised that pair of Reds he refused \$500 for, it would stir up such a demand for good birds that it could not be supplied. This might be asking a little too much, for no one likes to give away a skill acquired by years of study. Still if they did the Pouter fancy might be so educated that every one would know what girth, concave curve in back, fullness at back of neck, keel line, etc., means when it was referred to. A majority of the Pouter men only figure on the length of a bird, size of crop, and actual measured length of legs. They never speak of girth. If a bird is loose-shouldered so much the better, they think, for it makes him look fluffy and larger.

I can come near telling whether I am going to sell a man or not when I read his letter. Often I write some party three or four pages knowing I won't sell him. I give him my views of the proper Pouter hoping at least to get him to thinking. I have converted a few I think, but it has taken lots of ink. The hardest people to convert are the old timers that are always talking about that great big blower they once raised with a nice half moon on the crop out of a speckled he and a yellow she. When they talk like that you might as well agree with them for they are hopeless. I used to raise that kind myself and my stock birds usually came from some man running a coal yard, and I used to get them with the aid of a bean shooter. Oh, I used to have them as good (?) as anybody. My demand on the family grocer for soap and starch boxes was very heavy. I would cut the wings of the birds and then watch them all day to keep the cats from catching them. At night I would take them out with me and blow them up for the gratification of some of my boy friends under the light of some friendly street lamp. Great is the Pouter fancy!

But, seriously speaking, I always did love the Pouter and always will. Gilbert's Fans are elegant I guess; Crawford's Jacobins wonderful no doubt; Orr's Turbits grand, but to me there is only one pigeon and its name begins with a capital P.

Now don't run off with the notion that

I am blind to the beauties of any variety but my own. I simply believe in specialists. It is hard enough to thoroughly master one variety and breed it up to a high state of perfection. Certainly no one ought breed over two kinds. I have several reasons for this. To start out with a stud of *good birds* of any one variety of pigeons it takes about as much money as most men can spare on their hobby. I am sure nobody can buy, say three pairs of typical Pouters, Fans, Jacobins, Carriers, Owls, Turbits, for less than \$100. Well, \$100 is a whole lot of money to most people. And another reason is that to make a success of your following, you must *study* your birds; study them like you used to study grammar at school. One variety will give you study enough to fill in your spare time. The time of nearly all of us that we have to devote to pigeons is limited; consequently if we try to crowd too much in that space, details will be neglected; the difficult problems will remain unsolved even if noticed.

But the best argument I have is that our specialists are the ones most noted for the excellence of their birds. I have never yet seen anyone that could talk intelligently on three or more varieties of birds, and when I say intelligently, I mean it in the full sense of the word. I, myself, know that a Fan must have a wide-spreading, up-standing tail, that its head must rest somewhere on a cushion, that its head and neck must be in continuous motion, and you must talk about the other fellow's pot-lids and scoops, for he has called attention to your split tails, etc. I know that a Jacobin must have a good head, mane and chain, and that the rose ought to be in there somewhere; and I know that your neighbor's Jacks have foul heads and flaring hoods, and your bird's hoods lay very close, etc. I know, too, that an Owl must be small, have a round head and have a frill on the breast, etc., but then I am done. I have never *studied* the birds and study is absolutely necessary. I have old fanciers come in my loft to buy Pouters whose knowledge of the bird is just as limited as my description of the Fan, Jack and Owl would indicate mine is on them.

In conclusion I want to say that owing to insurmountable obstacles I am obliged to retire from the fancy. I am going to sell all my birds. As I see them go one by one it nearly breaks my heart, for nobody on earth can possibly be more devoted to them than I am. In all my writings I have ever tried to be fair and to refrain from personalities, however, if I have aroused the ill will of anyone, I trust they will forgive me for my intentions were only to advance the interests of the king—the Pouter.

H. A. BUDDE.

St. Louis, Mo.

To Members of the Tumbler Club.

It is to be regretted that owing to the widely scattered membership of our Club, it was found impracticable to hold a meeting during the late Baltimore show. This being the case, I feel that it would interest the members to know about how we stand, financially and otherwise, and take this means of communicating with them.

We have at present, twenty-one members, Dr. Chas. L. Lang, Meridian, N. Y., and Mr. Chas. H. Jones, Philadelphia, resigned, both having paid their initiation fees. We have \$28 in cash from initiation fees and annual dues. Eighteen of this is from initiation fees which still shows a few unpaid, and \$10 represents annual dues, (due Jan. 1st) paid in by the following members: Messrs. Gorse, Gill, Whitman, Schimmel and John H. Wagner.

If all initiation fees were paid, and if all members would pay their annual dues promptly, we would have in hand \$63, and by next year, without counting upon any new members, by adding interest, which I will pay, while treasurer, a total of \$66.78. Not a mean sum to invest in specials for next year's shows, or for any purpose tending to advance the club's interests. This amount will in all probability be increased by new members coming in.

As it has been the expressed desire of

quite a number of the members to vote for a new set of officers for the ensuing year, and as this could not be done in a regular meeting, I would suggest that any member who chooses to do so, make his nominations through the columns of THE AMERICAN FANCIER, or the *American Stock-keeper* nominations to close with the last issues of these papers published in this month. This I think will give ample time.

There are only two officers being combined in order to save time and trouble in the way of correspondence, etc. If however, it is the wish of any members to have these offices separated, they can signify such desire by making their nominations accordingly. After the nominations are made, I will place them before each member by personal correspondence in order to receive his vote, and as soon as the result is known it will be duly published.

I sincerely hope that members will not hesitate to place the names of any of their friends in nomination for the office of secretary and treasurer. My reason for making this suggestion is not from any lack of interest in our club, but is based upon the belief that there are others in the club who have more time at their disposal to devote to matters pertaining to the club than myself, and consequently the success of the club would be greater. I would beg to call their attention to the old saying, "a new broom sweeps clean," and I honestly think that it would be a good thing for the club to put in a new set of officers. I have purposely refrained from making a nomination for president, and will not suggest a name for my successor, preferring to submit this matter to the body of the club. There are several first-rate men, and enthusiastic fanciers among the members who would fill either office with honor to the club. In order to save time, I would beg to say that neither Mr. Gaddess or Mr. Gill could be persuaded to accept a nomination.

Now please don't allow this matter to drop, a few words from each member, taking but a few minutes' time, is all that is necessary. If any members prefer making their nominations to me direct, it will answer the purpose just as well and probably better.

FRANK S. WALTON,
Sec'y and Treasurer.

[The Club members should send their nominations direct to the secretary.—Ed.]

An American Band.

TO THE AMERICAN FANCIER:

There has been a world of discussion about seamless bands for 1894, and I think the matter is now solved. Mr. McLean of Charlestown, Mass., wrote me about a band invented by E. F. Webb, 62 Lynde street, Charlestown, Mass., and I sent and got some for '94. It is by far the best band I have seen and being a "combination" band, it does away entirely with the trouble of sending to England for conference bands and then using in addition, a loft register band on the other leg. In short Mr. Webb's band does away with the need for two bands.

This new band is large, light and strong, and the figures and letters are very plain. I consider it the best American band I ever saw.

There is no law in this free country to make us use the English band, and when I show my '94 (or another year) birds, the judge can go by my band or let it alone, just as he pleases. I'm not a bit stuck on the English way. I got a lot of birds over, yesterday, and with the exception of one, of which the breeder wrote that he "tied his tail to protect the blood feathers," I could not tell one solitary bird in the lot. One was the first Crystal Palace hen, but not a mark to show what she was. I suppose he thought I was good enough judge to look the lot over and tell which were the hens, and then, which ought to have won. When I send one a bird, my band shows first who bred it, second what year I bred it, and third what its loft number is. Look at the bands and the loft register does the rest.

Now Mr. Webb's band tells the whole story at a glance. I don't say that this new band is as pretty as a tinted enamel conference band, but I never yet saw a

band handsome enough to make a poor bird win. This band is complete and plain, and that's all I want. I suppose that conceited ass "Senex" will roast me for daring to say that anything can possibly be better than the English conference band, but I shall still continue to think that what he don't know would fill a book as large as Oscar Seiffert's overcoat.

I'm not working for any commission on Mr. Webb's band. McLean said it was just the thing, and I ordered some, and agree with Mac and that settles it.

F. M. GILBERT.

Evansville, Ind., Jan. 10th.

"Abel" Corrections.

TO THE AMERICAN FANCIER:

Please make the following corrections in the list of awards of the Baltimore Association Columbarian show as published in your last issue. In Black Carrier cocks you omitted to state that James Mander, Philadelphia, Pa., won 4th. In Any Other Color Shortface Tumbler cock you give 1st to O. Seifert, when it should read 1st James Hill, Jr.; 2d Seifert. Any Other Color Shortface Tumbler hen, you omit to give Gaddess 2d; Pigmy Pouters any other color hen, you omit to give Havemeyer 3d; Long-faced Muffed Tumblers, bred 1893, you give Blake & Johnson 1st, when F. S. Walton, Philadelphia, Pa., should have the credit. In White African Owl hens, Mr. Geo. Eckert won both 1st and 2d. In Red Wing Turbits you give all the credit to Ryan & Gould, when they only won 3d, and W. T. Levering 1st, 2d, and 4th. In Red Magpies you give 4th to Dorsey, when it should go to R. Joos, Peoria, Ill. In the list of winners of the W. T. Levering specials, you give the credit for best Longfaced Tumbler to Gaddess, when W. W. White, Jr., is entitled to it. Please make the above corrections.

JOHN D. ABEL.

Transfer.

H. L. Hayden has sold to J. Paul Weixlar, Jr., Worcester, Mass., 5 pair Satinettes, 3 pair Blue Barred and 1 pair Laced Blondinettes.

Pigeon Flying.

Notice to Subscribers.

Our subscribers are informed that we have arranged that all inquiries relating to the breeding, training and management of homing pigeons, and upon all questions bearing upon the history of pigeon flying, both at home and abroad, will be answered by "Fritz" through his columns in THE AMERICAN FANCIER weekly, and at the earliest possible opportunity, and should be addressed to

MR. T. FRED. GOLDMAN,

832 Herkimer Street,

Brooklyn, N. Y.

[All matter that he deems of general and practical interest, or of value to the young and inexperienced fancier, will be embodied in his weekly notes, while other matter will be sent direct by mail.—Ed. A. F.]

Points in the Flying Fancy.

A Weekly Review of Events in the Homing World.

BY FRITZ.

I have often been asked, whether I recommend the attempted settling of old birds at a strange loft where they have been kept as breeding stock, also, what are the best means to settle such birds? The most effective method to locate a strange bird, and if once settled down at such strange loft, do I recommend their being entered for races? In connection with the foregoing, a correspondent writes me this week as follows:

"May I trouble you for your advice regarding a splendid 500 miles cock I purchased a few weeks ago from ——. I am going to mate him to a 500 miles hen I own, and which I flew from North Carolina, but I don't want to make her a prisoner, and neither do I want to clip the

cock's wings. Do you think I could settle him, and if so, how would you advise me to set about it? Mr. — will return the bird to me should it fly back to his coop, but I don't want to be bothered sending for the bird by express, nor the expense of same," etc.

This correspondent is in a fix common with young fanciers, and I am very pleased to note his aversion to clipping the cock's flights.

It is an eyesore to me to see Homing pigeons bedaubed with red or yellow paint, but it is positively repulsive and highly offensive to my senses as a fancier, to view any of our game pets degraded by such mutilations as my correspondent refers to. Here is a game bird, who proudly and in the full possession of all of its powers, flew 500 miles, air line to its home. It is transferred to a stange loft for *breeding purposes*.

Can any fancier be so stupid as to imagine that this game bird, with clipped flights, and perforce relegated to the floor of a breeding loft, or a possible handy low perch—*certainly nothing beyond*—is morally fit to transmit his best qualities to young?

Is a bird while in such mortifying, degraded and crippled state, calculated to reproduce desirable young for workers? Is not this sudden transposition and mutilation of his flight power, calculated during such mutilation to dampen his ardor, destroy his best moral condition, and render him almost useless and unfit for the reproduction of snappy, intelligent and vigorous young? My experience years ago and combined search in this direction, fully confirm this, and I unhesitatingly pronounce against this barbarous and stupid practice of so relegating a good bird to the floor of the loft for breeding purposes.

To the thoughtful and thorough fancier the combined imprisonment of Homers *unclipped* in a comfortable breeding loft, with wired in aviary connected on the ground, of ample dimensions, and supplied with all natural necessities except absolute freedom in the air, is the only method to pursue for the reproduction of desirable stock, and even then for but few seasons, for stock is bound to degenerate under such enforced imprisonment.

A good game bird which has proved himself a worker is a difficult thing to settle at a strange loft with any *certainly*, and a hen doubly so. They are liable to leave you at any moment. I would recommend my correspondent to arrange a special corner apart in his loft for this particular pair of birds, connected with an aviary, that they may have entrance to, unless a special loft for prisoners exists. When the pair are well mated, and the cock commences to *drive in earnest*, give them the freedom of the general loft, but with its trap closed for a day. The hen will take him there and bring him back. This is the best known period to locate a cock bird at a strange loft. During the mating period, and a week or two to get settled down, the windows of the loft, the trap, and the aviary have enabled him to become familiar with his new home and surroundings, and then his *warm interest* in his new mate, and *when the driving commences*, I know of no better period to induce a cock bird which has worked successfully to a strange loft to settle down and remain in his new quarters.

I have successfully so settled many such birds, but at the best it is a mere matter of luck and chance, and my advice to the young fancier is to *first secure a few perfect young*, before experimenting with the settling of the parents.

A few pairs of desirable youngsters settled on the roof is worth much more than an unsettled parent in the clouds looking for its old home, and certainly far more than a deserted pair of cold eggs in the pan, upon which the young fancier has built great hopes.

As to the question of training such old birds if successfully located at a new home. Even this has been frequently carried out, and successfully too. This is also a mere matter of luck, but it must

certainly strike any fancier as very risky business, and thoroughly inconsistent with all accepted practice and theory of training Homing pigeons, particularly if the bird's old home lies any where near the course flown over.

Any flying fancier should deem himself as exceedingly fortunate in locating good birds, without tempting fortune further in trying to race them to their new home, for by the very practice he is reviving old memories and capacity, and the chances are in favor decidedly, that the bird will not return to him, at least in racing time, or necessary velocity to be any where in it.

I have so experimented with birds which I received from abroad, but never with any degree of success, except in one instance, and that bird was sent to me a youngster, and untrained abroad.

In attempting to settle strange birds, the very first thing to be considered is not to make the attempt until a reasonable time has elapsed since their imprisonment, with daily opportunity to become familiar with their surroundings, and particularly when the fancier feels satisfied that the birds *behave contented*, are well mated, well fed, and well cared for, and are not handled nor scared. Much stuff has been written about the Homing pigeons' love for its nest and young, its mate, and its particular perch and nest box. Granted, when all these attractions may exist in its original home, but in a new home it will as readily desert one and all as the most hardened and cruel of parents.

And how frequently we may see even in its original home during an enforced absence of a few days only of its mate, either the cock or hen at once enter upon new flirtations, which are immediately followed by a complete new alliance, and the eggs and even young of the former alliance neglected, and finally deserted. Of course there are many exceptions to this, but after all from my experience I cannot view the sentimental side of the Homing pigeon, or real racer of the clouds, so warmly nor confidently as many of my brethren in the flying fancy are apt to do.

In conclusion I recommend the young fancier when trying to settle trained or untrained old birds at his loft to select the period I have touched upon regarding cock birds, and for hen birds, rather late in the afternoon, an hour or so before the time she is accustomed to relieve the cock at nest, upon either eggs a day or so from hatching, or young a few days old. In either case don't have the regular occupants of the loft outside in fresh condition for a fly, but when they have already had ample flight, and ready almost to re-enter the loft.

Startled birds *when once they are on the wing*, are very apt to forget young, eggs, mate, and every bit of comfort their new owner has lavishly expended upon them.

So very many letters have reached me of late regarding seamless bands for 1894, that I would caution again the young fancier against the *uselessness and ill effects of too early breeding*.

Late in February or early March is ample time to mate up your birds and commence breeding operations, and unless you are breeding for *revenue* mainly why should you commence in January or early February? I view with as much disfavor these very early hatched youngsters, as I do those of the other extreme, the late hatched ones.

The flying fancier who is in the sport for recreation mainly, has no needs for either, and the novice, less. I have thoroughly tried both, and I give you the benefit of my experience. Eschew both extremes, for neither are not alone not essential to success, but positively against it.

This is no fad, but knowledge all good flying fanciers have acquired from ripe experience, many hard knocks, and many bitter disappointments of the past. There are many bitter cold and damp days and nights yet before us, and it is surprising what one bitter cold night can accomplish in a loft where the nest pans are well filled with half developed youngsters, on a nasty, cold damp day. Have you not had such experience reader? And

suppose you raise these January and February birds?

It's dollars against doughnuts that your March and April hatched birds in August and September following will discount them in plumage, feather, sprightliness and work, and your old birds in May and June be in 25 per cent better condition for racing.

Apropos of seamless bands, the distinguishing letter for 1894 of the National Association's official issue, is the letter "C," which many no doubt will infer stands for "*Consolidation*," at least so my accomplished brother scribe of the Philadelphia *Item* very ingeniously puts it, "and a goal that all good fanciers have been so anxious to attain during the last few months" and which we are now able to announce has been positively secured. The bands can be now ordered from secretary C. H. Jones, 10 South Broad street, Philadelphia, Pa., by all members of the National association, and are I believe manufactured in German Silver at \$2 per hundred and in aluminum at \$2.50 in any quantities, and from the specimens I have inspected cannot but give satisfaction.

At a recent monthly meeting of the Empire City Flying Club of New York, and vicinity, Mr. Thos. J. C. Clarke, who is a prominent member of this club, and whom all will recall was the easy winner in the Chicago, Ill., race last fall from the World's Fair grounds in the remarkably speedy time of two days, called the attention of the club, and very reasonably, to the fact that up to date he had received no prize nor diploma whatever from the Fair authorities, not even an official announcement from them as to the flight, nor the honors he had so creditably won with his game bird.

The members winning the other honors had the same complaint to make as Mr. Clarke, and I have no doubt all other sections who competed for the prizes are in the same boat. Now this is positively lamentable, and I regret exceedingly that the live stock department authorities of whom Mr. W. J. Buchanan was the chief, should pay so little regard to the many inquiries which I know have been made by the various flying sections upon the question of distribution of the honors earned by them.

The authorities surely cannot intend to repudiate their contracts in this department, and I would respectfully call the attention of Secretary Jones of the National Association of Homing Pigeon Fanciers to this unfinished business.

Perhaps a personal letter from him to Capt. Thompson or W. J. Buchanan might be attended with better results than that which has followed the inquiries of myself and others, and should that fail, then the matter should be introduced to the executive of the National Association for action.

When one considers the number of superb birds which were sacrificed in the flights by the several sections engaged, it seems particularly hard that the fortunate winners of the prizes offered should be compelled to go without them. I cannot possibly reconcile myself to the belief that the Fair authorities contemplate any such discreditable evasion of their contracts. Yet this continued silence upon the subject and delay on their part certainly invites the most unfavorable of criticism.

I hope that from now out the editor of the *Homing Exchange* will not hesitate to draw his blue pencil across communications of the kind appearing in the January issue of that journal from the Minerva Homing Pigeon Club, anent its grievance against the *Item's* editor. The Philadelphia *Item* is chiefly a local sheet so far as perusal of its pigeon flying columns by pigeon flying fanciers is concerned, rarely reaching the flying fancy outside of Philadelphia.

The *Homing Exchange* is more or less distributed throughout the various pigeon flying sections monthly, and presumably represents the National Association. Whatever personal grievance the Minerva Homing Club may have with the *Item* or its pigeon flying editor, such differences should be confined to the columns of the local press, or better not

at all if they are to appear only in the *Exchange*.

The great majority of our pigeon flyers now intend to support *one National Association*, or at least make a year's experiment at it, and such communications and reference to League or Federation as the one I refer to from the Minerva Homing Pigeon Club in the last *Exchange* is scarcely calculated to act as an incentive to such League members not yet enrolled in the National Association who may by chance or otherwise have read the letter I refer to. The Philadelphia *Item* in a recent issue makes the following comment upon the matter: "On September 7, the *Item* took occasion to criticize the members of two local organizations or clubs on account of their opposition to the consolidation of the Federation and League, a scheme that would unite the leading fanciers of the entire country, and by increasing the competition, redound to the best interests of the sport. The Minerva Homing Pigeon Club has thought well to take exceptions to these remarks, and state that its membership favors competition all the time, etc."

The *Item* is glad of it. In relation to the more personal portion of the Minerva Homing Pigeon Club letter it would hardly be wise to start a new altercation when everybody is resting after the recent earnest efforts in favor of peace.

Bravely and sensibly remarked, and let us all henceforth unite in striving to build up the one National Association to a strength it should have attained long ago.

A series of articles upon "The Working Homer" has just been commenced in the *British Fancier* by H. Kendrick, Jr., a writer upon our fancy of excellent style and attainments. I shall follow the series closely, and give to the readers of THE AMERICAN FANCIER such points of new interest and instruction as may appear. The first of the articles is a glance at what the working Homer is, what it has done, and more important still, what it is likely to do in the future.

Of course this latter is a mere matter of conjecture, but Mr. Kendrick is of the opinion that it will accomplish great things. Personally I think the Homer is now at the zenith of its fame, and the variety of uses commercially, &c., to which it can be applied in messenger service, fully and clearly understood.

As to velocity, the standing records of the day, up to date, would appear to leave but small margin for improvement, if at all, and a mere question of condition in the bird, and favorable flying conditions. The improvement of the future so far as we are directly concerned, must I think consist of but *better general average quality* in our flying stock.

As to what the working Homer of today is the picture drawn by Mr. Kendrick is a generally accepted one from novice to veteran. "A good flyer should be smart to look at. There is no doubt that you can to some extent tell the qualities of a bird by its look. It should have that fiery untamed appearance. It should, in familiar language, be *as hard as nails*, that is, its feathers should be close and trim, and kept well down, and it should feel hard in the hand when taken up. This is the ideal working Homer. *We care not what color it is*. Any color under the sun will suit just as well. The one qualification necessary for a Homer is to be able to fly and keep up on the wing." Mr. Kendrick's next article is to be upon the *left* for Homers.

It may not be uninteresting to readers of THE AMERICAN FANCIER to know that this really interesting and capable writer with whom I have the pleasure of a corresponding acquaintance, is very young; exceedingly so, not yet having reached his 20th year, but he has been a fancier for many years and contributed to the English fancy journals since he was fourteen years of age. His first noteworthy attempt as a scribe in the Homing fancy was a series of articles on "Homing," which appeared sometime ago in the columns of the *Homing News*, and although not attracting apparently very much attention, they at least were not unpleasantly criticised, which is somehow the common lot of young

scribes, and Mr. Kendrick thus passed on to greater things. He was soon corresponding with all the principal fancy papers in England, and a recent publication of his "Chats about Pigeon Fanciers" has been well received.

He contributed "Homing Notes" to the *British Fancier* almost from the start of that now prominent fancy journal, under the *nom de plume* of "Craig Royston," and which the readers of my notes may have observed I have quoted from time to time.

The career and capacity of this exceedingly young scribe upon Homing matters is well worthy the attention of our young American fanciers.

As compared with the various Homing journals of our brethren abroad, our American journals are painfully lacking in the variety and quality of their correspondents, as I have on more than one occasion mentioned in my notes, and this from no scarcity of material, but more from excessive modesty and a shrinking from assuming the duties of a scribe or correspondent.

The followers of the various breeds of fancy pigeons in America are very different in this respect, the various journals devoted to their interest being constantly well supplied with communications and articles abounding with interest and merit.

Election of Officers.

TO THE AMERICAN FANCIER:

At a meeting of the East Side Flying Club of Newark, N. J., held on January 2d at its rooms, the following officers were elected: Thomas Schroeck, president; Henry Kirsch, vice-president; Fred. Heiss, secretary; Albert Stein, treasurer.

FRED. HEISS, Secretary.
Newark, N. J., Jan. 9th, 1894.

Meeting of Indiana Fanciers' Association.

The Indiana Fanciers' Association met January 11, 1894, and elected the following officers. The date of the show was not settled but it will perhaps be the second week in January, 1895. The last show paid and have a balance in the treasury. The meeting was an interesting one and a good show next year is assured.

List of officers: President, A. J. Warbutton, Ladoga. Vice-Presidents: J. W. Sutherland, Roachdale; W. Turpin, Roachdale; Isaac Edwards, Roachdale; Samuel Gardner, Racoon. Executive Committee: Geo. Warbutton, Ladoga; Chas. Smiley, Milligan; D. F. Brothers, Fincastle. Recording Secretary, A. R. Allison, Bainbridge. Corresponding Secretary, C. J. Stutler, Roachdale. Superintendent, J. J. Burnside, Milligan. Treasurer, Robert Glover, Roachdale.

SECRETARY CROMACK SPEAKS.

I had heard that there was to be a new weekly poultry paper, but had never seen a copy until two weeks ago some copies coming to me by mail. When I opened the wrapper and the two beautiful numbers were revealed to me, the word "surprise" will convey a better idea of my impressions, than any other. If a competent poultry judge were to *score* THE AMERICAN FANCIER by the Standard, he would find it hard to make any cuts, it is *first-class*. Your list of shows to occur, is the most complete that I have ever seen. The premium list of the fourth annual show of the New England Light Brahma Club will be out the latter part of December. The show comes January 16 to 19, 1894, Faneuil Hall, Boston. Philander Williams, James F. Watson and H. H. Bumford are the judges. G. W. CROMACK.
Stoneham, Nov. 29, 1893.

OCCUPIES A PLACE OF ITS OWN.

Allow a word for THE AMERICAN FANCIER. I have never doubted its success from the start, but was not ready to believe such phenomenal bounds could be made in so short a time. It must be evident to every reader that THE AMERICAN FANCIER occupies a place no other journal does, and in a taste in accord with the most fastidious. Every department is well edited, and the pet stock column is to me a special delight, 'cause no other paper has it. W. F. ROTH, M. D.
Florin, Pa.

NEVER HAD SO MANY SALES BEFORE.

I have this to say for my advertisement which has been running in THE AMERICAN FANCIER for four or five weeks, that I have never had an "ad" bring me half as many letters of inquiry or as many sales in the same length of time. THE AMERICAN FANCIER is a hammer. IRVING CROCKER.
Seneca Falls, N. Y., Dec. 12, '93.

POULTRY.

JAMES H. HOUGHTON, Salem, N. Y.—High Class Black Minorcas (pure Northup Strain). First on pen, cock, cockerel, hen, and 2d hen at N. Y. and N. E. Fair. Clean sweep Cambridge Valley Fair. Cockerels cheap. Eggs in season. Write. *4t21

NOTICE Without any exceptions, we have as fine a lot of Buff Cochins cockerels as can be had; good leg and toe feathering, strong and vigorous. They would please you; we will make prices right; write to-day, don't delay, they will soon be gone. MAPLE AVENUE POULTRY FARM, G. W. Randolph, Prop'r, P. O. Box 725, Palmyra, N. Y. *1am3t21

AMERICAN DOMINQUES.—The Watertown Poultry Yards' stock continues unexcelled. Highest honors at New York, Worcester, Providence, Meriden, Hartford, New Haven and Shelton. A few fine birds left at prices low, considering quality. Eggs in season, \$2 per 13. \$3 per 26. C. S. HUNGERFORD, 121 West 69th Street, New York. *4t21

ASIATIC POULTRY YARDS.—Dark Brahmas, Partridge and White Cochins, Indian Games and B. B. Red Game Bantams, all excellent stock. Eggs in season, \$2 per setting of 15, except Bantams, which are \$3 per setting of 13. A few Indian Game and Partridge Cochins cockerels and pullets for sale reasonably; also a trio P. C. fowls, yearlings. Address C. H. TIL-LINGHASTE, Box 96, Hamburg, Erie Co., N. Y. *4t21

PLUM SHADE POULTRY YARDS. H. Y. EMRICK, Prop'r, breeder of prize winners in Buff and White Cochins, Barred and White Plymouth Rocks, Golden Poland, Golden Penciled Hamburgs, White Crested Black Poland, Buff Leghorns, Light Brahmas, Black Spanish and Aylesbury Ducks. Orders booked now for eggs, \$1.50 per 13, \$2.50 per 26. International Bridge, Ont. 13t21

ROSE COMB WHITE LEGHORNS.—1st and 2d prize cockerels at Cleveland, scores 94½ and 94, \$3 and \$2.50; others, \$1.50. Eggs from R. C. W. Leghorns, S. S. Hamburgs and Black Minorcas, \$1.50 per setting. Send for scores and judge for yourself as to quality. HARDING & MANNING, Office 17 Vestry St., Cleveland, O. *4t21

COCHINS AND COCHIN BANTAMS.—I still have a few Bantams in Buff, Black and White Cochins and Golden Sebright; also a nice lot of White Cochins and 1 pen of Black Cochins. Write for description and prices. *4t21 C. S. WHITING, Darien, N. Y.

A DOLLAR AND A HALF per setting.—Eggs from fine Buff Cochins, Light Brahmas, B. P. Rocks, S. C. W. and B. Leghorns, Houdans and Buff Pekin Bantams. Our breeding stock is strong and vigorous and thoroughly acclimated. J. H. & D. W. ROBINSON, Box 576, Pueblo, Colo. *4t21

BLACK LANGSHANS.—2 pens, 6 and 5 birds, extra good, \$15 and \$12. At Edmeston, N. Y., Dec. 26-29, '93, Drevenstedt, judge: Golden Wyandotte cockerels, 1st and 2d; pullets same. White Wyandotte cockerel, 1st; pullet same; 2d tied; breeding pen 2d, lost 1st by one-eighth point. Birds, \$2 to \$3; eggs, \$2 per setting. *4t21 J. H. MARTIN, M. D., Otego, N. Y.

WYANDOTTES.—C. F. A. SMITH, Waltham, Mass., originator of the "Promoter" strain of White Wyandottes. A few White and Silver Wyandotte cockerels left, that will prove of great value as breeders to you; or a show bird at a reasonable price. *4t21

MUST BE SOLD by March 1st, my entire stock of A-No. 1 Black Minorcas and Golden Wyandottes, also S. C. B. Leghorn cockerels. Prices reasonable and satisfaction guaranteed. *4t21 E. L. REYNOLDS, Mt. Kisco, N. Y.

A BARGAIN.—To reduce stock, I offer one exhibition pen (4 yearling hens and 1 cock) W. Wyandottes for \$13. These in show condition and fit for any competition, hard to beat; are now mated and in prime breeding condition. Also 8 W. Wyandotte and 15 R. C. B. Leghorn cockerels, \$1 to \$3 each, all fine birds; also 1 trio Buff P. Rocks, extra fine birds. All stock returnable if not satisfactory. *4t21 W. F. EVERITT, Westfield, Pa.

LORING BROWN, Bolingbroke, Ga., breeder of choice Pit Games, Light Brahmas, Langshans, Partridge Cochins, Barred Plymouth Rocks, Brown Leghorns, B. B. Red Games, Golden Sebright Bantams, Fancy Pigeons, Scotch Terriers and Beagle Hounds. Stock and eggs for sale. Circular free. 52t21

IF NOT, WHY NOT?—Felton's Golden Wyandottes are the champions of the East. Look at their record at Malden and Clinton, two largest shows of that variety. A few birds, males and females, for sale low. Eggs, \$2 per 15. ¼ *52t2 GEORGE W. FELTON, Barre, Mass.

GOOD STOCK FOR SALE CHEAP.—One trio Dark Brahmas, 1 trio Light Brahmas, 1 trio Buff Cochins, 1 pen Golden Duckwing Games, 1 pen B. Red Games, 1 trio Golden Wyandottes, 3 Brown Leghorn cockerels. *4t20 JENNIE VAISSIERE, Johnstown, N. Y.

I HAVE a lot of Buff Cochins chicks, White P. Rocks and Light Brahmas, will exchange for White Minorcas, or will sell reasonably. *4t21 G. C. MORRIS, Box 260, Sag Harbor, N. Y.

JOHN L. COST, Hagerstown, Md., has for sale 25 Light Brahma cockerels, well matured; must be sold for want of room; price from \$2 to \$5. A few pullets at \$2 each. Write quick; don't miss the opportunity. *4t20

ORR'S MILLS POULTRY YARDS. Orr's Mills, N. Y.—Light Brahmas and Barred P. Rocks of the choicest breedings. Winners at Syracuse, '93. Eggs in season, \$2 per 13. tf20

TOO MANY VARIETIES.—B. P. Rocks, S. C. B. Leghorns, L. Brahmas, B. Langshans, B. Cochins. Will sell the Cochins (13) for \$1 e. ch. The Daisy Farm, W. W. Shepard, Honeoye Falls, N. Y. *4t20

FOR SALE.—Silver Wyandottes, Silver Spangled Hamburgs, Buff Leghorns, Single and Rose-comb B. Leghorns, Barred and White Plymouth Rocks, Indian Games, Shall-neck Games (Grist's), Light Brahma cockerels, Bronze Turkeys, Toulouse Geese, and Pekin Ducks. I have had 21 years' experience in fancy poultry mating and judging. References: Farmers' Bank, A. R. Lette, P. M., Howard Snider, R. R. Agt. Address 2t20 S. D. BENNE, Sunbury, O.

"AUTOCRAT" STRAIN of Light Brahma cockerels, \$3 and \$5 each. 12t20 PHILANDER WILLIAMS, Taunton, Mass.

WESTERVELT HAYWOOD & CO., Ruth-erford, N. J., 15 years importers and breeders Game and ornamental Bantams. 200 premiums past season, including great New York show. White (Booted) and Yellow Fantail pigeons. Birds for sale. 52t3

EXHIBITION GAMES ONLY.—Brown Reds, Blacks and Whites. Have won 1st on Blacks at New York show since 1885. First-class stock for sale. Eggs in season, \$5 per 13. *4t20 H. H. HARMS & BRO., Phillipsburg, N. J.

GAME BANTAM HEADQUARTERS.—B. B. Red and Red Pyle, Thornton strain. Exhibition and breeding birds for sale at all times. Two Golden Duckwing cockerels, 1 Golden Sebright, for \$2 each. Eggs from now on at \$2 per 15, or 30 for \$3.50. *4t20 BERNARD MOHAN, Reading, Pa.

MAYO'S Silver Spangled Hamburgs won 1st and 2d at Hagerstown's great show, 1st at Allentown; equally as well at other shows. Eggs and stock for sale. Hamburgs exclusively. *4t20 JAMES MAYO, Pittston, Pa.

SAY! HERE IS A SNAP.—Send \$3 and take your choice of the following: One White Langshan cock, 1 Black Langshan cock, 1 Buff Plymouth Rock, 1 Buff Cochins Bantam cock, 1 cockerel, 1 Black Cochins Bantam cock, or a setting of eggs, either above varieties. Description upon application. *4t20 J. F. KNOX, Buffalo, N. Y.

NICE BUFF AND WHITE COCHINS. at low prices. 12t20 PHILANDER WILLIAMS, Taunton, Mass.

BUFF LEGHORNS, "East Close" strain, from Arnold's "Best" yard; every bird solid buff. I took 1st and 2d on cockerel, 1st and 2d on pullet, at Cambridge—Rockenstyre, judge. He called "Dandy" the best cockerel he ever saw. Eggs \$3, two sittings, \$5; cash with order. 17t19 JOHN L. RICE, Shushan, N. Y.

SINGLE COMB BROWN LEGHORNS. exclusively. A few choice cockerels and pullets yet for sale. For large size and fine markings my strain is unequalled. For free circular and price-list, address *4t19 REMINGTON HILL, Seneca Falls, N. Y.

PARTRIDGE COCHINS for sale.—Males, \$3 and \$5; pairs, \$5 and \$7; trios, \$7 and \$10; pens, \$12 and \$15. Sherman Hartwell strain; are grand birds, and will give satisfaction. Also Belgian Hares, bucks \$2 each. 52t15 E. L. REQUA, Highland Mills, N. Y.

W. B. SHERRY, Stoney Brook, N. Y., 10 pullets and cockerel, B. Plymouth Rocks, \$15; pair Blue Andalusians, \$3; pair W. C. B. Polish, \$2; 4 hens and cock, Dark Brahmas, \$8; Monitor Incubator, 300-egg, copper tank and boiler, never been used, \$30. *4t19

J. A. SHINEMAN, Fort Plain, N. Y.—Single Comb White Leghorns, at Canajoharie, won 1st and 2d on pens, pairs, cocks, hens, cockerels and pullets; also special (tie) for highest scoring cockerel and pullet in the show. I also breed high-class Barred Plymouth Rocks. Grand birds at low prices and satisfaction guaranteed. *4t18

WINDSOR POULTRY YARDS, Box 368, Taunton, Mass.—A few thoroughbred Black Langshan cockerels, from premium stock, for sale at \$5 each. *4t19

A RARE CHANCE to buy extra fine Barred Plymouth Rocks. I will sell the 1st prize cock at Gloversville, 1893, and two good hens, for \$8; also 3d prize cock, Canajoharie, 1893, \$7. Several good trios at \$6. Must dispose for want of room. *4t19 W. A. FULLER, Fultonville, N. Y.

INDIAN GAMES.—A rare chance to buy extra fine birds at reasonable prices. Owing to lack of room, I will sell all my imported birds, 1 cock, 2 hens (1892), and 4 pullets and 1 cockerel bred from them. They are direct from Messrs. Frayn & Gott, and are equal to anything in this country. Will be sold in one lot or separately. A. C. BRADBURY, Manager, Maybrook Kennels, Englewood, N. J. tf19

LIGHT BRAHMAS.—Ten hens, ten pullets, ten cockerels, from birds that have won first prizes in the hottest competition, four years in succession. Price \$2 and \$3 each. *4t18 C. B. TRAVIS, Brighton, Mass.

INDIAN GAMES AND W. WYANDOTTES—I offer some choice breeding stock of both varieties; prices reasonable. Won 6 prizes at N. Y. and N. E. Fair, and 4 at Cambridge Valley. W. Wyandotte cock 2d at World's Fair (the latter recently added to my yards). Eggs for hatching per setting or by the hundred. *26t17 L. C. FISER, Shushan, N. Y.

WHITE CRESTED BLACK POLISH, Black Minorcas and Light Brahmas. Prices reasonable; quality guaranteed. Address HOWARD M. NEWMAN, Poland, Herkimer Co., N. Y. *13t17

BUFF P. ROCKS and White Wyandottes.—A few trios of each for sale. W. Wyandottes will be sold cheap to close out. tf9 IRVING CROCKER, Seneca Falls, N. Y.

S. C. BROWN LEGHORNS.—I have for sale yet some grand cockerels, beautiful in plumage and style, evenly serrated, five point combs and clean, white earlobes; also a few fine pullets. I always win wherever I show. 39t16 WILLARD SELMSER, Johnstown, N. Y.

FOR SALE.—Three pairs White Cochins Bantams, beauties, at \$5 per pair; 2 Partridge Cochins Bantam cocks, very fine, \$3.50 each, and 6 Black Cochins Bantam hens, Knox strain, at \$2 each; all fit for exhibition now. tf16 C. H. AKERLEY, Gowanda, N. Y.

F. H. COOK, Beaver, Pa., breeder of S. C. Brown Leghorns and Black Langshans, has about 200 head of fine stock for immediate disposal. I can please the most exacting. Fine lobes, combs and plumage has been my object. Satisfaction guaranteed. Prices on application. *4t15tf

DR. WIANT & BERINGER, Marion, Ohio, sole importers of Geffikin's Buff Leghorns. They are buff. 100 extra fine breeders for sale, at \$2 to \$5 each. We must have room, and decided to let them go. Improved Spongia Roup Cure, 25 and 50 cent packages. *13t12

LIGHT BRAHMAS and Mottled Javas. Received premiums at the great Hagerstown, Md., (1893) Fair, viz: L. Brahmas, 1st and 2d on pen, 1st on cock, 2d on hen, 1st and 2d on cockerel and pullet; M. Javas, 1st and 2d on pen, 1st and 2d on cockerel and pullet, 2d on hen. Write for wants. 13t8 JOS. D. HOLLINGER, Mastersonville, Pa.

SILVER CAMPINES.—The new breed from Belgium. Greatest egg producers known. I can supply either the Golden or Silver varieties, and will sell a limited number of eggs for hatching in season. Send two-cent stamp for circular. *26t11 ARTHUR D. MURPHY, Importer, Biddeford, Me.

E. LATHAM, Flatbush, Long Island, N. Y., breeder of the Golden Rod strain of Buff Cochins Bantams. Fine cockerels, pullets and fowls for disposal. This stock is carefully bred; winners wherever shown. Prices reasonable. Gunnywamp Poultry Yards. 52t8

WHITE WYANDOTTES.—I have about two hundred and fifty White and Golden Wyandottes for sale at moderate prices; some of them are A-No. 1 exhibition birds. Address tf9 DR. E. W. DEYO, Montgomery, N. Y.

BUFF PEKIN BANTAMS.—Choice breeding stock at reasonable prices. Entire lot must be sold at once. Write for prices, enclosing stamp. *13t8 J. R. HOGAN, Manager, Saranac Lake, N. Y.

G. E. KEELER, Waterloo, N. Y., breeder of high class poultry: Rose and Single Comb Black Minorcas, Indian and Ky. Dominique Pit Games, Black Langshans. Prime young stock now ready for shipment. Orders for spring eggs booked now. 52t7

H. S. BURDICK, Rome, N. Y.—Fifty Indian Game cockerels, "Agitator," Babcock, Heavy Weight strains, \$2 each; yearling hens, \$2; yearling cocks, \$3; show birds reasonable. Buff Leghorns, "East Close," also Shady Shore strains; yearling hens, \$2 each; exhibition and young stock reasonable. Write. *32t6

PIGEONS.

FOR SALE.—White Chinese Owls only. I have all my 1893 hatched young for sale at from \$4 to \$8 per pair, according to age and quality. Stamp for reply. *4t21 L. B. PRICE, 39 Rear Orange St., Reading, Pa.

FOR SALE.—2 pairs Yellow Pied Pouters, 3 Blue Pied cocks, 1 pair White Fans, 2 White Fan cocks, 2 Crested and Booted White Fan hens. First-class birds, bred from some of the finest in America; \$5 to \$20 per pair. Enclose stamp. THEO. O. TAUBERT, 729 Water Street, Sandusky, Ohio. *4t21

TUMBLERS.—30 pair Short Faces, 20 pair Clean Legged performers, also Booted performers and Inside Tumblers. JAMES HILL, JR., 257 Waverly Ave., Cleveland, Ohio. 13t21

S. E. RABBITT, breeder of Pouters and Magpies. On nine birds shown at New York in 1893, was awarded 1st, 8d and 4th prize on 2 White Pouter cocks; 1 pair Black Magpies, 1st on cock and hen; 2 pair Yellow Magpies, 1st on cock and hen, 2d on cock, 3d on hen. 13t21 1321 10th St., N. W., Washington, D. C.

COMPELLED TO CHANGE my lofts I can only keep a few pair of birds; I therefore offer for sale at give-away prices, 20 pair of Pouters in all colors: 13 Barbs, in black, red, yellow and Dun, one to three years old; 20 pair of Crested Magpies, in black, red and blue; 15 Archangels, bronze; 2 pair Red Crested Helms. Will exchange Red Helms for Blacks. Address 13t21 FRANK ERDELMAYER, Indianapolis, Ind.

FOR SALE.—Twelve pair White Fantails, at \$5 to \$10 per pair. They are from the best stock obtainable in America and England. tf, P. F. HAGER, Nashville, Tenn.

FANCY PIGEONS for sale cheap. Black and Red Barbs, \$2 each, or \$3 per pair; Pied Pouters, \$4 per pair; White Fantails and Black Jacobins, \$3 each, or \$5 per pair. T. D. CAR-DEZA, Germantown, Philadelphia, Pa. *4t21

WINDSOR POUTER LOFT.—My assurance of satisfaction still holds good, as in past years, and to good quality of stock, reasonable prices and correct descriptions I attribute the ever increasing demand for my Blue and Red Pied Pouters. Send for circular, which describes fully my sale birds. 52t21 A. W. MCCLURE, Box 287, Windsor, Ont.

W. C. WEBER, Mahwah, N. J., breeder of first-class Fantails in all solid colors. Reasonable prices. At New York show, 1892, on 8 birds exhibited, was awarded three 1st, four 2d, one 5d, and Special. *4t21

SWALLOWS.—They are second to none and fit to win in any company. Some of them are marked perfect and not a foul feather on them. Prices reasonable. CHAS. LANG, 105 East North Street, Buffalo, N. Y. *4t20

PIGEONS.—World's Fair winners. 75 Pigeons, including 1 pair White Jacobins, 1st cock, 1st hen, World's Fair; 2 pairs Ice Pigeons, 1st plain cock, 1st spangled cock, 1st spangled hen, World's Fair; pair Archangels, 2d cock, 2d hen, World's Fair. Remainder are Homers, bred from Fred. Bowers and Blue Line lofts; smooth head and point crested Light Bronze Archangels, Fetterolf and imported strains; English Booted, high-flying Tumblers, etc. First check for \$75 takes the lot. The prize-winners alone are worth double this amount. All good birds, and many imported. Closing out. 2t20 KARL BJURMAN, Box 186, Wilmette, Ill.

A RARE CHANCE to buy Orientals of the finest strain; Laced Blondinettes, Barred Blondinettes, Satinets, Silverettes and Bluettes. Having bought out the entire loft of Dr. Henry E. Owner, of New York, which was considered one of the largest and finest lofts in this country; these added to my own collection, which are also of the best obtainable, I have, without doubt, one of the finest collections in the world. These are grand in both head and lacing, so eagerly sought for, without any Owl or Turbit blood being infused for many years. I will sell 40 pairs of fine specimens and guarantee them as represented, or money refunded. A special low price to anyone taking the lot. *4t20 H. L. HAYDEN, Plymouth, Mass.

FOR SALE.—The finest lot of fancy pigeons and poultry I ever owned, such as Pouters, Carriers, Jacobins, Fantails, Ural Ice Turbits, Tumblers, Dragons, Barbs, Moor Caps, Homers and Swallows. Also White and Barred P. Rocks, Leghorns, Cochins, Minorcas, Bantams, Spanish, Langshans, Games, Dorkings and Brahmas. Write for prices. *4t20 J. H. MEHRING, Littlestown, Pa.

8 PAIR ROLLERS, 7 pair Jacobins (reds), 15 pair Blue Fantails, 10 pair Magpies, 4 pair White Fantails, 2 Red Fantails, 8 Black Fantails, 6 English Carriers, 2 Yellow Jacobins, 8 Turbits. The lot cheap if taken at once. These birds are first-class and satisfaction guaranteed. *4t20 EDWARD H. JONES, Ashtabula, O.

BEAUTIFUL BIRDS AT A BARGAIN.—Our entire lot of solid White Muffed Tumblers, consisting of 10 pairs, to be sold at once. All have white beaks and pearl eyes. The only exclusive breeders in America. \$15 per pair. BESCHE & LANGVILLE, 1241 William St., Baltimore, Md. *8t20

D. A. TEETER, White House Sta., N. J.—On account of removal I am compelled to sell cheap, Fantails, Tumblers and Antwerps; also odd Tumbler hens in solid yellows. Write for wants; no fancy prices as they must go quick. *4t20

YOUNG OF 1894 GOLDMAN ("Fritz"), 832 Herkimer St., Brooklyn, N. Y.—I am now prepared to book orders for March, April and May hatch surplus young; supply limited. No one need apply unless prepared to pay from \$2.50 to \$5 per bird. 13t19

HOWARD MEHRING, Littlestown, Pa.—For sale, 2 pairs Red Pied, 2 pairs White Pouters, 1 pair Ice Pigeons, \$5 a pair; 1 pair Black Nuns, \$2; also Eng. Carriers, Fantails, Turbits and Homers. Stamp for reply. *4t19

FIVE PAIRS of Birmingham Rollers, bred from Red and Black Saddles and Badges; all good flyers and nice performers, and fairly well marked. Will be sold very low if taken in a lot. CHARLES LIENHARD, 438 W. Court St., Cincinnati, O. *4t19

HIGH-CLASS FANCY PIGEONS for sale. —Closing out sale of Fans, Jacobins and Trum-peters, \$2 per pair. Also high-class Black Minorca fowls for sale, or will exchange Minorcas or the above varieties of pigeons for Pied Pouters. *4t18 F. E. HOOKWAY, Wooster, Ohio.

HOMERS FOR SALE CHEAP.—Having more birds than I care to handle, I will dispose of about a dozen—all trained. Address WM. BOOK, JR., 139 Magazine St., Newark, N. J. 13t17

THE HOMERS I use as breeders are: Eight 582-milers, sixteen 451-milers, twenty-two 300 and 507-milers, all my own breeding and training. Youngsters and record birds for sale at all times. Descriptive circular describing my record breeders now ready for distribution. ¼ *52t7 O. F. CONNELLY, Carlisle, Pa.

FOR SALE CHEAP.—A very fine lot of Booted Tumblers, in black, red, yellow, black mottles, blue and white solid color; also dealer in all other varieties of pigeons. M. SCHEIN, 619 S. Charles Street, Baltimore, Md. 13t13

WHITE PIGMY POUTERS. Homers, African Owls and close performing Tumblers. These birds are all solid white, sold for room only. J. GEO. NAGELE, 301 S. 20th St., Philadelphia, Pa. *13t12

MORRIS PARK COLUMBARY.—Jacobins only. Having bred quite a number of fine birds the past season, I am compelled to sell some at a sacrifice to make room. These birds are bred from best imported and domestic stock and fit to show in any company. For particulars, address C. A. KOEHLER, 17 DeKalb Ave., Brooklyn, N. Y. *1312

TURBITS.—Mr. GEORGE TURNER, Mich-aelchurch, Ross, Herefordshire, England, Turbit specialist, breeder of winners of Premier awards at all important English shows and at the largest American shows, has show and stock Turbits for sale. It is an acknowledged fact that several of the most successful English exhibitors owe their success to birds obtained from these lofts. Ex-president of the Turbit Club. tf6

FOR SALE.—About thirty White Fantail pigeons, surplus stock. I am compelled to close these birds out at once, therefore offer them very cheap. Prices from three to ten dollars per pair. *1310

W. P. HOWE, 121 N. Vine St., Nashville, Tenn.

HAVING been very successful in raising young this season, to make room I offer for sale a choice lot of Turbits and Owls, all colors, out of the best and most noted strains. Also Bald-head Tumblers, "Gadness" strain. This is a rare chance to get first-class birds at a reasonable price. CHARLES SCHMENNER, 511 W. Bidle St. Baltimore Md. 1310

POUTERS.—All my birds for sale excepting several pairs. Everyone of them Geo. Ure strain. Only blacks, reds, yellows. A rare opportunity to buy good birds cheap. Better write quick. Have only thirty for sale. *2619

H. A. BUDE, 113 Market St., St. Louis, Mo.

R. B. YOUNGS, 612 G St., S. W., Washington, D. C., breeder and flyer of the Fast Flying Virginia Strain of Homing Pigeons. Also breeder of Fancy White Pouters. Surplus stock for sale. tf1

THE KENNEL.

SURE MIKE!—I have got them, another fine litter of Black and Tan Collie puppies, very fine, from imported stock. Dog puppies, \$8 each. Satisfaction guaranteed. Also one dog puppy, six months old, \$10. *112

C. R. TEARS, Walden, N. Y.

BRADLEY BROS.' BARRED P. ROCKS.

For many years our breeding has taken First Prize at America's best shows. Our New York
record, especially on Cockerels and made in hottest competition, has not been equaled by any ex-
hibitor for 6 years. Stock for sale from such males as New York Champion of '92. First at New
York Show; Madison Boy, headed first prize pen at that show; Albany Boy, refused \$100 for
him; and sons of New York Champion 94½ and 95 points. Grand exhibition stock a specialty.

BARRED PLYMOUTH ROCKS,
BLACK WYANDOTTES,
BLACK LANGSHANS,
BROWN RED GAMES.

Our Rocks are as good as can be found in
America. They have won everywhere shown.
Our pens contain many prize-winners at the
two largest exhibitions in the United States.

Our Wyandottes are winners at the largest
shows in the United States and Canada.

The Langshans are winners at the largest
shows.

Brown Red Games have won at New York,
Worcester and at the largest Canadian exhibi-
tions.

No better stock in America. See FANCIER
for recent winnings of above birds. Eggs, \$3
per setting; two settings, \$5.

BREEDER OF CHAMPION
African Owls,
Tail Turbits
and Jacobins.

Intending only to breed African Owls, in all colors, and Tail Turbits, I will offer for sale an exceptionally fine stud of Jacobins, comprising about 40 elegant birds, in reds, blacks and yellows. These birds are all bred Peer, Ward and Ewald stock, and are grand in hood, maul and chain, extra long and close feathers. Will sell in pairs at \$5 to \$20 per pair, or the lot at a low price. You will miss it if you don't secure a few pairs. Have also a few African Owls and Tail Turbits to spare. Pair of Black Tail Turbits, cock 1st and hen 2d at Louisville show, price \$15. Postals not answered; stamp for reply if convenient.

HARVEY SEED CO., BUFFALO, N. Y.

POUTERS EXCLUSIVELY.

I have made a specialty of the above for a great many years past; while I do not wish to indulge in pretentious claims, I hope I may be pardoned for feeling proud of the reputation gained by my large display at all the principal shows in this country for the last five years.

With a great deal of pleasure and satisfaction, I wish to inform my friends and patrons of my good success in raising Pouters during the last season; as a consequence, I am offering at prices abreast of the times, **ONE HUNDRED** splendid specimens of great individual merit, and bred in the purple. Old breeders know, and beginners soon learn, the necessity of breeding only from birds of the best established strains, if they aim at the production of the Pouter to its highest degree of perfection.

Believing that my reputation for honest dealings is so firmly established as to render further comments unnecessary, I will simply add that I shall, as in the past, willingly refund the money should the stock prove unsatisfactory, if returned within two weeks from time of shipping. This is considered the best guarantee of fair and square dealing. 26t16

HOG AND CHICKEN CHOLERA.

I HAVE A SURE, TRIED, PROVED AND guaranteed cure for Hog and Chicken Cholera, which has stood the test of six years in thousands of cases without a single failure. My father (the originator) is, and has been for forty years, one of the leading farmers and hog raisers of this county, and has lost a great many hogs and chickens with cholera, but has never lost a single one since the discovery of this remedy. One dollar will buy enough of the ingredients at any drug store to cure from 50 to 75 hogs. I will send the recipe and a family right for 50 cents, (the price is \$1.00). This is nothing, compared to its real value. Send now and use the remedy and you will never lose a hog or chicken with cholera. Send within 20 days, and will send you a book worth \$1.00, that should be in the hands of every farmer and poultryman in the land. References: My postmaster, express agent, or any business house or good citizen in this town. Agents wanted. Write for terms. Address

"Duke of Lancaster"

Game Bantam Yards.

"DUKE OF LANCASTER" was the finest Black Red Bantam male bred and shown last year; the mate scoring 97½ points. They were from my yards, and I have about 75 like him to sell—some as GOOD, some BETTER and ALL extra fine in standard characteristics. My stock is pedigreed from Thornton's imported "CHAMPION" (1890 and 1891), the greatest winner in ENGLAND and AMERICA ever shown. I claim this to be the grandest lot of Black Red Game Bantams ever reared by one breeder in one season. My RED PYLES are as good as my Black Reds. Write at once.

THE THING.

My ENTIRE STOCK of DUCKWING GAME BANTAMS, consisting of One Cock, Seven Hens, and Twenty-five Young Birds of this year's breeding, for sale. A low price will be named for the lot.

The Reason of the Thing.

My other duties are so encroaching upon my time that I must reduce the stock I keep.

The Advantages of the Thing.

Are all with the buyer, for he can at once obtain a stock from which he will be able to select some remarkably fine birds, at a price which is way below the market quotations.

The Conditions of the Thing

Are that the lot be taken by the buyer and the order be received within a short time. If I sell the birds in small lots I shall expect much better prices than if they go in one lot. Cash with order. ORDER NOW.

REPORTER PRINTING HOUSE, Wellsville, N. Y.

THE IMPROVED FLOWER CITY INCUBATOR is one of the most successful machines on the market. No day or night watching to be done with these machines, by no means, and the expense to run these incubators is but one cent every 36 hours for oil. These are no skeleton machines, but are all packed with 2½ inches of packing, which will hold the heat with change of weather. We offer *one hundred dollars reward* for any incubator we send out that fails to hatch, if our directions are followed. No handling or touching eggs in turning them; they are all turned from the outside of machine with just one move of the hand, without opening the machine; you push the button and the eggs are all turned, every one of them. Nothing to get out of order on these machines. They are warranted for five years, but will last five times that length of time with proper care. Record made at Western N. Y. Fair, September last, 95 per cent. straight.

We also breed Silver and Golden Sebrights, Black and White Rose Combs, Japanese, Buff Pekins, White Booted and White Polish Bantams. Also Brown Reds, Duckwings, Pyles and Solid White Game Bantams. In large Games: Black Reds, Duckwings, Brown Reds, Pyles, Solid Whites, Solid Blacks, Black Red Malays and Black Sumatras. Also Buff Laced Polish, Buff Leghorns, Buff Cochins, Partridge Cochins, White Cochins, Dark Brahmans, Black Russians, Jersey Blues, La Fleche and Silkies. The above are all of the best we could buy. A few birds for sale, (not given away). Eggs in season, at \$3 to \$5 per setting. Every one that purchases from us one incubator with one brooder, will be furnished free with \$6 worth of eggs or stock of any of the above varieties.

We are also agents for the great Webster & Hannum Green Bone and Vegetable Cutters; always takes first prize wherever shown; these are no man-killing machines; we pay all freight on these machines. Also clover cutters, best drinking fountains, tested thermometers, and the best silver finished wire netting for poultry runs, etc. Always enclose stamp for catalogue or answer, (postals not noticed.) BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition, with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price. \$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price. \$2.00

Book of Poultry

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price. \$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth. \$1.00

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price. \$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price. \$0.50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price. \$0.50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price. \$0.50

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price. \$0.50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price. \$0.25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price. \$0.25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper \$0.50

PET STOCK.

Birds and Bird Keeping in Cage and Aviary.

A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price. \$0.15

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price. \$0.25

English Books in Stock.

THE LANGSHAN FOWL. A Complete Treatise on the History and Characteristics of this Popular and Profitable Breed. By Miss A. C. CROAD. \$1.00

HOW TO MAKE £50 A YEAR KEEPING DUCKS. By HENRY DIGBY. This is a nicely bound book, and contains in connection with the above an article on Geese and one on the Turkey. 1.00

THE HIGHFLYERS' GUIDE (SMITH), or How to Train Tipplers, Tumblers, Rollers, etc. Invaluable to pigeon men. 1.00

STUD REGISTER FOR PIGEONS. By RICHARD WOODS. Very complete. 25

PIGEONS. Their Origin and Variation, with Illustrations on their Housing and Management. By Rev. W. F. LUMLEY. 50

FANCY POULTRY. Breeding and Feeding. By ALEXANDER COMYNS, B. A., LL.B., Editor of Poultry. Bound in paper. 50

VALE'S MANUAL OF POULTRY DISEASES. By W. VALE. Complete in every detail, with full description and cure for every disease. Bound in paper. 50

THE TURKEY. Its Characteristics, Varieties, and Management. By Mr. WILLIS-HARRIS, Vice-President of the Turkey Club. 50

THE LONG-FACED TUMBLER. A complete and comprehensive treatise on the different varieties of the Tumbler pigeon. By HENRY CHILD. Price. 50

THE JACOBIN. Its Breeding, Management and Exhibition. By JOHN WATERS. Price. 50

THE MINORCA FOWL. By T. H. HARRISON. Complete and fully illustrated. Price. 50

THE ANDALUSIAN FOWL. By L. C. VERREY. Price. 50

THE LEHIGH FOWL (3d Edition). By L. C. VERREY. Illustrated by Ludlow and showing the difference between the American and English Leghorn. Price 50

HOW TO BREED AND REAR BANTAMS. By L. C. VERREY. Price. 50

FRENCH BREEDS OF POULTRY. By L. C. VERREY, assisted by the best French authorities; very complete. 50

THE TURBIT PIGEON. By the Rev. W. F. LUMLEY. Fully illustrated and very complete. Price. 50

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of Perfection

This is the only authorized publication giving a complete description of every breed of fowls recognized by the American Poultry Association, the only representative body of poultrymen in this country. Remember, this invaluable book is fully protected by the United States, it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar, but

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24 page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it

For Nothing

By simply sending the amount to

BLUNCK & DREVENSTEDT, Publishers,

Jan. 28-31. — Utah Poultry Association, Salt Lake City. Theo. Hewes, judge. J. W. Haslam, secretary. W. W. Browning, president.

Feb. — Cape Ann, Mass. Geo. E. Merchant, secretary.

Our Clubbing Offer!

We have decided to club any of the following monthly poultry publications with THE AMERICAN FANCIER at the uniform price of \$1.50. You get two papers for the price of one. Here is our list:

Poultry Monthly,
Ohio Poultry Journal,
Live Stock Monthly,
Farm Poultry, Poultry Keeper
New England Fancier,
Midland Poultry Journal
Fanciers' Review,
Southern Fancier,
Practical Poultryman and
Western Poultry Breeder
Colorado Poultry Journal,
Homing Exchange,
Michigan Fancier
Michigan Poultry Breeder,
Game Fanciers' Journal

A WEEKLY JOURNAL DEVOTED TO
POULTRY, PIGEONS AND PET STOCK.

Issued every Saturday at
JOHNSTOWN, NEW YORK.

BLUNCK & DREVENSTEDT,
PUBLISHERS.

To whom all remittances should be made payable.

Terms of Subscription \$1.50 a Year
in advance.

In clubs of five or more \$1.00.

Foreign Subscribers, \$2 (8s. 4d.).

J. H. DREVENSTEDT, Editor.

POULTRY.

From the Editor's Perch.

The A. B. C. of poultry culture is the
title of a new book by J. H. Davis, editor
of the *Fanciers' Review*. It is a practical
book designed for beginners. Mr. Davis
writes in an entertaining manner, and
knows how to convey on paper his learn-
ing and experience without being prosy.
His ideas are often original, albeit his
opinions are frequently a little too
radical, but the whole book bears the
stamp of sincerity and deserves to be
read by every chicken crank, whether un-
fledged or fully moulted. It is exceed-
ingly well printed and cheap at 25 cents,
the price asked for it.

"Si Twist" of the *Southern Fancier*
and editor Curtis of the *Reliable Poultry*
Journal are exchanging pretty compli-
ments about "the editor's wife," and "Si"
would like to dine at the table she pré-
sides over. He is getting tired of hog,
hominy and bachelor's hall. The best
thing "Si" can do is to get married. It
will help his digestion and his French,
without taking the edge off his bright and
witty sayings. "Si" is good looking
enough to marry a princess.

F. M. Bronson of Vermontville, Mich-
igan, reports increased sales for his
famous Roup tablets. To judge by the
many favorable testimonials he receives
from leading fanciers, his goods are fully
what he claims for them.

"Uncle Tom" Rackham is now on his
annual southern tour. A letter received
from him dated from Richmond, Va.,
says: "Largest show ever held in Rich-
mond. About 3000 entries of poultry and
pigeons, in a grand, well lighted building,
with plenty of room. Spratts coops
looked fine. Spratts also fed the birds
with their prepared food in the morning,
corn and other grain at night, with a
liberal supply of shell and grit, pens
littered with straw. The birds looked
as well at the end of a ten day show, as
they did when they entered, and ten
days is a great test you know," are the
words of Superintendent Turner. I only
had charge for Spratts and judged the
pigeons. Abel F. Stevens judged the
poultry. No grumbling."

Of the exhibits Mr. Rackham writes:
"Quality of birds at southern shows much
better than in former years. Pit Games
were great in quantity and quality.
Brown Leghorns, Buff Cochins, Barred
Plymouth Rocks and Indian Games the
best and strongest classes."

Franklane L. Sewell, the artist, will be
at Kansas City during the great Mid-
Continental show, to sketch the winners
and enjoy himself. His little farm in
Michigan affords him the needed outdoor

exercise, and although not extensively
engaged in poultry experiments, he can
steal a couple of hours each day away
from his studio to enjoy the pure air and
sunshine in company with the feathered
bipeds he is so fond of.

A Water-Fowl club has been organized.
Mr. J. C. Harvey of Brookdale, New
Jersey, is the secretary. The latter
would be glad to hear from all breeders
of the web-footed feathered tribe for the
purpose of enrolling them as members.
There is already excellent timber in the
club, and we are confident that it will
prove a benefit to its members as well as
increase the interest in water-fowl in this
country.

E. B. Thompson of Amenia, N. Y., re-
ports the largest trade in Barred Ply-
mouth Rocks he has ever done, and
believes the old American breed is more
popular than ever. The fact is, trade in
all kinds of poultry has improved greatly,
notwithstanding the hard times of the
past 12 months. The demand for show
birds is immense.

The Allentown Poultry, Pigeon and
Pet Stock Association will hold its first
annual show December 24th to 29th. It
promises to be a most excellent exhibition,
the city of Allentown containing many
enthusiastic fanciers. John W. Yoachim
is the secretary.

Miss A. C. Croad of Poling House,
Poling, Arundel, England, sends us an
interesting letter on Langshans, which
will be published in our next issue.
Miss Croad inquires as to the identity of
"Zim." The latter is F. B. Zimmer,
Gloversville, New York, U. S. A.

S. K. Wilcox of Smyrna, N. Y., informs
us that there is a probability of a show
being held in his place next winter. If
the enthusiasm of the fanciers in that
section can count for anything, a show
would be a success from their standpoint.
Whether the gate receipts will help to
make it a financial success is a difficult
and at the same time serious problem to
consider.

One of the most enthusiastic members
and officers of the Troy Poultry, Pigeon
and Pet Stock Association is G. B. Moffatt.
He generously offered to supply all the
material for littering the coops gratis,
and also donated a handsome silver cup,
value \$25, offered for the best display of
turkeys. What is more, Mr. Moffatt is a
director who *directs*, and one who thor-
oughly appreciates the responsibility of
his office. The Troy show is certainly
engineered by a lot of hustlers and work-
ers.

Pet stock also will be one of the great
features at Troy. Superintendent Rich-
ardson is the right man in the right place
and will wake up the rabbit fanciers to
make a big showing in the city of collars
and cuffs.

Our English exchanges of October 12th
all contain long and interesting reports
of the famous Dairy show. The latter
is the first of England's great trio of
poultry exhibitions, viz.: The Dairy,
Crystal Palace, and Birmingham. The
show was a success, we understand, in
every particular. What a gratification it
must have been to the throngs of visitors
to find the entire show judged when they
arrived! Would that such methods were

more prevalent at our American shows!
We often wished that New York would
follow the example of the Dairy, Crystal
Palace, and Birmingham shows in not
allowing either visitors or exhibitors to
enter the exhibition hall on the day of
judging. There is no better, safer, or
more reliable way of judging a show
than to close all doors and turn the
judges loose and make them go to work,
and not allow them to escape until all
ribbons are placed. This is the English
method, but it "gits thar," and gives a
satisfaction to exhibitors and visitors
which no other method can give.

In looking over the prices realized for
winning birds at the Dairy, we deem it
of sufficient interest to reprint the
following sales, taken from the *Fanciers'*
Gazette, England:

Mr. W. S. Brewer's 1st Minorca pullet,
entered at £6 6s., which fetched £9 5 0
Mr. F. Jeffery's 1st Plymouth Rock
pullet, catalogued at £8, made 11 0 0
Mr. W. Slater's and Rock pullet made 8 5 0
Mr. J. Procter's 3rd Silver Wyandotte
pullet made 7 10 0
Mr. T. Millard's pair of Langshan sell-
ing class pullets made 5 15 0
Mr. W. P. Ryland's 1st Minorca cock-
erel (selling class) made 4 5 0
Messrs. Mogridge and Garlick's 1st pair
of Minorca pullets made 3 10 0
Messrs. Cook and Fletcher's 1st selling
class Leghorn cockerel 3 10 0
Mr. J. Hurst's 1st selling class pair of
Brown Leghorn pullets 4 12 0
Mr. Sandercock's 1st selling class Ply-
mouth Rock cockerel, entered at
£2, made 8 0 0
Miss Maxwell Stuart's 1st selling class
pair of Rock pullets made 4 5 0
Rev. Fitzroy Lloyd's 2nd pair of Rock
pullets 4 0 0
Mr. F. Jeffery's 4th pair of Rock pullets
Rev. R. F. Maynard's Wyandotte
cockerel 4 0 0
Rev. R. F. Maynard's 2nd pair of
Wyandotte pullets 4 5 0
Mr. T. Saunders' selling class And-
alusian cockerel made 4 15 0
Messrs. Ainscough's 1st selling class
Game Bantam cockerel made 6 5 0

It will be seen that the American
favorites, Plymouth Rocks and Wyandottes,
averaged the best from the high
figure standpoint. Over fifty dollars paid
for the winning "Rock" pullet is not to
be sneered at, but all reports state that
she was a beauty. Wyandottes are prime
favorites in England, which is not to be
wondered at, their intrinsic value and
the fact that our English cousins are a
nation of fanciers being responsible for
this state of things. Wyandottes are not
stabbed in the dark over there by
mercenary fanciers (?) of other breeds as
they are here in this country.

To judge by the illustrations of win-
ning Silver Wyandottes in England, the
open Sebright style of lacing is preferred,
and we must admit that it is extremely
beautiful, even if not the American ideal
of a Wyandotte's lacing.

The Lord Mayor's cup at the Dairy is
a coveted prize, and many a fancier has
been "so near and yet so far" in capturing
it, that the lucky individual who wins it
is envied above all others. This year
the prize went to Messrs. Ainscough, who
trotted out the winner in a Black Red
Game cockerel, considered by a number
of the judges the best bird in this class
seen this year. The English *Stock-
Keeper* describes him as being a rich-
colored, reachy bird, with a splendid tail
and short feathers, an easy win. It
seems to have been a hard fight for the
Black Red honors between such veterans
as Messrs. Ainscough, Captain Heaton
and H. S. Rainsforth.

In Game Bantams Messrs. Ainscough
and T. Stretch, both advertisers in *THE
AMERICAN FANCIER*, and E. Walton were
very much *en evidence* in the list of win-
ners. To judge by the reports the win-

ners in all the principal classes were a rare lot of birds, the first Black Red cock and Red Pile cock and pullet being particularly commended by the critics. We also noticed very favorable criticisms re Brown Reds, a variety becoming very popular in this country.

In Buff Cochins, Mrs. Harris furnished the "Cracker Jack." Our contemporary, the English *Stock-Keeper*, speaks of the Cochin display as follows:

"Mrs. Harris brought out a novice, an April hatched cockerel, her husband informed us. He is a lemon-buff of enormous size, with a huge mass of fluff and leg feathers, his hackles are not out, so he will yet improve, and should make a perfect monster; he has the true Cochin outline, and a full and broad chest; second, has more color and a lot of feather, as yet he has no tail fully developed, but he will be big presently and no mistake; they are a grand pair of cockerels, and the owner may well be proud of them; third, is smaller; he is a bit dark in tail, perhaps now at his best, we may term him a thoroughly smart cockerel; 574 (Linnell), as yet very raw, in fact such a growing chicken would have been better at home, but if he goes on growing he will be a rare good cockerel; 579 (Proctor), has splendid color and a big frame; he is not ready, but will make up as a grand chicken. Pulletts were a grand lot, Mrs. Harris again to the front with first and second. There was some conversation among exhibitors as to the age of these specimens, it being stated that it was impossible for birds to be hatched in April to come to such advanced maturity. We closely inspected the said birds, and certainly believe them to be birds of the year. The winner has great width, good color, ample feathering, and her size leaves nothing to be desired; second is hardly so good in color, but she is enormous, with a very neat head and remarkably nice shape. The quartette from Helston was indeed a most remarkable one. Third had the advantage of a better position as far as light is concerned; she has excellent color and good shape, and is a typical Cochin; 582, from same yard, was another well-grown bird, with plenty of feather; 586 (Linnell), very young, but promising; 587 (Witt), a very charming pullet, clear in color and most shapely; 590 (Linnell), another good one, but not well over her tubbing; 591 (Ramsden), is excellent in color, and should improve greatly; 596, reserve (Harris), has a true Cochin outline, with good shape and head points, and might perhaps have been higher; 600 (Proctor), a truly beautiful chicken, shown in lovely condition, possessing, moreover, rich color, and a mass of feathering; 598 (Taylor), was a very promising pullet, although the first and second prize-winners stood well out for size and depth of body, yet the other pullets in this class were a good collection, and many should come to the front presently."

In Buff Leghorns Mrs. Lister-Kay again made a grand record, and also made quite a bid for the honors in Browns. The first Buff cockerel is described as sound in body color, failing a little in tail and legs. The second and third cockerels were fair in color but small in size. In pullets Mrs. Lister-Kay took first, second and third with rich colored birds. It is rumored that all the Buffs in Mrs. Lister-Kay's yards may be offered for sale.

Transfers.

At the Hagerstown show Daniel S. Stauffer sold 1st hen, 1st pullet, and two other hens, White Plymouth Rocks, to C. W. Thomas, Roanoke, Va.; 1st cockerel, 2d pullet, and 1st pen, White Plymouth Rocks, to D. A. Mount, Jamesburg, N. J.

LIKES THE BOOK.

I have read through the Turbit book of Rev. W. F. Lumley, and consider it a valuable work. It should be in the hands of every Turbit breeder in America.

DR. CHAS. L. LANG.
Meridian, N. Y., Oct. 17, 1894.

Awards at Mineola, Queens County, N. Y., Sept. 25-29.

S. S. BANTAMS.—Fowls, 1st, Sherry; 2d, Little & Robbins. Chicks, 1st, Sherry; 2d, Little & Robbins.

BLACK BANTAMS.—Fowls, 1st, Murman & Smith; 2d, Gardner. Chicks, 1st, Murman & Smith; 2d, Little & Robbins.

R. C. WHITE BANTAMS.—Fowls, 1st, Murman & Smith.

BOOED WHITE BANTAMS.—Fowls, 1st, Murman & Smith.

PEKIN OR COCHIN BANTAMS.—Fowls, 1st, H. W. Smith; 2d, Homeyer. Chicks, 1st, 2d, Smith.

JAPANESE BANTAMS.—Fowls, 1st, Sherry.

PEARL GUINEAS.—Fowls, 1st, Gardner; 2d, H. H. Treadwell, East Williston.

SILKIES.—Fowls, 1st, Gardner.

TURKEYS.—Bronze—1st, 2d, W. A. Croft, Narragansett—1st, Dolbear. Slate—1st, 2d, Croft. White—1st, Treadwell; 2d, Dolbear. Black—1st, Ladem.

DUCKS.—Pekin—1st, George S. Powell, Glen Head; 2d, Gardner. Aylesbury—1st, Gardner. Rouen—1st, Dolbear; 2d, Sherry. Cayuga—1st, Gardner. White Muscovy—1st, Homeyer; 2d, Gardner. Colored Muscovy—1st, Croft; 2d,

S. H. Townsend, Gray Call—1st, Dolbear. White Crested—1st, 2d, Gardner.

GEESE.—Toulouse—1st, T. Treadwell, East Williston; 2d, Gardner. Embden—1st, T. Treadwell; 2d, Croft. African—1st, T. Treadwell. Brown Chinese—1st, 2d, H. H. Treadwell.

White Chinese—1st, H. H. Treadwell, Egyptian—1st, T. Treadwell; 2d, H. H. Treadwell. Wild—1st, H. H. Treadwell; 2d, T. Treadwell.

Poultry at Holden, Mo.

To THE AMERICAN FANCIER:

I judged the poultry and hogs at Holden, Mo. There was very close competition in the hog department, and it made me think of old times to get into the hog rings again. I had to judge the hogs by comparison, as they had no score cards. Though I think I made no mistake in the awards, I would rather score than judge by comparison. Some of the boys were surprised to think I was a judge of hogs, but I want to say that I think I can judge hogs better than any other branch of live stock. In the poultry department there were about 360 to 375 birds. I found what I considered the best pen of young Light Brahmas I have ever seen at this time of the year. They were well developed and showed good handling. One pullet in the pen was pronounced by L. P. Harris, of Lincoln, Neb., and myself to be the best in color of neck we ever saw. It seemed impossible to cut the neck for color. She is the only one I ever saw that I would not cut for color. There were some fine Barred and White Plymouth Rocks, Buff Cochins, White and Brown Leghorns, Indian Games, B. B. R. and Sumatra Games. I never saw as good a Sumatra cockerel as I saw at Holden, Mo. Judge L. P. Harris, of Lincoln, Neb., who bred Sumatra Games for years, said he never saw as good a Sumatra of any sex as that bird. There were a lot of fine turkeys. Mrs. Emma Y. Foster, who is a good breeder, an excellent woman, and one of the executive committee of the Missouri State Poultry Association, carried off the silver cup for best trio of turkeys; she also got silver cup for best pen of Buff Cochins, and she got \$10 for best display—surely enough for one person. B. F. Wood got silver cup on his Brahmas, and when it comes to excellence, he is certainly at the top. His Brahmas are away ahead of his last year's stock. Rolla G. Carroll, secretary of the Missouri State Poultry Association, got the cup on a lot of splendid Barred Plymouth Rocks. I have forgotten who got the other cups. Altogether it was a good show. The courtesy extended to the newspaper and other prominent men, besides the liberal premiums and gentlemanly treatment of all visitors ought to receive the highest commendation. The directors of the Holden fair certainly know how to run a fair. They paid for a lot of improvements, and had several hundred dollars left after paying every premium to the last cent.

At the Lee's Summit fair there were about 400 entries, and a lot of fine birds. Judge Emry gave entire satisfaction, as usual.

The outlook for Missouri State and Mid-Continental shows is very flattering. I have talked with several persons lately who want to join the A. P. A., Langshan and Plymouth Rock and Cochin Clubs if they meet at Kansas City in December. I believe it to be for the best interests of said clubs and the A. P. A. to meet there. Mr. Russell, of Kansas City, is making a gold medal, with shield, and will contain Langshan cock of oxydized silver, with colored stone for eye and comb and green gold for landscape. It will cost \$40 to \$50. Dr. E. E. Shattuck, the treasurer, who is one of the most gentlemanly men I have ever met, gives a silver cup lined with gold, and the doctor said he did not know what it would cost—somewhere between \$30 and \$200. This medal and cup are to be given to Langshans. A prominent breeder told me he intended to offer \$25 in gold coin to the Langshans. In case the Langshan Club meets at Kansas City it will get that cup and coin, besides money specials and regular premiums that we know of now. It will be a disappointment to us if the above-mentioned clubs and the A. P. A. do not come to Kansas City.

J. W. WALKER.
Harrisonville, Mo., Oct. 8, 94.

Poultry at Brookfield, N. Y.

The very best exhibit in our whole fall circuit as far as quality was concerned, (and what is there of a show without good birds?) and a show very near if not quite as large, as any attended this fall, was at the above named place. The poultry exhibit was almost double that of last year and there were many birds cooped fit to show at our very largest winter shows and win. We found a new building this year for the birds, and expect before two more years have passed, to hear the society has coops of uniform size for different breeds, and then exhibitors may bring their Brahmas in raisin boxes if they wish, but the birds will be recooped on arrival, and given a chance to show what they really are, and this coop nuisance removed; and trust for the benefit of whoever does the judging, that some better and more approved book of entries for a judge to work from in awarding prizes may be adopted. As it now is, a judge must be something of a fortune teller to distinguish a Brahma entry on one page of the same number as a Leghorn entry on the next page, or he must compare the entry number, exhibitor's number and class number to find "where he is at." However the eraser on our pencil was a good one, and it lasted us through. In the Asiatic class were some very promising English Buff Cochins although yet quite too young to show; some good Langshans, and the best shaped and feathered White Cochin pullet I have seen in many a day. Brahmas, a small class. Some really good Americans on exhibition, noticeably the pullets in the winning pen of Barred Plymouth Rocks and the winning hen, also a cockerel of considerable merit. Some fairly good White Rocks and White Wyandottes. The Silver and Golden Wyandottes only ordinary, with the exception of the winning Golden pullet which was above the average. Quite a display in the Hamburg class, not less than 30 Silver Spangles and a few good ones. Some fair Black and a few fairly good Silver pencilled and some very good Golden pencilled. The Spanish class was well represented, White and Black Minorcas, Andalusians, W. F. Black Spanish, White, Black, Dominique, Brown and Buff Leghorns (single comb) and in Rosecombs were White, Brown and Buffs. The cream of the class were the S. C. Brown Leghorn cockerels, two of them simply grand in shape, comb, lobes and color, and in females the R. C. Browns were fine in color and shape. This was a large class, and quite creamy all through. The Polish class was small and no cracks among them. The only members of the French family were the Houdans and here again was some A No. 1 birds of Uncle Daniel's strain. Next the Games, and what a class it was; every bird in Brown Reds was a clinker and every winning Black Red fit to show anywhere. Spooner had it all his own way on Brown Reds, while the high stationed Will Clark, who himself is as hard as nails, cleaned the board on Black Reds. No man in this country, I dare say, can show as large a flock of strictly high class Brown Reds as the former. All are bred from imported stock, and are the correct sort in reach, style, hardness of feather, shape, shoulder, tails, head and color, and in all my life, I never saw before 50 birds of this variety with the quality of these, and Mr. Clark with his Black Reds is not very far behind. Only a few Piles shown. Not a Pit Game in the building. In Black Red Game Bantams were some very nice birds, particularly some pullets bred from a Parker cock and Myers hen, clean, hard, nice little birds. In Bantams other than Game were some quite nice Silver Sebrights, and a few fair R. C. Blacks, and quite a display of Buff Cochins of considerable merit. The display of ducks, geese, turkeys and pet stock was small as was also the pigeon exhibit. This society is ahead of many fall shows in that it offers prizes on single birds, both old and young, and also on breeding pens. I found many of the exhibitors genuine fanciers, men who are thoroughly interested, men who want only the best. Among them are Mr. H. E. Spooner of the Brookfield *Courier*, Wm. and O. B. Clark, Messrs. Stillman, Brown, and the good humored owner of the Black Red Game Bantams, whose

name I have forgotten, and several other gentlemen, and will say, a more hospitable lot of people I never met. I was informed that they would make a bid another year for entries in the poultry department from all over the country, and trust they may have a still larger entry than this year. Of one thing I am certain, exhibitors will receive good usage if they go to Brookfield. ZIM.

Poultry at Cobleskill, N. Y.

There was a large exhibit, and among the number some fine specimens. The Asiatic class was, however, a small class, and nothing of note among the lot except the winning Partridge Cochins pullet. In the American class the Barred Plymouth Rocks led as regarded numbers, and some quite good birds were shown. In the White Plymouth Rocks I noticed a cock that was a valuable bird to a breeder desiring to increase the size of his stock. He was a very large, strong bird, good in shape, color and comb. But very few Wyandottes. Hamburgs only an ordinary lot. The best class on exhibition was the Leghorns, and some very good birds were shown. The winning Browns, both single and rose combs, were good. A man could easily imagine he saw Forsyth's trade mark on them. The winning White Leghorns were also good. The Game class was the largest class represented, but not an Exhibition Game in the lot worthy of mention, or that would get a mention at any of the winter shows, except about four Black Reds. This society, like some others I know of, offer and pay prizes on Pit Games of almost any name, and one can see Silver Duckwings, Golden Duckwings, Birchings, and Greys all bred from one mating, and none of them of any use but for potpie and perhaps an occasional one for pit use. I have no sympathy with such a method. A name does not make a breed. Better pay more money in premiums to the more popular breeds. No Polish worthy of note shown. Quite a number of entries in Bantams, but only a few birds worthy of the name they bore. The best shown were the Silver Sebrights. Not a respectable Game Bantam in the whole lot. Some good specimens in Ducks, Geese, and Turkeys, particularly the winning Pekin ducks and Bronze turkeys. The pigeon exhibit was large, and some grand birds were shown in Pouters, Fans, and Homers. Several cats were on exhibition, but of their merits I have nothing to say, as it is a trifle out of my line. I noticed, however, some very fine Angora rabbits in the pet stock department. Several Guinea pigs were also shown. The show was nicely classified, well fed, and quarters kept neat and clean, and attracted a crowd of visitors. "ZIM."

Poultry at Fairhaven, Vt.

TO THE AMERICAN FANCIER:

I enclose you a list of awards on poultry at the Western Vermont Agricultural Society's fair at Fairhaven, Vt., Sept. 25th-28th. The exhibit of poultry was the largest in the history of the fair. There were many fine birds shown. Mr. R. D. Button of Cottens, N. Y., placed the awards and gave universal satisfaction. Was sorry that I could not have sent these earlier but sickness prevented.

F. W. SPALDING.

Poultney, Vt., Oct. 11th, 1894.
Following are the awards:

LIGHT BRAHMAS.—Fowls, 1st, C. M. Holley, Glens Falls, N. Y.; 2d, L. B. Doane, Castleton, Vt.
DARK BRAHMAS.—Fowls, 1st, chicks, 1st, Dr. Morehouse, Fairhaven, Vt.
BUFF COCHINS.—Fowls, 2d, E. E. Snell, Fairhaven, Vt.; Chicks, 1st, Holley; 2d, Snell.
WHITE COCHINS.—Chicks, 1st, Holley.
BLACK LANGSHANS.—Chicks, 1st, Holley.
COLORED DORKINGS.—Chicks, 1st, 2d, Holley.
BLACK HAMBURGS.—Pair fowls, 1st, 2d, Holley.
SILVER PENCILED HAMBURGS.—Pair fowls, 1st, Spalding.
GOLDEN S. HAMBURGS.—Fowls, 1st, Wm. Hull, Hoosick Falls, N. Y.; Chicks, 2d, Hull.
GOLDEN POLISH.—Fowls, 1st, Hull; Chicks, 1st, Spalding.
SILVER POLISH.—Chicks, 1st, Holley.
WHITE LEGHORNS.—Fowls, 1st, 2d, Holley.
BLACK LEGHORNS.—Fowls, 1st, Holley.
BROWN LEGHORNS.—Fowls, 1st, Spalding; 2d, Holley; Chicks, 1st, Holley; 2d, Spalding.
R. C. B. LEGHORNS.—Fowls, 1st, E. J. Hooker, Poultney, Vt.; 2d, Holley; Chicks, 1st, Spalding; 2d, Holley.
R. C. W. LEGHORNS.—Fowls, 1st, Fred. Bur-

gess, North Hoosick, N. Y. Chicks, 1st, Fred. Burgess; 2d, Holley.
R. C. BUFF LEGHORNS.—Fowls, 1st, Burgess. Chicks, 1st, Burgess.
BLACK MINORCAS.—Fowls, 1st, 2d, Holley. Chicks, 1st, George Ballard, Fair Haven, Vt.
HOUDANS.—Chicks, 1st, Holley.
BARRED P. ROCKS.—Fowls, 1st, Holley; 2d, R. A. Williams, Poultney, Vt. Chicks, 1st, Holley; 2d, Spalding.
SILVER WYANDOTTES.—Fowls, 1st, Spalding; 2d, Williams. Chicks, 1st, Williams; 2d, Spalding.
WHITE WYANDOTTES.—Fowls, 1st, Burgess; 2d, Holley. Chicks, 1st, Spalding; 2d, Doane.
BUFF WYANDOTTES.—Fowls, 1st, Burgess.
WHITE P. ROCKS.—Fowls, 1st, Holley; 2d, C. W. Gardner, Fair Haven, Vt. Chicks, 1st, Gardner; 2d, Holley.
BUFF P. ROCKS.—Chicks, 2d, Burgess.
DOMINIQUE.—Fowls, 1st, 2d, Holley. Chicks, 1st, 2d, Holley.
MOTTLED JAVAS.—Chicks, 1st, 2d, Ballard.
BLACK SPANISH.—Chicks, 1st, Dr. Morehouse.
BLUE ANDALUSIANS.—Chicks, 1st, Dr. Morehouse.
B. B. R. GAMES.—Fowls, 1st, Spalding; 2d, Wm. L. Farnham, Poultney, Vt. Chicks, 1st, 2d, Spalding.
BROWN RED GAMES.—Fowls, 1st, Holley. Chicks, 1st, 2d, Spalding.
GOLDEN DUCKWINGS.—Chicks, 1st, Spalding.
HEATHWOOD GAMES.—Fowls, 1st, Spalding.
INDIAN GAMES.—Fowls, 1st, Holley; 2d, Burgess. Chicks, 1st, Spalding.
WHITE INDIAN GAMES.—Chicks, 1st, 2d, E. J. Hooker.
BROWN B. R. GAME BANTAMS.—Fowls, 1st, C. M. Holley. Chicks, 1st, Holley.
BLACK B. R. G. BANTAMS.—Chicks, 1st, Ballard.
BUFF COCHIN BANTAMS.—Chicks, 1st, Hull.
TURKEYS.—Bronze, 1st, Holley; 2d, Mrs. J. Leonard, Benson, Vt. Black, 1st, Holley.
DUCKS.—Rouen, 1st, Holley. Crested White, 1st, S. G. Eaton, Fair Haven, Vt.; 2d, Holley. Pekins, 1st, Eaton. Young, 1st, Eaton. Aylesburys, 1st, Spalding. Grey Calls, 1st, 2d, C. M. Holley.
GEES.—Toulouse, 1st, Doane; 2d, Spalding. Young Toulouse, 1st, Doane; 2d, Spalding.
GUINEAS.—Pearl fowls, 1st, Holley; 2d, Spaulding. Whites, 1st, Holley.
PEAFOWLS.—1st, Holley; 2d, Spalding. Collection fowls, 1st, Holley.
Collection pigeons, 1st, Hull; 2d, Doane.
All other pigeon prizes went to Wm. Hull.

The Troy Show.

A meeting of the Troy Poultry, Pigeon and Pet Stock Association was held at the Frear House, October 17th, when arrangements for the poultry show to be held at Bicycle hall, the first week in December were made. O. J. Lewis of Schodack Centre was appointed superintendent of poultry, Samuel L. Smyth of Troy superintendent of pigeons and W. N. Richardson superintendent of pet stock.

Six new members were elected, and George B. Moffatt of West Troy was elected a director. James Forsyth of Owego, a former resident of Troy, donated four special prizes of \$25 each, and seven silver cups were also donated as premiums. Every indication points to a successful exhibition, many displays from distant points having been promised. A special feature will be a display of pheasants, pigeons and rabbits. The association proposes to devote a part of each day to the children of the orphan asylums of the city and the Fairview home, and each day of the show three hours of the morning will be occupied with the visit of children from one of the asylums.

About forty special prizes have been given.

Erie Co. Poultry Breeders' & Pet Stock Association.

TO THE AMERICAN FANCIER:

The Erie County Poultry Breeders' and Pet Stock Association celebrated its first birthday on Wednesday, October 9th. During the short time this association has been organized twenty-one regular meetings have been held, and its field of usefulness has not been limited to Erie County merely, as one might infer, but its members are numbered by scores in all of the surrounding counties. Those well acquainted in the poultry business assure the secretary, E. C. Pease, that Hamburg will have the greatest poultry exhibition this winter ever known in this part of the country, everything pointing in that direction now. An important feature of the show will be a display that was witnessed by millions of people at the World's Fair. The association was addressed by F. E. Dawley, secretary of the New York State Poultry Society, at its last meeting, which was appreciated by all. With the membership constantly increasing and the bright prospects for our coming show, I assure you we all feel well pleased with our first year's work. E. C. PEASE, Sec'y.

Hamburg, N. Y., Oct. 7, 1894.

Has the Sage "Wheels?"

TO THE AMERICAN FANCIER:

I see by the *Ohio Poultry Journal*, that Uncle Isaac is attempting to draft a standard for Pit Games. He calls them "utility games," and describes a fowl that is neither a Pit Game or Game at all, but attempts to steal the merits of the true old fashioned Game in order to foist upon a fancy, already tired of his continued and persistent schemes for self-aggrandizement, a nondescript mongrel, which he proposes to establish and make a "standard" breed of. After lauding the powers of the old *Pit* Game as a reason why his "utility" Game should become a standard bird, he says that public sentiment is against Pit Game fighting; in other words, he loves the Pit Game for its fighting qualities, but wants it admitted to a Standard, so that its gameness, courage, and all that distinguishes the fowl and makes it dear to a large class of admirers, many of whom never fight fowls, simply to *destroy* these qualities. Any breeder of Pit fowls knows that by making it a "standard" fowl its courage would be a thing of the past. As long as the Pit Game can be kept out of the show room, or rather out of the *standard* (any standard) so long will it remain a beautiful, courageous *game* fowl. However, admirers of true Game need fear nothing from the making of a standard breed called "White Games," because they will, according to Uncle Isaac's description of them, not only look like dunghills, pure and simple. The great trouble with Felch is, that he is afraid that there are yet a few fanciers who have failed to credit him with being the great Solomon of the hen business. I venture to predict that when he gets the Game boys after him he will incline to wish he had confined himself to his feather-legged Asiatics. They won't let him down so lengthy as did the Anti-D. S. C. fellows. F. H. GRAVES.

Corrections.

In the list of awards at Trenton you have T. C. Allen credited with first on collection in Asiatic class and me second. This is a mistake; it should be reversed. You can plainly see I have twelve points in this class and Allen seven, counting two points for first prizes and one for seconds. Kindly rectify this.

C. A. REID.

Englishtown, N. J., Oct. 10, '94.

In looking over the awards of the Orange County fair at Newburgh, N. Y., allow me to make the following corrections: I won 1st on G. S. Bantams (fowls), 1st on S. S. Bantams (fowls), 1st on Gray Call ducks, 1st on Duclair ducks, 2d on pen B. T. Japanese fowls, 2d on pair B. R. C. Bantams (fowls), 2d on pair Silkies chicks, 2d on pair Ring Neck Pheasants. There were two Gardiniers at the fair—A. L. Gardinier and myself—that is how you came to get it mixed.

D. GARDINIER,

Proprietor Wild Cat Poultry Farm.
Amsterdam, N. Y., Oct. 13, '94.

In the awards of the Trenton Interstate fair, A. R. Rhinhart should be credited with winning 1st on B. B. R. Game fowls.

Big Show at Worcester, Mass.

At a meeting held by the Central Mass. Poultry Club October 19th, we voted to use the Decimal Score Card and to offer besides our regular premiums a \$5 cash premium on best cock, hen, cockerel, and pullet on nearly all varieties. We shall get the best incubators we can procure and shall hold our show in Horticultural hall, the finest in the city for this purpose. This society has the best record of any and is the oldest, and Worcester is a city of shows that has never been idle a winter for over a score of years. We have always paid \$1.00 for \$1.00, even if the members did reach into their pockets to do it. We shall do it this year. We have hired as good judges as stand in America, impartial and honest. Send your birds and don't forget the dates, January 21 to 24. Entries close January 19th. Address all communications to C. A. BALLOU, 205 Main Street, Worcester, Mass.

PIGEONS.

Standard Announcement.

For the benefit of our pigeon readers, we have made arrangements whereby we can furnish the Pigeon Standard at 50 cents a copy.

The White Fantail Pigeon.

A Monograph.

BY JESSE M. RUTTER.

[Written for THE AMERICAN FANCIER.]
[Continued from September 22d.]

To still more surely warrant impartial decisions, a judge should never compete where he officiates. Nobody doubts the absolute honesty of our best Fantail specialists, but, like Cæsar's wife, every arbitrator ought to be beyond possible suspicion of an interested motive beneath his verdict. To see a man's name published as judge in one class, and winner in the next, does not look well. Disappointed exhibitors never hesitate to covertly hint that a "give and take" policy underlies their non-success. If the pigeon justice has brought into being a model strain, and wants to advertise his stock, no grumbler can find a loop-hole for complaint when these famous birds are entered "for exhibition only." Every wide-awake fancier is sure to see the "judge's pigeons," and commend their owner's wisdom in not scrambling for laurels. In the past I have seen these not for competition entries penned by show officers, and have always heard hearty praises for the plan from conservative fanciers. In fact, this avowed keeping out of the contest is the best card a capable judge can possibly put upon his pigeon cages.

During recent years, much has been printed in reference to the artificial improvement of Fantails. Since moulding the form, or imparting stylish strutting action was scarcely possible except through selective breeding, artful tricksters focused their misplaced skill upon shaping the tail. Pigeons with profuse count were selected, because plenty of feather was necessary to permit a narrow tail being flatly spread far beyond its normal limits. According to hearsay, the caudal circle was sometimes sprinkled and ironed into a larger area, but this expansion was only temporary, the sham tail contracting after a few days. In May, 1889, an indignant fancier, assuming the name "White Feather," wrote to a prominent English paper, describing in detail a disgraceful scheme which would form a counterfeit spread likely to last from one moult to the next. As the publication of this spurious system would serve no good end, it is omitted here, but the following words of comment by "White Feather" will doubtless be read with interest: "Letters have, from time to time appeared in your paper about the trimming of Fantails, but from the absence of proof against the guilty parties, or from the disbelief of fanciers as to the existence of such practices, the matter has always been allowed to drop; but many fanciers of this interesting breed have either given up the variety, or retired from showing in disgust. This faking has been in the hands of a few individuals for at least twelve years to my knowledge, the process being a carefully kept secret. Every bird (intended for sale or showing) is subjected to the treatment, and many fanciers have given long prices for what were apparently perfect birds, only to find after the pigeons had moulted, that they had been swindled, and with no chance of redress."

My readers will here please take special note of the emphatic assertion that prizes won by patched-up Fantails have no attraction for me. No honest man cares to buy, own or show any pigeon unless its points result from natural growth. Beyond putting specimens into perfect physical trim legitimate fitting for exhibition cannot go without treading on doubtful ground. Plucking or adding feathers, or tampering with tail formation, is downright dishonesty, and in the end a lasting injury to the whole Fantail fancy. Any judge who declines to dis-

qualify a palpably made tail has missed his calling, and should never have a second chance to display his lack of backbone. Seldom indeed can tails be skilfully treated till all signs of hardwork are absent. Tell-tale wrinkles at the quill-bases, marks of tying low down upon the plume-shafts, double feathers carefully split apart, and tail-coverts unduly thin, are visible tokens of unfair manipulation. A severely tinkered tail usually shows but a single row of gauzy-looking feathers that seem to be glued together at the edges. A natural spread never has this starched and flimsy aspect. The foremost fanciers of Great Britain have tried to suppress this crying evil by banding together, and the following complete quotation will serve to explain the situation beyond the ocean. That scholarly writer, James C. Lyell, states: "The Fantail club was established in the year 1885, chiefly for the purpose of endeavoring to put down the dishonest practice, so common of late, of manipulating Fantails, so that very ordinary birds are manufactured into the semblance of good ones. The adepts at this art have for years succeeded in carrying off the principal prizes, and sold numerous good-looking birds, which after moulting in their purchasers' possession, have turned out ordinary spoon-tailed specimens; but they have kept the secret of their art so well, that no one can say what methods they employ. Pasteboard, or wire frames, for fixing to the tail during its growth, at the annual moult, is said to be one of the means employed; while extra feathers fixed into the quills of the natural ones; have actually been discovered in the tails of prize birds. Loading the lower tail feathers with lead, so as to form as complete a circle as possible, is also in vogue. When such frauds are constantly practiced, honest men get disgusted and go into some other variety, declining to compete with those who artificially improve their birds." Thus far, but few cases of this pernicious practice have cropped out at American shows, and the pigeon press has always given true fanciers ample space to advertise the mercenary schemers. A greedy mania for money is the good which urges men to try these knavish dodges, and they are ever eager to sell their fixed-up winners. Success in hoodwinking a judge often endows the wily exhibitor with surprising assurance. Within two years, one of this cheating class bitterly berated a Fantail fancier for "spoiling trade" by putting on paper a protest against this tail faking. Trade indeed! As if trade consisted in retarding the Fantail fancy by plundering unwary beginners. This grumbling trader once sold a pair of his improved pigeons for \$40. Prior to moult, the two stylish little Shakers had even, circular tails, wonderful in breadth, although lacking thickness. After shedding feathers, and assuming new suits, this catchpenny couple lost half their good looks. Those small, shapely bodies still strutted unaltered before the spectator. The graceful, rocking steps, and willowy neck sways were as charming as before. No points of physical formation seemed changed, but the saucer-like tail spreads were sadly shrunk. Both the widely opened fans had now closed up, and two tidy tunnels replaced the former flat circles. This pretty little pair was now worth about \$10. What a vast decline in value! Reader, how would you like to pay \$10 for two Fantails, and \$30 for the smooth-tongued seller's *sub rosa* toil? Perhaps I have written enough upon this disgraceful slight of hand. If my censure has seemed too severe, let the reviewer be lenient. Remember that my opposition to crooked pigeon practices is far more emphatic than mere words can express. This artificial tail spreading destroys public confidence in the Fantail, and checks the growth of an artistic hobby among honorable amateurs. The cheat is easily detected, and by personal effort, those who breed points can readily expose rogues whose exhibits are "made up."

[To be Continued.]

TRANSFER.—C. W. Clark, Gloversville, N. Y., to G. T. Hunt, Waterloo, N. Y., one pair Silver Dun Homers, to Frank Giles, Gloversville, N. Y., one pair Blue Black Bar Homers, to Chas. Ody, Gloversville, N. Y., one pair Red Checker Homers.

Cat Proof Cote.

TO THE AMERICAN FANCIER:

From preference or necessity, it is very probable that many of our pigeon lovers have built their cotes, as I have mine, on the ground. In this event, when the pigeons have their liberty all day, it requires more or less watchfulness to keep Miss Pussy from entering the coop through the hole provided for the exit and egress of the birds. In my own case, in order to remedy this, I took a piece of light weight wood, about 16 inches square and about half an inch thick, and cut it into a T shape, cutting the shank of the T so that it would readily fit into the hole in the cote. I then took a pair of T hinges, and fastened them at B and C as shown in the cut.

Then introducing the shank of the board through the hole, I attached it to the cote, screwing it up loose in order to give that part of the hinge fastened to the coop full play. I then weighted the board at the end of the shank, and after a few experiments got the board so nicely balanced that with one bird it retains its equilibrium, but with two it at once loses it.

This seems to overcome the difficulty so far as Miss Pussy is concerned, because her weight would at once upset the board, and even assuming that by the aid of her claws she retained a hold on the board, it would appear to be impossible for her to climb into the cote, because during the loss of balance the shank of the board acts as a cover to the hole.

For weights I used a pair of sinkers, each weighing nine and a half ounces, but, of course, the matter of weight would be governed by the size and weight of the pigeons kept.

I got this idea from seeing, when a boy, something of the kind used by a pigeon loving friend of mine.

This little scheme may be nothing new to some of your readers, but from my own observation I am of the opinion that it will be both novel and useful to a few pigeon lovers.

I might add that I feel no hesitancy in leaving my cote open all night.

R. H. KIRKMAN.

New York, October 10th, 1894.

The Owl Club.

TO THE AMERICAN FANCIER:

I have just received a very kind letter and invitation from Mr. Ewald for the Owl Club to meet at Cincinnati this winter, January 10 to 16, 1895.

As Mr. Ewald says, we have tried to meet in the east and failed, now why not try the west? As we all know, Cincinnati is a great show town, and I think we will have no trouble in getting a quorum. I expect to be there and show there. Now, how many of the boys will join me? Mr. Ewald promises us several new members and will join himself, and also promises us liberal classification and a good judge acceptable to the Owl Club. Now, in regard to the judge, I understand Mr. Ewald has asked Mr. C. J. Tanner to judge, but do not think he has as yet accepted. Mr. Tanner judges the Magpies, and being an old Owl breeder should make a good judge. I, for one, am in favor of him for judge. How many of the members are in favor of Mr. Tanner as judge, if he will have the kindness to accept? Don't be afraid to give us your opinion through THE AMERICAN FANCIER, or write me at once. Mr. J. H. Kuhn, chairman of our executive committee, will be there and judge Pouters. We can have a great meeting if the boys will do their part. I know of specials to the amount of \$30 now offered on Owls, and have done my part in same. If my mind serves me right, I think I offered the only special at the club meeting last year, all the others promised vanishing in the air.

Who is going to follow my example again this year to help make it interesting? I don't like to mention names in regard to specials promised last year (amounting to nearly \$40), as some one might say I was getting too personal.

I think we will have a 94 class for both cocks and hens and classification as follows: Owls (all varieties), cocks, Blue, Black, White, Silver, Any Other Color, and Tail. Hens, ditto. At least, this is the classification I have asked Mr. Ewald for.

C. W. BUTTLES,
President American Owl Club.

Peoria's Pigeon and Poultry Show.

TO THE AMERICAN FANCIER:

We are pleased to announce that we have rented the beautiful Paddock building for our first exhibition. This building is located on the principal street and right in the heart of the city. In order to secure this building we were compelled to change the admission from 10 to 25 cents. It also affords us great pleasure to announce that the merchants and business men of Peoria have kindly donated \$150 in special premiums. Mr. Charles S. Proctor of Peoria will judge the poultry and Mr. Henry Schimpff the Miscellaneous class, (ducks, geese, turkeys, etc.) The premium list is now ready for mailing, it is neatly gotten up and should be in the hands of every fancier.

In addition to the special premiums mentioned in our premium list, C. W. Buttles, the well known pigeon artist, of Columbus, Ohio, offers for the best bird on exhibition, any variety, one life-size India ink sketch of the winner, valued at \$10. This special is well worth competing for, as Mr. Buttles' skill as an artist is well known to the readers of this paper. I would also like to call your attention to the Flying Tumbler classification in our premium list in classes 291, 292, 293, 294, 302 and 303; it should read Mottle or Rose Wing instead of just Rose Wing. Then, again, we have since added the following two classes: Any Color Bell Neck Cock and Any Color Bell Neck Hen. In the Pouter class we are made to say White Pied, whereas it should be White Solid.

ROBERT JOOS, Superintendent.

October 24, 1894.

Cincinnati's Big Show.

George Ewald writes us that there will be an immense display of pigeons at Cincinnati, and that the specialty clubs will probably all meet there. Among the letters he has received is the following characteristic one from Major F. M. Gilbert:

Geo. Ewald, Esq.

DEAR SIR:—I thank you for the honor conferred on me in asking me to judge Fans at the Cincinnati show, and will be happy to accept. I think I can safely assure you that the American Fantail Club will hold its annual meeting with you, as all of the members I have been able to reach are in favor of meeting at the good old town of Cincinnati, where we are sure to meet a lot of good, whole-souled "cranks." As president of the club, I offer as a prize a beautiful silver cup (a duplicate of the one won by me at Baltimore), to go to the best young Fantail bred in 1894 by a member of the club. This to be an open race, colors, crests, boots, and plain to compete together, and the cup to go to the best bird. For this I shall ask Dr. T. W. Tuggle and Mr. Sam. Casseday (if he does not compete) to assist me.

F. M. GILBERT.

Evansville, Ind., Sept. 14, 1894.

Our Illustration.

The subject of our illustration on the title page this week is the imported White Turbit cock, "Frost King," owned by Mr. C. W. Buttles, Columbus, Ohio. This bird won 1st at the last great New York show against all colors in the solid Turbit class, and was afterwards presented to Mr. Buttles by his friend, C. J. Tanner, who pronounced "Frost King" to be the best headed Turbit in his loft.

Magpie Club.

TO THE AMERICAN FANCIER:

Mr. Robert Joos states that Mr. George Ewald, superintendent of Cincinnati, O., show, will give ten classes for Magpies, viz.: 1st on each Black cock or hen, Red, Yellow, Any Other Color, and 1st on young class, best 1894 birds, cock and hen.

G. A. FICK.

Pigeon Flying.

Fulton Co. Flying Notes.

A. C. Saunders, one of the club's most enthusiastic members, informs us of several new Homing fanciers who are now purchasing birds and will soon join the club.

* * *

The September 30th race resulted as follows: Shroeder, 25 miles, arrived in 40 minutes; Saunders, 75 miles, 3 hours; Randall, 73½ miles, 3 hours 3 minutes; Butts, 76 miles, 3½ hours.

* * *

October 7th the weather was fine and birds made good speed, Shroeder's birds on a 55 mile fly making a velocity of 1489 yards per minute. The Johnstown and Gloversville birds were recorded in last week's AMERICAN FANCIER.

* * *

Randall has one bird whose company is entirely too fast for any recorded last week, having made a 100 mile record as a youngster this season of 1308 yards per minute. In future races it is the sentiment of the club that this bird be barred.

Fritz in England.

There are other writers besides myself who find that Homing men are, on the whole, a lackadaisical lot. Not only in this country is this fact brought before our eyes however. In the United States we have only recently had an illustration of what I speak of, and my old friend, Mr. T. Fred Goldman, more popularly termed "Fritz," has had to take, for the time being, a back seat and retire into private life for a season. I sincerely trust it will be only for a season, for a kinder friend and more enthusiastic Homing fancier it has never been my lot to know. I remember how delighted I was on receiving my first letter from Mr. Goldman. I was just commencing my career as a Homing correspondent then, and Mr. "Fritz" in the kindest manner possible, placed all the help he could in my hands; and, as far as that goes, still does. His long letters are filled to the brim with witty and racy writings, and are studies in themselves from a literary point of view, for a more thoroughly educated and refined writer on fancy matters it would be difficult to find. There is something so simple, and yet so artistic and graceful in his flow of language, and I can easily see that his pen is truly one of a ready writer who is never at a loss for a sentence, who never blurs his work by disjointed expressions, but who keeps straight on in a steady, masterly style, from beginning to end. I can only say that I consider it one of the greatest of pities that Mr. Goldman has never honored the fancy world with a volume on the sport which he assuredly so dearly loves. Perhaps now during this enforced retirement he will take it into his head to favor us. I hope he will see this and take the hint. There is no charge. By-the-by, I heard from him quite recently that he was on the move. Everybody remembers 832, Herkimer street, which used to be so prominently stamped on the copies of THE AMERICAN FANCIER mailed into England, but I understand that Herkimer street now no longer knows Mr. Goldman. In connection with the recent fly of the Empire City Flying Club from Washington, D. C., I am sent a report, and with it "Fritz" writes:

"My birds behaved well, but not near fast enough. Heavy haze between Newark, N. J., and Brooklyn, N. Y., giving the New Jersey birds all the advantage. Had my entire entry of nine youngsters home within an hour after the first arrival. Will now transfer my birds to the new loft.—Yours sincerely, GOLDMAN, 1664, Dean street, Brooklyn, N. J."

This is an exceedingly good report. All he entered (nine birds) home within the hour, and shows that Mr. Goldman is possessor of a good loft of birds—a loft which he may well be proud of. He does not think that the removal will much disturb him, and he is full of confidence as to being able to settle the birds in their new home by the time the next flying season comes. May he be able to do so is my sincerest wish.—H. Kendrick, Jr., in Poultry, (England.)

Philadelphia Items.

There were two big races flown from the south-west on October 14th, and both were flown under the same favorable conditions of wind and weather, and in each race the leading birds made remarkable speed. The first and most important race was the 100-mile Championship contest from Odenton, Md., for the Item trophy and other prizes; the other was the second young bird race of the Philadelphia Section from Manassas Junction, the 150-mile liberating station. Both lots of birds were tossed promptly at 9 A. M., in a smart westerly breeze, the birds from the 100-mile station commencing to arrive

about 11 A. M., and those from Manassas at about an hour later.

At present it is impossible to name the winner in either event, as the distances have not all been measured. From a cursory glance at the returns, however, it would appear as if M. Sullivan was pretty solid on the item race, while in the 150-mile Federation event Geary & Kendall seem to have the pull for first honors. Innes, Clark and Connell will stand a good show for a place in the item race, and should at once get their distances measured by Peter Witzel and have same forwarded to the pigeon flying editor. Senderling, Linsenmaier and L. A. Miller are also well up, but their distances are on file.

Below will be found a list of the leading returns in each race, compiled from the official report:

THE "ITEM" 100 MILE RACE.

Name	Reg. No.	In Loft.
G. Connell	C, 525	11:30:30
G. Connell	S, 4984	11:30:35
M. F. Sullivan	S, 6768	11:32:24
M. F. Sullivan	S, 6804	11:32:24
L. A. Mehler	L. A. M, 43	11:33:30
L. A. Mehler	L. A. M, 23	11:33:36

J. A. Stovell	C, 14673	12:21
J. A. Stovell	C, 14662	12:21

An allowance has yet to be made for those who reported their birds by certified telegram. George J. Gilmore, 1732 North Nineteenth street, has lost three birds, C7649, C7650 and C2035.

The birds of the fanciers of the Philadelphia District of the National Federation were shipped to Orange Court House, Va., on Oct. 10th, and were liberated the next morning for competition in the third of the young bird races, that from 200 miles.

The first race was won by Geary & Kendall by a small margin, and the second seems to be a close thing between two or three fanciers, so everything points to keen competition for a third time.

The next race will be from Bedford City, Va., in competition for the item 300-mile challenge trophy, and all birds flown in competition for this prize must be so marked on the entry blank, and twenty-five cents per bird entry fee paid to the race secretary, who will divide the amount so received into first, second and possibly third cash prizes.

M. Sullivan looks like an easy winner of the 100-mile item race, taking second prize also, but it cannot be determined whether the third and fourth prizes go to L. A. Mehler, F. Clark or G. Connell until the two last named get their distances measured, and file same at the item office. The item, Philadelphia.

East Side Flying Club.

The East Side Flying Club held a meeting at their rooms, No. 426 Walnut street, awarded their prizes to the winners as follows:

One hundred miles, Wilmington, Delaware, A. Harting, first, \$5, donated by the club; second, Thos. Schroeck, \$3; third, H. Kirsch, \$2.

One hundred and fifty miles, Magnolia, Md., H. Kirsch, first, a box of cigars, donated by F. Heiss; second, F. Heiss, a pair of Homing pigeons, donated by Thos. Schroeck; third, Thos. Schroeck, picture easel, donated by H. Kirsch.

Two hundred miles, Washington, D. C., first, one pair of Homing pigeons and the photograph of the winning bird, donated by C. A. Mahr. As there was only one prize at this race, the rest of the members only receive the honor of a 200 mile record. FRED. HEISS, Secretary.

Newark, N. J., Oct. 10th, 1894.

Fulton County Flyers.

TO THE AMERICAN FANCIER:

Last Saturday morning, at the Gloversville depot, quite an attraction was caused by a basket of Homing pigeons waiting to be shipped to F. Hawley, express agent of Warners, Onondaga County, New York, to be liberated at eight o'clock Sunday morning, distance air line 105 miles. It was very amusing to listen to the various comments and especially the criticisms of passengers and passers by, such as "Do you think they will ever be able to find their way back home again?" "Don't you consider it very cruel to send them so far?" asked another, and "What keen eyesight they must have to be able to fly so high up and so fast," remarked another. None but those who have experienced their first amateur 100 mile race can realize the pleasure when the results prove good. Sunday morning came at last, with a clear atmosphere and a beautiful blue sky, the wind fanning the valleys from the south and all that nature could afford for an ideal pigeon fly, and we were all jubilant, feeling fully confident of some good records being made. The watchers were anxiously straining their glasses for birds at ten o'clock, and caught sight of two dark specks in the far distance, flying as none but Homers can, dropping on the coop of A. C. Saunders at 10:45. Hardly had a moment elapsed before another was sighted, which proved to be a messenger from F. Randall, Johnstown, stating that his birds had arrived at 10:20. Some messengers were seen flying from A. C. Butts, bringing the news that his birds had homed at 10:30. We all had tried our utmost to win, but the Randall birds had shown their superior quality and stamina in this race, and we most heartily congratulate their owner on the victory.

A. C. SAUNDERS.

Gloversville, N. Y., Oct. 12, 1894.

Chicago Flights.

TO THE AMERICAN FANCIER:

The last race of the Lake View Flying Club was flown October 7th from Princeton, Ill., air line distance 101 miles. The entries were: T. B. McCauley, 5; F. R. Phillips, 5; W. Huncke, 3; F. Druhl, 2; J. B. Burns, 1; H. Hamilton, 1; L. Warkentien, 1; J. Jacobs, 1; and W. Dreier, 2. The birds were liberated by Mr. Geo. M. Wing, Adams Express Company agent, who wired: "Birds liberated 7:10; weather cloudy, S-W wind." At home the weather was hazy, with light rain, south-west wind. The returns to the several lofts were reported as follows:

Name	Distance	In loft.	Speed. Yds. per min.
F. R. Phillips	101.13	10:00	1046.9
Ditto	101.13	10:01 1/2	1037.8
T. B. McCauley	100.88	10:03 1/2	1023.3
Ditto	100.88	10:03 1/2	1023.3
Ditto	100.88	10:03 1/2	1023.3
F. Druhl	101.20	10:08 1/2	1007.3
F. R. Phillips	101.13	10:09	994.3
Ditto	101.13	10:15	962.1
W. Huncke	101.13	10:18	946.7
Ditto	101.13	10:18	946.7
F. R. Phillips	101.13	11:06	
W. Huncke	101.13	4:15	

L. Warkentien and W. Dreier's birds arrived same day.

This completes our races for this year.

F. R. PHILLIPS, Secretary.

Empire City Flying Club.

TO THE AMERICAN FANCIER:

The 74th and regular monthly meeting of the Empire City Flying Club was held at its rooms, 5 Park Place, New York city, Tuesday evening, Oct. 6th, 1894, president, Wm. Johnson, in the chair and 10 members present.

Minutes of previous meeting read and approved. The young bird race report was rendered by the secretary, and no objection being made was accepted. The president awarded the following competitors their respective prizes and diplomas:

NEWARK SECTION.—100 mile race, C. Hebler, 1st diploma, \$5 cash; Wm. Holliday, 2d, \$5 cash; Albert Whitten, 3d, one bag pigeon feed.

NEW YORK SECTION.—100 mile race, John Fisher, 1st diploma, pair opera glasses; Joseph Scholl, 2d diploma, barrel peas; C. P. Schwenck, 3d diploma, \$5 cash.

NEWARK SECTION.—150 mile race, C. Hebler, 1st diploma, \$10 cash; C. A. Mahr, Jr., 2d diploma, \$5 cash; R. N. Pearsall, 3d diploma, barrel flour.

NEW YORK SECTION.—H. D. Mackintosh, 1st diploma, cloth for suit clothes; Thos. J. Clarke, 2d diploma, \$5 cash; J. H. Watjen, 3d diploma, set sowers.

TWO HUNDRED MILE GENERAL.—C. Hebler, 1st diploma, clock, barrel apples and pair of slippers; C. A. Mahr, Jr., 2d diploma, \$10 cash and set of tools; Wm. Book, Jr., 3rd diploma, bird and cage, set bob wires.

J. Foster, pair young birds, 1st to New York section; J. H. Watjen, pair young birds, 2d loft to New York section; P. Sharding, bottle whiskey, 3d loft to New York section.

C. Hebler, winner of gold-headed cane, donated to the loft making but average speed in the races flown.

The resignation of Mr. P. F. Sullivan was accepted with the regrets of the club. Mr. J. Prior's resignation was laid over until November meeting. No further business, meeting adjourned. WM. BOOK, JR., Sec'y.

Newark N. J., Oct. 15th, 1894.

Columbus Notes.

TO THE AMERICAN FANCIER:

Please publish in your valuable paper that a B. C. Homer is staying at my loft, marked L. L. 194, which I will gladly send the owner if he will address me at 841 Harrison avenue.

The Columbus Homing Club is in a prosperous condition, and at present we are

enjoying the flights of our young birds. At our last meeting, held October 2nd, the following officers were elected to serve for the ensuing year: Herman F. Bower, president; Louis Biersteadt, vice-president; Thos. Fellows, secretary; William Brown, treasurer.

THOS. FELLOWS, Secretary.
Columbus, Ohio, October 8th, 1894.

Westfield Homing Club.

TO THE AMERICAN FANCIER:

The last young bird race of the Westfield Homing Club was flown from Havre de Grace, Md. Birds liberated with a strong head wind at 7 A. M. Best speed made was 1353 yards per minute. Returns as follows:

	No. of Miles.	Reported in Loft.
E. B. Woodruff	120	9:36
W. H. Winter	120	9:38 1/2
F. C. Brunner	120	9:44
F. Pepin	127	10:25 1/2
W. Wittke		Not reported.

W. H. WINTER, Assistant Sec'y.
Westfield, N. J., Oct. 17, 1894.

MARION, O.,

Importer and Breeder of

Buff Leghorns

EXCLUSIVELY,

HAVE THE FINEST LOT FOR SALE WE EVER SAW OWNED OR RAISED.

They were sired by "JOKER," the World's Fair winner, and "BROTHER JONATHAN," the winner of more first prizes in England than any bird ever imported.

Remember, we are the only importer of the Geffcken strain in America, and have crossed them on the Kay, and the results, both in the show room and breeding pen, has been simply elegant.

The prices for fine breeding birds are, for Cockerels, from \$5 to \$20; Pullets, from \$3 to \$10. Exhibition birds a matter of correspondence. We guarantee every bird just as represented.

SPONGIA,

The great Roup Cure. Put up in 25c, 50c, and \$1.00 packages. eoww1361

OAKLAND FARM

Taunton, Mass.

BUFF COCHINS. Our American Standard Buffs are unsurpassed in this country, as their great record in the show pen will attest.

LIGHT BRAHMAS. Our Light Brahmas have won their full share of prizes wherever shown and we seek the keenest competition.

BUFF COCHINS. We have imported this season, as we have for the past three years, the best Cochins to be purchased in England. This year we have the winner of the LORD MAYOR'S CUP, the acknowledged champion cockerel; the champion pullet, winner of 1st DAIRY, CRYSTAL PALACE and BIRMINGHAM; also others of highest merit. We have probably the finest collection of these fowls in America.

We shall sell eggs from our English Cochins this season. Send for circular. Birds for sale at all times.

WINDSOR POUTER LOFTS.—To those in quest of show Pouters for exhibition purposes or stock birds for the breeding loft, I am now prepared to submit quotations. My annual catalogue of sale birds will be issued Dec. 1, when all are thoroughly moulted. State your exact requirements, thereby avoiding unnecessary correspondence. *521 A. W. MCCLURE, box 287, Windsor, Ont.

LOOK HERE!—My Homers belong to one of the very best strains; sure to satisfy you, for they are carefully bred for flying purposes, in all colors, seamless banded, at low prices, and possessing all the qualities of a good Homer. Correspondence promptly answered. *1357 J. L. POMEROY, box 368, Clinton, N. Y.

J. H. MEHRING, Littlestown, Pa., offers in pairs and odd birds, Pouters, Carriers, Jacobins, Fans, Turbits, Tumblers, Owls, Barbs, Nuns, Moorcaps, Swallows, Priests, Dragons, Homers and Magpies; show birds. At Frederick and Hanover, Brown and Warner, judges, won special prize for best display. *460

THE RED, WHITE AND BLUE Pigeon Lofts, has for sale a few pairs of high-class Homers, '94 hatch; also a few pairs high-class Homers, breeders; prices low. CHARLES W. CLARK, 8 Washington St., Gloversville, N. Y., sec'y No. 1 Fulton County Flying Club. *460

CHEAP TO CLEAR, or will exchange for Swallows, three pair white, plain and booted, Fantails; show birds, every one of them, and fit to win in the strongest competition. CHAS. LANG, 1550 Bailey Ave., Buffalo, N. Y. *460

WHITE FANTAILS, \$1.50 per pair. I have several pairs which I will sell at this low figure in order to make room. Good birds; satisfaction guaranteed. Also other varieties cheap. *460 J. K. WEBSTER, Norwalk, Ohio.

FOR SALE.—Pair Blue Pouters, \$5; pair Black Pouters, \$8; pair White Owls, \$3; pair Blue Fans, \$3; also Saddle Tumblers in blue and black, for sale cheap. These are all good birds, sold for want of room. *460 CHAS. E. LAWRENCE, West Medway, Mass.

FOR SALE.—Blue and White African Owls (Ewald's), 1 pair \$3, 2 pairs \$5. Oriental Rollers in black, black with white tips and crested, red with white tails, at \$3, 2 pair for \$5. Yellow, red, black, dun and silver blue white barred Tumblers, booted and plain, \$1.50 a pair, 5 pairs assorted, \$6. Homing Antwerps, \$1 a pair, 5 pairs, \$4. Or 50 pairs pigeons of the above variety for \$50. For further information write. RICHARD C. CASTENHOLZ, 335 E. Morris street, Indianapolis, Ind. *459

FOR SALE AT A SACRIFICE.—Loft of Fancy Pigeons, about 100 pairs, White Fans, Swallows, Jacobins, White Antwerps, Tumblers, etc. The lot at \$1 per pair. BELLE MEAD PIGEON LOFT, Belle Mead, N. J. *459

FOR SALE.—Twenty pairs fancy pigeons at give-away prices. They consist of Turbits, Nuns, Owls, Fans, Jacobins, Tumblers, Trumpeters, Barbs, Carriers, Priests, etc. All the above are choice stock. Send stamp for description. At four large shows, won forty first and twenty-five 2d prizes. GEO. WOOD, JR., & Co., Burwood Lofts, Ottawa, Canada. *459

I HAVE 200 Homing pigeons, none better, one-half have records of 582, 597, 451 and 300 miles, that I will sell at a great sacrifice. Will also exchange for large, handsome Newfoundland or St. Bernard dog, or a fine Pointer dog, on a 12-page gun. *52159 O. F. CONNELLY, Carlisle, Pa.

FRED HOBEL, Seneca Falls, N. Y., offers for sale at one-half price, Black Dragons, Blue Fans, Black Jacobins, Homers that have been trained to 100 miles, and very fine performing Tumblers. Satisfaction guaranteed. *459

W. A. HOOVER, 411 Anthony St., Williamsport, Pa., has for sale Jacobins in all colors. Try me; I can please you. P. S.—Buff Pekin Bantam cockerels, \$1. *459

INSIDE TUMBLERS ONLY.—I have about 60 birds, all colors, for disposal. Some very close performers, birds that will tumble 10 to 12 inches from the floor; \$4 a pair; younger stock \$2.50 per pair. *458 P. A. SCHEID, Lancaster, Pa.

CHEAP TO CLEAR.—Four pairs of Booted and White Fans, \$18; two are show birds; two White Crested cocks, both winners, \$5; five pairs surplus Blues, \$2 to \$5 pair. All are highly bred and a desire to give up Whites is the only motive for this sacrifice. EDWARD B. PAGE, 2125 Preston street, Louisville, Ky. *458

FOR IMMEDIATE DISPOSAL.—Dragoons in white and silver; Tumblers in black and red; Baldheads in silver, black and blue; Fans in white. Fifteen birds in the lot of Tumblers and Dragons, \$10. Good bargains; satisfaction guaranteed. Member of the American Fantail Club. Good references. *458 F. D. FOYLES, box 5, Marion, Ohio.

JOHN C. ERDMANN, 28 Wyckoff street, South Brooklyn, N. Y.—A few pairs of fine Black Bald Tumblers left, all out of A. M. Ingram's strain. Will sell cheap to anyone taking the lot. *458

LOUIS G. MULLER, 335 South Woodyear Street, Baltimore, Md., breeder of Black, Red and Yellow Magpies exclusively. A few birds for sale at reasonable prices. Write for prices; enclose stamp, no postal cards answered. *1358

MY CHOICE LOT of Homing birds, bred from stock that have each flown 500 miles; the young stock has flown from 85 to 100 miles. There are a few of the old birds left; these are all workers and not bred for show. No better in the country and all birds guaranteed as represented. They are also limited as to quantity. Address, enclosing stamp for reply, ELI MORETON, 410 South 10th street, Newark, N. J. P. S.—No notice taken of postal cards. *858

W. H. READWIN, Guelph, Canada, offers for immediate disposal a fine lot of Fantails in white, black, blue, silver and yellow; also Owls, Turbits, Magpies, Jacobins and Swallows. Pairs and odd birds cheap. *458

SIX PAIRS SATINETTES, at \$7 per pair. These are odd marked birds but have good tail bands, etc. Good chance, especially for beginners. Birds are all from good stock. *458 WM. ELLENDER, Clifton Heights, Pa.

WHITE TUMBLERS, \$3 to \$5 per pair; Homers and Splashed Tumblers at low price; Trumpeters, in all colors, \$5 and upwards. ISAAC SPRAGUE, JR., Wellesley Hills, Mass. *458

FANTAILS AND JACOBIANS in white and yellow only. My Fantails are an attempt at the "Modern," and my Jacobins are characterized by width of mane and perfection of rose. I have a large stock of '94 bred birds for sale at proper prices. No more Fans to spare till spring of '95; plenty Jacobins. *1353 A. H. HARRIMAN, Laconia, N. H.

I WILL SELL about 50 Pouters, bred by my father for pleasure and turned over to me for disposal, all having the Webster '94 band; also odd cocks in all colors and all ages. Correspondence cheerfully answered. *1357 JNO. F. REID, box 103, Sumter, S. C.

FRED C. WEISS, Evansville, Ind., breeder of Saddleback and White Fantails.—Have won the highest awards whenever shown. My entire lot of Crested White Fantails for sale at half their value. Winners at Louisville, Nashville, Charleston, Atlanta and World's Fair. *45253

C. W. BUTTLES,
Breeder of Champion
AFRICAN OWLS AND TURBITS

There has been placed in my hands a consignment of the famous
BERKSHIRE TURBITS!
Which must be sold at once—Blue and Black Wings. They are grand birds, extra fine in head and beak properties, and some of them winners. They will be sold at \$5 and \$10 per pair, which is lower than such birds have ever sold at before. If you want a bargain write me at once, enclosing stamp for description. Be sure and state just what you want.
Some grand pairs of Blue and Silver African Owls, at \$5 and \$10 per pair; Blue and Black Tail Turbits, winners, at \$5 and \$10 per pair; Jacobins at \$4, \$5 and \$10 per pair, excellent birds; Homers and Flying Tumblers at \$2 per pair.
Cuts of Fancy Pigeons made to order. Satisfaction guaranteed. Write me.
C. W. BUTTLES,
tf56 1070 Madison Ave., Columbus, Ohio.

Look at This!

Just received from Mr. P. F. Hager the entire collection of Satinets formerly owned by the Louisville Columbarium. They all must be sold at once. Price from \$5 per pair and up.
Also a fine lot of long face, clean legged Tumblers, from Mr. T. S. Gaddess, in red and yellow. Mottles, red and yellow Rose-wings and red and yellow Self; also one pair Black Mottles. Nearly all banded with the English enamel ring. Price from \$2 to \$4 per pair.
Smooth-head Magpies from \$3 to \$10 per pair.
Barbs from \$25 per pair and up.
Swallows, Nuns and Jacobins, from \$3 to \$10 per pair.
The best of the above birds are fit to show in the strongest competition. Satisfaction guaranteed. Enclose stamp for reply.

BLACK LANGSHANS

Dr. F. M. Robinson, Box 69, Pawling, N. Y.

At Madison Square Garden, New York, 1894, the largest show ever held in America, I was awarded the Grand Special Prize of Silver Cup, value \$100, for best exhibit: 1st, 3d and 4th cockerels; 2d and 3d cocks; 2d, 3d and 4th pullets; 2d and 5th hens; 2d and 5th breeding yards. 200 grand chicks, bred from "Gorden Champion," "Parnell," "Parnell, 3d," "Manhattan, 2d." Buy your birds from a race of prize winners, buy from a breeder who breeds his own birds, exhibits his own birds and advertises honestly what he wins, *not what someone else wins.* The above record has never been beaten in Madison Square Garden on Black Langshans. Illustrated circular on application, giving full list of awards for the past seven years at the largest shows in America. You need this stock to show; you need this strain for new blood. 52t25

THE GREAT ANGLO-FRANCO

COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Canker, Colds, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. **TESTIMONIALS ON APPLICATION.**

PRICES:—In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

HATCHED 100 PER CENT! THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889 and '90; First at Worcester, 1890. First at Great New York Show, Jan., 1891, hatching more chicks than all other machines combined. First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At Great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method *do away with the bottom heat*. This Brooder is made for either out or in-door use. We guarantee it to give satisfaction, price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$3.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price. \$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price. \$2.00

Book of Poultry

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price. \$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth. \$1.00
Paper. 40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price. \$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price. 50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price. 50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price. 50

Poultry.

(G. A. McFetridge). A most valuable little book by a practical and successful poultryman. Price. 50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price. 25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price. 25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price. 50

PET STOCK.

Dogs and Bird Keeping in Cage and Aviary.

Large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for caged pets. This is a most valuable publication. Price. 15

Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. Concise and valuable little book. Price. 50

English Books in Stock.

THE LANGSHAN FOWL. A Complete Treatise on the History and Characteristics of this Popular and Profitable Breed. By Miss A. C. CROAD. \$1.00

HOW TO MAKE £50 A YEAR KEEPING DUCKS. By HENRY DIGBY. This is a nicely bound book, and contains in connection with the above an article on Geese and one on the Turkey. 1.00

THE HIGHFLYERS' GUIDE (SMITH), or How to Train Tipplers, Tumblers, Rollers, etc. Invaluable to pigeon men. 1.00

STUD REGISTER FOR PIGEONS. By RICHARD WOODS. Very complete. 25

PIGEONS, Their Origin and Variation, with Illustrations on their Housing and Management. By Rev. W. F. LUMLEY. 50

FANCY POULTRY, Breeding and Feeding. By ALEXANDER COMYNS, B. A., LL.B., Editor of Poultry. Bound in paper. 50

VALE'S MANUAL OF POULTRY DISEASES. By W. VALE. Complete in every detail, with full description and cure for every disease. Bound in paper. 50

THE TURKEY. Its Characteristics, Varieties, and Management. By Mr. WILLIS HARRIS, Vice-President of the Turkey Club. 50

THE LONG-FACED TUMBLER. A complete and comprehensive treatise on the different varieties of the Tumbler pigeon. By HENRY CHILD. Price. 50

Jan. 10-16.—Cincinnati Poultry and Pigeon Association, J. H. Drevenstedt and Sharp Butterfield, judges. Geo. Ewald, sec'y.

Jan. 14-19.—Columbus, Ohio. G. F. Gast, secretary, Prospect, Ohio.

Jan. 15-19.—Howard County Poultry and Pet Stock Association, Kokomo, Ind. F. J. Marshall, judge. L. C. Hoss, secretary.

Jan. 15-20.—Nebraska State Show, Lincoln, Neb. Emry and Hitchcock, judges. A. Lemen, secretary.

Jan. 15-20.—Colorado Poultry Association, Denver, Colo. I. K. Felch, judge. John Herr, Denver, Colo., secretary.

Jan. 15-20.—Georgia Poultry and Pet Stock Association, Augusta, Ga. John W. Killingsworth, secretary.

Jan. 16-18.—St. Johnsbury, Vt. W. B. Eastman, secretary.

Jan. 16-18.—New England Light Brahma Club, Boston, Mass. G. W. Cromack, secretary, Stoneham.

Jan. 16-18.—Ansonia Poultry Association, Ansonia, Conn. J. W. Willis, supt.

Jan. 17-22.—Berks County Poultry and Pigeon Association, Reading, Pa. W. Harry Orr, president; H. M. Shoemaker, sec'y.

Jan. 18-20.—North-Western Poultry and Pet Stock Association, Sioux City, Ia. Theo. Hewes, judge. J. W. McMillen, president. Chas. E. Lozier, secretary.

Jan. 20-25.—Washington (C. H.), Ohio. W. R. Dalbey, secretary.

Jan. 21-24.—Central Mass. Poultry Association, Worcester, Mass. W. H. Pitton, secretary.

Jan. 22-25.—Parsons Fanciers' Association, Parsons, Kansas. C. A. Emry, judge. A. C. Braunsdorf, secretary.

Jan. 22-25.—Pittston Poultry Breeders' Association, Pittston, Pa. J. Y. Bicknell, judge; W. R. Allen, secretary.

Jan. 22-26.—Omaha Poultry Fanciers' Association, Neb. I. L. Richards, secretary.

Jan. 28-31.—Utah Poultry Association, Salt Lake City. Theo. Hewes, judge. J. W. Haslam, secretary. W. W. Browning, president.

Feb. —Cape Ann, Mass. Geo. E. Merchant, secretary.

Our Clubbing Offer!

We have decided to club any of the following monthly poultry publications with THE AMERICAN FANCIER at the uniform price of \$1.50. You get two papers for the price of one. Here is our list:

Poultry Monthly,
Ohio Poultry Journal,
Live Stock Monthly,
Farm Poultry, Poultry Keeper
New England Fancier,
Midland Poultry Journal
Fanciers' Review,
Southern Fancier
Practical Poultryman and
Western Poultry Breeder
Colorado Poultry Journal,
Homing Exchange,
Michigan Fancier
Michigan Poultry Breeder,
Game Fanciers' Journal

special premium for the largest display of birds by one exhibitor scoring over 90 points. Theodore Hewes is so enthusiastic over this special that he gives vent to his feelings in a letter published on another page in this issue. It is a grand special and no mistake, and indicate the intense interest taken in the coming show of the great west. Among other valuable premiums offered are the following: Two specials by the North-Orrison Furniture Co. and the Keith Furniture Co. for second and third largest number of birds scoring over 90 points. A handsome gold medal, consisting of bar and pendant, will be awarded to the highest scoring pen of Black Langshans. On the pendant is mounted an oxidized silver Black Langshan male with eye and comb of natural stone, and landscape in green gold. An elegant silver cup will also be offered on Lan shans as a club prize if the American Langshan club meets here. "The Sternberg Trophy," a \$25 gold medal, will be awarded to the breeder of the best shaped Buff Cochin pullet. James Forsyth offers \$10 in gold for best cock, hen, cockerel, pullet and breeding pen of Single Combed Brown Leghorns (two or more exhibitors competing); \$10 in gold for best cock, hen, cockerel, pullet and breeding pen of Buff Wyandottes (two or more exhibitors competing); \$10 in gold for the best cock, hen, cockerel, pullet and breeding pen of Houdans (two or more exhibitors competing); \$5 for Single Combed Brown Leghorn showing best stripe in saddle. The *Midland Poultry Journal* offers a solid gold medal, while numerous other cups, medals and specials of great value and beauty are being discussed with a view to being offered.

We know that eastern fanciers are very favorably disposed toward the Mid-Continental show and believe a large number of birds will be exhibited there hailing from east of the Mississippi. Only the best wishes and the kindest words for the success of the show are heard in these diggings and we certainly hope all western fanciers will take off their coats and work for the success of the Kansas City show. The latter is not local but national in character and we hope will take its place with New York as one of the great annual fixtures in the poultry show list.

Our Mr. Blunck, while enjoying the sights of Gotham a few weeks ago, felt lonesome without a chicken show or a hen crank at hand, so he took a trip to a foreign country for a day and visited with John Glasgow at Mahwah, New Jersey. Mr. Glasgow is in charge of the magnificent columbarium of Messrs. Havemeyer Bros., and naturally took pleasure in showing his visitor the lofts and its occupants. The Mountainside lofts are of course located on the famous Havemeyer estate, and are in keeping with the other fine farm buildings. Two sons of Mr. Havemeyer started these lofts, but we learn that one has given up the fancy, and Mr. Harry Havemeyer, Jr. is now the sole owner of the famous loft, and a more enthusiastic and thoroughbred fancier it would be difficult to find anywhere. Our Mr. Blunck is indebted to him for many little courtesies while at Mountainside. We were also informed that Mr. Havemeyer will engage in the breeding of Game Bantams, having already a nucleus for a fine flock of Red Piles and Black Reds. Mr. Glasgow will have charge of these in addition to the pigeons, the large poultry and practical part of the hen business being in charge of Mr. Drake.

"Cochin Evening" at the Los Angeles County, California, Poultry Association.

A Symposium of Papers on the Buffs, Prepared by the Cochin Committee, A. E. Olshausen, Chairman. Arranged for the American Fancier by John C. Stedman, Secretary.

BUFF COCHINS.

[By Theodore Sternberg, Ellsworth, Kansas, Honorary Member.]

God made us with many differences in tastes, and this is a beneficent provision; without it life would move on a dead plane without variety. All mankind recognizes and respects this diversity in taste, save and except some of the all-round professional poultry judges, and some thoughtless followers. This diversity in taste has led to there being two distinct types of the Buff Cochin. One is usually denominated the American type; the other is the full-feathered, or English type, while both types are pure Cochin in blood. The main distinction is in the greater length of feather, and the greater abundance of feather in the English type, "feathered from the ground up," as it is truthfully said. The English type have vastly more foot feathers, far more leg feathers, which should stand out in front from the body down, and with it more hock feather, but in the better specimens the hock feathering is so smothered up in the general profusion of feathers that it is not distinct as hock, but is only a part of the general profusion of feathers. These hock feathers should be long, soft and yielding, and not harsh and stiff.

The English breeders recognize as colors of equal dignity, lemon, orange, buff and cinnamon, with a decided preference for the light lemon. This color is perhaps the most exquisite of all for a show Cochin; but as it is the lightest of all Buff Cochin colors, the tendency and the usual color defect is white in flights, under hackle and tail of the males. While the cinnamon Cochin having the darkest and deepest color, has for its chief color defect black in flights and tail, and sometimes black tip to hackle in females. The orange and buff colors have as their color defects, both white and black in flights and in tails of males. The orange and buff vary in shade according to amount of cinnamon dominating blood. It is in the deep color of the cinnamon that is found the sources of color supply with which the buff, the orange and the lemon are repainted, as from time to time from natural causes these colors fade.

The deep under color with quills a reddish buff, so much admired by many, is a certain indication of cinnamon blood. It goes without saying, however, that it is quite impossible to mate buff, orange, or lemon colors together for many consecutive seasons without great loss in depth and brilliancy of color. I am very firm in the belief that three years of mating of birds standard in color, free from black, will result in lost color. Buff is a composite color—white, yellow, red and black enter into it—and the happy blending of all these colors so that each exerts its proper influence in producing the composite color of the shade sought for, without either of the original color being so prominent as to show in its original shade, results in the perfect buff. It is this color conundrum with which breeders struggle, and it is not a struggle which is ever ended. Each year it is renewed; now and then the perfect color is obtained, but very seldom, and when obtained it is an accident and cannot be relied upon to reproduce itself.

The cinnamon color must also once in many years be fed, or it too will fail. This is done by introducing black red blood, and then breeding back. The one thoroughbred color we have in all our breeds of poultry, the color which sustains itself and brightens all other colors, is black red.

The chief color beauty in a Buff Cochin is evenness of color from head to foot; the shade may be lemon or orange, buff

or cinnamon, but of whatever shade, let it be even from head to foot, and let the females in an exhibition pen match each other in shade and all match the color of the cock's breast. I am firmly of the opinion that in judging Cochins, color should be treated as one section—be judged as a whole. For this reason I believe the scale of points and card method of judging, not the correct way of judging Buff Cochin color. While the color of the Buff Cochin is pre-eminently the favorite exhibition color—and it is the fashion of the day to make everything buff—yet to me the chief beauty of the Buff Cochin is not found in its beautiful color, but is found in the matchless beauty of its rounded form. The line of beauty is the curve. In the best Buffs not a straight line in outline can be found. It has a rounded hackle, the convex cushion, the rounded breast, every outline is a curve. The portraits of Cochins in the suppressed edition of the Standard, in the Philosophy of Judging, and in Poultry Culture, and in our American poultry press generally, do not represent true Cochin form. The female is, or should be, steeper and fuller and more rounded in the breast and body, and should be evenly balanced. The heavy foot and big feathering of the true English Buff, in connection with its otherwise profuse feathering, gives to the fowl a certain massiveness in appearance which is very captivating, at least it is to me. I like big horses and big Cochins.

In breeding Buffs it is not so very unusual to obtain pullets with clear wings and tails, but a male with both wings and tail perfectly clear buff is very rare, so rare indeed that such an one can be classed as an accident. One of our oldest Cochin fanciers who has bred them in America for 30 years says he never saw but one male with absolutely clear wings and tail. The reason of this is very plain. The dark and white blood is in the fowls, and it is very apt to crop out somewhere. If I were writing a Standard for Buff Cochin males I would call for a clear buff tail for this is a very great beauty and is very noticeable, but I should not call for clear wings. I should permit dark in wings to go uncut and not call it a defect. Why? Because the color is in the blood—it is absolutely necessary that it should be in the blood or deep brilliant buff will be lost. It will break out somewhere, and it can be confined to the flight feathers and thus be concealed and not detract from the beauty of the plumage. I have seen in my life several males which filled this bill perfectly. Gorgeous buff plumes for the tail and all the dark out of sight in the wing flights.

In making Standards for fowls those things which are natural to the breed should be recognized. It is entirely wrong to make ideal standards which conflict with nature; breeders do not create colors. The best we can do is to some extent control the location of colors. In breeding Buff Cochins the breeder will select females as near as possible to the desired shade of buff, as free as possible from dark or white in wing and tail, and of as even a color as can be. The male for these females should not be the proper exhibition mate for them; but should, while of the same general shade be two or more shades deeper in color. Considerable black in wing is quite the thing, while the tail should be buff of a coppery lustre.

This mating should give many correct pullets and some fine cockerels, but for breeding cockerels I really prefer a pullet of almost cinnamon color, free from black in hackle, but with black in flights; some black in tail, although usually objectionable, is no serious matter. To such a pullet mate a male with clear buff tail quite light in color and some dark in flights. I have seen males with almost clear wings and tails of the brightest and most delicate shade from such a mating. This will be apt to give you some cockerels fit to use as males in the exhibition pen, but will not usually be so good as breeders at the head of a pen in the yard as the darker colored males. In short as a rule I regard exhibition birds as not altogether the correct thing in the breeding yards when mated together. Color is far more easily gained if once lost than is shape. Shape is not only the chief element in beauty, but it typifies the breed. As between color and shape,

shape is the most important and should have a much higher value placed upon it when judging Cochins. Here is another reason I object to the scale of points in the Standard as well as the Decimal system. The proper value is not given under either system to shape, I mean the typical shape of the breed. Color can and does win in our average shows over shape and this ought not to be so. If I were called upon to judge Cochins I should endeavor to give the honors to the bird which is of the best and most typical shape, and if there were more than one typically shaped bird, then to the one which in addition to typical shape had the best color; birds not of the typical shape should be passed over as wrongly entered and not judged at all.

Yet under the card system I have seen many birds score 87 to 90 points as Buff Cochins, which, except for a slight fringe of feathers on the legs and toes were much nearer the shape of the Wyandotte. I am one of those who believe that shape, like color, is a whole one section to be looked at as a whole, to be judged as a whole, and that there are but two sections in which it is according to all rules of art and of beauty proper to divide a fowl for the purpose of judging, viz: shape and color.

I know that all do not agree with me in this. I may be wrong myself, but so it looks to me, and I honestly think the day will come when the fancy generally will think on this point as I do now. Female beauty, masculine symmetry, perfect dressing, appeal to the eye as a whole, it is the *tout ensemble*, the whole business which attracts favorable notice or the reverse.

It is the effect on the eye who looks through the eyes, not a system of tape measures, so much for the nose, so much for the mouth, so much for the foot, etc., and then a sum in addition and subtraction. This does not awaken those emotions which a vision of loveliness does. Artistic beauty in any living thing does its work instantaneously or it does not do it at all. When it does not produce the effect at a glance there is no beauty.

But to return to Cochins. The heavy leg and foot feathers which are characteristic of the true Buff need constant care in the breeding pen, or they will become less and less every year. The constant tendency is towards less and less feather both in length and in quantity. While what is called a vulture hocked Cochin is not the exhibition Cochin, yet it is the source of all profusion of feathers. If a vulture hocked fowl were never bred from in this country at all, and no well feathered birds imported, it would not take ten years before all Cochins, still pure in blood, would lose their chief Cochin characteristics and become a short and hard feathered fowl, with only now and then a trace of feathers on the legs, and our magnificent Cochins would be no more. For this reason, and no other, I favor the removal of the vulture hock disqualification from the Standard, and would treat it as a defect when judging.

Cochins have to commend them to the breeder of poultry wonderful vigor and hardiness. A Cochin chick is usually raised, and as a cross it imparts size and vigor. As winter layers no fowl excel them. But it is to the fancier pure and simple, the person who with limited space, yet wishes to breed some fowls, and to breed something he can enjoy showing to his friends as an ornament to his home, and a fowl which is the king of the show room. It goes without saying that in the show room a pen of heavily feathered, large, massive, well colored Buff Cochins are the attraction of the poultry exhibition—the roast beef of the dinner. Other breeds serve as the side dishes, the deserts of the banquet, but the Buff Cochin is the principal dish. Success to all the breeds, but the Buff Cochin succeeds on its own merits.

I am glad you have at Los Angeles a poultry club; keep it up. God bless you all, brother and sister fanciers.

THE ROYAL BUFF COCHIN.

[By F. A. Stuart, Marshall, Michigan.]

The Buff Cochin is par excellence the fanciers' fowl. Leghorns and Hamburgs will lay more eggs; Brahmas, Wyandottes, and Plymouth Rocks may be

better table fowls, but withal the Buff Cochin retains the foremost place in the estimation of fanciers both in England and America. Of all the Asiatics they are to us the most beautiful. They are undoubtedly the oldest and certainly the most typical of the Cochin family, for they exhibit in the highest degree the distinctive Cochin characteristics of a broad, deep breast, short back with abundant cushion, with legs short and set far apart, with a profusion of fluff—the whole frame abundantly feathered and conveying the impression of massiveness and grandeur.

The outlines of the Buff Cochin are convex, and any approach to close feathering or to the Brahma shape of back must be avoided if the breeding of typical specimens is desired. The color runs through all shades from light lemon to a dark cinnamon, though neither of these extremes can properly be called buff. The medium shade between these two, a clear orange color, is to us the most pleasing and we think the most satisfactory and safest to breed, as the breeding together of lemon colored birds is certain to result in a still lighter color in the progeny, showing white undercolor and white in tail and wing flights, two very objectionable defects. On the other hand, breeding from very dark cinnamon colored birds may produce more black in tail and wing than is desirable, especially since the new Standard demands a clear buff color throughout in the female, no black in flights or tail, and the same in males except that the tail may be a copperish bronze in color.

One defect in color of otherwise very fine specimens is in the color of the shaft, while the remainder of the feather may be exceptionally good. While this defect is not so serious as many others, such as white undercolor, mottling, etc., and in fact is many times entirely overlooked by poultry judges at exhibitions, yet it is certainly never seen on first-class specimens, and is not in harmony with good undercolor.

Mr. Tomlinson, the oldest continuous breeder of Buff Cochins in England and probably in the world, mentions several variations in the colors of Buff Cochins now obsolete and never seen, at least in this country. One of these is the silver cinnamon; another color never seen now in Cochins was the Cuckoo Cochin, having a color very closely resembling the Barred Plymouth Rock.

In the breeding of Buff Cochins, or in fact in any variety, shape is of the first importance, but unfortunately most American Buff Cochin breeders have placed color first and apparently consider shape of secondary importance. Even most judges do the same thing, and practically endorse the evident opinion of the breeders. Reference to score cards on Buff Cochins will illustrate this by showing in most cases 75 or 80 per cent. of the cuts to be for color. Such a system of judging naturally compels the breeder to look more for color than for shape.

By reason of this we often see high scoring specimens nearly perfect in color, but with little or no cushion, not sufficiently feathered on legs and toes and close plumaged throughout. Such specimens are not Cochins at all, for the essential features of the Cochin family are absent, viz., the pronounced cushion, profusion of fluff and leg feathering and convex outlines, which can only be secured when the plumage is long, loose, abundant and fluffy.

The Buff Cochin is preeminently the bird of feather, and such a distinction as full feathered English versus American Standard Buff Cochins should not exist, and does not except on paper, for all Cochins should be full feathered. The more feathers the better, consistent with the general contour. For instance, a long legged, narrow breasted Cochin with scantily feathered shanks, with a large projecting hock would be an eyesore, but the same bird abundantly feathered on legs and toes would preserve the pleasing convex outlines and the large hock would not disturb the harmonious effect of the whole.

American bred Cochins, bred strictly according to requirements of our own Standard, are in no way inferior to so-called full feathered English Buff Cochins.

But the trouble has been that too little attention has been given to the strict Standard requirements, and the importation and exhibition of the English birds gave American fanciers a most valuable object lesson in demonstrating the value of shape and Cochin feathering over mere color.

That we have profited by the same was abundantly shown at our last Crystal Palace show at New York, where the American Standard Buff Cochins were as true Cochins in every particular as their so-called full feathered rivals.

We see it stated that the Black Cochin surpassed the other Cochins in laying qualities, that the Partridge is larger and handsomer, while the White Cochin is the choice of others. We welcome each of these as Cochin brothers, but, after all, if you are a true Cochin fancier what is it that commands admiration in your favorites? Is it not the massive form, the gentle disposition, the rugged constitution, and withal the lavish profusion of rich golden feathers from head to middle toe? The ideal Buff Cochin is the embodiment of these qualities, and so far we believe the full feathered Buff comes the nearest to this ideal.

THE POPULAR BUFF COCHIN.

[By W. W. Browning, Ogden, Utah, Honorary Member.]

The most popular variety of fowl at the present time is the Buff Cochin. The reasons are a rich, clear buff color, massive size, ideal shape, immense feathering, and docility. The demand for buff color has been so persistent that we now have a large number of breeders of numerous varieties striving, by crossing and otherwise, to produce the beautiful color of the Buff Cochin. Up to date no breeder of any other variety has produced a buff color approaching that of the Buff Cochin.

Many breeders have striven for years in mating their Cochins to produce that soft buff color so much admired, and finally become discouraged and disposed of their stock on the ground that Buffs were "too difficult to breed true to color." The fact is, properly bred Cochins intelligently mated will produce 75 per cent. of specimens that will average 90 points and over by our best judges.

To mate for color outside appearance is no criterion. The under color is the breeders' guide. The breeder who is particular about under color, wings and tail of his breeding stock will surely succeed. A buff with white or blue undercolor should be discarded; black in wings or tail is bad, but white is worse. Never allow black in neck of females; to do so is to transmit the defect to her progeny, and to use a cock from such a hen is to taint your entire flock. Again, it is difficult to detect black in the neck of a male except when moulting. Extra dark or nearly red specimens usually have light or defective under color and are not strong breeders for color.

The Cochin is a heavily feathered fowl, and it is not difficult to breed them with enough fluff and feather without vulture hocks. I have bred specimens with such an abundance of fluff that it became necessary to use the shears on them in order to get fertile eggs. Too much feathering is a positive injury, but at the same time to be properly feathered a Cochin should be well feathered from the end of the middle toes up, and appear massive but not slouchy.

In shape, the principal features are the convex or high cushion and short tail.

Put a rich clear Buff Cochin of proper shape and color and well feathered on the lawn, and it will attract the attention of every passer by.

Practically the Cochin is a superior fowl. For table purposes, when from four to 12 months of age, I know of nothing superior. They fatten more readily than most any other variety, are tender, fine flavored, and have beautiful skin and legs.

As a layer, they will not produce so many eggs in a year as some other varieties. They produce an abundance of eggs during the winter months. Being "on to their job," they do not lay cheap eggs abundantly during the summer season, but will hatch as many or more chicks during this period than any other breed. No other variety possesses so many desirable qualities.

To attain the best results the Cochin must be properly cared for. The greatest danger lies in over-fattening.

Some Comments and Comparisons.

TO THE AMERICAN FANCIER:

Under the above heading an article appears over the signature of George E. Howell. I take it by his remarks that the reports of the Orange County show which have appeared in your paper and others did not altogether meet his views of the actual happenings which took place thereat.

I am responsible for the reports which appeared in THE AMERICAN FANCIER and also that of The Live Stock Monthly.

The burthen of Mr. Howell's song seems to me to be that in those reports sufficient prominence is not given to the exhibits and exhibitors hailing from Orange County. Now, when I am engaged to report upon any show I don't lay myself open to inquire into whether exhibitors reside in the county wherein the show takes place or whether they are residents of Timbuctoo; it is with the specimens on view I have to deal and the merits they possess. In the outline I drew of the show and its promoters I don't think anyone can point to any passages contained therein but what give full credit to the executive for their endeavors where it is deserved, and as to the Orange County product of poultry, if he will refer to the report which appears in The Live Stock Monthly he will find the following paragraph: "Orange County is a great centre for fine poultry, and admirers of the feathered world were *en evidence* by the thousands that thronged the aisles in the poultry and pigeon division." In the same report, in speaking of the officers, the following appears: "The executive of the Orange County show have yet considerable to learn in the matter of running a poultry and pigeon show. Their will is good, and a more courteous lot of officers we never met with, from the ticket seller at the box entrance to the president, and they will 'git thar' in time."

Mr. Howell's tabulated statement of comparison is, to my mind, worthless, unless he had at the time of formulating it given the comparative number of exhibits in each class in 1893 and 1894. He goes on to say, "The time has arrived when the society must protect itself." I am with him there, but probably not in the way Mr. Howell intends the protection to take place.

The manner in which the poultry department of the Orange County show is managed must entail a very heavy outlay. To call it liberality is a misnomer; it is, to my mind, a sheer waste of the society's funds without advancing the poultry industry of the county one whit. What they require to do, if the management will pardon an outsider for making a suggestion, is to cut down the classification. Let them carefully scan the classes for, say, three or four years past wherein prizes have been awarded with little or no competition and ruthlessly cut them out.

Another set of classes also wants eliminating, namely, the prizes awarded for pens of chickens; I mean pens, not pairs, although I have an opinion it would be infinitely better to have separate classes for males and females, instead of having the birds shown in pairs. The prize money awarded for pens of chickens where, in many instances, they were literally in their babyhood is simply nonsense.

I must correct Mr. Howell in his assertion that prizes were awarded in the Pit Game section where they were entered under different names, as such was not the fact at the Orange County fair. I was asked by Mr. Rockenstyre, who judged the Pit Games, what my opinion was, and although I had an exhibit in this particular section, I said at once they should all be considered as one class and judged accordingly, and they were, notwithstanding your correspondent's assertion to the contrary. Only one first and one second premium were awarded to Pit Games, and, if my recollection serves me right, a pair of Irish Greys were first and a pair of Black

Reds second in chickens. What was done in the adult class I could not say, but I take it the judge adopted the same principle. If he didn't the fault lies with him; he ought to have done so.

As to what Mr. Howell says referring to my report as to the quality of many of the fowls on exhibit, what I said in this respect is absolutely correct. There are no ifs about it. Many were not fit to appear in a show pen, and if the judges had done as they ought to have done many dollars would have been saved to the treasury of the Orange County Agricultural Society, and justly so, as no judge has a right to award a prize to a bird or birds of inferior quality and thereby attach a fictitious value upon a specimen which does not merit it.

In following your correspondent's remarks, I find the chief sting, as usual, is to be found in the tail of his article, namely, a dead set at a class of individuals, whom he terms "ringers," who go from fair to fair with their stock. Now, if such have the best birds and honestly win the prizes they go for, I consider they are perfectly within their rights. If they get prizes to which they are not entitled, then I put it down to the incapacity or "cussedness" of the judge.

In the columns of THE AMERICAN FANCIER of a recent date to which Mr. Howell refers, if I remember rightly, from his own pen he makes a suggestion that those fair shows should be confined to residents in the county. Now, I differ with him there. Localize a show and a win at it does not count for much to a fancier who is up to snuff and wants to buy stock. I say have open competition; still, to encourage local exhibitors, societies would do well to have some classes confined to a certain area. They would tend to bring out local exhibitors and increase their numbers, which is, or should be, the chief aim of societies of the kind.

Referring to exhibitors being hard task masters, what is wanted is to employ judges only who have the grit in them to do what is right without fear, favor, or affection. When I have had the honor of judging a show I please myself whether it pleases grumbling exhibitors or not, and the same when I am engaged to write a report. Either of those offices are very unthankful ones as a rule. Still, they have to be filled by some one, and those who attempt to please everybody, as many try to do, to make things pleasant all round, the general result is, similar to the man who tries to sit between two stools, that they come to the ground. JOHN GLASGOW.

Mahwah, N. J.

Replying briefly to the above, let me say:

1. If Mr. Glasgow had read the article he refers to, he would have seen no mention in reference to or of his report, excepting as to quality of stock. I quote from a confidential letter I received from an exhibitor only this week, and before I read the above article: "So Glasgow thought half the birds were trash there. Did he mention the fact that some of it belonged to him? People living in glass houses should not throw stones."

2. The editorial advocating the exclusion of competition outside of the county came from the editor's pen, not mine.

3. My tabulated statement did show something. It showed that the county exhibitors were perfectly able to hold their own with one or five thousand birds, and that they competed in the strongest classes. We want outside competition, the more the better, but we want them to take the same medicine that we have always had to, and that is, no prize on a disqualified bird and no first prize on a bird that does not merit better than a second.

4. I defy anyone to produce a more liberal society.

5. There were more than two prizes awarded in the Pit Game class in the list of awards sent THE AMERICAN FANCIER, for I cut them out myself.

In conclusion, let me say it is to be regretted that Mr. Glasgow misconstrued my article in so much of it as referred to his report, which was admired on all sides for the graphic account and cleverness of the author. GEO. E. HOWELL.

Southern Shots.

Spicy Comments on Poultry Topics.

BY SL TWIST (of the *Southern Fancier*.)

"Even with our long experience and a distracted brain, we can only with difficulty refrain from giving rehashes in our 'Mentionings' Department."—Statesman Patrick Henry in *Poultry Keeper*.

How refreshing! And yet we must admit that the New Jew statesman *does* send out a great deal of *fresh* goods. His goods are always done up in small packages, and contain the stamp of the brain mint. He is privileged to criticise, because his humor is so unctuous and is always laden with so much sensible application.

One hundred and three degrees is the accepted temperature for incubation. Mr. Wheeler, of Experiment Station, Geneva, with clinical thermometers, finds the heat under the wing to be 106 to 109, and the *Poultry Keeper* makes the deduction that the mean temperature necessary for incubation is 103 degrees.

What is the matter with most of the October journals? They seem to be edited by a lot of Kilkenny cats. Curtis is just tearing Bates and the *Herald* all to pieces; McReynolds is just pawing up the earth with everybody and everything; and Felch is shaking Drevenstedt by the collar until he's blue in the face. In short, the bulldog star seems to be in the ascendant, and everything is snorting and choleric. The philippics of these fellows would be much more effective if they would sit on a block of ice when they go to write, so as to cool their temper and give us good English. All public controversies in this country ought to be conducted in the English language. The most sensitive gentleman in the fraternity seems to be Mr. Theodore Sternberg. Even on minor matters he writes with an amount of feeling indicative of an epidermis as susceptible to pain as is a looking glass to a breath. In the *Western Poultry News* he speaks of a "sore spot of years' standing," because some judge spoke unkindly of his exhibit. He was so hurt at the time that years have failed to heal the scar. Mr. S. should not put so much feeling in life. It's a rocky road in the poultry world if a man is hyper-sensitive. Buckle on your armor of thick-skinned indifference, Mr. S., and "let her roll!"

A very smart man,
Of verdant hue,
To whom is due
The thanks of all,
Is the celebrated Mister
Emery S. Pugh.
Oh, Pugh!
Oh, Pugh!

Every poultryman or commentator on poultry hygiene has a specific for the prevention of lice. The simple truth is, any one of them will prevent, if you will only use it, and use it soon enough. The main point is, to do and not to talk, and tell the other fellow how to do it. But human nature is given to advice rather than practice, and especially among poultrymen.

It's a good thing that Gilbert's "Pigeon Keeping—Hints to Beginners" is to be republished, with six new chapters added by the author. It is a most valuable book for pigeon lovers, even without the additional new chapters. In the past, if you could get hold of "Robinson Crusoe" or Gilbert's pigeon book I just did not care for corn sold or who was President.

In the "Chattertown Chirpings" of the *Poultry Monthly*, Aunt Elsie winds up one of her delightful children's talks with this query, "Who will be the next chirper to write to Aunt Elsie's big boy?" I answer unhesitatingly, Solon Pugh.

This is the time of the year when the early hatched cockerel struts around the yard proud of his sleek coat of iridescent plumage, most beautiful to behold, and reminds one of the time when he himself first changed from the jacket to his long-tailed coat. You can see that the gawky

cockerel is just the least bit ashamed of his attempt to be mannish, and his determination to show that he is a man in his endeavor to crow, recalls your endeavor for the same purpose, when you first raised a little fuzzy moustache. And that falsetto crow, which breaks off when it is but half way up to high C, and with a staccato quiver, humiliatingly tumbles down to a croak and a squeak, brings to mind Stuart Robson on the theatrical stage.

So if any of you old poultry lovers wish to delightfully ruminate and philosophize at the same time, go out into your poultry yard at this time of the year, and behold the beautiful pullets in their iridescent sheen, and the lusty young cockerels in this transition period of their lives.

There is no doubt that when raising poultry for the table, the matter of rapid growth is quite an item. And I don't know but that it is an important item at any stage of the game. Chickens are raised for brawn and physical usefulness, and there is no brain phase to them like in mankind; so that a dwarfed or stunted physique is a serious detriment to a chicken. Therefore, early growth, rapid growth, is economy and wise practical breeding. So keep your thinking tank in operation, and remember to select the rapid growing breeds and the large breeds, for they can be found among the good layers. In other words, don't go to sleep; keep your eyes open.

The Missouri State Show.

TO THE AMERICAN FANCIER.

The eastern people having heard so much of the great and only Mid-Continental show have no doubt come to the conclusion that this is the only show of any importance that will be held in Missouri this year. I wish to impress on the minds of the readers of THE AMERICAN FANCIER, that the Mid-Continental is only one of the many that will be held in this great and only poultry state of Missouri in the next few months.

While the Mid-Continental is likely to be the big show of them all, the Missouri State show promises to rival it in point of numbers and quality. There seems to be a regular fever here just now and everybody has caught it. The majority of the big breeders have concluded to make a big exhibit at the State show and then take the pick of their yards home and fit them for the Mid-Continental. I look for competition to be closer on Brown Leghorns, Langshans, Barred Rocks, Silver Wyandottes and Light Brahmas at the Missouri State show than was ever known in the west, in fact I have already seen birds of the above varieties that will break the record over anything ever shown in the state, and those birds will be at the Missouri State show. Breeders will be there with car load lots; this may sound a little fishy to you boys and girls back east, but I am personally acquainted with parties to-day that are figuring with a railway company for car load rates.

Now my reason for calling attention to this large show to the eastern breeders is this: You that are coming to the Mid-Continental show any way, will want to be in Kansas City the 20th of December, to attend the A. P. A. meeting, so why not come a few days ahead of time, take in the big State show December 11th to 14th? I tell you it is well worth your time to see the interest that is taken in this state association, and another important feature is the number of ladies we have as members and exhibitors. There are enough of them in the meeting to come pretty near voting things as they want them, and if they would vote as intelligently at the polls, I am sure I would be in favor of woman's rights. While I am a trifle old to be popular with the ladies, if "Quincy" Forsythe, Jacobs, or any of your young bloods will come out to the show I will see that you are properly introduced.

We are offering about \$400 in cash prizes besides some elegant specials and medals. The *Rural World* of St. Louis, Mo., one of the best farm papers published in America, is offering five silver medals on the following varieties: Best breeding pen in American, Asiatic, Mediterranean and Hamburg classes, also for best pair of Bronze turkeys. There is no

string on these medals, all you have to do is win them and they are yours for keeps.

Poultry Topics, one of the best 25 cent poultry papers on earth, offers two silver medals on highest scoring 10 birds in American and Asiatic classes. Now those medals are none of your 50 cent medals, but A 1 in every respect, and large enough to hold the foam inside a *White Horse Inn* beer glass. Come out you boys and win one of them!

THEO. HEWES.

Trenton, Mo., Oct. 23d, 1894.

Ontario and Durham Exhibition.

TO THE AMERICAN FANCIER:

The above fair was held in Whitby, and a grand success it proved to be. The poultry building was filled to overflowing with some choice birds, many of them being winners at Toronto, and shown by Thomas Rice and F. C. Hare (Whitby) and William Elliott and John J. Lenton (Oshawa). Strange to say, however, some of the Toronto winners were beaten by inferior stock. The judge (Mr. Joseph Dilworth, Toronto) had some queer ideas, with which many of the exhibitors could not agree. The following is the prize list:

DARK BRAHMAS.—Fowls, 1st, T. H. Paxton, Whitby; 2d, T. C. Nichols, Port Perry. Chicks, 1st, 2d, Nichols.

LIGHT BRAHMAS.—Fowls, 1st, Nokes & Dilling, Bowmanville; 2d, W. R. Knight, Bowmanville.

BUFF COCHINS.—Fowls, 1st, 2d, F. C. Hare, Whitby. Chicks, 1st, 2d, Hare.

PARTRIDGE COCHINS.—Fowls, 1st, Nokes & Dilling; 2d, Knight. Chicks, 1st, Knight; 2d, Joseph Ramsay.

A. O. V. COCHINS.—Fowls, 1st, 2d, chicks, 1st, 2d, Nokes & Dilling.

B. B. R. GAMES.—Fowls, 1st, 2d, chicks, 1st, 2d, Nokes & Dilling.

A. O. V. GAMES.—Fowls, 1st, Nokes & Dilling; 2d, N. & F. Northcote, Bowmanville.

S. S. HAMBURGS.—Fowls, 1st, Knight; 2d, Wm. Elliott, Oshawa. Chicks, 1st, 2d, Knight.

BLACK HAMBURGS.—Fowls, 1st, Nokes & Dilling; 2d, Knight. Chicks, 1st, 2d, Elliott.

POLANDS.—Fowls, 1st, 2d, Knight.

LANGSHANS.—Fowls, 1st, 2d, chicks, 1st, 2d, Knight.

BARRED P. ROCKS.—Fowls, 1st, John J. Lenton, Oshawa; 2d, Nokes & Dilling. Chicks, 1st, Lenton; 2d, Ramsay.

WHITE P. ROCKS.—Fowls, 1st, Elliott; 2d, T. S. Henry & Son, Cedar Dale. Chicks, 1st, 2d, Elliott.

HOUDANS.—Fowls, 1st, Knight; 2d, Nokes & Dilling. Chicks, 1st, Knight; 2d, Elliott.

BLACK SPANISH.—Fowls, 1st, 2d, chicks, 1st, 2d, Hare.

WHITE LEGHORNS.—Fowls, 1st, 2d, Thomas Rice. Chicks, 1st, Thomas Hawes; 2d, Rice.

BROWN LEGHORNS.—Fowls, 1st, 2d, Rice. Chicks, 1st, Hawes; 2d, Rice.

A. O. V. LEGHORNS.—Chicks, 1st, 2d, Hawes.

WHITE WYANDOTTES.—Fowls, 1st, Joseph Ramsay, Malvern; 2d, Lenton. Chicks, 1st, 2d, Lenton.

LACED WYANDOTTES.—Fowls, 1st, Lenton; 2d, W. J. Haycraft, Agincourt. Chicks, 1st, Lenton; 2d, E. S. Dearborn & Son.

MINORCAS.—Chicks, 1st, Rice; 2d, Haycraft.

B. R. GAME BANTAMS.—Fowls, 1st, Thomas Hawes, Whitby; 2d, Nokes & Dilling.

A. O. V. GAME BANTAMS.—Fowls, 1st, Nokes & Dilling; 2d, N. & F. Northcote.

SEBRIGHT BANTAMS.—Fowls, 1st, Rice; 2d, Elliott.

TURKEYS.—Bronze, 1st, Haycraft; 2d, Lenton.

GESE.—Emblen, 1st, John A. McGillivray, Uxbridge; 2d, Knight. Toulouse, 1st, W. Meen, Whitby; 2d, Knight.

DUCKS.—Aylesbury, 1st, Haycraft; 2d, Knight.

Rouen, 1st, 2d, Knight. Pekin, 1st, 2d, Haycraft.

GUINEA FOWLS.—1st, 2d, Nokes & Dilling.

SPECIAL PRIZES.—Best Barred Plymouth Rock, John J. Lenton. Best pair parti-colored fowls belonging to the American class, 1st, Lenton; 2d, Haycraft (both on Golden Wyandottes).

JOHN J. LENTON.

Oshawa, Ontario.

Corrections.

TO THE AMERICAN FANCIER:

In the list of awards at Mineola, Queens County, N. Y., Sept. 25-29, you have credited R. A. Homeyer with 1st on Black Leghorn chicks. This is a mistake, as we received the 1st prize on Black Leghorn chicks, this being our only entry in that class.

EVERGREEN POULTRY FARM.

Queens, N. Y., Oct. 29, 1894.

In the awards of the Orange County Fair, J. H. Doane, of Gouverneur, N. Y., should be credited with winning second on pair of Buff Cochins Bantam fowls instead of Wallace E. Griswold.

HELPS WONDERFULLY.

Put my same advertisement in THE AMERICAN FANCIER for another month, as it helps me wonderfully. CHAS. ENGLAND.

Baltimore, Md., Oct. 23d, 1894.

Western Gossip.

BY C. A. EMRY.

[Written for THE AMERICAN FANCIER.]

I have been so busy THE AMERICAN FANCIER has been neglected. I spent two days at the Illinois State Fair. The poultry exhibit contained nearly 3,000 entries, and was a credit to the Prairie State.

James Garvin, of Princeton, Ill., exhibited Langshans and S. C. B. Leghorns, winning 1st on Langshan cock, 2d on Leghorn cockerel, 3rd on Leghorn pullet. Mr. Garvin is the man who bred and owned the 1st prize Bronze Turkey tom at the World's Fair. While Mr. Garvin is not as large a breeder in quantity as many others, his stock shows best of matings and experienced judgment.

Mrs. Judy made an exhibit in S. and B.'s, Langshans, and B. P. Rocks that were a credit to her, and well sustained her former record in the show room. A majority of premiums awarded those breeds were attached to her coops. She also won 1st premium on display in Asiatic class.

J. M. Rapp, Lamoile, Ill., showed splendid B. P. Rocks, Bronze turkeys, and Pekin ducks. Mr. Rapp is an enthusiastic fancier, working for the best.

W. M. Summers, of Curran, Ill., showed an excellent line of water fowls and turkeys and the leading varieties of poultry. His collection was exceptional good.

E. G. Roberts, of Atkinson, Wis., exhibited a general line of leading breeds. His specialty for years has been S. C. B. Leghorns, and he won 2d on cock, 1st on hen, 1st on cockerel, and 1st on pullet in strong competition.

Rainey Miller, of Champaign, Ill., showed a large collection. Mr. Miller does an honorable business, and won a large number of premiums. At Indianapolis, Jacksonville, and many other good fairs Mr. Miller captured many premiums.

James Temple, of Cameron, Ill., showed a fine pen of Langshans, and while a new man, he will be heard from among good company in the future.

F. H. Cook, of Union, was a large and very successful exhibitor.

S. T. Jones, of Williamsville, Ill., made a fine show in the leading varieties of poultry and turkeys. His White P. Rocks won all four of the blue ribbons in their class.

The coops of Indian Games shown by Mrs. McClelland, of Williamsville, Ill., wore two blue and one red ribbon. Also her Dark Brahmas were winners.

The Reliable Incubator Company made an excellent exhibit. Their machines were continually hatching during the week, and attracted a large crowd of interested people.

The poultry display at the great St. Louis fair was the best in the history of that successful association. Three car loads from Ohio, two car loads from Wisconsin, one car load from Illinois, besides a very large collection by local freight and express.

The large hall was taxed to meet the demands, all breeds were classified, which makes easy work for the judge, and as a rule more satisfactory to the exhibitors. The management propose to increase their poultry hall to one-third more floor room, and hope to be in shape to better care for exhibitors in future years.

The fanciers at Junction City, Kansas, have organized the Junction City Poultry and Pet Stock Association, and intend holding a show during January of the coming winter. W. S. Scott is secretary. Indications for a grand show at Kansas City, are improving all the time. If Specialty clubs should condescend to meet there, great good can be accomplished, the great Mid-west demands it. One thing has pleased us, the steady improvement in fine poultry and the rapidly increasing interests manifested by our fair associations to encourage the better class only. The day of scrubs getting the premiums at fall fairs, is growing steadily less year by year.

The outlook for a splendid show at Macon, Mo., could not be better. The Missouri State show of 1894 will be a grand exhibit.

English Correspondence.

TO THE AMERICAN FANCIER:

I notice a letter signed "Zim" in your issue of September 29th. May I ask you to put me in communication with that gentleman. I supplied the late Mrs. R. W. Sergeant with Langshan birds and eggs from the spring of 1879 to the time of her death, which I think occurred in 1886, and she never once reported having sold or hatched out a White Langshan. Of course, I know a White Langshan would be possible, for white is the *spook of black*. The egg again puzzles me. The pure Langshan tints her eggs variously, and the same hen will do this. At the present time I have a hen that did lay a dark egg, and now it lays a chocolate white. I mean like chocolate with a good quantity of milk in it. Mind you, I am not disputing what "Zim" writes, but I feel more confident when a name is given in full, and I like to exchange experiences with other Langshan breeders, who really have the purity of the breed at heart. "Zim" tells of the Wyandottes producing white birds, but this is not a case in point with the Langshan, which is a breed of *absolute purity and not a made breed*. I do not say this to detract from the Wyandotte. I simply state what I know to be the truth. I have now had twenty-three years' experience with the Langshan. The first few years was spent in lifting off from it the *reproach* that it was a weed from a Black Cochon breeder's yard. A Cochon cross for some time did duty for the Langshan in the show pen, and latterly a Game cross takes in a great measure its place, although both flourish to the detriment of the *pure* bird. There would not be such a case against these mongrels were the Langshan an *ugly bird*. Instead of this, it is startlingly beautiful. My cockerels and pullets strike even the laborers in the neighboring farms as being wonderfully grand birds. Not long since I was crossing our field, through which there is a right of way, when a countryman passing along touched his hat to me, so I returned a "Good day." He said, "Whenever I pass this way I have a look at these birds; they are beauties. I am a cattle drover, and when I go to the great shows I always have a look at the poultry, but I never see any so fine as these." "That is because you see them free, running about, and happy," I replied. But it is a fact patent to all that the pure bird has in most cases been replaced by a mongrel. For instance, the judge who is to take the Langshan classes at the Dairy show to-day goes in for a Game cross. The pure bird, however beautiful, is passed over for this *mongrel*. The principal prizes go to a bird with long back and screwed up tail. This is especially seen in the hens and pullets, for cushion is conspicuous by its absence. Anyone acquainted with the pure bird will know what a graceful curve the back assumes. It has been called bank shaped and concave. The way in which a bird *sails round* or steps daintily along is very attractive even to those who are not breeders of poultry. I have heard even children remark, "What proud birds!" Again they have frequently been called "high steppers." I am very anxious that all the individualities of the Langshan should be preserved—the curve it at times assumes, its high steps, and the various tints in the eggs. I appeal to American Langshan breeders to help me in this. You are at liberty to make any use of this letter you please. A. C. CROAD.

Poling house, Poling, Arundel,
England, Oct. 9th, 1894.

Public Opinion.

PILSENER AGAIN.

"Pilsener," in THE AMERICAN FANCIER, is a great gun, "vell I dinks," if we may be permitted to quote one of his favorite sentences. In a recent issue some of America's pigeon cranks are pictured to life, and a great contrast to the pen-and-ink sketches which appear in the same paper over the *nom de plume* of the redoubtable "Senex." The latter writer, in his pen-and-ink sketches, was sometimes insultingly personal, but "Pilsener" is funny without being offensive. Go it, "Pilsener," we like your style.

"Senex" admittedly pictured from hearsay, but "Pilsener" shows evidence of having mixed with the crowd, and has a happy knack of transferring his observations to paper. *Live Stock Monthly*.

Better Attend to His "Feather-Legs."

TO THE AMERICAN FANCIER:

I was considerably amused the other day, when I read in the *Ohio Poultry Journal* an article under the title, "The Utility Games" by I. K. Felch, in which he advocates to the standard (his standard I suppose) and the show, various colored dunghills as "utility games." He starts out by lauding the old English Pit Game, speaks of its merits, beauty and courage, then after saying that "the time has come when our exhibitions, with the present public sentiment against Pit Game fighting can no longer make classes for Pit Game in the indiscriminate way of the past," deliberately describes a common barnyard fowl, suggesting its being made a standard breed because of the beauty, merit and gameness of the old style Pit Game. He suggests for colors, Black Reds, Brown Reds, Golden Duckwings, Blue Reds, Red Pyles, White Georgian and Black Belton. Why the Georgian and Belton is attached to the Whites and Blacks, Mr. Felch neglects to mention. He discards the Silver Duckwing color because he says the Silvers are only faded Golden Duckwings. Right here I wish to say that the Silvers are the only Duckwings that will breed true to color, that it is a true color and can not be made with any combination of the other Game colors. Golden Duckwing can be made on short notice from the Silver and the Black Red. The Silver Duckwing is one of the best outlined and oldest of game colors, and to call them faded Golden is as nonsensical as to claim Silver Wyandottes faded Golden or Silver Polish faded Golden Polish. Mr. Felch places his "utility" cocks at nine pounds (whew!) with short, "deep" face. After a lot of rubbish in which he describes a fowl to enter into whose class most any single combed dunghill of proper color would pass muster he "continues in next issue."

Mr. Felch does not describe the Pit Game either of the all English or any other type, and even if he did, who wants Pit Game in the standard? Even though true Pit Game be admitted to a Standard how long would it remain a Pit Game? How long would it retain this courage that Mr. Felch takes particular pains to praise and offers as one of the reasons why "utility" Games should become a standard breed? With due respect for Mr. Felch's knowledge as a poultry fancier, and especially for his knowledge of the Light Brahma and certain other breeds, I must say, that regarding the subject at issue, he simply don't know what he is writing. When the Pit Game breeders or fanciers want a standard for their pets, they will let us know, and I wager a cigar that they won't call upon a Brahma breeder to draft it for them. Let us hear from others who admire the true old fashioned Game.

OLD ENGLISH.

A Great Premium.

While in Kansas City Saturday last I was informed by the secretary of the Mid-Continental Association that Mr. Andrews, the big piano dealer of that city, had turned over to the association, a \$750 piano to be awarded to the largest number of birds scoring over 90 points owned and exhibited by one exhibitor.

I would just like to ask the readers of THE AMERICAN FANCIER how many men in the United States have ever made any such generous offer as this to a poultry show?

There is a string of special premiums offered there (outside of almost \$4,000 cash) that beats anything ever competed for in this country, and if the eastern men don't come and bring their birds I am going to order a boycott just as soon as the show is over.

The Exposition building will be used as a show room and will hold 10,000 birds with good light on all of them. Kansas City is going to do the proud thing by this show in way of attendance and you will be given the freedom of the city with the *jaill* thrown in if you will just come and help swell the crowd.

We want you and we need you, and we are making you offers that no club in America ever thought of offering to a show.

THEO. HEWES.

Our Ohio Letter.

TO THE AMERICAN FANCIER:

White Leghorns are without doubt one of the best breeds of fowls that fanciers are blest with to-day, and when I say white, it is not the intention to give all credit to the single comb variety. Rose comb White Leghorns are fast forging ahead in the northern states—considering of course the time they have been before the public. Some few years only since Rose Comb White Leghorns were viewed with suspicion, as are our new breeds to-day; but time always does for the strangers what lack of liberality won't do. The short body of the first R. C. W. Leghorns is now a thing of the past in all good breeders' yards and they have birds that are *Leghorns* in the strict sense of the word. It is true that scores of R. C. W. Leghorns do not run so high as the single combs, but in a few years we will breed rose combs on our birds with greater accuracy than is now done.

To get a good rose comb on a Leghorn especially, is not to say easy. The great fault is the Wyandotte shape of spike, or the spike, leaving the comb proper much below the surface. Both styles of combs are unsightly and should be bred away from at all times.

It certainly is not in keeping with reason to breed for any one section alone, but it surely does not go beyond bounds of sense to make the section that identifies a breed an especial effort, as I believe the comb of our later additions to the Leghorn family do.

Ten years ago single combs among our best matings were common, but to-day, and for at least five years it has not been our lot to have a single combed bird in the flocks. Careful mating has not only bred out the disposition to breed back, but it will also in course of time reduce combs in size as should be, and straighten even spikes as well. It is not my purpose to decry the single comb Leghorns, or single combs of any variety, but reason teaches us (or if it don't experience will in cold winter climates) that the rose combs have a decided advantage. Any casual observer at our fairs and shows will notice how badly single combs fare in this latitude in winter time.

All credit to the fancier who can make an improvement on any variety, be they standard or not. There has never yet been the handsome or useful fowl that did not have our best wishes for its future, and as our interest extends beyond three styles of combs I trust no one will construe our meaning beyond honest intentions.

THEO. G. SCHEID,

Smooth Judging.

TO THE AMERICAN FANCIER:

I see a great deal of comment in THE AMERICAN FANCIER in regard to score card and comparison judging, and while I am not set in my way in regard to either way, the smoothest judging I have seen was at the Illinois State Fair.

There was about twice as much poultry as there was room for, making it almost impossible for the judges to find the birds or get a look at them when they found them, so the superintendent put up a tent outside the poultry house and set coops in it for the judges. Then the show began in earnest, with a policeman at the door to keep out everybody except a breeder with a winner under his arm.

F. M. Munger took one row of coops with Plymouth Rocks, and J. W. Barker started on the Brahmas in the coops on the other side of the room. With all the fowls in a class before the judge at once it gave him a good chance to make a decision, as well as giving the breeder a chance to compare his fowls with the ones in competition.

The bad features of the judging that way was in the amount of carrying in and out of fowls, and, the worst of all, was fowls being overlooked on account of not having assistants enough to take the fowls before the judges at the proper time, some of them being overlooked.

JAMES GARVIN.

Princeton, Ill.

GETTING TO BE POPULAR.

THE AMERICAN FANCIER is getting to be a popular paper. I get answers from my advertisement from every quarter. E. E. PAGE, Cleveland, Ohio.

Noonday Notes.

TO THE AMERICAN FANCIER:

The Meridian Poultry Show is booming. Entries are coming in from all sides. W. E. Eallant of Chicago, has entered a World's Fair Game cock, said to be a winner of many specials. I do not know who showed him at the fair. Many specials have been offered since last report. J. C. Palmeter of Meridian, just hailed the writer, and offers to treat all the boys well at the Palmeter House; also to give a box of good cigars to the owner of best Barred Plymouth Rock pullet, and a set of table knives and forks for best Pea Comb B. P. R. cockerel. The American and U. S. Express companies will return all birds free if shipped by their lines to Cato or Jordan.

I would like to warn all pigeon and poultry fanciers against a dead beat who has caused me lots of annoyance. He paid for a lot of pigeons last spring with his note for 30 days. I was three months getting the money, then, foolishly, about Sept. 1, I accepted his check in payment for another lot of Turbits. His check was protested and I had to make it good and pay a protest fee of \$1.65 and cannot get him to pay or return the Turbits. Such is my desire to harm nobody that I refrain from publishing his name this week for fear he may be unfortunate and simply content myself with saying he lives in Orange Co. and his initials are J. P. M. I wrote him a week ago that unless he settled I would show him up in THE AMERICAN FANCIER. Next week I may give his full name.

I sent a list of all the special premiums offered to an eastern weekly devoted to the fancy, but for some reason they omitted from the list the four specials offered by THE AMERICAN FANCIER, which are: A year's subscription on best pair Pekin Ducks, best pair Bronze Turkeys, best pair Black Booted Tumblers, best pair Yellowwing Turbits.

The monograph on the Turbit pigeon by the Rev. W. F. Lumley is a very valuable work. Since reading it I doubly value my Silver Wing Turbit cock, whose mother was one of Mathias' blue hens.

In the *Feathered World* for August 24, 1894, I see that the first annual show of the Hull and East Riding Fanciers' Association had a very large entry of pigeons, and in Turbits the firm of Mathias & Lumley are mentioned in nearly every line of the awards. Mr. Lumley speaks of maple peas as being his standby to feed Turbits. I have lately fed Canadian or Alaska peas, which are very similar, if not identical, with the maple peas. They are small, sound and smooth and cost \$1.25 per bushel. CHAS. L. LANG, M. D.

Eggs and Egg Eating.

After all that has been said of the real worth of green bone for chicks and poultry, I want to add my testimony in favor of its use. I shall only try to give some of the established facts obtained by experience. Fresh bone, meat and gristle when fed to your poultry will also make the eggs more fertile. It has been proven by some of the foremost poultrymen that fresh bones cut and given to poultry will stop egg-eating, because it satisfies the craving of the flock for blood and fresh lean meat, both of which are supplied by fresh bone. One average analysis of these bones showed by actual weight thirteen ounces of lean meat, gristle and fat in every pound of bones obtained that morning at one of the markets. This meat, cartilage, etc., when cut up in small pieces and fed in a raw state to hens, gives them fresh, rich animal food. Another reason for their use is, that the bones are easily obtained and are very cheap, and when cut by a good machine you will find no other food that your flock likes as well. You can convince any one doubting this last statement by placing all your different kinds of food along with this cut bone and meat, and opening the doors of the pens. One trial will convince the most skeptical. The raw bone and meat is devoured at once, and although one ounce per hen for each day may be considered sufficient, many give their flocks more than this, and no disastrous results follow. We firmly believe no one having properly used green bone food has or

intends to discontinue its use. This may partially explain the fact that there are a larger number of poultry yards through the country than formerly. This improvement in feeding makes the poultry business more lucrative. Would it not be well for all those interested in poultry raising to give close attention to the most important methods of feeding their flocks, and in this way make a complete success of the business?—A Reader of *The Ploughman*.

Duck Raising.

BY G. A. M'FETRIDGE.

[Written for THE AMERICAN FANCIER.]

Duck culture became a paying business when carried on on a large scale. There is a great deal to learn for a beginner. The start should be small, say one pen, four ducks and one drake, give all the range possible and feed carefully, as over-feeding is conducive to poor hatches as it will weaken the germs, which means a great mortality among the young the first two weeks of their existence. Ducks do best when they have a range on swampy land as they can get enough to live on during the summer months although they should have some feed at night to induce them to come home. Ducks kept this way will lay more and better eggs, there will be no trouble in hatching and raising the ducklings. The young will be strong and vigorous from the start and will grow very rapidly.

Ducks are easily fenced, which is quite an item in the expense account. They do not need warm houses like chickens, that is, the houses need not be built so tight, as they throw off a great deal of heat and would smother where a chicken would be comfortable. The windows are usually kept part way open, even in severe weather, to prevent the house from becoming damp from the steam that comes from them.

Each house or coop should have a small yard around it to keep the ducks from going away until 8 or 9 o'clock A. M., as they often lay as late as 8 o'clock in the morning. They can be let out into this yard to feed any time after daylight. The feed for breeding ducks at present should consist of steamed cut clover hay, 4 parts, bran, 2 parts, corn meal, 1 part, No. 2 flour, 1 part. Don't feed any scrap or cut bone until the middle of November. I will write more about that later on.

Mr. Walton Resigns.

TO THE AMERICAN FANCIER:

It is with a keen sense of regret that I hereby respectfully tender my resignation as secretary and treasurer of the American Tumbler Club to my fellow members. My intercourse with the members, both personally and by correspondence, has always been of the pleasantest kind, and I sincerely trust that this kindly feeling shall always exist between them and myself, for with their permission I shall continue a member of the club. My reason for taking this action is on account of business duties occupying so much of my time that I am unable to do justice to my office. During the time I have held office in the club it has been my pleasure to have been in correspondence with nearly all the members, and although all have always shown the deepest interest in the advancement of our variety, I cannot help saying here that of all these enthusiastic fanciers Mr. F. W. Gorse has always seemed to me the most enthusiastic of all. I have not the pleasure of this fancier's acquaintance except through correspondence, but his letters to me have proven that he is an earnest fancier of the Flying Tumbler, and I therefore take the liberty, as a member of the club, of heartily recommending him as my successor. Upon being notified of the appointment or election of my successor, I shall take pleasure in submitting my report as treasurer, accompanied by a check covering the amount of cash on hand.

F. S. WALTON.
Philadelphia, Pa., Oct. 22, 1894.

PIGEONS.

Standard Announcement.

For the benefit of our pigeon readers, we have made arrangements whereby we can furnish the Pigeon Standard at 50 cents a copy.

Gilbert's New Book.

Owing to repairs on the presses and pressure of other work, the publication of the third edition of Major F. M. Gilbert's famous "Hints to Beginners" has been delayed. We hope to issue it shortly after election, November 6, when all orders will be promptly filled.

Editorial Squibs.

From the *Feathered World*, England, we glean the following, which will interest American Magpie fanciers: "In the issue of September 14th reference was made to the headway which the Magpie was making amongst American pigeon fanciers, and it is with pleasure that I note that THE AMERICAN FANCIER of October 6th reprints upon its front page, as the ideal adopted by the American Magpie Club, Mr. Lydon's illustration which first appeared in this paper on October 13th, 1893. Thus almost coincident with the unwelcome news of Mr. Warner's retirement from the fancy comes the compliment to that gentleman from across the water of his ideal bird being adopted by the American Club as the type to breed to. At the big shows last year at Baltimore and New York, 'Mags' at each event mustered nearly 100 strong, and the entries this year promise to be even heavier. New York gives eight classes, and it is hoped that at Cincinnati the same number will be allotted; so here again can be seen the good resulting to a breed from having a strong club devoted to its interests, and above all so capable and energetic a secretary as Mr. G. A. Fick, of Baltimore." Mr. Fick deserves every bit of the credit given him by our contemporary, and we will add that no squarer and more thoroughbred fancier exists anywhere.

The Carrier and Barb Club will meet at New York next winter, the majority of the members preferring the latter city to Cincinnati, Boston, or Reading.

We regret that the pigeon awards at the Hagerstown show did not reach us for publication in THE AMERICAN FANCIER. Henry Tiemann, of Baltimore, writes us that he was awarded first on Red Wing Turbits, Satinets, and Yellow Magpies and second on Red Rose Wing Tumblers.

The Boston Pigeon Association will hold its first annual show at Horticultural hall, Boston, Mass., December 12 to 14. Entries close December 1. Premium lists can be obtained by addressing C. E. Twombly, secretary, Boston, Mass.

As the Boston show will be exclusively for pigeons, we shall watch the result with considerable interest. Heretofore exclusive pigeon shows have proven financial failures, and if the "boys" in Boston succeed in coming out with a balance on the right side of the ledger, or even a small loss of cash, they will deserve a monument. Now, let every pigeon fancier worthy of the name take off his coat and help make the Boston show a success. John Kuhn, with his usual liberality, has started the ball rolling by offering \$225 in cash for specials.

The resignation of Frank S. Walton as secretary of the Tumbler Club is to be deeply regretted. No fancier in the country enjoys a greater respect and no officer could administer his trust more faithfully than Mr. Walton. Candidly speaking, the secretary of any specialty club is not to be envied. His position is not a bed of roses, and the lukewarm support the members give discourage the most plucky secretary.

Pigeon Notes.

BY JOHN HOPEWELL.

[ALL RIGHTS RESERVED.]

Continued from October 20th.

THE TURBIT.

Closely allied to the family of Owls, is the family of Turbits, and yet the difference in many points is so great, as never to permit of one being taken for the other. Both have very short bills, round heads, full eyes, and large frills on the breast, but here the resemblance stops, and the shell or peak of the Turbit with its colored wings, marks the point of variation between the two varieties. The nearest approach to the Owl is in the solid varieties, the only point of marked difference being the peak or crest, without this a solid Turbit would readily be taken for an Owl. The standard qualities of Turbits are:

Size.—Small. A little less than that of English Owl.

Carriage.—Erect and graceful.

Head.—Large, round, broad between the eyes, curving evenly upward from tip of beak to crown of the head, and then sloping slightly to where the peak or shell starts.

Peak.—A group of feathers springing from the back of the head, quite full at the base and tapering nicely upwards ending in a point about on a level with the crown of the head.

Shell.—A group of feathers starting at the base of the skull just back of the eyes and curving nicely and evenly forward, the top about on a level with crown of the head.

Mane.—An elongation of the feathers of the neck, commencing at the base of the neck, gradually increasing in length until they neatly unite with the crest or shell.

Beak.—Short and thick. The upper mandible curving downward, the lower mandible quite straight and fitting closely to the upper, and of a flesh color.

Wattle.—Full, but fine in texture, of a powdered white color and confirming to the curve of the head.

Eyes.—Full, round and large, situated well up in the head and of a dark hazel color, known as bull.

Jowl.—Quite full and neatly rounded.

Gullet.—Large, filling the hollow in the throat well up, and extending down to the frill.

Frill.—Composed of soft curling feathers, commencing just below the jowl and reaching well down the breast, starting from the center of the breast and extending both ways, outwardly increasing in width as it descends.

Neck.—Short, thick at base, but tapering neatly to point of juncture with the head.

Breast.—Full, broad and prominent.

Body.—Full, round and compact.

Back.—Straight.

Wings.—Broad at shoulders, carried closely.

Flights.—Short, and resting above the tail. The ten primaries white, secondaries colored like the shoulders.

Tail.—Short and closely folded.

Legs.—Short, free from feathers, coral red in color, ending in small feet, tipped with flesh colored nails.

Color.—All pure snowy white, except the shoulders in wing Turbits, and tails in Tail Turbits, which may be Black, Blue, Red, Yellow, Dun or Silver, each color bright, rich and glassy. The Blue having two broad, even black bars across the lower part. The Silver two, of a dark Dun color.

Solid Colors.—To be of a rich even color throughout, with all the characteristics of the wing and tail varieties.

Common Defects.—Long, narrow heads, spindling beaks, imperfect peaks and crests, the same too far down on the neck. Small, deficiently developed frills, foul shoulders, flights, thighs and tails. Lack of soundness in color.

Disqualifications.—Long, spindling beaks, foul necks, breasts, shoulders, tails or flights. Crests or peaks not well developed and carried to one side. Feathered legs, disease and deformity of any kind.

There is a plain headed variety of Turbit sometimes met with, and by some called Colored Winged Owls. This standard will apply to them, with the exception of mane and crests.

Seamless Bands.

TO THE AMERICAN FANCIER.

I have often been asked all sorts of questions about seamless bands for young pigeons, as to what were best, where to get them, when and how to put them on, etc. The absolute necessity of using seamless bands is something that presents itself to every breeder who raises birds of any value. I can well remember when a band of any kind was a great novelty, and a seamless band an unknown thing.

The great fundamental band, if I may use the term, is the English Enamel Conference band, which can be had of H. Allsop, Birmingham, England. This band is of a delicately tinted color, and has on it the year and a letter which distinguishes the variety of bird on which it is to be placed. It is nicely rounded on the edges, is the proper size, and is quite an artistic affair. But it simply fixes the year of the bird's birth and nothing else. Hence it is not what we want in progressive America. Its chief value, and its only one, is to prevent any underhanded work in the "young bird classes." But when that is done it has fulfilled its mission, for as a means of further identification of a bird it is valueless. The open band made in this country is of little use, save for the owner's private mark, as it can be put on or off at will. What I consider the best band extant is made by Mr. E. F. Webb, of Charlestown, Mass. It has the year of birth in large, distinct numbers, and has also the loft number, equally plain, and the initials of the man who breeds the bird. For instance, if at any time in the next ten years a man finds on a bird a seamless band as follows, "1894, F. M. G., 650," he will know that the bird was bred in my loft this year, and he can write to me and get its full history. I have only to turn to my loft register and can then give its parents, grandparents, etc., as far back as is necessary.

Now, to put on the band, a man must use his common sense. It is useless to put it on to a wee bird that is liable to slip it off during the next hour and lose it in the nest. Wait till the bird is well along, so that it is some little trouble to slip it on. Then take the bird carefully and turn up the back toe along the leg, slip the three front toes in and then slip the band on, and clear up on the leg; then with the thumb and first finger gently draw out the back toe into place. The band is then on to stay for the rest of the bird's life.

There is one good point in these loft bands, in that they keep irresponsible men from palming off scrubs and claiming that they are from noted lofts. A gentleman told me only a few days ago that he had run across a lot of pens of "Gilbert's Fans" in another city that were "guaranteed" to be bred in my loft. I asked him what kind of leg bands they wore. He was not certain, but on his next trip he looked and found they wore none at all. He asked the party why this was, and was told that I never used bands as I "didn't want the judges to know my birds." That was a pretty good lie, but it showed me that the dealer was pretty shrewd. He had no doubt read that a bird when entered at a show must have no distinguishing mark. That is all very well as far as it goes, but it is quite a reflection on the honor of American judges. A judge who would look at a ring and not at a bird has no business posing as an honorable gentleman. And it is too much to ask honorable fanciers to lose all track of their matings and their results in order to conform with a rule made simply to control English sharpers who pose as judges.

If a fancier wishes a ring simply for his own guidance during the season, a plain open band with a number on it is all he needs. These can be had of Mrs. E. S. Starr, Philadelphia, or can be gotten through any reputable fanciers' paper.

There is another English ring, which is a plain tab with a number on it, which is on still another plain open ring. These I never liked, as they are a constant annoyance to the bird, and the tab is likely to slip off the ring at any time. There are many fanciers who use two bands—the English on one leg and

the seamless American band on the other. I think I can say candidly that the English Conference band did a world of harm in this country a few years ago. They were imported in great numbers and put on to young birds, which later on posed as imported birds, just over from the great English lofts.

There was many a scrub that gained honors through this little scheme. Now they are so common that no one should be misled. It takes something more than an English band to make a bird now.

I can remember when we made our own "bands" out of a little piece of red or blue worsted, but "that was in the long ago." As it is now, with so many varieties of bands in the market, no fancier, no matter on how small a scale, can well do without them.

F. M. GILBERT.
Evansville, Ind., Oct. 15th, '94.

Mass. Columbarian Association.

TO THE AMERICAN FANCIER:

The first semi-monthly meeting of the above association was held at Union hall, 133 Blackstone street, Boston, on Friday evening, October 26th, with President Gavin in the chair. This being the first show night brought together a large attendance of members, some 37 being present. About 20 Tumblers were exhibited by Messrs. Connors, Whitely, Horsman, Willetts, and Vanwart. Among them were some very good specimens, notably Mr. Connors' Red Badge hen, about as perfect as they can be got, and a young Silver, the property of Mr. Willetts. Mr. Whitely also showed a nicely Badged Blue, but a little off in the wing butts. Mr. A. T. Davis made the following awards in the Badge classes: 1st Black cock, 1st Black hen, 1st Blue cock, 1st Blue hen, T. Willetts; 2d Black cock, C. E. Vanwart; 2d Blue cock, 2d Blue hen, F. W. Whitely; 1st Red cock, 1st Red hen, T. Connors; also 1st Red hen, 1894 hatch, went to Horsman. Mr. John C. Billings made the following awards on the Solid Muffed Tumblers: 1st Blue hen, Horsman; 1st Silver cock, 1st Silver hen, 1894 hatch, T. Willetts. The classification as laid down by Mr. Harris for Homers was accepted. Mr. Middleton's arrangement of dates for the different varieties to be shown was also accepted. The question as to what shall be printed on the prize cards, &c., was left entirely in the hands of the printing committee.

On behalf of the association and through our president, Mr. Joseph Gavin, I have to thank Mr. George Ewald, secretary of the Cincinnati show, for a communication received wherein he cordially extends an invitation to all members of our club and also other New England fanciers to send exhibits and in that way help to support the show. It is a well known fact that Brother Ewald is a genuine hustler and it is to be hoped the fanciers in this section will give Mr. Ewald and the Cincinnati show management that encouragement they so richly deserve. I am given to understand the birds will receive the best of care and will be promptly returned at the close of the show.

Have also to thank Mr. Ehinger, president of the American Magpie club, for the receipt of two very neat and attractively gotten up standards for the above club; they contain a very appropriate letter from Mr. C. Burton, Barnes, England, a list of officers and members. The centre of the card contains the cut of a Magpie as adopted as a standard to breed up to. The whole being a great credit to the club. There is also a very neat sample of what I presume to be one of their prize cards which, to my mind, might be made a trifle smaller to advantage. This also contains the same cut in the centre with spaces left denoting the amount of the premium, number of class, band number, year and at what exhibition and where held. Also the date, places for the president, superintendent, judges, secretary and treasurer's signatures, the whole being a great credit to the members of this lively club. A long life and lasting prosperity to the Magpie club are the wishes of the members of our association.

The next meeting will be held at Union Hall, 133 Blackstone St., on Friday evening Nov. 9th and the varieties to be exhibited are Black and Blue, Pied Pouter cocks same in hens; Blue and Silver English Owl cocks, same in hens; Black, Red, Yellow and White English Owl cocks, same in hens; Almond Tumblers, Kites and Agate cocks, same in hens and same in young birds. Members will please take notice.

GEORGE FEATHER,
Corresponding Sec'y.
Ballou Ave., Dorchester, Mass.,
Oct. 29, 1894.

A Trip Among the Fanciers.

TO THE AMERICAN FANCIER:

A comedy writer once wrote a play, entitled "Oh! Such a night." Now I might write "Oh! Such a trip," but if I wrote under such a heading it might be mistaken that I had been upon a spree with the honorable gentlemen whom I had the pleasure of calling upon. Now it is not everyone who can boast of having had such an extremely enjoyable visit among true fanciers of pigeons and poultry as it fell my lot to have. It was my intention to stop at Indianapolis but time was limited, as I was combining business with pleasure, it was necessary for me to skip Indiana's great city and push on to Louisville, Ky. There once and I was made at home by the united cordiality of Hon. John H. Kuhn and Mr. Charles Tanner. The morning was passed pleasantly in conversing upon the various topics of interest to fanciers such as the coming Peoria show Nov. 28th to Dec. 3rd where John H. Kuhn will judge pigeons. The questions of the formation of a National American Band were talked over. Now I believe I can safely say that the following gentlemen all well known pigeon fanciers are in favor of adopting a standard, enameled, dated and numbered band or leg ring—Messrs. John H. Kuhn, Charles Tanner, F. M. Gilbert, Fred C. Weiss, Edw. T. Hazeldine, Max Koenig, August and Robert Joos and many others including myself. All with whom I have spoken upon this subject have expressed themselves favorable to this leg band, but want some one to suggest how to bring about its national adoption. Mr. Tanner invited me to take dinner at his lovely new home with his family and it was much pleasure to accept. After dinner Mr. Tanner took me through his pigeon lofts, showing me a grand lot of Turbits and Magpies, which he will show at Peoria and other prominent shows this winter, then he placed me in position to view his pugilistic game chickens. It will be hard to defeat some of his birds in the ring.

Next we took in the lofts of Mr. Kuhn; now that takes time as Mr. Kuhn has many birds and many lofts. He is one of America's largest breeders of fine pigeons and also has some great game chickens. The pigeons which were shown me were of many varieties and good individuals in all varieties.

Personally John H. Kuhn is one of the best men in the fancy and has done much to encourage and increase interest in pigeons. From Mr. Kuhn's we went to call upon Mr. J. W. Reccius and found him absent attending the K. of P. meeting at Washington, D. C. where I would like to have been myself, I being a Knight. We saw his birds and many birds he has to be admired. I am sorry I failed to meet him personally. After supper Mr. Tanner took Mr. Kuhn and myself for a drive. We called upon the Ornsby Bros. They kindly exhibited their birds by lamplight. They have good birds and some that will become winners of high honors at the shows. It had become late so we sent Charlie Tanner home, he being too young to be out.

Mr. Kuhn and myself returned to my hotel where we spent an enjoyable hour in conversation. I regretted much to bid him good-bye.

The following morning I took the train for Evansville, Ind. to visit our mutual friends, F. M. Gilbert and Fred C. Weiss. Any one who has ever visited these notables can only imagine the reception with which I met. First one then the other took me in charge and it was one continual round of pleasure. The birds I saw at the plastered loft of F. M. Gilbert made me envious so I just bought a

few good ones. Now Gilbert has grand White Fantails and Weiss has grand plain white and Saddle and Tail Fantails. Speaking of Weiss he is pretty big company, in fact so tall it is hard to keep track of his sly glances upon the fair sex. Leaving Evansville Saturday night I arrived at Terre Haute, Ind., early Sunday morning. About ten A. M. Mr. Edw. T. Hazeldine called at my hotel and invited me to dine with Mr. and Mrs. Hazeldine which kindness it was impossible for me to refuse as a better host and hostess could not be found anywhere. Ever since my return I have been blowing about "Hazel's" blowers and the manner in which he blows to make his blowers blow. Why they can blow a crop as large as a circus balloon. Hazeldine has good Fantails and Jacobins, but excels in Pouters which are grand.

After such a trip among such ardent fanciers, it is no wonder that I return to Peoria, following my friend Hazeldine's example of blowing, as all of these gentlemen have agreed to exhibit their best birds at the Peoria poultry and pigeon show to be held at Peoria Nov. 28th to Dec. 3rd, 1894. CHARLES W. ROBISON,
Peoria, Oct. 3rd, 1894.

The Boston Show.

TO THE AMERICAN FANCIER:

The Boston show is bound to be one of the best, if not the best, pigeon shows ever held in this country. I do not say this simply for the sake of something to say, but because everything indicates that such is sure to be a fact. Every fancier whom I met while on a recent trip in company with Mr. Tudor, Jr., in and about New York, was very much interested in the promised show, and one and all promised to liberally support us with entries, while many offered specials, which is sufficient proof that they endorse our show. To say that we were pleased with our trip would hardly cover the feeling of triumph which we possessed upon our departure from New York, and it is very safe to say that never was a show for fancy pigeons launched before in the history of this country that had brighter prospects than has the coming Boston fixture. There is not a particle of opposition or unfriendliness shown us at any point, and I feel sure that every fancier in America has the welfare of the show at heart. All any show needs is the hearty co-operation and support of the combined fancy, and this is just what the Boston show has got and is going to have. We have done our utmost to give a classification that will just suit the fanciers of this country, and with success I feel certain, for our classes have been looked over by such men as Messrs. Crawford and Glasgow, and they could suggest no change that could be made to better benefit the promoters or intended exhibitors. Our prize money is liberal, \$2 first and \$1 second, with but 50 cents entry fee. By setting the entry fee at a nominal sum we expect many young fanciers will show with us who would not care to risk \$1 on each bird at the New York show. The only other 50 cent pigeon show of any note held for many years was that at Philadelphia in 1892, which was a combination show, and the entries amounted to in the neighborhood of 1,400 birds. This was two years ago, and all fanciers know there are many more high class and really good specimens in this country to-day than there were in 1892. Many very good cash specials will be offered at the Boston show. Mr. John H. Kuhn has offered \$225, to be divided on various varieties; Mr. H. O. Havemeyer has offered \$25, Mr. Tudor \$10, Mr. Ingram \$2, Mr. Gorse \$5, Dr. Kendall \$5, D. E. Newell \$5, the club \$10, and the writer \$5. Several more good ones will be added before the premium list is sent out, which will be in a very few days. Now I want every pigeon fancier who may possibly own a few show birds to wake up and realize that Boston, the greatest pigeon centre in America, is going to have a pigeon show, beginning December 12 and closing December 14, 1894. Send in your entries early, for there are but 30 days before the entries close, and it is very poor policy to wait until the last moment. The premium lists will be ready by the time this is being read, and

if any fancier should by chance be overlooked we shall deem it an especial favor if he will drop us a postal giving his name and address. No fancier, large or small, will be skipped intentionally.

C. E. TWOMBLY, Sec'y.
October 31, 1894.

That Turbit Sketch.

TO THE AMERICAN FANCIER:

I have just read with much interest and quite a little amusement Mr. Chas. L. Lang's criticisms on the drawing of Mr. Tanner's Turbit cock made by myself. I do not call the drawing really first class myself, but, then, it is a fair likeness of the bird, and I can't see anything "awful" in it. As to Mr. Tanner not thinking it an accurate portrait, I will try and relieve Bro. Lang's mind at once. I am sure friend Tanner will forgive me for just quoting a part of his letter to me in regard to the drawing, which I give below:

"MY DEAR BUTTLES:—I am in receipt of your letter, the drawings, and the birds, and you have certainly gone to a great deal of trouble, and which I think is not right to expect you to do for nothing. As you make no charges, I will ask you to accept as a token of my appreciation of your excellent work the best headed Turbit I own, and I hope he may prove of valuable service to you as a stock bird. He is solid white, but Oriental bred."

I imported him last December, and entered him in the solid Turbit class at New York, where he won first. Now, in regard to the pictures, I should say they are very fine, and I dislike to put any criticism on such good work, especially where it is gratuitously performed—I had asked Mr. Tanner to fully criticize the work, so I could correct it—"but as I know you are too broad gauged to accept my criticisms in any other than a friendly spirit, I will speak my candid opinion. I am, of course, no artist, and really have no right to comment on this matter, but I cannot help but feel that the picture of the cock where he stands alone is 50 per cent. better than in the pair picture; the head is better, and as for the shape, style and general character, why I should say it cannot be excelled. In the pair picture the head of the cock is just a bit lofty, and in the hen she is just a little deep in the chest and looks a little stiff to me. If only one sketch is shown, we should show the single bird. One thing is sure—we ought to get the latter reproduced by all means, for the symmetry and grace of the drawing is so good that it would be a great advertisement to you as an artist and to me as the breeder."

If not asking too much, would you let me have the sketches when you are through with them—I mean the head of the Turbit and the one on which I have marked as being so exact a likeness"—(meaning the Turbit cock Mr. Lang thinks is "awful" and which he "bets Mr. Tanner won't own as being an accurate portrait"). "I would like to have them for my scrap book."

With sincere thanks for your kindness, I remain, very truly yours, C. J. TANNER."

I believe Mr. Tanner is as able a judge of Turbits as any fancier in America. At least, your readers can better decide just how "poor" (?) that awful drawing is.

The Turbit cock in question is the best Strawberry cock in America, his only faults being a low peak and just a trifle flat on head. He has won 1st Nashville, 1st Reading, 1st and special Atlanta for best Turbit in show.

C. W. BUTTLES.
Columbus, O., Oct. 9, 1894.

Transfers.

From Henry Tieman, Baltimore, Md. to John Loffler, 3 Satinettes; to J. H. Mehring, of Littlestown, 4 pairs of Satinettes and 1 pair Crested Black Magpies; to Mr. Engelhardt, of Chicago, 1 pair Yellow and 1 pair Black Smooth-head Magpies and 5 pairs of Homers; to Mr. Brown, of Baltimore, 1 pair Red Badges, 1 pair Inside Tumblers, and 1 pair Fantails; to John Langville, of Baltimore, 7 Black Muffed Tumblers; to Mr. Geo. H. Whitehead, Trenton, N. J., 3 pairs of Wing Turbits; to George Meredith, of York, Pa., 1 pair Satinettes

Tumbler Club.

TO THE AMERICAN FANCIER:

It is with feelings of deep regret I have been advised of the resignation of F. S. Walton as secretary and treasurer of the Long Face Tumbler Club. As he claims this to be his final decision, I consider, in view of the approaching show season, it very important this position with the club should be filled at once. I would accordingly call on members of the club to send me on or before November 8th, at my office, 304 Rialto building, Chicago, their vote for secretary and treasurer of the club. The name of F. W. Gorse has been proposed. If his nomination meets with the approval of a majority of the club members, it will be duly announced in this paper. Should any other member be desired, the one receiving a majority of votes by November 8 will be declared elected. Send votes as above promptly.

J. H. WHITMAN,
President Tumbler Club.
Chicago, Ill., Oct. 29, 1894.

All Aboard for Peoria.

TO THE AMERICAN FANCIER:

All fanciers who have not as yet made an entry at the great Peoria show should do so at once, for it promises to be a grand exhibition. The entries are coming in in fine shape, and from present indication there will be no lack of competition in most classes. There will be lofts represented that never were represented at any show before. We invite all fanciers to attend our show in person, but if you cannot accept this invitation send us an entry, and we will try and prove to you that we appreciate your favor by taking the best care possible of your birds. All helpers at the show will be fanciers, men who have spent years in the fancy, and men who have a kindly feeling towards the little feathered pets. If you have not received a premium list, you should send for one, as all entries close November 15th.

ROBERT JOOS, Supt.

The Carrier and Barb Club.

TO THE AMERICAN FANCIER:

The members of the Barb and Carrier club have voted to hold their next annual meeting in New York at the time of the poultry and pigeon show in Madison Square Garden. Six members voted for New York, two for Cincinnati, one for Boston and one for Reading. Three members did not vote. Now that the place of meeting is decided on, it is to be hoped that each member of the club will arrange to attend and also to send to the show as large a string of birds as he can. Although wishing and doing for Cincinnati, Boston and Reading whatever we can to make those shows a success let us make the exhibition of Barbs and Carriers at New York the largest and best ever seen on this side of the Atlantic.

J. S. RITTENHOUSE, Sec'y.
Reading, Pa., Oct. 29 1894.

Pigeon Flying.

Homing Gossip and Echoes From the Flying Fancy.

BY "FRITZ."

I am very much pleased to resume my columns in the pigeon flying department of THE AMERICAN FANCIER, and judging from the very many expressions of regret which have reached me from readers of my notes since they were withdrawn, both at home and abroad, not excepting the very kind and flattering criticisms I have been honored with by the editors of the chief foreign pigeon journals, I cannot but feel that my many friends too will feel pleased at seeing me once again at work.

I sincerely trust that our American flying fanciers will now extend a more substantial support to the journal in the shape of subscriptions and advertisements than that which marked the first year's issue of the paper, also items of interest contributed from the various sections. For the present I must content myself

with a semi-monthly appearance, but I feel sure that at no distant day I shall be able to resume my weekly notes if the support given THE AMERICAN FANCIER at all approaches that which is promised. I am very hopeful that it will.

As Messrs. Blunck & Drevenstedt announced in the issue of THE AMERICAN FANCIER of September 1st, last: "News-papers are not published for fun, but are run the same as any other business—for profit," I cannot afford to give my necessary time and labor for nothing, neither can Blunck & Drevenstedt, the proprietors of THE AMERICAN FANCIER, afford to pay me for my services, unless Homing fanciers will assist in the work, in the shape of subscriptions and advertisements. Surely all flying men throughout the United States should be willing to chip in the cost of a yearly subscription to THE AMERICAN FANCIER which gives them weekly, or even semi-monthly, an epitome of items of passing interest in the flying fancy and the columns of the journal which are open to all, are a valuable and necessary medium whereby the followers of the sport throughout the various sections may interest and instruct each other. There is a heap of Homing matters of interest which should appear in the journal apart from any one individual witness, and I hope to see the pigeon flying columns used more frequently from now on than they have in the past, by the various sections. From the many communications sent to me consequent upon the withdrawal of my weekly notes I cannot but feel that they have been read with pleasure and profit. I therefore say with the proprietors of THE AMERICAN FANCIER, as expressed in the issue of Sept. 29th, last: "Now boys take off your coats and go to work. We press the button and you do the rest." All Homing fanciers should by this time fully realize how valuable and necessary is a weekly journal devoted to their sport, but if they persist in withholding so narrowly legitimate and necessary support, then all I have to say is, that there is no future for the American flying fancy.

I know of no question in a flying club which requires a more careful adjustment and consideration than the one of the membership radius, and it is a question which is being constantly agitated with often more or less disagreeable results. Just at present I learn that the Brooklyn section of the Empire City Flying Club of New York and vicinity are seriously considering the subject, and at the approaching annual, will move for increasing the number of independent and distinct sectional races, uniting with the New Jersey section of the club in a general competition from the 400 and 500 miles distances in the old bird season only.

The Brooklyn and New York fanciers have long and justly viewed with extreme disfavor any general competition against the New Jersey lofts except from the extreme distances, and now that the membership of both sections of this prominent club are so complete and representative, there is no earthly reason why their sport should in any way be marred by uneven competition, either imaginary or actual. That the birds of the Brooklyn fanciers are very, very frequently handicapped in racing against those of the Newark lofts, and particularly over the south-western course, is indisputable, and in the proposed increasing of more independent and distinct competition by its sections, the club will be but following in the footsteps and experience of some of the large flying clubs abroad. From all I can gather, the matter can and will be amicably adjusted by the membership at the coming annual, and the unity and progress of the club in no way threatened. For the full and complete enjoyment of the sport, large clubs are essential, both in the matter of funds, equipment and competition, and in the proper protection of the records. Luck enters very largely into the sport of pigeon racing now, all things being nearly equal in the matter of quality and condition, and more or less advantages of location, winds and weather, will continue to exist, in spite of all that can be done, but intelligent reasoning and observation can remedy many of the more marked inequalities, and I quite agree with many of the Brooklyn fanciers that the time is now ripe for a more satis-

factory adjustment of the one of section or district in the Empire club as now upon the tapis.

In reviewing the flying work of the past season throughout the various sections, I note that the younger fanciers or less prominent homing men, have gained the major share of the honors, and I am very pleased it is so.

There is nothing so helpful to the young fancier in keeping his enthusiasm warm, his care of his birds correct, his attendance to his club and associations and his connections with the flying fraternity a mutually agreeable and pleasant one, as a little success.

It matters not whether it be by a fluke or well deserved, the healthy influence is very marked and I have on many occasions seen the result of a position well up in a race, or a win, immediately wipe out many pangs of disappointment and long drawn hopes, also cancel even determined withdrawals from the fancy.

There is nothing so encouraging to the flying fancier as little success, and while it occasionally has a reverse influence to what I have drawn, sometimes producing in the fortunate novice a severe case of what our old friend, Dr. Strong, aptly termed "hydrocephalus," or "the big head," and rendering the once former modest and retiring young fancier both "chinny" and decidedly "patronizing" and less careful in the handling and keeping of his birds. Still on the whole I am always pleased to see the honors of a flying season resting on the shoulders of both novice as well as old stager, and as a general thing the influence is a healthful one all around, the novice spurred on to further success and the old stager doubly anxious to regain any waning prestige.

Our brethren in England are just now deeply exercised over the question of a flying course and a proposed change of route from the south of France into England to that of the north course from Scotland is the all absorbing topic there at present. The disastrous results attending their initial grand national this year from La Rochelle appears to be the main cause of the proposed change, much as it was with us some years ago. Just as soon as a disastrous race was in order from Virginia or Carolina, or the District of Columbia, just so soon was the course controversy the main topic between the different advocates for the western and southwestern. Then came a change to the west shortly, a hard fly from the west, in which our best birds got a bad grueling and the losses very heavy, turned the feeling once more for the southwestern course, and so on. Of course the birds of our English brethren have many serious disadvantages to contend against in the distance racing from France, the water or channel portion of the course being the great stumbling block, and yet in good weather this 500 miles station has often been flown and flown well.

But the good days appear to be so few and far between in the experience of our English cousins and the losses so heavy from the La Rochelle tosses that very many in the fancy are clamoring now for a change of course and like the compass nearly all have the index finger pointed north.

This northern course may have many practical advantages for the fancier in the south of England, or perhaps to some portions of the midland countries, but what the Lancashire and Yorkshire or northern flying men will do for a 500 miles station remains to be seen. Perhaps stick to La Rochelle and the south, a veritable "Hobson's choice." Mr. Jno. W. Logan with his long and varied experience proposed this change of route before the disastrous toss of the grand national birds at La Rochelle, and I quite agree with him in his remark that "to continue over and over again to knock one's head against a stone wall, may prove a man's claim to bulldog pluck, but it would hardly be taken as evidence of his wisdom." A truly sensible remark. Our English friends are indeed exceedingly handicapped in their distance flying, and without this extreme distance in the day test, or 500 miles station, I am sure the sport of pigeon racing would lose one of its strongest charms and

attractions. It would to me. We are specially favored in this respect in America, and our now numerous one day 500 miles workers, and early second day returns, stand in evidence, and an attractive goal for the novice in American pigeon flying.

At this writing, late in October, our Philadelphia brethren are still enjoying the sport of pigeon racing. While all other sections have their flying equipments safely stored away for the winter, our brethren in the city of brotherly love, strange to say, are successfully and enjoyably flying their young birds in competition for local and national honors, and have even a 50 miles race in view for Thanksgiving day. There was much unnecessary, and yet it appears unavoidable, delay this year in the Philadelphia District of the National Federation coming to some definite understanding as to the carrying out of its young bird race schedule, and much apprehension was felt that the lateness of the season would somewhat mar its success and enjoyment. But so far everything appears to have gone along swimmingly, and with trifling losses, although many lofts have not been engaged. The first contest from 100 miles was flown October 6th, with 131 birds from 12 lofts, a rather poor showing, but owing to some incompleteness in management, was to be expected. The toss was at 10 A. M., at Odenton, Md., with a west wind, and the birds commenced to arrive 2½ hours later. Messrs. Geary & Kendall were the winners, scoring a velocity in the neighborhood of 1120 yards; the loft of S. Brooke Thomas being very close behind, 101 birds out of the 131 being reported home before dusk, and many late arrivals being not reported. The losses were very trifling.

The second race was from Manassas Junction, 150 miles, engaging 124 birds from the Hamilton, Quaker City and Belmont clubs, with about 25 birds from other fanciers scattered. The start was at 9 A. M., October 14th, in a fresh westerly wind, and Messrs. Geary & Kendall were again to the front, with returns at 11:59 A. M., but it is so close a thing between the first three lofts, and in the senseless absence of certain measurements, no decision has yet been rendered. The third race was flown from Orange Court House, Va., on Oct. 20th, 200 miles, engaging birds from the same lofts as in the preceding race, the start at 9 A. M. under favorable conditions. First returns to Jno. D. Munro at 1:25, recording a speed of over 1300 yards. S. D. Thomas, second, with about 1298 yards, and C. Hub, third, 1289 yards.

The last and final race closing the young bird season for the Philadelphia district is scheduled for October 29th, from Bedford City, Va., 300 miles, and in this race the birds have the opportunity to compete for the Item 300 miles trophy, as well as National District diplomas.

I have often been asked regarding the possibilities of seeing the World's Fair medals which the winning fanciers in the various sections competed for last year, and which up to date have not been forthcoming. A letter addressed by Secretary Book of the Empire City Flying Club to United States treasurer, Carlisle, brought the following copy of a letter received by Mr. Carlisle from R. E. Preston, director of the Mint at Washington, D. C.:

MINT BUREAU, Sept. 11th, '94.

Respectfully returned with the information that it is expected that the delivery of the medals of awards of the World's Columbian Exposition will be commenced in from four to five months time.

(Signed) R. E. PRESTON,
Director of Mint.

Winners of these medals may therefore take due notice thereof. "All things come to him who waits."

On several momentous occasions of the past a monster Homing pigeon liberation has been a prominent feature of the ceremonies with us in the New York vicinity and elsewhere, and the sight has been an enjoyable and wondering one to the public. I can recall several, but how insignificant and tame any show of ours in this line would appear to a resident of old

Antwerp when put into comparison with a monster toss of birds which took place at Antwerp on Sunday, October 7th, and marking the closing days of the Belgian Industrial Exhibition.

The Homing pigeon is dear to the Belgian heart and the readers of my notes can form some estimate of this monster liberation of birds when I state that some fifty clubs in the city of Antwerp and nearly the same number outside of the old city sent some 350 baskets, containing in the neighborhood of 15,000 pigeons for liberation.

From my foreign advices I learn that the toss was effected in two sections at 12 o'clock and 12:30, and the sight was an inspiring and glorious one.

Medals were awarded to the clubs entering the most birds, the first prize being awarded to the "Randaxe Club" of Antwerp, who contributed 765 birds in 21 panniers, "Oud Fwaantje" of Hoboken, getting the second with 350 birds and Spanners and so down to the 7th medal, which was awarded "Valkennest" of Antwerp, 240 birds in 8 baskets.

The whole thing was representative of the 16th century both in the costumes worn and the very panniers the birds were shipped in.

The occasion was one in which *revenue* played but a small part, nothing but pure love for the sport being considered.

This can be readily believed at a glance at the prizes given to the first birds homing which I quote from a handbill or announcement issued by *Le Martinet, De Denvenvriend* and *Le Pigeon Voyageur Belge*, the chief Belgian pigeon journals. The meagre sum of 400 francs was divided into 25 prizes.

5 prizes of 25 francs each, 4 prizes of 20 francs each, 7 prizes of 15 francs each, 9 prizes of 10 francs each and the verification of returns being catch and show, as in the 16th century, excluding all the telephones, telegraphs, automatic verifiers, etc.

Owners had to get their returns to a common centre as quickly as possible on foot for verification, and then reported to headquarters at Antwerp. The affair was a grand success and will long be remembered by the Antwerp fanciers, who were enthusiastic over the novel event, trivial though the racing work of the birds was.

Thoroughly schooled and practiced in pigeon racing of far more serious import, one can readily understand how the Antwerp flying fanciers gave themselves up to a solid day's enjoyment where their birds played so simple and yet so prominent a part.

In the perusal of the German pigeon journals devoted exclusively to the homer, one can read constantly of steady and enjoyable work accomplished by the many small clubs now in existence there. Yet nothing of any magnitude nor speed and from distance is ever chronicled beyond the very ordinary.

But to a close reader and observer of the sport in Germany, there is a certain system, unity and air of solid patronage and protection of the sport there to be admired. And really we in America can find much in the way the German fanciers have established their sport that we could copy with profit and satisfaction.

The *Feathered World* recently published some interesting statistics and comment upon the Homing fancy in Germany taken from the *Gelfug elborse* which is particularly of interest to all flying men.

It appears that the union of German pigeon clubs now comprises 256 societies with 3334 members, owning nearly 100,000 birds and the yearly report published recently presents a pleasing picture of the union's activity.

Many advantages concerning the flying, etc., of Homers have been gained through the emperor himself taking the office of protector of the union. The prizes paid for the shooting of birds of prey during the last twelve months amounted to some 300 dollars.

There have been killed in the Imperial forests during the year, 5693 birds hostile to pigeons, viz., 588 falcons, 1998 hawks, 528 tree falcons and 2260 sparrow hawks.

A new departure is also the proclamation by the German war office concerning the award of government medals.

During 1893 5 gold, 110 silver and 163 bronze medals were awarded and for the future these will be stamped with the emperor's likeness.

The police authorities also would appear to have special instructions to see that Homers are properly treated whilst on transit to liberating stations. Quite recently an Alsace Lorraine railway company was prosecuted at Bale and fined for neglecting proper precautions for the birds whilst in their care. Would that the same supervision existed with us.

TWO HUNDRED DOLLARS A MONTH.
I have derived a great amount of benefit from advertising in your paper, having sold 40 pairs of Homers, several pairs of Barbs and 2 pairs of Carriers in the last 30 days, amounting to \$200.
C. M. SWEENEY.
Detroit, Michigan, October 22d, 1894.

Theodore Sternberg

Has for sale a limited number of superb full feathered

BUFF COCHINS,

bred from his own importations, and up to the American Standard.

PARTRIDGE COCHINS, of the highest quality, grandly pencilled.

MARION, O.,

.. Importer and Breeder of ..

Buff Leghorns

EXCLUSIVELY,

HAVE THE FINEST LOT FOR SALE WE EVER SAW OWNED OR RAISED.

They were sired by "JOKER," the World's Fair winner, and "BROTHER JONATHAN," the winner of more first prizes in England than any bird ever imported.

Remember, we are the only importer of the Geffcken strain in America, and have crossed them on the Kay, and the results, both in the show room and breeding pen, has been simply elegant.

The prices for fine breeding birds are, for Cockerels, from \$5 to \$20; Pullets, from \$3 to \$10. Exhibition birds a matter of correspondence. We guarantee every bird just as represented.

SPONGIA,

The great Roup Cure. Put up in 25c., 50c. and \$1.00 packages.

OAKLAND FARM

Taunton, Mass.

BUFF COCHINS. Our American Standard Buffs are unsurpassed in this country, as their great record in the show pen will attest.

LIGHT BRAHMAS. Our Light Brahmas have won their full share of prizes wherever shown and we seek the keenest competition.

BUFF COCHINS.

English Type. We have imported this season, as we have for the past three years, the best Cochins to be purchased in England. This year we have the winner of the LORD MAYOR'S CUP, the acknowledged champion cockerel; the champion pullet, winner of 1st DAIRY, CRYSTAL PALACE and BIRMINGHAM; also others of highest merit. We have probably the finest collection of these fowls in America.

We shall sell eggs from our English Cochins this season. Send for circular. Birds for sale at all times.

G. W. MARSHALL, Manager.

Ideal Strain of Turbits,

Combining the Purest Blood of England and America.

NOTED FOR THEIR BEAUTIFUL CARRIAGE, SMALL SIZE, AND WONDERFUL HEAD AND BEAK PROPERTIES.

The following recent winnings, in the keenest competition ever brought together in this country, attest their merits:

BALTIMORE, 1894.—Five Firsts, six Seconds, six Thirds, Special for best Young (1893) Turbit in Show. Also, Specials for Best Blue bred 1893, Best Red bred 1893, Best Yellow bred 1893. Winners of largest amounts of money of any exhibitor, viz., \$92 in prizes.

ATLANTA, 1894.—Seven Firsts out of possible eight.

NEW YORK, 1894.—Four Firsts, three Seconds, five Thirds (in standard colors only) Also, Grand Gold Special for best collection of Turbits.

Requiring the room, I will sell seventy-five pairs Turbits, in all colors, from above stock at prices to suit the times. Anyone taking several pairs will be liberally treated. Embrace this opportunity to get fine birds. On writing state most you will pay and I will try and suit you.

ORIGINATOR AND BREEDER OF THE CELEBRATED

"DUKE OF
YORK"
STRAIN OF

LIGHT BRAHMAS

Which are UNEQUALLED for their great SIZE, grand SHAPE, superb COLOR fine COMB, profuse MIDDLE TOE FEATHERING and extra LAYING QUALITIES.

The "DUKE OF YORK" LIGHT BRAHMAS are the result of many years of careful study in mating for the finest points, without detriment to their utility. I have bred them continuously since 1862, regardless of labor or expense, upon farms allowing free range, and they are a large, vigorous, prolific strain, possessing perfect Brahma character, according to the Standard of Perfection.

I have NEVER EXHIBITED, but have sold many yearly which have won the Highest Prizes for their purchasers, at the prominent exhibitions in United States and Canada. I breed Light Brahmas EXCLUSIVELY, and their absolute purity is guaranteed.

FIRST-CLASS BIRDS for sale at all times at reasonable prices. SPECIAL PRICES made to those wanting large numbers. Particular attention given to mating for best results in breeding according to Points and Pedigree.

EGGS From Selected Matings of Exhibition Birds, at \$3.00 per setting of 13 eggs; \$5.00 for two settings; \$7.00 for three settings; \$10.00 for five settings. Carefully packed and delivered to Express in BOSTON. *13tf62

SOMERVILLE, MASS.

THE GREAT ANGLO-FRANCO

COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Canker, Galls, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. TESTIMONIALS ON APPLICATION.

PRICES:—In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

Hand Power, Price \$10.

HATCHED 100 PER CENT!

THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889, and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method *do away with the bottom heat*. This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$2.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

JOHNSTOWN, N. Y., NOVEMBER 10, 1894.

Whole No. 63

The Sultans.

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition.....\$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price.....\$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price.....\$2.00

Book of Poultry

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price.....\$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth.....\$1.00
Paper.....40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price.....\$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price.....50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price.....50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price.....50

Poultry.

(G. A. McFetridge). A most valuable little book by a practical and successful poultryman. Price.....50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price.....25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price.....25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published.....\$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper.....50

PET STOCK.

Birds and Bird Keeping in Cage and Aviary.

A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price.....15

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price.....25

English Books in Stock.

THE LANGSHAN FOWL. A Complete Treatise on the History and Characteristics of this Popular and Profitable Breed. By Miss A. C. CROAD.....\$1.00

HOW TO MAKE £50 A YEAR KEEPING DUCKS. By HENRY DIGBY. This is a nicely bound book, and contains in connection with the above an article on Geese and one on the Turkey.....1.00

THE HIGHFLYERS' GUIDE (SMITH), or How to Train Tipplers, Tumblers, Rollers, etc. Invaluable to pigeon men.....1.00

STUD REGISTER FOR PIGEONS. By RICHARD WOODS. Very complete.....25

THE AMERICAN FANCIER,
Johnstown, New York.

POULTRY.

From the Editor's Perch.

Secretary Doubleday informs us that the next meeting of the American Exhibition Game and Game Bantam club will be held at the Madison Square Garden, New York City, next February. Nine out of the 13 members of the executive committee have voted so far and all in favor of New York.

The Indian Game club will meet at Kansas City, Mo., December 21, during the progress of the Mid-Continental show.

Secretaries of other specialty clubs will kindly notify us promptly of the annual meeting places of their societies.

The new catalogue and pricelist of the Prairie State Incubator Co. has been received. It is the largest one ever issued by the firm and unquestionably the finest. Profusely and beautifully illustrated, it makes a most valuable contribution to poultry literature. The incubators and brooders manufactured by the above mentioned firm are standard goods in use on thousands of poultry farms. They are made to do practical work and not gotten up to sell at cheap prices to the unfortunate novice who, misled by the bold and often false claims in gaudy circulars of irresponsible manufacturers, buys a miserably constructed incubator or brooder. Every poultryman should send for the Prairie State Incubator catalogue of 1895.

Another magnificent catalogue is the one issued by the Reliable Incubator and Brooder Co. It is handsomely printed and illustrated. The goods manufactured by this firm are what the word reliable signifies. Constructed of the best materials by skilled mechanics the Reliable incubators and brooders virtually advertise themselves. Catalogues will be sent to any of our readers for a stamp, and we trust all who are interested in artificial hatching will avail themselves of the liberal offer of the above mentioned firm.

Editor Hunter, of *Farm-Poultry*, while in Albany one day last week, thought Johnstown was on the map and like a good boy took a flying trip to our city to see the publishers and editors of THE AMERICAN FANCIER. The short hour he spent here was thoroughly enjoyable and many a word was crowded into those sixty minutes. We are glad to note Mr. Hunter's excellent health and trust his increased duties on the semi-monthly *Farm-Poultry* will not impair it. He informs us that Editor Boyer is getting ready to move to the city of culture and beans, and no doubt this team of editors will soon be working hard and true in harness together.

The "long and the short of it," Col. Rockenstyre and Ferdinand Beagle Zimmer held an important conference in THE AMERICAN FANCIER office one day last week. Both are Bantam fiends of the deepest dye and both claim having had unusual good luck raising Bantams the past season. "Zim's" trade has been something enormous, especially in Sebrights and Polish.

Robert A. Colt, who has charge of Eugene Reynal's great poultry ranch in White Plains spent a few happy hours in Johnstown on Monday and Tuesday. He hunted up old acquaintances of some nineteen years ago, and between talking chickens, base ball and past escapades, had a roaring good time. He is on the lookout for more White Leghorns, and informs us that the eleven hundred hens now at White Plains will not begin to supply the demand for eggs he receives. Selling eggs at 50 to 75 cents a dozen is a pretty nice business. Mr. Colt pins his faith on the White Leghorn as the business fowl of the century, and from his standpoint he is right. That famous Natick *dreibund* is not "in it" with the great little egg machines, the Leghorns, according to Mr. Colt.

G. A. McFettridge has severed his connection with the Stroudsburg, Pa., firm of which he was a member, and will start in the duck raising business for himself shortly.

Jacob Ruppert, the millionaire brewer of New York city, whose fine country residence adjoins that of ex-vice-president Morton, near Rhinecliff, N. Y., is going into the chicken business on an extensive scale, we understand. Twenty-four Prairie State Incubators have been ordered for his broiler establishment.

Another great poultry plant is to be built by Mr. Rockefeller, the millionaire oil king, on his place at Tarrytown, N. Y. The great influence of the New York Poultry show is reflected in the wonderful growth of poultry establishments in the vicinity of New York. No country home is complete without a chicken plant, and the intense interest shown by our wealthy citizens in fancy and practical poultry culture indicates the growing and permanent success of America's great show held in the Madison Square Garden, New York city, every year.

Doctor "Ben" Thornton is probably the best dubbed Game Bantam crank in America. When he removes his "tile" from his well groomed cranium, all doubt as to his being a Game fancier disappears. "Ben" evidently has some fine birds in training for the New York show. This rather nettles John Glasgow who also has a team in fine running order. The Hon. John writes to the *British Fancier* and gives "Benny's" plans away. He says:

"Ben" is a Game and Game Bantam fancier from a way back, and judged the large Game section at the last New York show, and what is more, judged it well. "Ben" is well known to many of the leading fanciers in England, having imported in his time more birds than any other Game fancier I have met since coming over here. He writes me that having moved to his present quarters where he presides over a hotel at a place called Richland, Atlantic county, N. J., rather late in the season his breeding operations, which have been entirely confined to Game Bantams, are somewhat limited, but from a light colored Red Pile from the yard of Mr. E. Walton, of Rawtenstall, which was brought over here last fall by a Mr.

Furness, a nephew to the noted breeder of the same name, who presides over Messrs. Ainscough's yard, he has succeeded in breeding a cockerel, to his mind equal to the Stretch Pile cockerel which set the fancy's tongues wagging at New York show last February.

"Ben" does not often talk "through his hat" when talking about a Game Bantam, and if this one is as good as the Stretch cockerel there will be some lively competition at next show in Madison Square Garden, as I have seen one or two cockerels by the Stretch bird, owned by Mr. Magoun, that will take a considerable amount of "doing."

I am promised a look at this cockerel as soon as he is healed of the dubbing operations which was performed last week, and if he is as good a colored bird as the Stretch cockerel, and has as good style as the bird from which it is bred, I shall make a strong bid to become the owner. Its sire, though high in color, has all the style for which Walton's Piles are proverbial, and might do me some service in the breeding pen next season—mated with some hens I possess. I shall have to import unless I can run up against one over here to my mind."

To judge by the above remarks there will be hot times in the Game Bantam alley at New York next winter. There are several counties to be heard from, and we believe A. A. Parker, A. F. Pierce, and several other Game Bantam fanciers are emulating brer rabbit's example in "laying low."

L. P. Harris, one of the leading fanciers and a well-known judge in the west, writes: "I am always interested in your valuable paper. It is always on hand every Monday afternoon of each week, and is looked for with interest and eagerly read. There is one feature in THE AMERICAN FANCIER that far surpasses all other papers, and that is, the show reports. They are worth to any fancier ten times the price of the paper. I dislike these narrow, contracted poultry papers that will not publish the award of a premium unless you happen to be an advertiser. It is too much like children's play, 'If you won't play with me I won't like you.' Bosh!" Right you are, Mr. Harris. THE AMERICAN FANCIER is a newspaper, not an organ. It knows neither friend nor foe, and cares not for advertiser or non-advertiser when publishing the awards made at a poultry or pigeon show. What is more, it publishes the addresses of all exhibitors in full. If there is any exhibitor benefited by such free advertising, he is welcome to it. In our experience we have found that over 90 per cent. of the exhibitors are either advertisers or would be such if they had stock for sale. The few dead beats in the fancy who depend on free advertising are sooner or later recognized by the intelligent readers of the poultry papers, but it would be a grievous wrong to exclude the masses to get square on the few.

Here is a sermon on advertising that should be carefully read by those who believe printer's ink or even chalk of little use:

"In a spirit of idleness a few weeks ago a West Philadelphia pigeon fancier scribbled his name and address in chalk on a freight car standing in the Pennsylvania railroad's yard with a few words about his birds. He thought no more of the matter, says the *Philadelphia Record*, until the other day, when a man from Ohio, a perfect stranger to him, called upon the pigeon raiser and said that he wanted to buy some birds. Conversation brought out the fact that the car bearing the West Philadelphian's name had traveled from place to place, finally reaching the Ohio town where the stranger lived. He had seen the inscription in chalk and

had come to make a purchase. A deal was quickly made, and now there is no man in Philadelphia with a firmer belief in advertising than the pigeon fancier across the Schuylkill."

It also indirectly shows the value of continued advertising. There is nothing like keeping your name and goods before the gaze of the public the year around.

* * *

A number of White Wyandotte breeders are "kicking" over the disqualification clause in the new standard. The standard for this breed was made by a committee and accepted by the A. P. A. It contained a clause which reads: "Black, gray, red or any shade of yellow in any part of the plumage to be considered a serious defect." This appears in the section "Color of Plumage" all right enough, but under the head of disqualifications we read "Feathers other than white, in any part of the plumage." This will create confusion and we are afraid will be the means of disqualifying many birds protected by the color of plumage section. Certainly both cannot be applied and the sooner the disqualification clause is removed from the standard, the better, if the intentions of the Wyandotte committee and the A. P. A. are to be honored.

Facts and Fancies From the West.

BY THEODORE STERNBERG.

The issue is, shall we have two measures of value, two score cards, two scales of points and endless confusion, or will the fancy stay by the bridge which has, for more than twenty-five years sustained the whole poultry industry?

* * *

A friend has just loaned me his copy of the *American Stock-Keeper* of September 8th, 1894, otherwise I should not have known of Mr. Felch's reply to my article in *THE AMERICAN FANCIER*. A blunder, an inexcusable act is none the less a blunder, an inexcusable act when committed by one who occupies a high position, by one who may be lovable in his private life. It is the fact, the act, that I am condemning. Therefore at the very outset, I now, as I did at Chicago, and before and since that meeting, publicly and honestly express my highest appreciation of much of Mr. Felch's career and because he is capable of much useful work in the future, because he is of great intelligence, because I like him and would like to work in harmony with him in the future, that I speak plainly of those acts which cannot be excused. If my comrade betrays his post, shall I not report him to the commanding officer? Great and good men have gone wrong before the day of Mr. Felch, and they will do so again. Previous good conduct is of weight as a plea for the mitigating of a sentence, but is no defence to a crime. It may even be used in an application for a pardon. Mr. Felch in his private capacity is not involved in this matter at all, his public acts and doings are. Mr. Felch appears to be utterly incapable, because of his strong personal feelings, of separating his private personality from the public Felch, I make that distinction. A recruit is just as patriotic and has just as much right (and it is his duty) to defend his colors, as an original old color guard has to desert and attack the colors. No one can read Mr. Felch's article in the *Stock-Keeper* without knowing that his present position results from causes personal to himself, that his acts are inflamed by personal considerations, personal enmities and personal anger. Mr. Felch takes exception to the words, "a bald headed lie." They are not elegant, but they are expressive. Does Mr. Felch think he can continually assault and try to destroy that which I honor? Does he think he can impute discourtesy on the part of the A. P. A. towards himself for the mere purpose of eliciting sympathy for himself, so as to strengthen his arm so he can strike the harder blow; and the charge

being false, no one will rise up and call the charge by its true name, because it is Felch who makes it? When an untrue charge is made from a malicious motive, plain language is proper. A great man may be malicious, a prominent man may speak with prejudice and color, though to suit his purpose. Mr. Felch has demonstrated that he is not exempt from human weakness. Neither am I. I feel deeply his acts. Judge what I say, as I judge Felch. I am a partizan of the A. P. A., he is a partizan of Felch, and this issue shall be determined on facts which admit of no dispute. We are neither of us free from bias, but facts are facts and cannot be overcome. The only official action of the A. P. A. at Chicago towards Mr. Felch personally, was the adopting of the resolution of kindness I quoted and reprinted in Mr. Felch's article now under review. Mr. Felch grudgingly thanks me for introducing the resolution, but he expresses kindness toward the body which adopted it unanimously. What a technical man he has become all at once. Long ago he received the official proceedings, and there the resolution is. He has known that the A. P. A. passed those personally kindly resolutions for many months. It is the fact, the act, not the failure to transmit which is of moment. Suppose I write you a kind letter expressing kindly feelings towards you and it is lost in the mail and you never do receive it, but you do obtain a copy, knowing of my kindly words, you go on and claim I spoke discourteously towards you in that very letter, when you knew the fact was otherwise, would "bald headed lie," be any too strong, especially when you made the charge of discourtesy to injure me and help a scheme of your own? But Mr. Felch when writing his *Stock-Keeper* article, then knew of the resolution of the A. P. A., for he quoted it. This stickler for courtesy has not now a word of kindness towards the A. P. A. which passed it, but still clings to his charge of discourtesy, not because the resolution was passed, but because he never received a duly engrossed and certified copy, signed and sealed by the president and secretary. The American Poultry Association passed those resolutions and adjourned. It has never met since. As a body it does not know whether Felch has ever received them. It cannot know until it meets again. It did all it could. Every intelligent man knows this to be the fact. The A. P. A. like all other organizations, only acts by motion or resolution voted upon. Is it a terrible affair to be charged as discourtesy on the part of the A. P. A.? Is it of sufficient moment to warrant and excuse an attempt to divide the poultry world into two bodies that the president and secretary failed to carry out their instructions? Their failure is their act alone and not the act of the A. P. A. But just think, the secretary lives at Baltimore, Md., the president in Indiana. Each are busy men. The papers and minutes were in the hands of the stenographer at Chicago, being used in preparing his report of the proceedings. Was it a terrible thing that their officer should have overlooked the matter? For, often it possibly, or being delayed until the publication of the proceedings, thought its being there would do. There are a thousand things which would excuse the officers in failing to transmit, if they did fail to transmit. Just think, my readers, of the mental condition of a man who would make haste to charge a regularly organized society which keeps a stenographic report of its proceedings and publishes its report and sends it to all its members. Just think of the mental condition of the man who would hasten to make a charge of discourtesy towards himself in the public press, upon partisan newspaper articles, and not await the official report, and then when he does receive the official report and finds the fact to be the other way, does not publicly and at once apologize, but still sings discourtesy. Why the man is in a condition of red hot anger and acted from anger; and is angrier than ever when he finds he has no cause for his anger. At the present writing Mr. Felch is more actuated by unofficial and partisan newspaper statements than he is by the official record of what was really said and done at Chicago. So Mr. Felch blazes out and fights. The whole matter is simply personal feeling, wounded vanity

on his part. The necessity of only one national society in the fancy, of only one Standard, of one measure by card, which shall be uniform all over the land, don't count. I'll show them who Felch is, he says to himself, and he proceeds to try and destroy the fancy in order to get even and be revenged, and this is the keynote to all his attacks on the A. P. A. The A. P. A. placed the Fillebrown letter on file and took no action on it, but not an unkind, not a sneering word did I hear uttered against Mr. Felch in the sessions of the A. P. A. at Chicago, but I did see a kindly resolution passed. But suppose the members of the A. P. A. had spoken hotly against Mr. Felch? Suppose the A. P. A. had passed severe resolutions, suppose it had pitched into Felch as he does into it. According to the ordinary rules of human actions, it would have had ample justification. Here was a society which for many years had been and was the only recognized national society in the poultry fancy, a secession society which is already organized, a society which had already formulated another card and scale of points, which was seeking to divide the fancy into two bodies, both national, which sought to destroy all that had been done in more than one direction, a society which did not ask for a debate on its ideas and submission to the vote, but was going it alone in direct antagonism to the A. P. A. This society had the lack of common decency to come and ask the A. P. A. to recognize it, just as if the southern states after secession had had their secession secretary of state write an official note to the United States congress and ask permission to use the constitution of the United States until they could print a new one, and if there were any second hand volumes, please lend them to us, for this Decimal society is no more or less than a secession society, a schism in the fancy, and the secession was a fact before the A. P. A. met at Chicago, and nothing the A. P. A. did, or could do at Chicago, excused the already executed act. For Mr. Felch as father and prime mover of this secession, to talk about courtesy, I criticize the actions and doings of the A. P. A. at Chicago as monstrous.

Mr. Felch no longer has the right to criticize the acts and doings of the A. P. A. From the moment he put himself at the head of an antagonistic society he ceased to have that right. The proceedings at Chicago were satisfactory to the A. P. A. Mr. Felch says when he was active in the A. P. A. that society was all right. Then why leave it; why cease to be active? I find nothing in the Los Angeles meeting to justify his ceasing to be active. He was active at Charleston. I find nothing there to justify his present course. But he did not wait for the Chicago meeting; he seceded before that meeting. Neither by himself or by another did he offer his decimale scale as a substitute for the Standard scale at Chicago. He did not inform the A. P. A. that if it would adopt his decimale scale his decimale society would dissolve. He made no attempt at Chicago in the A. P. A. to get his views adopted and made standard, but insolently he organized his secession government in all its detail. It came to Chicago and demanded recognition. Talk about courtesy! Mr. Felch don't seem to know what it means. But the acts of the A. P. A. towards him at Chicago were really grand. They are far reaching, and tell the poultry fancy that the A. P. A. in its relations to the fancy at large is the same broad gauged, patriotic body it always has been, and as good and as beneficial to the fancy as it was when Mr. Felch was active in it. I said, and say it again, the Decimal has the same right to organize as did the A. P. A. There is no law against such organization. The A. P. A. is a voluntary association, so is the Decimal. There is no United States statute against it. It is not forbidden in the Ten Commandments. I know of no law, human or divine, prohibiting it, but all the same a member of any society who organizes an opposition society is a traitor to the old. Mr. Felch winces at the word traitor. This shows that he understands the situation. He commits treason to the A. P. A. and objects to the name he who commits treason bears. He ought not to be so thin skinned. Quinine is quinine

still, even if concealed in a sugar capsule. Treason is treason by any name.

Now, I say he had the right to organize his decimale secession society. So have the fanciers of New York the right to organize a new society, make a scale of points, issue score cards, and publish a standard. So have the fanciers of Georgia a right to make a decimale scale and card and issue a standard different in every respect from any other standard. So the Pacific Coast has the right to make a scale of points differing again, and make Buff Brahmas standard and disqualify for white in the Light Brahma fowl. Canada can come in on the deal and make a standard and measure of its own. Each State has the right to make standards and scales of points and measures of value which will cut out every bird not bred in that State from competing in it. Why, get the thing started and we will see a Pacific Coast standard which will cut off every eastern breeder's sales there. We of this mid-west could hold our own trade for ourselves by making a standard which will shut every one else out. Standards and scales can be and will in the future, if Mr. F. wins on his secession movement, be made independently by the breeders of each breed, with a scale for each breed. One hundred different standards and scales of points are as justifiable as are two. We will never stop at two. But let Mr. Felch go on with his game of revenge, for fancied slights open wide. The end of score card judging of an organized national fancy, with one card, one measure of values, one standard for all America, is at hand, and Mr. Felch will be responsible for it. In the days to come he will find that the fancy will stay, as they now are, together and say, no real or fancied discourtesy to any one will justify a divided fancy. Hurt feelings, wounded pride, lacerated vanity will not justify two scales of points, two measures of value, two standards, and two national societies. As long as membership in the A. P. A. is open to all, as long as matters of moment are open to debate and decided in open meeting by a majority vote, just so long the fancy needs no other society than the one under which it has flourished in the past. Felch claims his decimale method to be the best; others say not so. This is proper matter for debate in the A. P. A., and should be decided there. It can be decided there. Every error, every mistake can be corrected there. If not this year, then the next. Therefore a new society is not needed. One national society is all the fancy requires; to found more is suicide. No personal anger, no act of any man, can justify the fancy in changing the order of things and starting anarchy and chaos. If the members present at any meeting of the A. P. A. did an improper act, far better stand it for a year and then turn out and rectify it than for the fancy to ratify the idea that secession for any reason shall be permitted. Reader, cannot you see that I am contending for the very existence of a national fancy in this land? I do not like to have to show Mr. Felch's course up as it is! I like the man, and hope he will accept the olive branch offered him by the A. P. A. at its Chicago meeting in the resolutions adopted. Come back and be one amongst us again. We will kill the fatted calf when the prodigal returns. Let Mr. Felch's views and opinions take the same course and stand the same test as do those of others, for we have many men of many minds in the A. P. A. We don't think alike on many subjects. We have personal disputes; men are there who don't like each other. We are not saints by any means, but only mortal men, full of errors; but we do all unite and will stand shoulder to shoulder in defence of the A. P. A. itself. We all believe in standing by the majority as voted, and will everlastingly fight secession and will maintain one national society, one standard, one score card, and one scale of points. *In hoc signo vinces.*

In order to complete my reply to Mr. Felch, it is but proper the public should know who were present at Chicago and who comprised those who did the terrible things Mr. Felch's brain heated with anger has conjured up. The following members responded on roll call: Allen

Bogue, London, Ontario; Sharp Butterfield, Windsor, Ontario; George G. McCormick, London, Ontario; William McNeil, London, Ontario; George W. Mitchell, Bristol, Conn.; C. J. Ward, Chicago, Ill.; T. W. Tuggle, Columbus, Ga.; J. B. Foot, Norvord Park, Ill.; W. A. Gregory, Lexington, Ill.; Geo. T. Pitkin, Chicago, Ill.; J. N. Barker, Thornton, Ind.; Sid. Conger, Flat Rock, Ind.; C. H. Johnson, Rushville, Ind.; B. N. Pierce, Indianapolis, Ind.; George Seeger, Jr., Lafayette, Ind.; R. Twells, Logansport, Ind.; John Woocher, Jr., Indianapolis, Ind.; F. W. Hitchcock, Greenleaf, Kan.; G. O. Brown, Baltimore, Md.; Theodore Sternberg, Ellsworth, Kan.; Henry S. Ball, Shrewsbury, Mass.; Geo. V. Fletcher, Belmont, Mass.; Philander Williams, Taunton, Mass.; E. B. Easter, Detroit, Mich.; Theodore Hewes, Trenton, Mo.; John E. Diehl, Beverly, N. J.; P. H. Jacobs, Hammon, N. J.; J. Y. Bicknell, Buffalo, N. Y.; F. C. Brandy, Whitney's Point, N. Y.; James Forsyth, Owego, N. Y.; J. H. Drevenstedt, Johnstown, N. Y.; E. H. Knapp, Fabius, N. Y.; George E. Peer, Rochester, N. Y.; T. Farrar Rackham, New York City; E. B. Thompson, Amenia, N. Y.; F. B. Zimmer, Gloversville, N. Y.; Robert A. Braden, Dayton, Ohio; Chas. McClave, New London, O.; Frank Saumenig, Springfield, O.; A. F. Cooper, Homer City, Pa.; H. W. Mowry, Oaklawn, R. I.; S. W. Bicare, Charleston, S. C.; Eber Bladgett, Charleston, S. C.; D. M. Owens, Athens, Tenn. A goodly number of representative poultry men. The lot know almost as much as Mr. Felch. I am proud of the list. From what Mr. Felch has written one who did not know the fact might believe that deep, dark, and damnable conspiracies against the fancy were concocted by the gentlemen named and others who come on later, and to accomplish villainies and dynamite plots other bloody, desperate men were called in to assist and to bury the dead. Here is a list of the new members who participated in the gunpowder plot: S. A. Nofitzger, North Manchester, Ind.; J. L. Todd, Atlantic, Iowa; C. A. Emry, Carthage, Mo.; J. W. Wale, Sedalia, Mo.; Allen F. Herbert, Iona, Mich.; F. H. Shellabarger, Letts, Iowa; G. F. Gast, Prospect, Ohio; Dr. M. F. Lee, Columbus, Ohio; James A. McIntosh, Columbus, Ohio; Theo. G. Scheid, Bluffton, Ohio; J. F. Knox, Buffalo, N. Y.; C. E. Howell, Elmira, N. Y.; James E. Hazzard, Elmira, N. Y.; B. E. Rogers, Lake Bluff, Ill.; C. E. Rockenstyre, Albany, N. Y.; John H. Duke, Troy, N. Y.; Ira C. Keller, Prospect, Ohio; M. L. Andrews, Sedalia, Mo.; H. V. Crawford, Montclair, N. J.; F. J. Marshall, Middleton, Ohio; D. Lincoln Orr, Orr's Mills, N. Y.; Charles H. Rhodes, North Topeka, Kan.; Wm. P. Wheeler, Geneva, N. Y.; A. E. Blunck, Johnstown, N. Y.; Elmer P. Bowditch, Seattle, Wash.; James Qurolla, Kearney, Mo.; E. A. Haslet, Atchison, Kan.; John A. Rundell, Lamar, Mo.; Louis Mollenbaur, Quincy, Ill.; Albert Leman, Lincoln, Neb. Mr. Felch, who seems so sensitive of a want of courtesy in others, is himself so remarkably courteous as to characterize those who participated in the proceedings of the A. P. A. at Chicago as "a gang," and he expressed in his *Stock-Keeper* article the kindly and courteous hope that the A. P. A. will meet at Kansas City, so it will be run by "the same gang." I really suppose the only way to escape "the gang" is for the A. P. A. to meet in Mr. F.'s parlor at Natick and he solitary and alone hold the meeting. But to the end that the fanciers of America can know and spot "the gang" I have given the name and residence of each who at Chicago comprised "the gang." These names are not entirely unknown to the fancy, and if they be a "gang" I am willing to be classed with them, but, then, Felch is so courteous.

Public Opinion.

ALWAYS ON TIME.

I like the FANCIER very much: Always something to interest a person in it and another very important thing, it is always on time.

WM. RUTHERFORD.

Oct. 20th, 1894, Winnipeg, Manitoba.

Practical Pointers.

BY GEORGE E. HOWELL.

[Address all Communications for this department "Practical Department," AMERICAN FANCIER, Johnstown, N. Y.]

From the columns of the British *Feathered World* I take the entries of the different breeds that are popular in America at the Dairy shows since 1891:

	1891.	1892.	1893.	1894.
Brahma	105	83	69	87
Langshan	117	105	72	87
Cochin	101	64	64	72
Minorca	89	83	69	97
Hamburg	66	71	109	74
Plymouth Rock. ..	81	97	71	73
Wyandotte	103	121	117	131
Leghorn	119	116	136	167

Of the breeds mentioned here, the Leghorn and Wyandotte show the most consistent gains. Of the breeds not mentioned, because of the comparatively few acquainted with them, the Dorking comes the nearest to holding its own with the big entry of 1891. The best gain of any class was made by the Orpington, which came within two of doubling the number shown in 1891 in the year 1894.

It is impossible to get a similar table on this side, but were such possible I think it would show a steady increase in nearly every breed. *Re* the same subject I quote: "Leghorns, Wyandottes, and Bantams were the best classes. The special for the best bird in the show was accorded to a very good Golden Wyandotte cockerel, one of the best we have yet met this season, a good White Leghorn cock following him up very closely." This is clipped from an editorial in the *British Fancier* apropos of a sweepstake special offered at a leading show, and bears out the comparison made above. Still lower down in the editorials I see one stating that the Plymouth Rocks were about the best class shown at another exhibition. Verily, we must look out on this side. With such out and outers as the Wyandotte and Plymouth Rock carrying off first honors against all comers, our English brethren will be wanting to adopt them.

John Glasgow, whose weekly letters in the *British Fancier* are read with considerable interest on this side of the water as well as the other, has just purchased a pair of extra good White Wyandotte chicks to exhibit in English shows. This will surely open a market for many White Wyandottes for export. Mr. Glasgow is becoming a regular medium of reciprocity between this and the mother country. His views are positively refreshing when compared with some of our writers on this side.

From the reference made to the Orpington, it would seem they are gaining ground on the other side. I also note Mr. Cook has originated a Buff Orpington. This variety may suit our English cousins, but here they don't go. See!

There are a few breeders who still stand by the Black Spanish. If we just lay aside all our favorites, pets, etc., and give all their due, few will be found that can shell out more eggs. Here is what one subscriber says about them: "I don't think they can be beaten for eggs; if they can, it will have to be a breed that lays two a day."

Dear Brethren:—In computing your little tables of advertising, always remember when you include THE AMERICAN FANCIER in your lists that we publish 13 numbers to your other fellows' three. We are not finding any fault at this seeming oversight on your part, only refreshing your memory in the early stage of the game.

Some one requested a remedy for sore head. Being unfamiliar with the disease, I could give him no remedy. From the *Southern Fancier* I clip the following for the benefit of my southern readers: "Whether sorehead is a disease, the symptoms of a disease or the result of a disease, what its causes are or the true nature of the trouble, is an unsolved

problem. One thing is certain, nothing is more destructive to poultry of all kinds. Various remedies have been suggested as sure cures. A remedy that proves efficacious in one instance signally fails in another. We have tried all the remedies that we have seen published and all that we ever heard of, and the most satisfactory that we ever tried is the following: Take one part of good fat lightwood tar and two parts of lard, mix well and anoint the afflicted parts as often as may be necessary until a cure is effected.—J. H. M."

On the same subject a correspondent of the *Poultry Keeper* writes: "I hatched as nice a lot of chicks this summer as I ever saw. The most of them were Brown Leghorns, some few Cochins, and also Plymouth Rocks. They were growing nicely until they got from a pound to two pounds in weight, when I noticed that they were taking sore head. I began to administer things that I supposed were good for the disease. I used sweet oil and coal oil, lard and calomel, neats foot oil and sulphur, and several other compounds. I think the lard and calomel was the most effectual. I lost over three hundred and fifty before I succeeded in checking the disease. I think the best medicine for sore heads in the world is never to let your birds out in rainy, damp weather, and if there are weeds or grass in your run keep the chicks up until the dew is all off. I experimented with a half-dozen in that way, and they were cured just as soon or sooner than the others that had the grease, etc., applied to their heads. For the benefit of amateurs who have no experience, I will tell how sore head looks when it is in its first stages (though a few birds may look different). You will notice in young chicks a little spot on the eyelid or on the bill. It swells very rapidly until it sometimes grows as large as a grain of corn. It closes up their eye or prevents their closing their mouths sometimes. In the more mature fowls it looks a little different. Their faces and sides of their heads break out in little sores. In a day or so their eyes will be entirely closed in some cases, generally scabbed over, so that you could not tell that they ever had an eye if you did not know it. Sometimes their eye is filled with a matter similar to a slimy saliva, entirely white. Some people who don't know what they are talking about say that it is roup, but it is not, although they sometimes discharge a little at the nose, and, as is the case with roup, it is a little offensive. If you will examine their mouths you will most always find (on their tongue generally) a little white blister, looking sore. I don't consider that there is any certain cure for sore headed chickens. It don't pay to fool with them much after they get bad off unless they are extra fine birds. To give salts one day and sulphur the next, until killed or cured, might be of a little benefit to them, if you refrain from using it in damp weather, and keep them up in the morning as aforesaid. The chopping block is the best thing if one or two have it. Take them, cut off their heads and burn their bodies, as the disease is as contagious as smallpox."

A subscriber in Northampton, Mass., asks for the cause and a treatment for canker. Richard Woods, in his valuable work entitled "A Practical Guide to Successful Pigeon Culture," says canker (and scrofulous deposits generally) are traceable to an impure and overheated state of the blood, and my experience teaches me that a thorough cleansing of the bowels is the only rational treatment to adopt in cases of this kind.

The remedy again is Epsom salts, accompanied by a temporary "lowering" diet, but in this case the dose should be doubled for the first four or five days, after which it should be reduced to the original quantity, with which the bird should be daily dosed for another four or five days; then the quantity may be again reduced one-half. This should be given until the cure is effected. Let me here note it is not so much the quantity of medicine used as the proportions in which it is given and the length of time it is administered. On no account should any cankerous deposits be removed until the above treatment has had time to allay the inflammatory state of the blood.

When this has been accomplished it will be found that the deposits will be more readily removed, and without the danger of any further complications.

It is a notable fact that no matter how conversant the average agriculturist may be with the different breeds of farm animals his education in the poultry line has been and is woefully neglected. The agricultural publications are directly responsible for this. Some have the assistance of a self-imposed apostle whose ignorance equals and knowledge of hen culture seldom exceeds those whom he wishes to teach. When these great and shining lights hold forth on the merits of Buff Light Brahmas and Rose Combed American Silver Plymouth Rocks, it is time for all well disposed farmers to run and hide.

In the way of cuts, matters are still worse. The hideous examples of out-of-date poultry portraiture is something awful to behold.

The poultry fancy draws its trade in a measure from the marketman, the farmer, and the home flock of the villager. Occasionally a fancier is developed from the ranks.

What a great ally the poultry business would have in the intelligent and interested editors of agricultural journals. The efforts of the average editor at the present time is doing the fancy harm and their readers no good, for they are misinforming the latter and misrepresenting the fancy.

Not a little importance is now attached to the stripe in the center of the feathers adjoining the neck and saddle of a Brown Leghorn male. The best cockerels in this respect I have seen in Johnstown, belong to "Jim" Windsor, an amateur, who deserves his good fortune, for he started on the right path by procuring a good breeding male to head his breeding pen. I am a strong believer in like begetting like, and trust very little to luck. Johnstown is especially favored with good stock of nearly every variety, in both large fowls and Bantams, and it will not be long before we will be able to have a hen show at any time.

Can it be true that we are drifting very near a fork in the stream of poultrydom? Some infer the fancier must take one course and breed for feathers only, must never test the laying qualities of the birds he keeps and must never say his breeds would make good fowls for the farmer.

The poulturer's boat will go down the other current, and he must keep hens, just hens, ring, streaked and speckled. He must value them by the eggs they lay, and the pounds of meat they have on their carcass. Feathers and points must never enter into his vocabulary.

I say no; I am just as good a fancier if my best hen from a fancy standpoint is my best layer, the heaviest hen I have of the breed.

Am I less a fancier because in selecting my breeders I keep the most symmetrical birds I have, that is, the best shaped birds of the breeds they represent? That is what I consider symmetry to be, and why should it not be a standard section? Why should typical shape be discarded from the scale of points? Am I less a fancier because I bring in a practical point in selecting my stock? Could not the farmer do away with the long legged, lantern jawed monstrosities, as unfit for his use without injuring the fancy?

There is no one more capable of putting an attractive dozen eggs or a lot of chickens on the market than a fancier, and I do not see wherein you can separate the two branches.

It has been decided by the managers of the Orange County fair, that the poultry exhibit hereafter will be a local affair. This will take away a strong incentive to showing a good string, and destroy the competitive interest which has always been very strong among the county breeders.

The poultry department has been one of the strongest at the fair for years, and I hope the new move will not cause the local breeders to lose any interest in the

department. Now that outside breeders cannot be depended upon to bring them in, I suggest each breeder in Orange county add as many breeds to his string as he can manage; keep up the interest and fill the show yourselves; there are enough breeders, all you want is the breeds. Gather them in, boys.

* * *

It is to be regretted that some plan could not have been formulated by the directors, whereby outside competition could have been admitted, and an entry fee on each bird charged.

But the powers that be are omnipotent, and if they say no, it will be no. This I have already learned in two lessons. In the first, the boys wanted one judge, the superintendent another. The superintendent won, and that year some of the classes went home without being judged. Such are the ways of a county fair.

* * *

"I have found that should a hen moult early, she will lay early, with every reason to believe she can be kept at it through the winter. I also noticed a hen that raised a brood of chicks would moult earlier than the one that did not, consequently will lay earlier in the fall. It will be well to bear this in mind when reducing the flock. A hen the second and third year of her existence will lay just as many eggs as a pullet, and will lay more regularly and a larger egg."

I have seen the last sentence of the above paragraph, taken from notes in the early fall, footed about the poultry world by different members of the profession, until I am led to believe it to be an exceptionally brilliant remark; that is, for me. The latest to shy a castor in this direction is Mr. Hunter of *Farm-Poultry*.

The success Mr. Hunter has had with his pullets as fall layers is something marvellous, and few would care to run up against him with either hens or pullets in a fall egg laying contest. Speaking for myself, I will admit that I am a Leghorn breeder and a fancier, but will have to differ with him as to the kind of a fancier, and also am not the Elmira Howell as his article seems to infer. I might add, I should like to be as good a Leghorn breeder as Chet Howell, but it wasn't the Leghorn at all that I had in mind when I first wrote upon the subject. Besides being a fancier of fine fowls, I was also a fancier of fresh eggs for market. During the months of October, November and December to get a steady supply of eggs is a task that fills the soul of the modern poultryman with anguish, for such a trade, a pullet under nine months of age will not do. To my mind, for reasons stated above, namely, the eggs are too small and irregular, and pullets are too inconsistent layers; you never know when they will or when they won't. Then too, pullets of the smaller breeds that grow up and begin laying in August and September, or earlier, will invariably moult before snow flies. Now where does the profit come in? A Leghorn pullet lays three dozen of eggs that our customers will not receive, and then moults. The Brahma pullet does not lay at all. I am free to admit, pullets of the American breeds, if hatched early and fed with the same care Mr. Hunter would accord to them, make a very snug little craft to anchor by when eggs are wanted, but I still support my first claim, that "an early moulted hen is the best for the purpose." She has had a rest while changing her feathers, is not worth but eight or ten cents a pound, will commence laying almost immediately eggs that are bringing 40 cents a dozen, and making your next season's contract with the consignee secure for another year. Later, after the pullets without forcing, have reached maturity and ready to lay a uniform egg, steady and regularly, you can dispense with the old hen at 12 and 14 cents a pound, and she has laid eggs enough to twice cover her market value if sold in September.

After a practical experience with this class of poultry raising for years, I appreciated the fact that the forcing necessary to get fall eggs, if you depended on pullets, was too heavy a strain on their undeveloped organs, and impaired their future usefulness as layers. I learned to select the earliest moulted of the hens and forced them when at their best and in the fullness of their matured vigor.

A subscriber asks: What causes my young stock to get colds in the head when they roost in a house at night? I answer: The change from a hot, close house to the fresh air of the morning when first turned out, or else a draught from the door or window. The method of Jim Seeley, superintendent of Levi P. Morton's poultry ranch at Ellerslie, is to cover the doors and windows with muslin, thus admitting all the air possible and excluding any possibility of a draught.

* * *

At this season, when the youngsters are all doing their best to outgrow each other, they need separate accommodations from the old fowls and also from each other as regards the two sexes. Where the room is to be had, a small temporary house is very convenient; make the roof water tight, place a swing door along the lower half of the front, to be raised half way up during the day; cover the upper half with wire netting, and as the nights become colder put muslin over this; place the perches on a level with the bottom of the wire window and raise the house up high enough to allow the birds to run under at will. You will be surprised how many spare cockerels can find shelter in a house of this kind, and if made 4 feet by 8 feet in dimensions it can easily be moved on a sled from one place to another. A flock of early pullets isolated in one of these houses will develop wonderfully fast. The features of these houses are: Your chicks are absolutely protected from all prowling vermin, which, with me, is one of the greatest terrors. Only a few weeks ago I received word that a mink had made his way through a decayed portion of the floor, and twenty-four early hatched Brown Leghorn pullets are now gone to the land where minks and hawks are unknown and wheat and corn is not needed. Another strong point is that you get plenty of fresh air, and each bird has a wide, roomy perch to rest on. In the south the wire netting can run on all four sides.

An Apology and Correction.

TO THE AMERICAN FANCIER:

Let me through your columns apologize to Miss A. C. Croad for my saying that I ever received Langshan eggs from her yards direct. The fact is, the eggs I had reference to came from the yards of Mrs. R. W. Sargent, and from the fact that she was known as the agent of Miss Croad and as keeping pure Croad stock, I made the mistake in writing, and should never have noticed the error only from the fact of noticing in your paper that the lady whose name I had mentioned in my former article was "looking me up," and when THE AMERICAN FANCIER gave her address, then for the first time I noticed my blunder, and I hasten to beg pardon. Further, let me say in mentioning the incident *re* the white chicks, I had no intention of harming anybody, and am *certain* the birds that produced the white chicks were pure Langshans, and not only that, but were *very fine* specimens. In fact, the cockerel raised from the eggs Mrs. S. sent me was *the best* male of the breed I ever owned, and the hen called "Black Bess" that laid the purple egg was a show bird of no average merit. The same birds were bred together the following season, and no "sports" were hatched, and I never hatched one since. Although I do not keep or breed Langshans, still I think them one of the grandest breeds we have and *the best* of the larger varieties as regards hardness and as layers. Will further say that the white chicks were true Langshan in shape, size, etc. They were two cockerels and one pullet. One cockerel died when about one-third grown in the late fall, when nearly full grown the pullet was stepped on by a horse and killed, and the other cockerel I gave a farmer to cross on his common hens. I had never heard of White Langshans at the time, and so did not value them highly, and only mentioned this circumstance, among others, as being one of the many unexpected or queer things that can, and does, occasionally happen in breeding live stock.

"ZIM."

Make It This.

TO THE AMERICAN FANCIER:

We doff our hats to the debut of the Maryland Poultry Club, and wish it long life and prosperity in its noble undertaking, from the fact that it meets a long felt want among the poultry and pigeon fanciers of the state of Maryland and the District of Columbia.

It is an evident fact that the poultry industry is a growing institution in our midst, and the signs of the times point to a thorough organization of those interested, that the best results may be had in its welfare.

The exhibition of fowls that takes place annually at the fair held at Hagerstown, Frederick and Rockville, demonstrates this fact and clearly shows the interest that is manifested in the welfare and development of the feathered tribes.

I had occasion recently to visit numerous farms in Frederick and Washington counties, and was more than gratified at the fine display of poultry which I saw. Here, there and everywhere, the idea seems rampant for stock that will be a source of profit, as well as pleasure, to the Maryland farmer. The average farmer is no longer satisfied with the old dung hill fowl, and has awakened to the fact that it costs no more to raise the thoroughbred, while the profits are greater. The cultivation of this idea throughout the state will afford a rich harvest for the new association.

There is no better way to further this thought than by organization and annual shows. Without organization it is every man's business in general and no man's business in particular. This sort of thing is against progressive work in any field, more especially in the poultry arena, where the diffusion of ideas and true fraternity may be exemplified with greater force and power than in any other calling. The poultry and pigeon fancier is a queer individual; he knows what he is doing, but is always over-anxious about his neighbor's welfare, lest the neighbor is doing so much better.

For success then, we must look to a permanent head, and that head must be a live, energetic organization, like the one just instituted; its membership to be composed of all lovers of poultry and pigeons from the various sections of the state.

As residents of the District of Columbia we look with keen interest on this undertaking, and desire to urge upon the fraternity of our Mother State, the advisability of framing their laws for the admission of the residents of the national capital. The suggestion of THE AMERICAN FANCIER is a wise and a just one, for the divers reasons that may be offered to warrant such an affiliation.

All good people know, or should know, that geographically considered, the District of Columbia is a part of the state of Maryland. Aside from the fact of its imaginary boundary of ten miles square, and being the seat of the government, it might readily be taken as Washington, Maryland, U. S. A.

Washingtonians have always looked on the people of Maryland as kins folks, and from time immemorial have exchanged greetings of friendship over the tissue paper boundary. In the national capital we have some earnest workers for the "cause of feathers," who no doubt would be pleased of the opportunity of affiliating with the members of the Maryland Poultry Club. As a section our area is limited and our fields of operation small, yet as an adjunct may prove of invaluable service to all concerned.

Washington is one of the most beautiful cities of the world, and as a drawing card for shows and conventions its claims are undisputed. The many attractions of the capital city prove a strong incentive for visitors, and records show that it is the visitors' delight and the tourists' hobby. As an alternating place with Baltimore for show purposes, no greater combination could be formed. It is bound to win every time it is played.

Then, brethren of Maryland, why not erase this dotted line of separation and admit our people to membership in "The Maryland and District of Columbia Poultry and Pigeon Association?" Your field would be larger and advantages greater than your first inclination. When the A. P. A. meets here in 1895, they will come as the guests of this as-

sociation; the cocks will crow louder, the hens cackle longer, and new blood and stamina will be infused in the ranks of the poultrymen south of Mason and Dixon's line. To the honor and glory of the feathered race these things will come to pass. Make it the Maryland and District of Columbia Association.

GEORGE E. HOWARD,
Washington, D. C.

The Seymour, Conn., Show.

The Seymour Poultry Association will hold their first annual show the 25th, 26th and 27th of December, one that we expect will be outdone only by New Haven, but will try and have the largest in the state. The hall is a very large and roomy one and well lighted and the poultry fanciers of the association ask the hearty co-operation of all the fanciers in the good old nutmeg state to make this a rousing show. The last year has brought a great many into the industry and it will be a good place to exhibit and make ready sale of fowls, so we ask your support. The association also wants the fanciers throughout the state to bear in mind and send for their premium list. The officers are very busy making out their plans and the prospects are good. They have so far many special prizes offered them. The Monitor incubator will be on exhibition and will hatch chicks at the show by artificial heat. There will also be a great many other attractions which will make this show an interesting one for the lovers of poultry. Seymour is situated in the Naugatuck valley about 10 miles from Waterbury and 10 miles from New Haven on the Naugatuck division of the consolidated railroad. Within a radius of six miles we have a population of 40,000, so we can assure you of a good place to exhibit and a success. Wm. M. Hughes of Newport, R. I., will be the judge.

G. J. FABER, Sec'y.

Nov. 5, 1894.

Seymour, Conn.

Superintendent Orr Speaks.

Noticing the letters of Mr. Glasgow and Mr. Howell, I would like to say a few words regarding our last county fair. I wrote Mr. Glasgow after reading his letter, thanking him for his report, stating I was very well satisfied with it.

We had a very large show, by actual count, 4600 birds, and quite a few were not fit to show. As farmers drove in with pigs and fruit, they would drop at our department, poultry that was only fit for the pot. There is a great "cry" around here about barring outsiders. If they do that, I will have nothing to do with the show, as then the proportion of culls will be of a larger per cent. Usually fanciers from a distance will not send disqualified birds to a show unless it is an oversight. What glory is there in it for me or any other fancier to win over farmer Jones or Smith? I asked the society early last June to charge so much per pen and pair, but they would not listen to such a proposal. They now have their eyes open, and next year we will have a regular poultry show if they will only come up to the times, otherwise they will drop back to their old time show of about 900 birds.

The list of awards sent to THE FANCIER was in some cases wrong, and I see that on the Games it has caused Mr. Howell to be led astray. Anybody wanting a corrected list can get one by sending to D. A. Morrison, secretary, Newburgh, N. Y. The mistakes are my fault not THE AMERICAN FANCIER. I was an exhibitor myself, and suppose I live in a glass house, but am free to confess by far the greater per cent of "culls" was shown by Orange county breeders. I have in my mind now, one entry of about 25 Light Brahma chicks, all sent in one coop. I don't think one of them would stand inspection. That is the kind of birds we would have if we made it a strictly county fair. I say open it to the world on good show principles. The greatest kicking that I have heard has come right from Orange county. We should feel happy in putting up such a show and happier still to think that we got our share of the premiums. Mr. Glasgow I consider a thorough fancier and am highly pleased that I have met and become acquainted with him.

D. LINCOLN ORR.

The Sultans.

The Sultans were brought into England from Constantinople by Miss Watts in 1854, and recognized from the beginning as unique pets. They are well known throughout the Ottoman possessions, and what is strange, have at one time been regarded as sacred birds by the followers of Mohammed. They were originally named Mézzuin, and this arose probably from the generally accredited transportation of the prophet to the seventh heaven, where he saw an angel in the form of a cock, his feet standing on the first heaven and his creast reaching to the second, five hundred days' journey as men travel. When the Almighty sang His morning hymn, this angel cock always crowed so loud that he was heard throughout the whole universe of heaven. Of course, the reader can accept as much of this tradition as his credulity will bear.

One might doubt, in this age, that people were so foolish as to believe the Sultan a venerated bird, if it were not proved by the still visible carved picture of the bird on one of the columns of the Mosque Amr, Cairo, with outspread wings and holding between his claws a papyrus scroll, on which is written some Arabic characters.

The Sultan breed is below our medium sized fowls, not even as large as the Polish. The cock has a large flowing crest, shaped like a half globe and without a seam or line in the center to show the parting of the feathers to either side. The comb is crescent shaped, the horns pointing upwards, the base of the comb rises from an urn-shaped secondary which projects out on the nostrils. The nostrils are broad and cavernous; the ear lobes, though hidden, are small and white; wattles small and wrinkled, owing to a heavy beard. The neck hackle and saddle feathers are full and flowing; body short; wings long and drooping; legs, short and heavily feathered; vulture hooked in degree to merit "winged," and Dorking-like, they possess a fifth toe. The tail is large, upright and well sickled, carried well back like a Japanese Bantam. The plumage is pure white.

Our standard favors an invisible comb or with two small spikes. The pure Sultan has a comb such as we have described, and is the form most popular among English fanciers. Some eight or ten years ago the Polish and Sultan were crossed to aid each in special points, and the angular comb, with the small spikes of the Polish for a while supplanted the crescent-shaped comb, but after a while the original form, somewhat modified, ruled again.

The crest of the hen is compact and globular; beak, short and white in color, or rather fleshy white, with large cavernous nostrils; comb, two small spikes, shaped like those of the cock, but much smaller; beard, thick and curving well around the throat and meeting the crest; neck feathers, full; back, short; breast and body, deep; wings, large and carried low; tail, large, erect and well expanded and somewhat shaped like a Japanese Bantam hen; legs, short and well feathered; hocks, fully vulturized; toes, five in number, and the plumage pure white throughout.

There is a kind of grotesque beauty about the Sultan fowl which seems to please those who like rare pets. They are not so good to lay as the Polish, nor is their flesh so tender. Doubtless the heavy leg feathering and huge vulture hocks have much to do with the production and quality of both. They are non-sitters, though once in a while one shows maternal propensities. There is much of the Bantam style and pomposity about them, particularly the hen, with her drooping and long pointed wings, erect and well fanned tail, her carriage and fussy ways. They are docile and real pets like the Polish. They are kept more for ornament than for real usefulness, and in this sphere of life their oddity is much in their favor.—[From Wild Cat Poultry Farm Catalogue.

Cocou de Malines.

As this variety of fowl appears to be likely to find favor with the English poultry fancier, the majority of whom appear to be totally unacquainted with it, I offer a few remarks on same, hoping they will be of service to those who think of taking up the breed. This breed of fowl has been made and produced in Belgium and around the town of Malines, where the small farmers and peasants raise table poultry for the Brussels market, the one and only aim of the breeders being, apparently, to have a good, large fine-fleshed fowl fit for the table at a very early age. The race de Malines consists of two varieties, the Cocou and the White, but the Cocou is the most in favor, being considered somewhat hardier, and the color being more preferable than the White. With regard to the origin it is not quite safe to make an assertion on the subject; but certainly it is not the outcome of a scientific or premeditated cross or series of crosses, as in the Wyandotte, Orpington, etc., but has rather grown upon the Belgium peasantry in the same manner as has the Lincolnshire buff upon the small farmers and breeders in South Lincolnshire, by the occasional addition of birds possessing the qualities sought for by the breeder and demanded by the consumer. However, the breed is now well fixed, and I am informed by the best breeders in Belgium that it is the outcome of the addition of single-combed Brahma and Cochins to the "Campine," a species of fowl very much like a large single-combed Hamburg, quite indigenous to Campine district of Belgium, hence its name, and without doubt the finest laying fowl in the world. As the name implies, the Cocou de Malines is a Cuckoo-colored fowl, raised in Malines, and very much resembles our Plymouth Rocks, but the legs are flesh-colored and slightly feathered, as in our Langshan, and the comb single and upright in both sexes. They mature very early, and have a decided penchant to take on flesh at any age and under any treatment. They lay fairly well in autumn and winter, and produce a richly colored egg of a fair size, and are excellent sitters and mothers. The principal points of perfection are: Plumage regularly marked, each individual feather being marked from end to end. Comb, face and wattles of a bright red and of medium size, comb single, evenly serrated and carried well back. Ear lobes fair size, red, but occasionally marked with white. Beak strong, flesh-colored, marked with dark grey. The neck is short in comparison to the size of the bird, well furnished with hackle, which should not exhibit a yellow sheen. The tail is short and carried semi-horizontally, the feathers short, and the coverts very numerous, forming a cushion of considerable size. The breast is large and deep, and the general contour of the bird would give even a novice a fair impression of the bird's table qualities. The principal defaults are lack of size and volume, Brahma or triple comb, yellow legs, plumage spotted with red or shaded yellow (except at the end of the summer), excessively clear or dark, irregularly barred; squirrel-tailed or too low carried, bad conformation of back, bow legs, drooping wings, etc.

The following is the scale of points drawn up by Mons. Paul Monsen, President of the Belgian Poultry Breeders' Society, to whom I am indebted for much of my information of the Cocou de Malines and the Campines.

Size, apparent weight, and volume	25
Breadth and depth of breast	10
Shape and contour	10
Condition	10
Plumage	20
Length and color (legs and feet)	5
Head, comb, eye, wattles and lobes	10
Neck and hackle	5
Tail (carriage, length and form)	5
Points	100

The chickens are very strong and precocious, and are usually ready for market at the age of twelve weeks, and are then known in the poulterers' trade as the Poule de Bruxelles, and are much sought after by the caterers of that city.—Geo. Blades in *Poultry*, England.

Poultry at Raleigh, N. C.

TO THE AMERICAN FANCIER.

The poultry and pet stock exhibit at Raleigh, N. C., Oct. 23 to 26, was the largest and best exhibit ever held in the State, some 1,700 birds (actual count) competing—in fact, so many birds that the managers had to secure some 200 Spratts Patent coops extra to accommodate the large number of birds rushed in at the last moment. The show was superintended by Bro. W. S. Barnes, of Raleigh, N. C., and he succeeded in receiving the hearty good will and wishes of every exhibitor by his close attention to his duty and businesslike manner in seeing that every exhibit and exhibitor was well taken care of. Among the fanciers present were: F. E. Hege, Salem, N. C.; H. M. Thomas, Camden, Del.; W. A. Smith, Whitney Point, N. Y.; W. M. Carroll, Lynchburg, Va.; T. Farrar Rackham; A. D. Green, Laurenceville, N. J.; R. S. Petty, Pittsboro, N. C.; L. W. Jordan, Seneca, S. C.; Daniel Allen, W. S. Barnes, C. S. Ryan, J. C. Barker, Miss Mary Hinton, Raleigh, N. C.; W. D. Harrill, Ellenboro, N. C., and many others. The show was judged by the Decimal Score Card. Below are the awards:

BARRED P. ROCKS.—Cock, 1st, Hege; 2d, Thomas; 3d, Smith. Hen, 1st, 2d, 3d, Smith. Cockerel, 1st, 2d, 3d, Hege. Pullet, 1st, Smith; 2d, Thomas; 3d, Hege.
WHITE P. ROCKS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, 3d, Smith. Cockerel, 1st, Hege; 2d, Smith; 3d, Barker. Pullet, 1st, Hege; 2d, Smith.
PEA COMB B. P. ROCKS.—All to Smith.
S. WYANDOTTES.—Cock, 1st, Hege; 2d, Smith. Hen, 2d, Smith. Cockerel, 1st, Thomas; 2d, Smith. Pullet, 1st, Hege; 2d, Smith.
G. WYANDOTTES.—All to Smith.
W. WYANDOTTES.—Cock, 1st, Hen, 1st, Smith. Cockerel, 1st, Hege. Pullet, 1st, Smith.
BLACK WYANDOTTES.—All to Smith.
BUFF WYANDOTTES.—Cock, 1st, hen, 1st, Smith.

BLACK JAVAS.—All to Smith.
WHITE JAVAS.—All to Smith.
MOTTLED JAVAS.—All to Smith.
AMERICAN DOMINIQUE.—All to Harrel, Red Caps.—All to Smith.
SHERWOODS.—All to Smith.
LIGHT BRAHMAS.—Cock, 1st, Thomas; 2d, G. B. Poultry Yards. Hen, 1st, Hege; 2d, Thomas; 3d, G. B. Poultry Yards. Cockerel, 1st, Hege; 2d, Thomas; 3d, Hege. Pullet, 1st, Thomas; 2d, G. B. Poultry Yards; 3d, Hege.

DARK BRAHMAS.—Cock, 1st, Thomas. Hen, 1st, Thomas; 2d, Hege. Cockerel, 1st, Thomas; 2d, Hege. Pullet, 1st, Thomas; 2d, Hege.

BLACK COCHINS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, Thomas. Pullet, 1st, Thomas; 2d, Smith.

WHITE COCHINS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, Thomas; 2d, Smith. Pullet, 1st, Thomas; 2d, Smith.

BUFF COCHINS.—Cock, 1st, 2d, Hege; 3d, Thomas. Hen, 1st, Thomas; 2d, 3d, Hege. Pullet, Thomas; 2d, 3d, Hege. Cockerel, 1st, Thomas; 2d, Hege; 3d, Petty.

PARTRIDGE COCHINS.—Cock, 1st, Smith. Hen, 1st, Thomas; 2d, Smith; 3d, W. N. Carroll. Cockerel, 1st, Smith; 2d, G. B. Poultry Yards. Pullet, 1st, J. C. Barker; 2d, W. M. Carroll; 3d, Smith.

BLACK LANGSHANS.—Cock, 1st, Thomas. Hen, 1st, Thomas; 2d, 3d, Smith. Cockerel, 1st, Hege; 2d, Harnee; 3d, Hege. Pullet, 1st, Hege; 2d, Harnee; 3d, Hege.

WHITE LANGSHANS.—All to Smith.
BLUE LANGSHANS.—All to Smith.

R. C. W. LEGHORNS.—All to Smith.
R. C. BROWN LEGHORNS.—All to Harris.

R. C. BUFF LEGHORNS.—All to Hege.
S. C. BUFF LEGHORNS.—Cock, 1st, Smith. Hen, 1st, Smith. Cockerel, 1st, L. W. Jordan. Pullet, 1st, 2d, 3d, Jordan.

BLACK LEGHORNS.—Cock, 1st, hen, 1st, Thomas. Cockerel, 1st, pullet, 1st, Smith.

WHITE LEGHORNS.—Cock, 1st, Hege; 2d, Harris; 3d, Smith. Hen, 1st, Hege; 2d, 3d, Smith. Cockerel, 1st, G. B. Poultry Yards; 2d, R. E. Harris; 3d, Miss Mary Hinton. Pullet, 1st, G. B. Poultry Yards; 2d, Miss Hinton; 3d, W. S. Barnes.

S. C. BROWN LEGHORNS.—Cock, 1st, Smith; 2d, Harris. Hen, 1st, Smith; 2d, Daniel Allen; 3d, Smith. Cockerel, 1st, Petty; 2d, 3d, Hege. Pullet, 1st, Petty; 2d, 3d, Hege.

DOMINIQUE LEGHORNS.—All to Smith.
BLACK MINORCAS.—Cock, 1st, hen, 1st, Thomas. Cockerel, 1st, Ryan; 2d, Hege; 3d, Smith. Pullet, 1st, Hege; 2d, Harrell; 3d, Ryan.

WHITE MINORCAS.—All to Smith.
BUFF LACED POLISH.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, pullet, 1st, Smith.

S. B. POLISH.—Cock, 1st, Thomas; 2d, Carroll. Hen, 1st, 2d, Thomas.

PLAIN GOLDEN POLISH.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, 2d, Smith. Pullet, 1st, 2d, Smith.

BEARDED GOLDEN POLISH.—Cock, 1st, Thomas. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, pullet, 1st, 2d, Smith.

W. C. B. POLISH.—Cock, 1st, Thomas; 2d, Hege. Hen, 1st, Thomas. Cockerel, 1st, pullet, 1st, Hege.

W. B. POLISH.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Smith; 2d, Thomas.

W. C. P. POLISH.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith.

WHITE HAMBURGS.—All to Smith.
G. P. HAMBURGS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Smith; 2d, Thomas. Cockerel, 1st, pullet, 1st, Smith.

BLACK HAMBURGS.—Cock, 1st, Smith; 2d, Thomas. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, pullet, 1st, 2d, Smith.

SILVER PENCILED HAMBURGS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, pullet, 1st, Smith.

S. S. HAMBURGS.—Cock, 1st, Harrell; 2d, Thomas. Hen, 1st, Thomas; 2d, Hege; 2d, Harrell. Cockerel, 1st, Smith. Pullet, 1st, Smith; 2d, Hege.

G. S. HAMBURGS.—Cock, 1st, 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, pullet, 1st, Smith; 2d, Smith.

WHITE DORKINGS.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Smith. Cockerel, 1st, Thomas; 2d, Smith. Pullet, 1st, 2d, Smith.

SILVER GREY DORKINGS.—All to Smith.
COLORED DORKINGS.—All to Smith.

SILKIES.—All to Smith.
W. F. B. SPANISH.—Cock, 1st, Smith. Hen, 1st, Smith. Cockerel, 1st, Thomas; 2d, Smith. Pullet, 1st, Smith; 2d, Thomas.

JERSEY BLUES.—All to Smith.
SILVER CAMPINES.—All to Smith.

NAKED NECKS.—All to Smith.
SICILIANS.—All to Smith.

CREVE COEURS.—Cock, 1st, 2d, hen, 1st, 2d, Smith. Cockerel, 1st, pullet, 1st, Thomas.

FRIZZLES.—Cock, 1st, Thomas; 2d, Smith. Hen, 1st, Thomas; 2d, Mrs. Green. Cockerel, 1st, pullet, 1st, Mrs. Green; pullet, 2d, Thomas; 3d, Green.

BLUE ANDALUSIANS.—Cock, 1st, Smith; 2d, Thomas. Hen, 1st, Green; 2d, Smith; 3d, Thomas. Cockerel, 1st, Mrs. Green; 2d, Smith. Pullet, 1st, 2d, 3d, Green.

R. C. ERMINETTES.—All to Smith.
BLACK SUMATRAS.—All to Smith.

BLACK RUSSIANS.—All to Smith.
HOUDANS.—Cock, 1st, 2d, hen, 1st, Thomas; 2d, 3d, Hege. Cockerel, 1st, Hege; 2d, Thomas; 3d, Smith. Pullet, 1st, Thomas; 2d, Hege; 3d, Smith.

INDIAN GAMES.—Cock, 1st, 2d, 3d, hen, 1st, 2d, Hege; hen, 3d, Smith. Cockerel, 1st, Hege; 2d, Ryan; 3d, Hege. Pullet, 1st, 2d, 3d, Hege.

B. B. R. GAMES.—All to Smith.
B. B. R. MALAY GAMES.—All to Smith.

BANTAMS.—Black B. R. Game.—Cock, 1st, hen, 1st, Smith. Cockerel, 1st, pullet, 1st, Hege. White Game.—All to Smith. Red Pile Game.—All to Smith. White Pile Game.—All to Smith.

White Polish.—Cockerel, 1st, Smith. Golden Sebright.—All to Smith. Black Tailed Japanese.—All to Smith. Silver Duckwing.—All to Smith.

White R. C.—All to Smith. Black R. C.—All to Smith. Booted White.—All to Smith. Silver Sebright.—Cockerel, 1st, pullet, 1st, Smith.

Black Pekin.—All to Smith. White Pekin.—All to Smith. Buff Cochins.—Cockerel, 1st, Hege; 2d, Carroll; 3d, Hege. Pullet, 1st, Hege; 2d, Carroll; 3d, Hege.

GUINEAS.—White—Pair, 1st, Harris; 2d, 3d, Smith. Lavender Pearl—Pair, 1st, 2d, Smith.

PEA FOWLS.—Pair, 1st, Harris; 2d, Smith.
TURKEYS.—Bronze—Pair, 1st, R. E. Harris; 2d, Smith. Black—Pair, 1st, Smith. White—Pair, 1st, 2d, Harris. Wild—Pair, 1st, Smith.

GESE.—White China—Pair, 1st, 2d, Harris. African—Pair, 1st, Harris. Toulouse—Pair, 1st, 2d, G. W. Vanderbilt. Embden—Pair, 1st, W. A. Smith.

DUCKS.—Colored Muscovy—Pair, 1st, Barker; 2d, Smith. White Muscovy—Pair, 1st, Smith. Pekin—Pair, 1st, Smith. Rouen—Pair, 1st, Smith. White Crested—Pair, 1st, Smith.

HEAVIEST CHICK IN SHOW.—Light Brahma, 12 lbs., H. M. Thomas.

HIGHEST SCORING BIRD IN SHOW.—White Plymouth Rock, 95½, Hege.

PET STOCK.—Dogs—St. Bernard, 1st, Hege. Pug, 1st, Hege. Pointer, 1st, Hege. Mastiff, 1st, Kendrick. Rabbits—Angora, 1st, Hege; 2d, Smith. Lop Ear, 1st, 2d, Hege. Maltese, 1st, Hege. English, 1st, Hege; 2d, Smith. Himalayan, 1st, 2d, Hege. Hares—German, 1st, 2d, Hege. Guinea Pigs—1st, Hege; 2d, Smith.

Rats—White, pair, 1st, Hege. Spotted, pair, 1st, Hege. Mice—White, pair, 1st, Hege. Spotted, pair, 1st, Hege.

Rochester Poultry and Pigeon Association.

TO THE AMERICAN FANCIER:

There was a meeting of the Rochester Poultry and Pigeon Association at Powers block on Thursday, November 1st, with a large attendance of members, when it was determined to drop the Pit Game from the premium list. After general business was transacted, a discussion on the different breeds of fowls was gone into. It appears by the way the boys are talking they are coming out in great force with their stock next January, and it looks as if the exhibition will be a great deal larger this January than last. The premium list will be ready about December 1st, and if you do not receive one please write to W. J. Harrison, secretary, 15 Dewey place, Rochester, N. Y., and please make your entries as soon as you can after receiving a premium list. Entries will close January 1st, 1895, and on no pretense whatever will an entry be received after that date. There are about one hundred special premiums offered, amongst which are a silver cup from S. Sisco on best pen of White Rock chicks. Mrs. W. P. Wheeler offers ten dollars in gold on best breeding pen of Buff Leghorns. Eke & Gainsey offer five dollars in gold on the best B. P. R. cockerel; so get your stock in shape and come to Rochester next January. We will try and use you well and send you all home happy.

W. J. HARRISON, Sec'y.
Rochester, N. Y., Nov. 5, 1894.

Rules for Fattening Fowls.

Recently I have been favored with a statement from one of our most successful poultry fatteners, as to the rules which guide him, and the methods he adopts to secure success. The following is a summary of his observations:

1. In fattening fowls the actual quantity of food supplied goes only a little way in the production of flesh, as compared with the conditions under which the birds are kept.

2. There is considerable difference in the readiness with which fowls fatten, even of the same variety. In selecting for this purpose, a large framed bird should be chosen, and one that has well grown.

3. The birds thus selected should be placed in a large run (outside), and for the first three or four weeks fed on no more than one meal a day; then gradually increasing the quantity until they have as much as they can eat, when they are finally finished off by cramming, which in itself occupies three weeks. The object of this treatment is to reduce them as much as possible at first, then gradually build up the flesh upon the frame. This method is not suitable for young chickens, which are fed right off, but for large fowls to be killed about Christmas.

4. When cramming commences each bird should be placed in a separate pen, or half a dozen of the same age and sex together, in a quiet, sweet, and, if possible, rather dark room or shed, and for the first few days be fed from a trough, finishing off by the crammer. The food should consist of either fine barley meal, or fine Kentish ground oats, mixed with a little fat, and made with milk into a paste when feeding from the trough, and like very thick cream when used with the crammer. The fat should be small in quantity at first, but may be gradually increased during the process.

5. Before a bird is crammed each meal the crop is felt, and if there remains any food in it from the previous meal, no food is given until the next time of feeding. Observations should be made as to the quantity assimilated, so as to give a fowl each time as near as possible just about as much as it can digest. Should a bird show any signs of sickness during the process it should be placed in an open run for twenty-four hours without food. To aid digestion grit may be kept in a dish before each pen, and boiled nettles mixed with the food twice or thrice a week, as an aid in keeping the blood cool. Young chickens may be fed thrice a day, but for older birds twice a day is much to be preferred.

6. After the birds are killed, to prepare for which they should be kept without food for thirty-six hours, the blood is drained from the body, and the fowls are plucked immediately. The meat is then drawn by the hands forward to the breast, and the legs tied back to keep it in place. The bird, while still warm, is dipped into cold water, and thus becomes stiff, but it is an improvement to wrap the body in linen cloths dipped in milk or water.

The above indicates the methods adopted for producing the best table fowls, and while entailing trouble and care, brings its own reward, for the specimens so produced command good prices. —STEPHEN BEALE in *Country Gentleman*.

The Development of a Chick.

The development of a chick within the egg is one of the most wonderful things in nature. At the end of the fifty-eighth hour of incubation the heart begins to beat, two vesicles are seen, and a few hours later the auricles also appear; on the fourth day the outlines of the wings may be perceived and sometimes of the head also; on the fifth day the liver is visible; on the sixth other internal organs appear; in 190 hours the beak is fully formed; in 200 hours the ribs are clearly developed; in 240 hours the feathers are visible; in 268 hours the eyes appear; in 288 the ribs are completed and the feathers on the breast; in 330 the lungs, stomach, and breast have assumed a natural appearance. On the eighteenth day the first faint piping of the chick is sometimes audible. —*St. Louis Globe-Democrat*.

Symmetry.

TO THE AMERICAN FANCIER:

With pleasure I read the editorial extracts and comments on symmetry in your issue of October 13th.

Symmetry throughout the Standard gives eight points to the symmetry section on all breeds, excepting B. B. R. Malays, ducks and geese. On those breeds ten points is given to symmetry.

Symmetry is typical shape, outline of form of each breed. Plymouth Rock symmetry, Cochon symmetry, Leghorn symmetry, Dorking symmetry, ideal outline of form of each breed, and to hold us to this ideal and real shape of the different breeds is the mission of the symmetry section. I want a Cochon a Cochon, a Dorking a Dorking, and a Leghorn a Leghorn, in their true outline of form, for their real beauty, and until the A. P. A. can so record themselves with something more explicit to us than symmetry let us learn to be just in its use.

An illustration: A Barred Plymouth Rock pullet, symmetry eight points, the eight points the outline of form, typical shape of the breed in head, neck, back, breast, body, tail and legs—eight points given to the uniting of these sections into an ideal Plymouth Rock pullet. Cuts on shape—Neck, $\frac{1}{2}$ (too long), breast, $\frac{1}{2}$ (not full), tail, $\frac{1}{2}$ (too small), etc. A specimen meriting not more than $\frac{1}{2}$ point cut on any section making the eight points in symmetry should be cut $\frac{1}{2}$ point only on symmetry, and it is inconsistent and unreasonable to make a harder cut than $\frac{1}{2}$ on symmetry where the different sections making the symmetrical proportions of the breed are not cut more than $2\frac{1}{2}$ points. A specimen cut 1 point on shape of back, 1 point on shape of breast, 1 point on shape of tail, or a specimen where shape receives from 3 to 5 points cut on the different sections, should be cut 1 point on symmetry. Any specimen justifying $1\frac{1}{2}$ points cut on symmetry in outline of form is unfitted for fanciers' use, and should be consigned to the market.

Symmetry, if thoroughly understood and intelligently applied in scoring, has as true a value in the interest of correct shape in each breed as any 8 points in the scale of 100, or perfection.

Its abuse: At the Illinois State Fair it was my misfortune to look over the score card of an ideal B. P. Rock pullet, given to the pullet then and there upon exhibition, and signed by an Illinois judge. Cuts on shape—Breast, $\frac{1}{2}$; tail, $\frac{1}{2}$. The pullet merited them and, in my judgment, no more, but the cut for symmetry on that ideal shaped bird was $1\frac{1}{2}$ points. Such work, brother fanciers, being either ignorantly or intentionally done, is what gives symmetry the claim of detriment to the specimen scored. It is the cutting and slashing on symmetry by those ignorant of the value of the 8 points in the true outline of the typical shape considered that makes the majority of workers against the symmetry section.

A judge that says symmetry (typical shape of the breed to be scored) is a section that cannot be described is a judge unfitted to make cuts for deficiency in ideal shape on the shape sections of the breed. Felch to the contrary notwithstanding, and still we hope and wait for the wisdom of the A. P. A. to give us something better. Brothers, be not asleep on the camp grounds; master the conditions that govern you, be watchful, hopeful, and work to correct and perfect something better to unite us more firmly together through the father of our cause, the A. P. A.; make no fight outside, but content yourselves on symmetry for four years to come.

C. A. EMBRY.

Carthage, Mo.

Birds and Their Eyes.

Birds, as a rule, cannot focus their eyes on an object, save at a considerable distance, and then only with difficulty. The reason for this singular fact is found in the position of the eyes in the head, one being placed on each side and looking directly outward, so that they cannot be brought to bear on one object save, perhaps, at a very long distance and directly in front.

The truth of this statement may readily be demonstrated by anyone who has observed ordinary fowls turning their heads on one side when desirous of more closely examining some object which has attracted their attention. When excited by the presence of a strange object, chickens will often be noticed examining it, first with one eye and then with the other, turning their heads for that purpose, showing that they cannot bring both eyes to bear upon them at once. The only exception to the general rule is found in the case of the owl, whose eyes are placed in front of the head, and are capable of being brought to a focus on an object at a very short distance in front. —*Baltimore News*.

PIGEONS.

Standard Announcement.

For the benefit of our pigeon readers, we have made arrangements whereby we can furnish the Pigeon Standard at 50 cents a copy.

Pigeon Notes.

BY JOHN HOPEWELL.

[ALL RIGHTS RESERVED.]

Continued from November 3rd.

THE FANTAIL.

Like many others of the pigeon family, the Fantail dates its origin far back to the earliest days of civilization, and is frequently mentioned by ancient writers, showing that it was even in those early times a favorite. It is supposed to have originated in India, where it is still bred and admired. Ships in the East Indian trade have often brought them to our ports, and some that I have seen quite recently were fine specimens of their kind, and readily found purchasers when presented for sale. Old writers sometimes called them broad tailed Shakers, and others again Peacock pigeons, a name readily suggested by the shape of the tail. One writer suggests the name Turkey pigeon, a not inappropriate name, also suggested by the manner of carrying its tail. I formerly knew two varieties, the English and the Scotch, but these two have now been combined, forming a pigeon with all the desirable qualities of both, and much nearer an ideal bird than either of the two old varieties. The standard for Fantails is as follows:

Size.—Medium—that is, neither large and coarse nor too small and fine.

Carriage.—Erect, proud and graceful.

Head.—Small and fine, forehead full, carried well back, and just touching the tail.

Beak.—Straight, medium in length, upper mandible slightly heavier than the lower, which should fit neatly into the upper; upper mandible slightly curved at the tip. In Whites, Yellows, Reds, Duns, and Silvers, flesh colored; in Blacks and Blues, black or dark horn color.

Beak Wattle.—Small, fitting neatly to base of bill.

Eye.—Full and bright and set about in the middle of the head. Color in Whites, Saddlebacks, and Silvers, hazel or buff; in Blues, Blacks, Duns, Reds, Yellows, and Silvers, orange.

Eye Cere.—Small and fine.

Neck.—Long, tapering neatly from body to junction with the head, curved in a graceful, swan-like manner, and continually trembling or moving backwards and forwards, and carried so far back as to rest on the cushion of the tail.

Breast.—Full and round, carried very high up, so as from a front view to completely hide the head.

Back.—Very short.

Body.—Oval in shape, small and close feathered.

Wings.—Quite large, flights long, drooping, and meeting at the tips beneath the tail.

Tail.—Large, round, wide spread, and flat, carried upright, a perfect arch in shape, the outside feathers touching the floor of the pen; composed of from 30 to 36 broad, long feathers, rather thicker arranged at the centre of the tail than the sides.

Cushion.—Large and full, neatly rounded, and well covering the base of the tail.

Legs.—Of medium length and clean, ending in small feet, the bearing of the bird being chiefly on its toes; color, coral red.

Condition.—Healthy and clean.

Color.—Black, Blue, Red, Yellow, Silver, Dun, White, Saddlebacks are varieties in which the wings are colored as in Turbits, all the rest of the body being white; then we have Fans with colored bodies and white tails, also white bodies and colored tails, and a variety known as Silkies, in which all the web of the feather is separated, looking like threads of chenille. A variety known as Frizzles has the feathers all turning towards the head, the fibres of the tail and flight feathers curling and reversed.

Common Defects.—Long, thin head and spindling beak, coarse body, short, thick neck, small tails with narrow feathers, also extremely large tails carried low and carried inwards like a scoop, small cushion and short legs.

Disqualifications.—Tail with less than 24 feathers, foul feathers, lack of carriage, tail carried to one side, bad condition and disease or deformity of any kind.

In addition to this variation in color, we have Fantails with crests which should rise gracefully from the back of the head, forming a point pointing forward and reaching just above the skull. We also have feather legged or booted Fantails, on which the feathers of the leg are short and neatly arranged about the feet and legs. All varieties have their admirers, but the plain legged variety are the favorites generally.

[To be Continued.]

Queries and Answers.

Queries.—As a beginner, I wish you would answer the following questions through THE AMERICAN FANCIER if space permits: 1. Is anything better than good wheat to feed to pigeons regular? 2. If pigeons are not permitted outside of house, what should be kept in pigeons' house so that they can get at it any time they wish? 3. How many pigeons can be kept in a house 12 by 18 and 10 feet high? 4. Do you know of a secondhand (\$8.00, R. Fulton's) pigeon book for sale, cheap and in good condition? 5. Can pigeons be paired successfully if mating coop is in house with the other pigeons? 6. Can anything be kept in pigeons' house to keep rats out? 7. Would a ferret catch and kill pigeons if kept in pigeon house? POUTER.

Denver, Pa.

Answers.—1. There is nothing better than good wheat as food for pigeons, but a variety answers better than to feed one kind all the time. 2. Food, water, grit, saltcat, and occasionally green vegetables. 3. About 25 to 30 pairs. 4. I do not at present know of any. 5. Pigeons will pair even if confined in room with other pigeons, but it is better to keep them secluded when mating. 6. Yes, a well trained cat will keep rats out of a loft. 7. A ferret left in a pigeon loft overnight would make short work with the pigeons. All the above questions have been answered in previous articles on pigeons published in THE AMERICAN FANCIER.

Query.—I have a pigeon which, when I feed it, it seems unable to pick up the feed and can't get down that far. It keeps bobbing its head three or four times before it finally reaches the object it is after. If you will kindly advise me what the trouble is and also a cure, if any, you will oblige, WM. ELDER.

Philadelphia, Pa.

Answer.—This is a form of vertigo in which the sight of the bird becomes affected. It does not see the grain readily, and cannot gauge the distance to the kernel it desires to reach. I attribute it to a disordered state of the digestive apparatus. Give it half a teaspoonful of Rochelle salts every three days, or try two or three pellets of the homeopathic remedy, belladonna, three times a day.

Query.—Kindly let me know a good cure for canker in the mouth. This seems to be my main trouble, and is

quite frequent, taking off many grand youngsters. Is there any sure cure, and also what is good to use as a preventative? Cleanliness, pure water, and good feed could not be improved on.

C. M. S.

Detroit, Mich.

Answer.—In issue of THE AMERICAN FANCIER of July 28th, 1894, this trouble is treated quite at length. Examine your files for that number.

Query.—I have had two Fantail squabs die of what I think is known as canker. Their throat filled up with a solid yellow growth, so that their parents could not feed them, and I finally killed them. What is the cause of this disease? How may it be prevented? Can it be cured in the advanced stages? I was unable to remove the growth without choking the birds. Is it contagious? Do you know of any quick way of artificially feeding squabs about two weeks old? Could they not be pumped full of food the way poultry is sometimes treated? I wish to raise squabs for market. Can you tell me of any fanciers near Boston who have runts for sale?

S. E. W.

Answer.—See our issue of July 28th, 1894, for full instructions on canker. Squabs can be fed artificially by the same process as is recommended for stuffing or cramming fowls and turkeys. Many young birds have been raised by artificial means, but not extensively to my knowledge. A little ingenuity and experiment would suggest no doubt a practical way to accomplish the desired object. Examine our advertising columns or those of our contemporaries for runts for sale.

JOHN HOPEWELL.

Noonday Notes.

TO THE AMERICAN FANCIER:

My preceptor in the study of medicine, Dr. Andrews of Honolulu, Sandwich Islands, used to say, that every man ought to have a hobby, something entirely foreign to his business, something to which the mind can turn outside of working hours for rest and refreshment. His hobby was flowers and his greenhouses on Fort street, Detroit, Michigan, where he lived when I was with him, served him grandly as a place of rest and inspiration. One man will have horses, another, billiards or cards, another amateur photography or art work of some other kind, another the cultivation of pets. Cowper, the poet, had a regular menagerie. Show me the man who has no hobby outside of his regular business, and I will show you a narrow minded man, one who bores his friends by always talking shop. Such a man is Dr. H., who for twenty years thought of nothing but his practice, he dreamed of his patients and his ledger, he talked medicine to every chance acquaintance, no night was too stormy nor the distance too long. He was keen in business and was a good collector. At the end of twenty years he had a stroke of apoplexy, and is now, at forty-five, a broken down old man, when he should just be entering his prime. Of all the hobbies, perhaps the cultivation of fancy pigeons is most commendable where one is situated suitably for it. One learns to know his birds intimately and they become more like friends to him than chattels. Of course a true fancier may have to sell his surplus, and may sometimes sell even his best birds, those to whom he has become most attached, but no true fancier will sell his best birds to one who will not appreciate them. One may even part with his own children where he can see that it will be greatly to their advantage. During ten years of my life since reaching manhood, I lived in the metropolis, where it was not possible to surround myself with the pets I craved, but never a day passed that I did not dwell in imagination upon the little place in some thrifty village, that I hoped some day to occupy. This is a free country and one may accomplish almost any reasonable ambition, so I find myself at thirty-five with just about the surroundings I had dreamed of. As I stand in the shell driveway leading to the stable and let fall the grain to the Turbits, which crowd over and between my feet, drinking in the clear, cool air, rendered sparkling by the brilliant October sunshine, I am conscious that "man wants but little here below nor wants that little long," and can

harness my own horse, and drive away into the country feeling content with myself and life in general. The farmers whom I meet with heavy loads of apples on their way to the evaporator, look cold. They wear their winter overcoats and their noses are blue. I don't feel cold and I wear no extra coat either, but my circulation is vigorous and digestion perfect, and my interest in nature keeps my brain active during the long rides that would be tedious if I had nothing but the woes of others to think of. A purple finch flies to the top of a spruce tree in the cemetery and pours out his hasty liquid song and is off. A chipmunk races with the horse, and just as he was about to be beaten, dodged into the stone wall. What is that flying high as a crow but much more swiftly? Surely it is a Homing pigeon. I wonder if it can be the one I let Oscar take to Buffalo yesterday to be released this morning? Yes! Upon my return to the stable just at dusk, I found the Blue Checker in his accustomed place over the window, and pause to get him a handful of buckwheat and a dish of water before I go in to supper. As we sit before the blazing wood fire after supper, Florence says: "Don't you sometimes wish you were back in New York again with the elevated roads and bigger fees?" And I sit looking into the fire and thinking, till finally aware that she is looking at me, I answer, "No."

CHARLES.

The Various Ailments of Pigeons with Hints for their Prevention and Cure.

The maintenance of health amongst his stock is a veritable desideratum with every good pigeon fancier, for if he fails in this, he is handicapped very heavily in the race for the goal of "success."

The ailments of pigeons are varied, often complicated and difficult to cope with, and, when once disease has taken firm root in the birds, the chances of thoroughly eradicating it are very limited. It, therefore, behooves the aspiring fancier to use the utmost endeavors in order to prevent this unwelcome visitor entering his lofts. As a breeder of some standing I would urge him to take fully to heart the old proverb, "Prevention is better than cure." With its utmost force does it apply to him, and should ever be uppermost in his mind. Young beginner in the fancy, write it in large, bold letters in your stud book; give just heed to it, it will materially influence the balance to your favor later on.

Of course, with the most careful in the fancy, ailments will, at times, spring up amongst their stock; but I don't think I am exaggerating when I say that 90 per cent. of the diseases that lurk in some lofts might, with due care and attention, be utterly avoided. Let me, then, give a brief summary of the various matters that should be scrupulously heeded.

The loft or building wherein the birds are kept should be in a good spot, well sheltered from cold north or north-east winds, roomy, well ventilated, still, at the same time, free from draughts. Cleanliness is a most important factor, particularly with regard to the nesting places, food, drinking water, vessels, etc. Supply them with wholesome grain; vary it; let good old grey peas and barley be their staple food. Be sparing with maize, wheat and hempseed. Attend to their digestive organs by furnishing crushed oyster shells, old mortar, etc., also provide a "salt cat," or rock salt. See they are not short of a good bath each day, especially in the warm season.

Thoroughly whitewash the walls, boxes, etc., at least once a year, and, should you at any time observe nits or insects in crevices, etc., put an end to same with some good, pungent insect powder.

If these precautions are faithfully adhered to, the fancier will not be troubled greatly with sickness of his feathered pets.

The most common diseases of pigeons are dry roup, wet roup, canker, feather rot, wing disease, and a troublesome complaint known as "going light."

These six, I think, are all we need and have space to touch on in this short article, and I will take them in their respective order, and give the most simple and best methods for their cure.

First, then, dry roup.

This is a kind of dry and husky cough, caused by excessive cold or damp, particularly when moulting. For this give three or four cloves of garlic once a day.

Wet roup is another similar complaint, but the cough is attended by a discharge from the mouth and nasal organ. It is rather infectious, and the sufferers should consequently be taken away from the others, when three or four peppercorns may be given once in three days, or some good roup pills, which are now in the market. A few sprigs of green rue infused in the drinking water is also an excellent remedy.

Canker is also contagious, and is mostly caught by cocks fighting each other. Rub the part affected daily with burnt alum and honey, or a little carbolated vaseline.

Feather rot is often brought on by a too plentiful supply of hempseed, and other heating foods, and will disappear, in most cases easily, on strict attention being paid to their diet.

Wing disease is often the result of blows by fighting, or other means. It generally takes the form of a large, sore lump near the shoulder. The wing should be gently slung, and painted with tincture of iodine, or some prefer to anoint with carbolated vaseline or pure cold cream. I think iodine is most effective.

"Going light" is a most troublesome disease, and difficult to combat. It is a general decay of the constitution, and may be termed consumption of the bird.

It can only be treated by tonics, such as the tonic pills now sold for pigeons; a little sulphate of iron in water, and the like, to restore lost vitality. It is very seldom they can be saved when once severely attacked by this.

On the more simple ailments, such as "crop bound," "hard moulting," etc., I need not touch, as everyone knows the good old remedy of castor oil for the former, and how, in the second, to assist the shedding of the feathers with the thumb nail.

For nits, vermin, etc., in feathers, use the insect powder can vigorously.

In conclusion, I would again say the great thing is to try and avoid these ailments; but, when they insist upon invasion, let your aim be to "nip them in the bud," and, if you use the remedies carefully I have herein mentioned during the early stages of the diseases, you will find them, though simple, to be very effective.—*Feathered World.*

A Pigeon's Travels.

An interesting story is told in the *Eastern Morning News* of the return of a Homer pigeon belonging to Mr. T. P. Hancock, of Alsager, near Crewe. In the course of a race from Cherbourg the bird alighted on a German vessel, the officer of which was thoughtful enough to send it back to the owner in England. Mr. Hancock received the bird on Friday in good condition, and apparently having been well cared for. It had been placed in a specially made box, with sufficient food and water, and on it being liberated it flew straight to its old loft. Mr. Hancock has received a letter from C. E. Steffan, second officer of the steamship *Campania*, of the Hamburg South American line, upon which vessel the bird alighted, and on which she has had a long voyage. The officer says the pigeon came on their vessel and laid an egg. In San Nicolas, up the river Parana, between Buenos Ayres and Rosario de Santa Fe, where they loaded grain, he got a male pigeon. After leaving Bahia they reared two young ones, and the officer adds:—"The male bird and the two young ones I gave to a person here (Hamburg) who keeps pigeons. He assures me to bring the young birds up. First, I hesitated what I should do—to send you the whole family or not; but I determined to send you your bird in fear the young ones would die on the passage across. I send the bird with a Grimsby boat as parcel, and bring it myself on board the steamer to give it in charge of one of the officers in the expectation to get the poor creature safely back." This act of kindness on the part of the German officer will be of interest to those connected with Homing.—*Feathered World, England.*

The Cincinnati Show.

TO THE AMERICAN FANCIER:

From all indications, Cincinnati will have a pigeon show which will be (in the language of the irrepressible Ewald) a pee warmer. Without wishing to throw cold water on any other show, I would say that Cincinnati has a great many points in its favor. In the first place, it is near the center of the Union, and all fanciers have an equal chance, as regards distance, in shipping. I have at least a dozen fancier friends who would not think of sending a bird to New York, or to any other extreme eastern point, yet are willing to show at Cincinnati. I think, from what I hear, that most of the specialty clubs will hold their annual meet at Cincinnati. The Fantail Club have rated to meet there, and we look for a big entry, as several very nice prizes, outside of the catalogue, will be given away. One will be a silver cup for the best Fantail (any color) bred by a member of the club in 1894.

Again, Cincinnati, Louisville, Evansville, and Nashville (all close together) have enough really first-class birds to give a grand show if not another outside bird was sent. This of itself is a big thing. I am positive that these four cities have more good birds than any four in America, no matter what their size, and as the feeling between them is of the most friendly nature, the show is thus an assured success from the start. In a personal letter Ewald tells me that the two great points for which he is striving are, first, ample classification, and second, good judges who know their business and will put the ribbons where they belong without fear or favor. Their date is January 10-16, and I think I can assure any timid fancier who may be backward about trying his luck that his birds will be well cared for, returned promptly and safely, and that the ribbons will be honestly placed. As the western and southern men have been sending their birds east for several years, there is a chance now for the old adage, "Turn about is fair play."

F. M. GILBERT.

Pigeon Flying.

Philadelphia Items.

The third young bird race of the Philadelphia District of the National Federation of American Pigeon Fanciers took place on October 20, the birds being liberated at Orange Court House, the 200 mile station, at exactly 9 A. M. The weather was fair, and while there was very little wind, what little there was assisted the birds in their flight, consequently a very respectable showing was made.

John D. Munro had the first return at 1:24:53 P. M.; average speed 1,307 yards. S. B. Thomas comes next with a speed of about 1,298 yards, and C. Hub was third; speed 1,289 yards. The leading returns to each loft will be found in the following report, which is official:

Name.	Reg. No.	In Loft.	on wing.	Time
H.M.S.				
J. D. Munro	C 634	1:24:53	4:24:53

In compliance with the earnest request of a number of local fanciers, backed up by the endorsement of Race Secretary C. H. Jones, of the National Federation, the *Item* has consented to receive entries and assist in promoting another competitive race of Homing pigeons before the close of the long distance flying season. This race will be a 50 mile affair, and will be flown from Charlestown, a point on the P. W. & B. R. R., on Thanksgiving Day. The birds will all be tossed together at about 9 A. M. of the race day, and the conditions governing the race will be the same as those governing the *Item* 100 mile championship. The entry fee has been fixed at one dollar per bird, and as Mr. Jones and other fanciers predict an entry of over 100 birds, the cash

prizes should be both large and numerous. Entries may be made to either C. H. Jones, 10 South Broad street; A. M. Wood, 4305 Fairmount avenue, or the sporting editor the *Item*, any time prior to the Thursday preceding Thanksgiving Day. This race will be open only to fanciers living within the city limits.

Race Secretary Jones has kindly consented to assume the management of the race, and a fair and square contest is sure to be the result.

The race should prove a popular one with the short distance fanciers, as the distance is not too far for one of the broad shouldered, heavy type to cover at the top notch of speed. It will also suit those whose birds are sent annually to the 300, 400 and 500 mile stations. As the season is now too far advanced for such heavy work, and there is no reason to believe the true Antwerp cannot do just as good a "clip" from a distance of 50 miles as from a point two or three times as far.

As in the 100 mile races, there will be no limit placed on the entry of each contestant. The more the merrier, and the bigger the prizes.

As the race is tried as an experiment, it would give satisfaction and promote interest if those fanciers who intend taking part would do so at once instead of waiting until the last moment at their disposal. There is more fun in a case of this kind than in most of those for National record, and the *Item* hopes to see a big entry and sharp competition for the prizes.

S. Brook Thomas has done good work in the young bird races.

Geary and Kendall have been in the lead or near it in each race.

The rules state that watches should be enclosed in envelopes and sealed in the presence of the owner, immediately after birds are timed home. Watchers and owners should not forget this fact, or disqualifications might result.

Reporting the arrival of Homers by certified telegrams is a necessary evil, but should be avoided whenever possible. It is not an exaggeration to state that the operators do not call up the main office to ascertain a correct standard time once in a score of different cases in which they are called upon to send certified telegrams of the arrival of a bird.

The new Keystone Club will give the Hamilton a run for the leadership next season.

Report has it that H. W. Beck's loft is situated so high that the watchers strain their necks looking up for the arrivals, and of late Herman has been offering them a more exalted point of observation.

The race from the 300-mile station next Saturday will close the young bird series.

Every fancier who participates in the 300-mile race should enter his birds for the *Item* trophy. The same birds have not been winning every time, as contestants have to name which birds are in competition for the trophy prior to the race, there are likely to be a few surprises, and both trophy and bodie may go to outsiders. Every one has a chance.

Mark Smith and a few fanciers over in the neighborhood of Gray's Ferry road have arranged a short distance race from near Peter Kershaw's Globe Hotel at Bonnafon. This race will be flown on Thanksgiving Day.

The Hamilton Homing Club will celebrate the same holiday by a two-mile race from Randor. The entrance fee for this race is \$2 per bird and entries close the first Tuesday in November.

No little excitement was stirred up in local pigeon flying circles yesterday by the announcement that a race, open to any resident in Philadelphia, would be flown from Charlestown, Md., 50 miles, on Thanksgiving Day, to determine who is entitled to the 50 miles championship of the city, and incidentally to settle who shall possess a number of cash prizes that will be put up for competition.

When the 100 miles championship was first inaugurated by the *Item* it was a mooted question whether the long or short distance birds would prove the speediest from the distance, various arguments pro and con being advanced. The results of the 100 miles race have proved the superiority of the long distance Homers from such a distance; but there are many who think the shoe will be on the other foot in a competition from the fifty mile station. In any event the race should be more open and more keenly contested, and with the chances so even, it is expected both the long and short distance fanciers will be well represented in the contest. In order to make good sized cash prizes and several of them, the entrance fee has been fixed at \$1 per bird, each contestant having the privilege of entering as many birds as desired.

Entries may be made any time between now and the Thursday preceding Thanksgiving Day to C. H. Jones, 10 South Broad street; A. M. Wood, 4305 Fairmount avenue, or the sporting editor of the *Item*.

Owing to the fact that a number of the contestants in the 100 mile race had not had the distance from Odenton to their lofts measured at the time of the race, it was impossible to determine the exact average speed and make the awards until the measurements for the leading lofts had been made. Record of the leading birds is appended:

Name.	Distance.	In loft.	Speed. Yds. per min.
M. Sullivan	100.32	11:02:24	1442.40
M. Sullivan	100.32	11:02:24	1442.40
G. Connell	97.64	11:00:00	1434.98
L. A. Mehler	102.30	11:05:30	1434.64
G. Connell	97.84	11:00:05	1433.94
F. A. Clark	102.37	11:05:43½	1433.82
W. T. Innes	102.89	11:06:22½	1432.80
W. T. Innes	102.89	11:06:24½	1432.00
F. A. Clark	102.37	11:06:13½	1428.00
E. S. Sanderling	102.34	11:06:13	1426.80
G. Linsenmaur	102.38	11:06:28½	1424.40
W. Thompson	101.41	11:05:28	1422.54

The birds of the other contestants were close up.

M. Sullivan is a clear winner of the first two prizes, George Connell takes the third and L. A. Mehler the fourth, and should no protests be received by Tuesday next, the following prizes will then be awarded: First and second, M. Sullivan, the *Item* 100-mile championship trophy, a set of Long's Pigeon Remedies and \$40; third, Geo. Connell, \$20; fourth, L. A. Mehler, a pair of

youngsters out of Frank Lane's 500-mile stock.

No further challenges for the 100-mile championship trophy will be considered until early next Spring.

Should the weather prove favorable, the young birds of the members of the Philadelphia District of the National Federation will be liberated at Bedford City, Va., this morning, in competition for the *Item* 300-mile trophy and the National record. This is the last of the Federation young bird races, and no further flying events will take place prior to the race for the championship of Philadelphia for fifty miles, which takes place on Thanksgiving Day, and which is open to all residents of Philadelphia.

It has been suggested that a special race for big cash prizes be arranged for next April or May, all contestants to pay \$1 per month from now until date of race for each bird it is desired to enter, the entrance fees to be divided into prizes. Before definitely arranging such a race, it is thought well to see if the suggestion meets with approval from the flying fanciers; consequently, those who would enter such a race, if arranged, are requested to forward their names to the sporting editor of the *Item* at once.

Two Homing pigeons have been lost in the neighborhood of Germantown, marked C2926 and C2930. Any information will be gladly received by Charles H. Jones, 10 South Broad street, Philadelphia.

The birds of the Philadelphia District of the National Federation sent to Bedford City, Va., the 300-mile station, to be liberated on Saturday, October 27th, were held over on account of rain until the next day, when the weather being clear, with light westerly breezes, the birds were tossed at 8:16 A. M.

In Philadelphia the wind was fairly strong from the east and north-east all day, and the result was another Waterloo, not a single bird returning the day of liberation. The birds were in competition for Federation young bird honors, and also for the *Item* 300-mile championship. As no birds returned day of toss, no Federation diplomas will be issued, and the race for the *Item* 300-mile trophy is declared off. The amount received for entrance fees will be returned by Race Secretary Jones.

Owing to the fact that Charlestown is a flag station and close to the river, where there would be a possibility of pigeons being shot by gunners, it has been decided that the race for 50-mile championship shall be flown from north-east, one station this side of Charlestown. As the race does not take place until Thanksgiving Day there will be ample time for everybody to get their birds in trim for the event. The entrance fee has been fixed at one dollar per bird, and entries can be made to A. M. Wood, 4305 Fairmount avenue; C. H. Jones, 10 South Broad street, or the sporting editor of the *Item*. The amount collected in the shape of entrance fees will be divided into cash prizes. The rules of the *Item* 100-mile championship races will govern.

James A. Stovell will retain the 300-mile trophy until the old bird race of 1895.

Good south-west winds can hardly be expected over a full 300-mile course at this season of the year. August is the time for young bird races.

Pet Stock.

The Rabbit at Home.

BY W. N. RICHARDSON.

[Written for THE AMERICAN FANCIER]

Anyone who has visited a rabbit warren in the early morning or at dusk, has heard when his presence became known, a long, distinct rap, at which the older rabbits disappeared into their burrows, while the inexperienced younger ones sat on their haunches staring wonderingly until a second alarm was given, when they hastily sought cover. This rap or thump is made by the rabbit's only weapon of defence, namely, the hind foot being used in forcibly striking the ground. This rap is also a challenge for love or war. A buck will be scouting about the burrows, and on arriving at one he will give a resounding rap, and if no reply, another, until he is attracted elsewhere. If the burrow is occupied, the tenant will respond immediately. If a sleek young doe, the result is interesting and amusing, the pair playing and racing about until she suddenly disappears in the burrow. If a buck appears, the scene is changed, for a knock out ensues; they rush at each other with the ferocity of bulldogs, snapping at each other and by lying on their sides try to disembowel one another, and by jumping over each other try to thump their heads with their hind foot, and if successful, the recipient is as completely knocked out as if struck with a stick. He is not killed, however, only stunned, while the victor proceeds to rap at some other door for fun or fight, as the case may be, until tired or vanquished, he retires to enjoy a nap or nurse his aching head.

GETTING TO BE POPULAR.

THE AMERICAN FANCIER is getting to be a popular paper. I get answers from my advertisement from every quarter. E. E. PAGE, Cleveland, Ohio.

Great Sale

OF

GAME BANTAMS

**Black Breasted Red,
Red Piles,
Duckwings,
Whites,
Blacks.**

Having purchased the entire stock of Adrian W. Smith of Whitesboro, N. Y., who had probably the finest collection in this country, that won hundreds of prizes at the leading shows, I offer them for sale, without reserve, at reasonable prices. The following quotations are part of the stock should interest fanciers of Game Bantams:

One fine yearling B. B. Red cock, in the pink of condition.....	\$15 00
B. B. Red cockerels, each.....	10 00
B. B. Red hens, good breeding stock, each.....	5 00
One yearling Golden Duckwing cock, extra good.....	20 00
Duckwing cockerels, each.....	7 50
Duckwing hens, each.....	5 00
Two pair Blacks, fair birds, per pair.....	5 00
Two Red Pile cocks, excellent birds, willow legs, each.....	10 00
Red Pile hens, willow legs, each.....	5 00
White Games, per pair.....	10 00
One pair Golden Sebrights.....	10 00
One Rose Comb Black cockerel.....	5 00

Fifty other Birds, not enumerated, a matter of correspondence. Address

A. E. BLUNCK,

Johnstown,

New York.

PLYMOUTH ROCKS.

TO MAKE ROOM.—I will sell for the next 30 days at a great bargain, 12 trios Barred P. Rocks at \$4 per trio; 12 trios Brown Leghorns, \$3 per trio; 5 trios Buff Leghorns and 5 of Black Minorcas at \$5 per trio; 2 trios Buff Cochins, 2 of Partridge Cochins, 2 of White Cochins, 2 of White P. Rocks, at \$4 a trio; 1 breeding pen Light Brahmas, \$7; 1 breeding pen White Cochins, \$7; also a few extra fine cockerels, Buff P. Rocks, Dark Brahmas, and also of above named varieties. F. G. BEAN, Fairview Village, Montg. Co., Pa. *463

CHOICE CHICKS, \$1 EACH.—Fine White P. Rocks, B. Langshans, Buff Leghorns and Black Minorcas. Pairs, trios and cockerels, all A-No. 1 stock, at low price, but must reduce stock at once. Here is your chance for a bargain. *163 G. L. ARMS, Adams, N. Y.

FOR SALE.—For want of room I offer my entire stock of White Plymouth Rocks, American Dominiques, Rose and Single Comb White, Rose Comb Brown and Black Leghorns, Silver and Golden S. Hamburgs, Black Hamburgs, Colored Dorkings. A few Golden and Silver Wyandottes, 100 Buff Cochins, 100 White Holland Turkeys, 40 African Geese, 1 pair or trio Rouen Ducks, 20 Aylesbury Ducks, 1 pair Muscovy Ducks, pair Wild Geese. Write for wants. WALLACE E. GRISWOLD, South Montrose, Pa. *1360

STOCK FOR SALE from 25 breeds. Hundreds of premiums won in 1894. B. P. Rocks, Buff Cochins, Black and White Minorcas, all varieties of Leghorns. Offer my entire stock of Light Brahmas. All stock guaranteed as represented. *1362 J. J. WATERS, Sidney, N. Y.

FOR SALE.—Very fine B. P. Rocks, old and young; some March and April hatched. Also a fine pen B. Leghorns, 11 hens and cock, show birds; a few young Leghorns for sale. *461 A. H. TYSON, Lansdale, Pa.

I HAVE FOR SALE fine Blue Andalusian cockerels or pairs; Barred Plymouth Rock cockerels and pullets, winners at fairs this fall; six Brown Leghorns, hens and cock; extra fine cockerels and pullets; one English Buff Cochins cock and three cockerels; one trio B. B. Red Games, the male extra fine in color. *5229 JENNIE VAISSIERE, Johnstown, N. Y.

C. P. BOUTON, Hyndsville, N. Y., Three Links Poultry Yards, has for sale B. P. Rock cockerels and pullets, from E. B. Thompson's stock, at \$2 each. Will exchange some for pigeons. *857

PLUM SHADE POULTRY YARDS.—At Rochester, N. Y., 34 entries, 31 prizes and a special. Barred and White Plymouth Rocks, Light Brahmas and ten other varieties. Fine birds at \$5 and upwards per trio. HY. EMRICH, International Bridge, Ontario, Can. *1356

WHITE PLYMOUTH ROCKS, Silver Sebright, Black and White Rose Comb, Buff, Black and White Cochins Bantams. For exhibition or breeding just right for the early fall and winter shows. A 1 in every respect, typical throughout. Fowls and chicks. *156 H. J. QUILHOT, Johnstown, N. Y.

FOR SALE.—Barred Plymouth Rock, White and Silver Wyandotte and R. C. Brown Leghorn chicks, April hatch—cockerels, pairs or pens. Stamp for prices. S. A. SPOLL, Columbia Park Poultry Yards, Johnstown, N. Y. *1351

FLORIDA.—If you want good fertile Eggs at reduced price for next 60 days, see our "ad" elsewhere in this paper and address PECK & DREW, Lake City, Fla. *142

WYANDOTTES.

FOREST HILL FARM.—Specialties for 1895 are Golden and Silver Wyandottes, Buff Laced Polish, Buff Cochins Bantams, Blue Andalusians, Black and Dominique Leghorns, White Holland Turkeys and all leading varieties Water Fowls. A few choice birds for sale. Eggs for sale in their season. Write for wants. WALLACE E. GRISWOLD, prop'r, South Montrose, Pa. *5260

EGGS, \$3 PER 15, \$5 PER 30. *52756

BUFF LEGHORN COCKERELS

Here is a few of those *dark colored* breeders so much sought after. Good under color, splendid combs, ear lobes, bright yellow legs. These birds are direct descendants of the finest breeding male Mrs. Lister Kay ever sent to America, known as "Joker," the World's Fair winner. The sire of these cockerels is a son of "Joker." In "head points" we claim them to be superior. The price for these fine breeders are \$5 to \$15.

A few exhibition cockerels on sale. We can sell you a few good yearling hens cheap, for reliable stock. We are one of the oldest breeders of Buff Leghorns in America. No one is more in love with the Buffs than I am. No handsomer bird grows; this, combined with a large egg yielding fowl, makes them the fowl.

Buff Plymouth Rocks

(COLUMBIAN STRAIN)

I have 30 females in my breeding pen that are
giving Buff, without penciling on hackle or
slaty undercolor. Since January, 1893, my birds
and eggs have taken 34 premiums, 16 being
first, and two medals. I have sold 27 trios and
71 settings of eggs, and on account of a scarcity
of circulating medium caused by the changing
of our administration, I have reduced my price
of Eggs this season from last year to \$2.50 for 15,
\$4 for 30, \$5 for 45, \$10 per hundred, after June
15th \$1 per sitting. Cockerels after October.

THE GREAT ANGLO-FRANCO
COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Ganker, Colds, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. TESTIMONIALS ON APPLICATION.

PRICES:—In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

AT THE NEW YORK SHOW, 1894.

The greatest and largest one ever held in America, my birds won the following: Cocks, 2d and 4th; Cockerels, 1st, 2d and 4th; Pullets, 3d and 5th; Pens, 2d, 4th and 5th. My birds have won hundreds of premiums in the hands of my customers. I have choice birds and eggs for sale at all times. 52t45

PHILANDER WILLIAMS, Taunton, Mass.

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of Perfection

This is the only authorized publication giving a complete description of every breed of fowls recognized by the American Poultry Association, the only representative body of poultrymen in this country. Remember this invaluable book is fully protected by the United States, it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar.

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24 page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it

For Nothing

By simply sending the amount to

BLUNCK & DREVENSTEDT, Publishers,
JOHNSTOWN, NEW YORK.

Leads the Procession

Our \$12 Power Green Bone Cutter, over all \$26 power cutters. Has been awarded the First Premium at all State, Industrial, County and Local Fairs in this and other States over all competitors. Stands without a peer. Is self-feeding. Superior quality. Is not complicated. Easily operated. And stock fed on its cuttings do not fill up in the crops and choke. No knives or screws to become loosened. Best results guaranteed. Try it and see how your stock will improve. Green bone cuttings discount grain. Purchase our Cutter and be convinced. Address

When You Buy a Show Bird You Want the Best. My BARRED PLYMOUTH ROCKS

Are recognized everywhere as invincible. I have hundreds of chicks sired by such males as "MANHATTAN," 1st prize cockerel at World's Fair; the FIRST PRIZE COCK, and "KEYSTONE," 1st at Philadelphia. They will do you good in the show room.

My Plymouth Rocks have won for customers in the past, with scores running to 94%, 95 and 95½ points, and they will win for you. The great records of my birds and strain at Philadelphia, New York, Charleston, Buffalo and the World's Fair are well known, and fully described in new, finely illustrated catalogue, which will be mailed free to all who apply.

Three hundred prime young hens at low figures. Eggs—\$5 per 13, \$8 per 26, \$10 per 40.

E. B. THOMPSON,
Amenia, Dutchess Co., N. Y.

Buff Cochins.

Immense size, massive feathering, elegant color and grand Cochin type. These Golden Beauties are direct descendants of the famous prize winning birds of Wm. Wallace Tooker and E. T. Blood. Can you find better stock?

AT THE WORLD'S FAIR,

On Five entries, we won THREE First and ONE Second Prize. 5258 Send for Circular.

BUFF COCHINS and ... BUFF COCHIN BANTAMS.

Blood tells in all stock raising, and in none more strongly than in thoroughbred poultry. The line of blood I am breeding has produced and is producing prize winning specimens. They have won highest honors at such noted shows as Columbus, Cleveland, Detroit, Findlay, Tiffin and North Baltimore. I have a grand lot of young and old stock, and can send you birds for the show room or breeding pen, at living prices.

My Cochins have real, deep, clear buff color, great size and true Cochin shape, profuse leg and toe feathering, and their line of blood makes them desirable for a breeder to select from. Ask for fine illustrated circular. 52121

HATCHED 100 PER CENT!

THE CHALLENGE

Is the Best Manufactured and Remains Undefeated.

Won First Prize at Boston, 1889 and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the Incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method *do away with the bottom heat.* This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$2.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

The AMERICAN FANCY

A WEEKLY JOURNAL DEVOTED TO
POULTRY, PIGEONS AND PET STOCK.

Vol. III, No. 12.

JOHNSTOWN, N. Y., NOVEMBER 17, 1894.

Whole No. 64

Buff Cochon Cockerel.

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition, with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price.....\$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price.....\$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price.....\$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth. Price.....\$1.00

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 210 pages. Price.....\$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price.....\$0.50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price.....\$0.50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price.....\$0.50

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price.....\$0.50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price.....\$0.25

Profitable Poultry Farming.

(M. K. Boyer.) A practical little book of interest to market poultrymen. Price.....\$0.25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. Price.....\$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper.....\$0.50

PET STOCK.

Birds and Bird Keeping in Cage and Aviary.

A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price.....\$0.15

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price.....\$0.25

INCUBATOR ON TRIAL

Try it before you buy it. Highest Award at World's Fair. Plans of Brooders, Houses, Etc., 25c. Judge of Incubators at World's Fair says: "If I were going to buy for myself I would give the VON CULIN the preference." Book on Incubation, 5 cents. *1361

Von Culin Incubator Co., box 39, Delaware City, Del.

IS MADE in eleven different styles and sizes. Something new and safe. Recommended by all who use them. Saves 1/2 the oil and doubles the heat and light. No smoke, no smell; absolutely fire-proof. Fourteen styles and sizes of Hot Air and Water Heaters. Send for catalogue and state your wants. Agents wanted.

E. E. PAGE, M'fr., Station B, Cleveland, Ohio. 1/4 *5263

Show Calendar.

1894.

- Nov. 20-23.—The Sedalia Poultry Club, Sedalia, Mo. C. A. Emry, judge. E. A. Henney, secretary.
- Nov. 27-29.—Boyer Valley Poultry Association, Missouri Valley, Iowa. Theo. Hewes, judge. C. C. Dorr, secretary.
- Nov. 27-30.—Sumner County Poultry Association, Wellington, Kansas. C. A. Emry, judge. W. D. Whitfield, secretary.
- Nov. 27-Dec. 2.—Eastern Iowa at Davenport, Iowa. F. H. Shellabarger, judge. H. C. Goettsch, secretary.
- Nov. 28-Dec. 3.—Peoria Columbarian Association, Peoria, Ill. John H. Kuhn, pigeon judge; Robert Joos, superintendent; Wm. H. Koch, secretary.
- Dec. 3-5.—Ottawa County Poultry Association. Third annual show at Minneapolis, Kas. F. W. Hitchcock, judge. T. E. Hurley, secretary.
- Dec. 3-7.—Hawkeye Poultry Association, Mount Pleasant, Iowa. W. S. Russell, judge. A. B. Porter, secretary.
- Dec. 3-9.—Pottawattamie Co. Poultry and Pet Stock Association, Council Bluffs, Iowa. J. Y. Bicknell, judge. O. K. Pratt, secretary.
- Dec. 4-7.—Troy Poultry, Pigeon and Pet Stock Club, Troy, N. Y. John H. Duke, secretary.
- Dec. 4-7.—Lyon County Poultry and Pet Stock Show, Emporia, Kan. C. A. Emry, judge. Wm. Hammond, president. W. T. Walters, secretary.
- Dec. 4-7.—Northern Iowa, at Hampton, Iowa. G. D. Holden, judge. F. A. Bailey, secretary.
- Dec. 5-7.—Warren County Poultry and Pigeon Club, Bowling Green, Ky. G. S. Hollingsworth, secretary.
- Dec. 5-12.—Cleveland Poultry and Pet Stock Association, Cleveland, O. B. N. Pierce and Cornelius Murphy, judges. W. S. Rowe, 18 Herschner street, secretary.
- Dec. 10-14.—Missouri State Show. Rolla G. Carroll, Warrensburg, secretary. Judges: C. A. Emry, Theo. Hewes and J. W. Wale.
- Dec. 10-15.—Iowa State Poultry Association, Ottumwa, Iowa. F. H. Shellabarger and J. Y. Bicknell, judges. W. S. Russell, sec'y.
- Dec. 11-14.—Roanoke Valley Poultry Association, Salem, Va. J. H. Drevenstedt, judge. Frank A. Lovelock, sec'y.
- Dec. 11-14.—Rhode Island State Poultry Association, Providence, R. I. I. K. Felch, H. S. Ball and F. B. Zimmer, judges. Samuel Cushman, secretary, Kingstown, R. I.
- Dec. 11-16.—Hasting, Nebraska, Poultry Association. J. A. F. Hitchcock, judge. J. A. Howard, secretary.
- Dec. 11-13.—Brockton Poultry Association, Brockton, Mass. C. H. Pope, secretary.
- Dec. 11-14.—Coshocton, Ohio. Quincy Dawson, secretary, Roscoe, Ohio.
- Dec. 12-13.—Norfolk County Poultry Association, Franklin, Mass. W. M. Clough, secretary, Medway, Mass.
- Dec. 12-14.—Boston Pigeon Show Association, Boston, Mass. C. E. Twombly, sec'y.
- Dec. 17-21.—Southern Kansas Show, Winfield, Kan. F. W. Hitchcock, judge. M. L. Wortman, secretary.
- Dec. 17-23.—Southern Kansas Fanciers' Association, Wichita, Kas. B. N. Pierce, judge. H. L. Rochelle, Wichita, Kas., secretary.
- Dec. 18-20.—Guilford Poultry and Pet Stock Association, Guilford, Conn. L. R. Shelley, secretary.
- Dec. 18-21.—Southern Illinois Poultry Association, Albion, Ill. C. A. Emry, judge. S. N. Weaver, secretary.
- Dec. 18-21.—Nemaha Valley Poultry Association, Auburn, Neb. H. J. F. Wert, secretary, Auburn, Neb.
- Dec. 18-21.—Findlay, Ohio. McClave, judge. John A. Meeks, secretary.
- Dec. 18-22.—Buckeye Poultry Association, Dayton, Ohio. I. K. Felch, judge. F. W. Bellman, secretary, Dayton, Ohio.
- Dec. 18-22.—Indiana Fanciers' Association, Roachdale, Ind. F. J. Marshall, judge. C. J. Stutler, cor. sec'y, Roachdale, Ind.
- Dec. 18-26.—Mid-Continental Poultry Association, Kansas City, Mo. J. H. Drevenstedt, Sharpe Butterfield, B. N. Pierce, Theo. Hewes, F. W. Hitchcock, and Theo. Sternberg, judges. Dr. G. W. Davis, president. F. M. Slutz, secretary.
- Dec. 19-24.—North-Western Illinois, at Lanark, Ill. F. H. Shellabarger, judge. F. Irvin Root, secretary.
- Dec. 21-25.—Eastern Middlesex Poultry Association, Malden, Mass. G. K. Holbrook, secretary.
- Dec. 24-29.—New Mexico Poultry Association, Albuquerque, N. M. John C. Snyder, judge. W. S. Lowe, secretary.
- Dec. 25-27.—Seymour Poultry and Pigeon Association, Seymour, Conn. G. J. Faber, sec'y.
- Dec. 25-28.—Ionia, Mich. I. K. Felch, judge. A. F. Herbert, secretary.
- Dec. 25-29.—South-Eastern Nebraska Poultry Association, Beatrice, Neb. C. A. Emry, judge. H. H. Halladay, secretary.
- Dec. 26-Jan. 2.—San Francisco, Cal. A. Armstrong, secretary, Petaluma.
- Dec. 27-Jan. 3.—Erie County Poultry Breeders and Pet Stock Association, Hamburg, N. Y. E. C. Pease, secretary.
- Dec. 31-Jan. 4.—Ontario Poultry Association, Butterfield, Jarvis, Smelt and Johnson, judges. T. A. Brown, sec'y, London, Ont.

1895.

- Jan. 1-5.—Inter-State Poultry Association. Arkansas City, Kan. John C. Snyder, judge. G. A. Howerton, secretary.
- Jan. 1-5.—North Kansas Poultry Association, Atchison, Kan. Theo. Hewes and F. W. Hitchcock, judges. S. G. Sprague, secretary. W. A. Roberts, president.
- Jan. 1-5.—Knoxville, Tenn. B. N. Pierce, judge. John W. Flennikin, secretary.
- Jan. 1-7.—Wapsie Valley Poultry Club, Dubuque, Ia. Decimal score card will be used. I. K. Felch, judge. John M. Parker, secretary.

- Jan. 2-5.—Butler and Warren County Poultry and Pigeon Association, Middleton, Ohio. F. H. Shellabarger and C. W. Butties, judges; Henry Hensy, secretary.
- Jan. 3-5.—Hutchinson Poultry Association, Hutchinson, Minn. Geo. D. Holden, judge. Dr. J. F. McArthur, secretary.
- Jan. 7-12.—La Crosse Poultry Association, La Crosse, Wis. F. W. Hitchcock, judge. E. H. Hoffman, secretary.
- Jan. 7-12.—Allentown Poultry and Pigeon Association, Allentown, Pa. John W. Voachim, cor. sec'y.
- Jan. 7-12.—Montreal Poultry Association. J. Y. Bicknell, poultry judge; C. H. Currier, pigeon judge. W. J. Morton, secretary.
- Jan. 8-9.—Highlandville Poultry Association, Dedham, Mass. B. F. White, secretary.
- Jan. 8-11.—Peninsular Poultry, Pigeon and Pet Stock Association, Jackson, Mich. J. H. Drevenstedt, H. A. Bridge, and S. H. Slifer, judges. Frank W. McKenzie, Concord, secretary. E. J. Mason Grant president.
- Jan. 8-11.—Interstate Poultry Association, Falls City, Neb. C. A. Emry, judge. Cyrus Milam, secretary.
- Jan. 8-11.—Roanoke Valley Poultry Association, Roanoke, Va. G. O. Brown, judge. Frank A. Lovelock, secretary.
- Jan. 8-12.—Henry County Poultry Association, Geneseo, Ill. F. J. Marshall and F. H. Shellabarger, judges. W. A. Shelhamer, sec'y.
- Jan. 8-12.—Maryville, Mo. I. K. Felch, judge. Fred. Parcher, secretary.
- Jan. 8-12.—Rochester Poultry and Pigeon Association, Rochester, N. Y. Judges: F. B. Zimmer, C. E. Rockenstyre, G. S. Pratt, George E. Peer and Amos P. Mack. W. J. Harrison, secretary.
- Jan. 8-13.—Tacoma, Washington. H. H. Collier, secretary.
- Jan. 9-11.—New Hampshire Poultry Association, Concord, N. H. J. J. Trenoweth, secretary.
- Jan. 9-12.—North-Western Ohio Poultry and Pet Stock Company, Tiffin, Ohio. T. S. Falkner, secretary.
- Jan. 9-12.—Chattanooga Poultry Association, Chattanooga Tenn. P. M. Reagan, sec'y.
- Jan. 9-12.—West Chester Poultry Association, West Chester, Pa. C. C. Townsend, treasurer, Cheyney, Pa.
- Jan. 9-14.—The New Haven Poultry Association, New Haven, Conn. Ed. A. Todd, sec.
- Jan. 10-14.—Kansas State Show, Topeka Kan. D. A. Wise, secretary, Topeka.
- Jan. 10-16.—Cincinnati Poultry and Pigeon Association. J. H. Drevenstedt and Sharp Butterfield, judges. Geo. Ewald sec'y.
- Jan. 14-19.—Columbus, Ohio. G. F. Gast, secretary, Prospect, Ohio.
- Jan. 15-18.—Binghamton, N. Y., Poultry Association. Nat. E. Luce, secretary, Binghamton, N. Y.
- Jan. 15-18.—Chenango Poultry and Pet Stock Association, Smyrna, N. Y. J. Y. Bicknell, judge. Courtney E. Ferris, secretary.
- Jan. 15-19.—Howard County Poultry and Pet Stock Association, Kokomo, Ind. F. J. Marshall, judge. L. C. Hoss, secretary.
- Jan. 15-20.—Nebraska State Show, Lincoln, Neb. Emry and Hitchcock, judges. A. Lemen, secretary.
- Jan. 15-20.—Colorado Poultry Association, Denver, Colo. I. K. Felch, judge. John Herr, Denver, Colo., secretary.
- Jan. 15-20.—Georgia Poultry and Pet Stock Association, Augusta, Ga. John W. Killingsworth, secretary.
- Jan. 16-18.—St. Johnsburg, Vt. W. B. Eastman, secretary.
- Jan. 16-18.—New England Light Brahma Club, Boston, Mass. G. W. Cromack, secretary, Stoneham.
- Jan. 16-18.—Ansonia Poultry Association, Ansonia, Conn. J. W. Willis, supt.
- Jan. 17-22.—Berks County Poultry and Pigeon Association, Reading, Pa. Judges: Poultry, Halsted and Zimmer; pigeons, Stanton. B. F. Ruth, president; H. M. Shoemaker, secretary.
- Jan. 18-20.—North-Western Poultry and Pet Stock Association, Sioux City, Ia. Theo. Hewes, judge. J. W. McMillen, president. Chas. E. Lozier, secretary.
- Jan. 20-25.—Washington (C. H.), Ohio. W. R. Dalbey, secretary.
- Jan. 21-24.—Central Mass. Poultry Association, Worcester, Mass. W. H. Fitton, secretary.
- Jan. 22-25.—Parsons Fanciers' Association, Parsons, Kansas. C. A. Emry, judge. A. C. Braunsdorf, secretary.
- Jan. 22-25.—Pittston Poultry Breeders' Association, Pittston, Pa. J. Y. Bicknell, judge; W. R. Allen, secretary.
- Jan. 22-26.—Omaha Poultry Fanciers' Association, Neb. I. L. Richards, secretary.
- Jan. 28-31.—Utah Poultry Association, Salt Lake City. Theo. Hewes, judge. J. W. Haslam, secretary. W. W. Browning, president.
- Feb. —Cape Ann, Mass. Geo. E. Merchant, secretary.

POULTRY.

From the Editor's Perch.

Incubation and Its Natural Laws, is
the title of a new book by Chas. A.
Cyphers of Boston, Mass. We have no
hesitation in pronouncing it the most
thorough book on the subject ever writ-
ten. Notwithstanding the fact that it is
full of science and the laws governing
artificial hatching, it is so well written
that any intelligent reader can grasp the
meaning of the author. It is not a book
that will be carelessly read and thrown
down to become dusty with age; on the
contrary, it is a book that will be read
again and again. Many old theories are
exploded and many new ones advanced
with convincing proof of their stability.
We would be pleased to quote at length
from the author's remarks if space per-
mitted, but will refer every reader of THE
AMERICAN FANCIER to the book itself. It
is invaluable and as it costs but 50 cents,
no progressive poultryman can be with-
out a copy.

One of the handsomest catalogues we
have seen in many moons is the one
issued by F. A. Stuart of Marshall,
Michigan. "Stuart's Buffs" are famous
in the great west and justly so, for no
breeder has worked harder to get on the
top perch. Every poultryman send for
Mr. Stuart's catalogue.

The largest premium list issued by any
poultry association is the one just re-
ceived from the Cleveland Poultry and
Pet Stock Association. It is beautifully
gotten up and a credit to the society and
printer. The Cleveland show will be a
great one.

Another exceedingly neat list is the
one sent out by the Peninsular Poultry,
Pigeon and Pet Stock Association. This
society will hold its third annual show at
Jackson, Michigan, and it promises to be
one of the largest and best shows ever
held in the Wolverine state. Frank Mc-
Kenzie, Concord, Michigan, is the secre-
tary.

Here is the way P. H. Jacobs, editor of
the *Poultry-Keeper*, hits the narrow-
minded unjournalistic publishers and
editors of poultry papers who are afraid
to say a good word of their contempor-
aries:

"If we were disposed to fear other
journals we would not succeed at all.
We prefer competition. There are a
hundred readers of poultry papers where
there were twenty of them ten years ago.
An old paper that is afraid of a new one,
or is envious or jealous, and attacks it,
simply shows its weakness, and will have
the heaviest end of the log to lift."

Right you are. When we feel it neces-
sary to withhold our praise of a con-
temporary because of its greater success
than our own darling, we will quit the
newspaper business. We are all brother
journalists and not literary cutthroats.

The *American Cultivator* says:

"Experiments at the stations indicate
that fowl fed upon corn and cornmeal,
wheat and barley usually lay a larger
egg than do those fed upon bran and oats,
and the yolk is larger, therefore it is
richer and more nutritious. This is what
might be expected from the nature of the
food, but unless some care is taken the
hens may get too fat upon such food, and
there will be a less number of eggs than
on the poorer food. Alternating these
feeds with bran and meal mash in the
morning, to which a little meat is added,
oats and wheat at noon and corn at night,
comes nearer a 'well-balanced ration'
than any other we know."

There is so much truth in such a concise
form in the above paragraph that we
advise inexperienced feeders of poultry to
paste it in their hats. Pages can be
written on the laws of feeding and the
value of grain, yet they cannot convey
more clearly the principles that govern
successful feeding for eggs than the little
"par" we reprint.

Without rich food you cannot expect
rich products in the shape of eggs or
milk. That everyone who has had ex-
perience in producing and selling milk,
knows. Quality is as essential as quan-
tity if good prices and a fancy trade are
expected. Those who decry corn as a
food for laying hens lose sight of the
quality factor in the product. A fresh
egg like fresh milk can be of very poor
quality. We have learned that from bitter
experience in past years when compelled
to buy both articles to supply a demand
we could not fill from our own dairy and
poultry yards. That is why we are
opposed to the mere forcing for quantity
of milk and eggs regardless of the quality.
While it is true that the average trade
cares little for an egg except that it be
fresh, it is equally true that the trade
that pays more than average prices for
eggs looks upon quality as the prime
factor.

We are indebted to the Berkshire
Poultry and Pet Stock Association for a
complimentary ticket of admission to a
lecture on poultry to be delivered in
Sedgwick Hall Annex, Lenox, Mass.,
November 14th. We are pleased to note
the more frequent occasions on which
poultry topics are discussed for the benefit
of the practical breeders and amateurs.

A certain old gentleman who in past
decades was a power in the fancy, whose
every word was eagerly caught by the
willing ear of the new born fancier is still
imbued with the idea that what was his
meat in the dim past must be his mutton
in the bright future. Many another good
man has made the same grievous error
of judgment. The wheels of progress are
in motion; electricity and steam have
supplanted engine motive power, yet
there are still men among men who travel
on in the old rut believing that all others
are "but travelers like themselves." The
latest indication of a return to ancient
methods garbed in modern dress, is the
attempt of I. K. Felch to introduce the
"Utility Game" to the fancy. This
unique fowl is neither a Pit Game nor an
Exhibition Game. It is a market fowl in
the garb of a standard bred Game. The
latter evolved from the old English Game
and stands to-day among the highest and
most thoroughly bred fowls on earth.
The Pit Game is bred for fighting pur-
poses only, regardless of color points.
The idea of "Utility Games" originated
in the fertile imagination of Mr. Felch.
He is willing to give us a bird that is
neither an Exhibition nor a Pit Game.

It will be nothing more than a respectable
mongrel, such as we see at hundreds of
county fairs masquerading as standard or
Pit Games. What Mr. Felch's object is
in desiring to burden our or his new
Standard with such misfits is not clear.
He is on record against the so-called new
breeds. He denounced the Buff Leghorn
as a mongrel, spoke slightly of other
meritorious new breeds, condemned under
a *nom de plume* the best table fowl in the
Game class, the Cornish Indian, and yet
comes out advocating a mongrel creation
of his own. Where is the consistency in
such methods? What does the much
vaunted self-constituted censorship as-
sumed by Mr. Felch over the misguided
mortals who fail to reason as he does,
amount to, when he is guilty of the same
offence he so hastily condemns in others?
The intelligence of American fanciers is
too well known and established, and Mr.
Felch must have a very poor opinion
it if he believes modern fanciers will gulp
down the morsels he dishes out. They
are taken *cum grano salis* in these days,
and especially will this be the case with
his so-called "Utility Games."

We receive hundreds of letters during
the year from young fanciers and inex-
perienced poultrymen asking us to give
remedies for the various ailments the
feathered races are afflicted with. This
leads us to offer a few general remarks
on the subject of diseases of poultry.

Our old friend, J. H. Davis, in his new
and interesting little book "The A, B, C
of Poultry Culture" remarks: Afflictions
among poultry—fowls never have dis-
eases—may be the result of negligence,
ignorance or laziness on the part of the
breeder in many cases. The breeder
who knows how to take care of his fowls
and does it, may expect vigorous birds
and few sick ones. Afflictions among
fowls are not natural. They never con-
tract afflictions in a state of nature.
Now here is a text for a sermon
and we will help formulate it trusting
some well read brother will preach it in
print later on.

Mr. Davis is right and Mr. Davis is
wrong. He is right when he says fowls
"never contract afflictions in a state of
nature" because nature ordains that the
fittest only survive. The weaklings fall
by the wayside. He is wrong when he
says "fowls never have diseases." They
have. If you don't believe it read what
our learned chicken doctors have to say,
albeit, they say it in scientific language.
But aside from what the doctors say,
every poultryman knows that chickens
have diseases of some kind. Apoplexy is
a disease. So is consumption or going
light. Chicken pox comes under the
same head and so on with canker, roup,
diarrhoea, etc. All are diseases that
fowls under domestication are subject to.

Having established the fact that fowls
are afflicted with diseases or afflictions,
as Mr. Davis calls 'em we must look for
the remedy. We do not believe in lay-
men doctoring men or animals except in
very simple cases where the unpro-
fessional can recognize or diagnose the
disease, ailment or "affliction." Even
then a good physician is worth a hun-
dred "would be doctors." This state-
ment will not prevent the "smart Ales"
of the universe from assuming that they
know as much as an M. D., but we are
not dealing with the S. A's. We want

to talk to the sensible but inexperienced amateurs. So here goes.

When fowls are bred in confinement nature's laws must not be disobeyed. It is true that free range helps us to secure health and vigor for our flocks. That is simple. But there are hundreds of fanciers so situated that they cannot secure that "free range" and they must depend on small houses and small yards to raise their annual product of fine feathers. That is difficult. But it has been successfully done in the past and can be done in the future.

To breed fowls in health while in confinement we must study the laws of nature and of feeding. This is no easy matter but it must be the aim of every fancier to learn how best to accomplish it. Proper buildings are the first requisite and scrupulous cleanliness the second. Healthy breeding stock of course is indispensable and we assume that only such is tolerated in the yards of the fancier. A proper building is one that protects delicate fowls at night from drafts and prevents the freezing of the combs, wattles and toes, yet has sufficient pure air to keep the carbonic gas under control. A small building is better than a large one and a muslin window is better than one of glass in a roosting room. With a muslin window ventilators are unnecessary in cold climates. Have the building or roosting room small enough so that the animal heat of the fowls will supply all the warmth necessary to prevent freezing of the combs, wattles and toes. So much for the buildings.

Now for the food. Corn, wheat, oats and bran are staple articles of food for chickens. No better mixture than ground corn and oats and bran has yet been found to feed to chickens. We used it for seven years as a standard for all morning feeding to young or old. Cracked or ground bones, crissel, meat scraps are all desirable adjuncts in the daily menu. Of the prepared foods Spratt's poultry meal is without a superior. It contains every ingredient necessary to the growth of a chicken. Vegetable food is indispensable. Potatoes, boiled and mashed with the grain mixture alluded to above, chopped carrots and beets and small heads of cabbage are all cheap and excellent foods. Probably the most important addition to the above is water. The latter should be pure and given twice a day in winter. We always used it hot when the temperature in the chicken house was below freezing and poured it into open vessels. It kept warm long enough for all the fowls to drink and then was poured out. Never allow fowls to drink ice cold water or chew snow and never allow fowls to eat frozen clover or vegetation of any kind if you want the egg basket filled with increasing regularity.

Having touched upon the vital features of what are necessary to keep fowls in good condition we will try and shed a little light on the diseases that afflict them or rather the best way to avoid serious consequences from such.

An ordinary cold is not serious. The fact of the nostrils running and the head being swelled is no indication of roup. Place such a fowl in a hot room, registering 80 degrees, and bathe head with hot water of 120 degrees two or three times a

day for a few days and the trouble will disappear. If you must resort to drugs give a two grain quinine pill morning and evening. When the discharge becomes thick syringe nostrils with a solution of boracic acid, camphorated oil, crude petroleum or tar oil, but keep fowls in a warm place.

Another important thing to remember in doctoring fowls afflicted with colds is to regulate the diet. In England Glauber's salts are fed extensively to poultry and pigeons "under the weather." Well, a dose of castor oil will work wonders in America. But that is not all. Keep the grain away from the fowls until they are cured. Our own method has always been to keep fowls on a vegetable diet during the temporary sickness they suffered from. Chopped onions and cabbage are excellent.

As to canker, it must be removed and the parts painted with an astringent such as a 10 per cent solution of sulphate of zinc or a solution composed of corrosive sublimate one grain and one pint of water. Powdered burnt alum is also used. But the afflicted fowls must be dieted just the same as those having colds.

As to roup there are many remedies given, but in a really genuine case where the discharge is from the respiratory organs and foul smelling the feathers become dry and the comb dull, the best remedy is the hatchet. Of course birds have been cured of alleged roup and no doubt there are some cases where the genuine article has been conquered, but the exception to the rule should never lead intelligent poultrymen astray. Better kill the evil at the root. With the few brief hints given above we trust the intelligence and common sense of our readers will enable them to fight the most common and dangerous ailments the feathered races are afflicted with. It is only necessary to remember the old proverb "A stitch in time saves nine," when dealing with sick fowls.

It must not be understood from the above remarks that we are opposed to the medical treatment of sick fowls by competent practitioners, but we do emphatically oppose the indiscriminate use of powerful drugs by persons who are ignorant of the principles of medicine and who are not qualified to diagnose the disease. Many of the latter class could draw valuable lessons from the animal kingdom if they only observed the actions of sick beasts. The first instinct of the latter is to fast, but the first law of the owner of an invalid beast is to stuff it with nauseating drugs or compel it to eat unsuitable food. Torpid livers and depraved stomachs are not helped by such a course. Nature rebels against it and the dumb brute knows it.

We do hope that some well qualified common sense physician who has studied animal diseases thoroughly, especially those affecting fowls and chickens, will write a clear, concise but comprehensive book on the subject, devoid of all scientific frill, one that the common every day people can understand. Such a book will do much toward clearing away the fog which now enshrouds the subject. Why cannot some of our experiment stations take hold of this subject? There are well educated men connected with

these institutions and no doubt some are posted on medical and physiological matters sufficiently to be thoroughly competent to investigate the causes and remedies of all diseases affecting the feathered race. We are certain that Prof. Law of Cornell college, whose excellent book on veterinary surgery is well known, could do grand work in this direction.

Dr. Charles Lang made a complaint against one "J. P. M." in a recent issue of THE AMERICAN FANCIER. Now we receive a letter from Geo. W. Unger of Boyertown, Pa., denouncing the same individual as a dead beat. His name is J. P. Mulford of Middletown, N. Y. He is or was a carriage manufacturer.

Advices from South Carolina indicate the finest and largest display of poultry ever seen, at the State fair held in Columbia this week. A full report appears in THE AMERICAN FANCIER of November 24th.

We are indebted to F. A. Lovelock, the expert judge of cattle, swine and sheep, for a copy of the American Standard of Excellence for judging these breeds, compiled by him. It is a most handy, convenient and valuable book of reference which every judge of live stock needs. It is well printed and cheap at the price, 75 cents. It can be obtained from F. A. Lovelock, Salem, Va.

About the neatest new monthly poultry paper we ever saw, comes from far off British Columbia. It is called the *British Columbian Fancier*. The cover is a model of good taste and the excellent typography and paper it encloses are fine samples of the printer's art. But it does not stop there, for the reading matter is fully up to the mechanical make-up. We congratulate our new contemporary and trust it will meet with the success it deserves. It costs but 50 cents a year, which is remarkably cheap, considering the size and quality of the *British Columbian Fancier*.

She Kerosened the Chickens.

Mrs. John Seebury was until last night the proud possessor of seven specimens of the gallinacean family. Of late the birds have been afflicted with vermin, and at dusk last night Mrs. Seebury, armed with a bucketful of oil and a candle, started for the hen house. She also took a brush along with which to apply the coal oil, and the candle was placed on a board while the work proceeded. Each bird received a supply of oil, and when saturated the lady took up the light to make a closer inspection of her work.

While trying to look at two chickens at the same time the candle happened to touch one, and swish, seven chickens were fired. The poultry studio was filled with more noise than a barnyard full of fowls would make over the first egg of the season, while the whole interior became as light as if the Monterey's search light had suddenly been turned on full. Suddenly seven animated torches shot out in as many different directions, all cackling like mad, and winding up three seconds later in a haystack, which they began to fire in true incendiary style.

By this time everybody on the block was yelling "Police," and a general alarm brought the fire department on the quickest run of the year. Mrs. Seebury has the remains of seven chickens out on Pearl street, somewhat charred, but free from insects.—*San Francisco Examiner*.

A GREAT FEATURE.
The show reports of THE AMERICAN FANCIER are a great feature.—*Poultry Monthly* for November.

State Fair Poultry.

Mr. Butterfield Replies to "J. C."

TO THE AMERICAN FANCIER:

I wish to enlarge on "J. C.'s" remarks in his State Fair notes, and will try and give him and your readers one of the chief reasons why good exhibitors will not send their birds to State fairs, especially Michigan State Fair, and have no doubt other State fairs are much the same. It costs \$1.00 to become a member, and a member can show just as many chickens, pigs, sheep, cattle and horses as he wishes, and after entering whatever stock the member may wish, the rules say that each exhibitor must feed, water, and take care of his own entries, and that's where the itinerant or huckster gets the fatted calf—from the ignorance of those in control of State fairs. Now, when breeders know that they will have to go with their birds for eleven days at the show and a day going and coming, making about two weeks' time to be spent in showing a few pairs of birds, why it is absurd to expect a good breeder to send an exhibit, while the majority of birds shown by those hucksters are not worthy of being poked up by a stick nor even worth a second look, and I generally ask the secretary or superintendent at a show whether they want me to judge severely or go it lenient, and they invariably say, "Don't be severe, for it will kill our exhibit." I judged in Toledo this year, and they asked me to exercise my own discretion. Well, I withheld probably twenty-five 1st prizes, and I distinctly remember one exhibitor showing four pair of S. S. Hamburgs—two of old and two of chicks. I placed a 2nd prize, not for the two old pair nor for the two young pair, but on the four pair. I said, "Just place the ribbon so it will take in the four coops," and the exhibitor said, "I was hard treated," as he stood alongside of the coop. I replied to him and said, "Twenty years ago I remember you showing some good birds, and you know better. If I lived in Ohio I could get much better birds than probably your best pair at five dollars per pair, birds that would have some credit," and his reply was, "If you had not been here they would have all won, for with the majority of judges who judge at State fairs the poor ones stand just the same chance as good ones." He enumerated a good many shows he was going to attend, ending up at Dallas, Texas. I said, "Well, do you ship your birds back to Ohio?" He said, "No, that would not pay. I sell them at any price I can get, not stopping at 50 cents a pair, and when the show is over and I have some birds left still, I just open the coop doors and let them go and send back my coops by freight to Ohio." Well, I have tried hard to get the State fair to charge even 10 cents for feed and care during the show and to see to the birds being kept clean and returned to their owners after the show, and this is the result: I find that at their annual meetings, when one of their directors has held the position of poultry superintendent for, say, two years at the most, just about the time he begins to know half as much as he ought to know when first elected, he has to get out and give the position to some other gentleman, who probably don't know by name any breed of chickens, and to him they look all alike, dunghill and thoroughbred, and so the judge, whoever he may be, can award the prizes just as he wishes and no one to find fault. In Detroit I held back probably thirty 1st prizes, and, "J. C.," I don't think they will ever go through the books to see how many prizes were withheld or ever pause to think why. Well, Detroit show held two, three, and four years ago was much different. Each exhibitor had to pay his entrance money, and the last two years of its existence entrance money amounted to over \$800 per year. The birds were fed, watered, and coops cleaned out every morning, and some of those hucksters' birds, if they could have expressed their feelings, would have wanted the show to last another two weeks. I remember Mr. McNeil saying that his birds were just getting in grand shape for Toronto's hot classes, and I well remember the Waterloo Mr. Gam-

merdinger met at Detroit shows. When scoring was in vogue at New York it was my luck to score the Polands, and Mr. Gammerdinger was there with his big string of Polands. He came into the show on Sunday morning, and I had finished judging on Saturday, and he was wild when he saw the scores. He said, "I had them all scored at a show in Ohio inside two weeks ago," and he was protesting to Mr. Rackham, who was superintendent, and Mr. Rackham called me over to where they were talking and said, "This is the judge." Mr. Gammerdinger said, "How is this my birds have scored three to four points lower here than at the other shows?" He named the judge. I said, "He never saw any good Polands." He said, "Where are these good Polands you refer to?" I said, "In Canada. Mr. McNeil's and Bogue, of London." He said, "I would like to meet them." Well, he met the Polands I had spoken of, which "J. C." mentions, and when McNeil had cooped his birds Mr. Gammerdinger said, "Mr. B., just give McNeil 1st and 2d all round and look amongst us Yankees for 3d."

Now, how are we going to get out of these difficulties? I have done about all I can in trying to show the associations, and my teaching has been of no avail. I know from actual experience in judging in Michigan at their winter shows that I meet birds good enough to compete in New York or any other good show, where competition is keen in any class. I always take out and examine the birds before I make my decision, but when one meets such birds as are at the State fair, reeking in filth and disease, one don't care much about handling them, and I don't wonder that "J. C." was disgusted.

I think Mr. Blunck could tell quite a different story of the fall show at Toronto, where it cost twenty-five cents an entry. No hucksters were there; it don't pay them, and it would be much better for good breeders if all the State fairs would insist that nothing but first-class specimens ought to win and the judges so instructed, for a huckster don't love good chickens. The almighty dollar is his god, and what will he not do for the money.

S. BUTTERFIELD.

Northwestern Pennsylvania Poultry, Pigeon and Pet Stock Association.

Poultry fanciers and pet breeders held an informal meeting Nov. 4 in Scott Post room and it was attended by about fifty gentlemen. The proceedings were full of interest.

A constitution and by-laws were adopted. The name given the society was "The Northwestern Pennsylvania Poultry, Pigeon and Pet Stock Association." The membership fee was placed at \$1 and the dues at 25 cents a quarter.

Election of permanent officers resulted: President, Capt. John J. Baxter; first vice-president, George Siegel; second vice-president, E. J. Liebel; secretary, Peter Wingerter; treasurer, Louis Lander; executive committee, Wm. Ebisch, Samuel M. Brainerd, Jr., B. F. Disbrow, Jacob Hammer and D. S. Hanley.

The association adjourned to meet on Friday evening.

It is the purpose of the association to offer a standing reward for information which will lead to the arrest and conviction of thieves or destroyers of the property of the members.

It is also intended to have a vigilance committee, which will cover certain districts in which the possession and ownership of fowls or pets exist. The reports of the committee will keep the association thoroughly posted and enable it to trace stolen property.

The following is a partial list of the members and exhibitors at the charity fair: Peter Wingerter, Nicholas Bricher, Chas. Ebisch, Wm. Sapper, E. R. Liebel, G. R. Liebel, August Fegert, M. Kern, Jacob Hammer, E. J. Liebel, W. C. Ebisch, G. Geisler, Dr. Chidester, B. F. Disbrow, S. M. Brainerd, Jr., D. S. Hanley, J. F. Schulz, C. L. Hirt, Chas. Eber, George Kraus, Wm. J. Schamble, John Franknecht, Frank King, George Brown, Anthony Schnee, F. Brehm, Fred Berst, R. Lunder, George Sapper, John Dawe, W. P. Grazier, Geo. Siegel, Capt. Baxter.

Der moral ish, "A frish man moosn't deal in shesnuttles."

YAKOB PILSENER.

Hoboken, N. J.

White Plymouth Rocks.

TO THE AMERICAN FANCIER:

Being an attentive reader of your very valuable paper, I see articles on the different breeds of poultry, but never saw any on the White Plymouth Rocks. This, in my estimation, is the breed. While I know they are not perfect in every respect, I believe they combine more good points than any other variety. They are dangerous rivals of the Leghorns and Minorcas if properly fed and cared for, especially in winter, when eggs are high in price. For market they have no superiors. Amateurs think, being a solid color, they are easier to breed to show room requirements than the parti-colored breeds, hence they think they should buy them for less. I will admit one can breed a greater per cent. of good pullets of the whites than of the parti-colored, but when they come to get pure white plumage and orange yellow legs on males, as the Standard wants them, they will find as many good first-class males among the parti-colored as in the whites. I was looking over a sample copy of *Poultry Inter-Ocean* and saw an article on this breed by Rucker Bros., Literbery, Ill. In my opinion, the latter are on the wrong track to get the desirable white plumage. They say, in order to get white plumage, select birds "with not too yellow legs and beaks." Seems to me anyone can breed white plumage with such matings, and where does the fancy come in in doing what anyone can do? Again, such matings are bound to throw lots of disqualified birds by having willow legs. Again, if I read my Standard right, it wants orange yellow and nothing else on males, while straw color is allowed on pullets. I would rather see some tinge on surface color, if quills and under color were white, than light colored shanks. If Messrs. Rucker & Bro. would come east to some of our shows, we will show them some White Plymouth Rocks with white plumage and orange colored shanks. At this time there is a great demand for extra large birds. I am in favor of good size, but don't care to have them any under standard weight nor much over. When so very heavy they have too much Cochins appearance and are clumsy and sluggish layers.

DANIEL L. STAUFFER.

Spring City, Pa., Nov. 7, 1894.

An Important Sale.

This certifies that I have sold and delivered to A. E. Blunck my entire stock of Game Bantams, consisting of Black Reds, Duckwings, Piles, Brown Reds, Blacks, Whites, and White Indian, including all my noted prize winners at the leading shows of America and the young stock bred from them. This is undoubtedly the finest collection in America. I heartily recommend all my former patrons in need of good stock to Mr. Blunck.

ADRIAN W. SMITH.

Whitesboro, N. Y., Oct. 18, 1894.

Poultry Experiments.

Report of the First Assistant, W. P. Wheeler, of the New York Agricultural Experiment Station.

A breeding experiment with fowls looking especially toward the improvement in egg production has been continued. This experiment which was at first started with pullets of four breeds (White Leghorn, Black Minorca, White Plymouth Rock and Buff Cochins) was found to require so much attention that work was continued with but two breeds—the Buff Cochins and White Leghorns; the one breed being of rather small size, very active, and about the best of layers; the other of large size, very quiet disposition and a moderate layer. It was thought that more pronounced results might be obtained with these than with breeds more intermediate in the several characteristics.

From the hen of each breed that, among six of each tested, gave for two years the largest product of eggs in number and weight, six pullets were bred—also from the hen of each breed giving the poorest egg yield, six pullets were bred. Of these pullets, the one of the best record in one lot and the one of poorest record in the other will be bred again. At the start a male had to be used from a dam whose record was unknown, and no conclusions can therefore be made from the records of the first lot of pullets. The intended sires of the second generation however, have been bred from recorded dams. In order to prevent too great inbreeding toward the end of the experiment, male birds were bred from hens giving next the best and next the poorest record, and these are reserved for breeding; cockerels again being bred in the same way for sires of the next generation.

This experiment has now made all the progress that perhaps could be made, in two years. But any reliable information in regard to the laws of breeding and inheritance can not be obtained without some years of careful record. It is not possible to predict just how many generations must be before certain traits, developed considerably away from the normal, become so fixed that any mating although carefully made may not obscure or destroy them. The certainty, however, with which many breeds established by the fancier can be depended upon to reproduce certain characteristics, gives encouragement to the belief that still further development in some directions may be brought about by selection and fixed by careful breeding.

Whether or not within any reasonable length of time, by breeding from only the very best layers the prolificacy of a strain can be definitely increased—whether or not breeding from the poorest layers, though vigorous and healthy birds, will cause rapid deterioration in the laying qualities of an established breed—whether such a breed as the Leghorn has been developed to the point where it is only a question of proper feeding and careful general management to obtain the highest possible egg yield, or whether the capacity for egg production can be further improved by breeding—whether or not the laying qualities of such a breed as the Cochins can be greatly improved without losing appreciably the size and typical shape—whether or not breeding for several generations from the best and poorest layers will develop easily recognizable types in the two lines, are all questions of great interest to the breeder and poultryman, but can not be answered satisfactorily except by several years of careful experiment. It is hoped that this breeding experiment may help to answer some of these questions.

In growing, this past year, some pullets for use in feeding experiments which are now under way, the cost of hatching and of food for growing was recorded for the purpose of determining approximately the cost of young fowls, as they are usually grown on the farm. As the information obtained as part of an experiment not complete may be of service in itself, the results are here given.

About 130 chicks were hatched by hens in the usual manner. They were Cochins and Leghorns. The Leghorns were

hatched a little later in the season, during milder weather, and the eggs were more strongly fertile, so the cost of the chicks when hatched was considerably less. The eggs were tested first after eight days and the second time on the eighteenth day. One hundred and seventeen Cochin eggs were set, 11.1 per cent proving infertile. After the second testing 65 per cent of the eggs remained; 77.6 per cent of the tested eggs hatched, or 50.4 per cent of all eggs set. Allowing for all accidents and losses in hatching, 46.1 per cent of all eggs set were represented by strong healthy chicks. One hundred and one Leghorn eggs were set, 9.9 per cent proving infertile. After the second testing 83.2 per cent of the eggs remained; 91.7 per cent of the tested eggs hatched, or 70.2 per cent of all eggs set. Allowing for all losses in hatching, 75.2 per cent of all eggs set were represented by strong, healthy chicks.

The hens used were nearly all Cochin or of Game-Cochin cross and were tame and easily handled. They were given water to drink and were taken from the nests and fed once daily all the Indian corn and mixed grain they would eat. The mixed grain consisted of four parts cornmeal, two parts buckwheat middlings, two parts wheat bran and one part each of wheat middlings, ground oats, linseed meal (O. P.) and cottonseed meal. In every twenty pounds of this mixture one ounce of salt was thoroughly mixed. Of the food taken by one lot of hens, 70.8 per cent was whole corn and for the other 73.9 per cent. For hatching the Cochin eggs nine hens were used the first week and eight for the rest of the time. For hatching the Leghorn eggs eight hens were used for three weeks. The hens with the first lot of eggs consumed of total food an average per day per hen of 1.53 ounces, and the average cost of food per hen for the twenty-one days was 2.06 cents. The average cost in food for hens when hatching Cochin chicks was 32 cents for each chick hatched. Rating the eggs at twenty-four cents per dozen, the cost of each chick when hatched was 4.65 cents. The hens with the second lot of eggs consumed on the average 1.12 ounces of food per day per hen, and the average cost of food per hen for the twenty-one days was 1.5 cents. The average cost in food for the hens while hatching Leghorn chicks was .16 cents for each chick. Rating the eggs at twenty-four cents per dozen, the cost of each Leghorn chick when hatched was 2.82 cents.

The average of all made the cost in food for sitting hens 22 cents for every chick hatched. Rating eggs at twenty-four cents per dozen, every strong healthy chick cost when hatched, 3.58 cents. At fifteen cents per dozen for eggs the cost per chick was 2.32 cents.

The young chicks were kept indoors a few days and then put with the hen out-of-doors and allowed to run at will in an apple orchard, the hen being confined in a small coop after the ordinary method. The average time of keeping the hens with the Cochin chicks was six weeks and hens were kept with the Leghorn chicks on the average a little over five weeks. The food for the growing chicks was mixed grain, cracked wheat, skim-milk, dessicated beef and finely cut fresh bone. The first mixed grain fed was composed of two parts corn meal, and one part each of wheat bran, ground oats, wheat middlings, buckwheat middlings and linseed meal (O. P.) Another mixed grain consisted of four parts corn meal, two parts buckwheat middlings, two parts of wheat bran, and one part each of wheat middlings, ground oats, linseed meal (O. P.) and linseed meal (N. P.) To every twenty pounds of the mixture one ounce of salt. A third mixture was the same except that two parts of old process linseed meal were used in place of one each of new and old process. The chicks were entirely healthy at all times and suffered from no disease. The few lost were from accidents.

When the young fowls were put into the poultry houses and the sexes separated, which was for the Cochins at the average age of 109 days and for the Leghorns at the average age of eighty-four days, the Cochins averaged 4.05 pounds in weight and the Leghorns, 1.83 pounds. The total cost of all food consumed up to this time averaged 19.71 cents per chick for the Cochins and 9.77 cents for the

Leghorns. The cost per pound gain in weight made by the Cochins was 4.09 cents and of that by the Leghorns, 5.65 cents. Including the cost of hatching, the average total cost of each Cochin chick at this time was 24.36 cents and of each Leghorn, 12.59 cents or 6.01 cents per pound for the former and 6.88 cents for the latter. The Cochin pullets averaged 3.56 pounds in weight and the cockerels 4.52 pounds. The Leghorn pullets averaged 1.65 pounds and the cockerels 2.06 pounds.

The Cochin cockerels were fed separately for a short period and then caponized and used in another feeding trial. Had they been sold, when separated, at the local market price, twelve cents per pound, they would have more than paid the cost of food up to this time for all in the lot. The cost of feeding the pullets from this time (September 7th,) until November twenty-first, was an average of 20.07 cents per fowl. Deducting the market poultry value of the cockerels at the time separated from the total cost of all the lot would leave the net cost of eggs, hatching and food for the Cochin pullets averaging 5.53 pounds in weight, 13.24 cents apiece.

The Leghorn cockerels were fed for some time after they were separated from the pullets before being sold. The cost of feeding the Leghorn pullets from September 7th to November 21st, was 13.09 cents apiece. Deducting the local market value of the cockerels at the time of removal from the total cost of all birds in the lot would leave the total net cost for the Leghorn pullets averaging 2.81 pounds at 16.78 cents each. The sexes were about equal with the Cochins, but there was an unusual excess in the number of pullets among the Leghorns hatched (thirty-seven per cent more pullets than cockerels), so that the poultry value of the cockerels represented a lesser proportion of the value of food consumed. Had the sexes been equal, at the same proportionate cost for growing, and considering the poultry value of the cockerels, the net cost of Leghorn pullets would have been 13.55 cents apiece, nearly the same as that of the Cochins.

In calculating the cost of the food used, wheat was rated at sixty-five cents per bushel, corn at twenty dollars per ton, corn meal at twenty-two dollars, wheat bran eighteen dollars, buckwheat middlings eighteen dollars, wheat middlings twenty dollars, ground oats twenty-six dollars, linseed meal (O. P.) twenty-eight dollars, linseed meal (N. P.) twenty-six dollars, cottonseed meal thirty dollars, dessicated beef at two cents per pound, fresh bone at one-half cent per pound and skim milk at twenty-four cents per 100 pounds.

In The Show Room.

TO THE AMERICAN FANCIER:

Anyone, by referring to the long lists of coming poultry exhibitions, will see that they are sufficiently numerous in nearly all parts of the country, to enable every person who has an interest in them, to attend with their stock or at least by their own person, and they should give all the encouragement they can for the advancement of thoroughbred poultry.

It has long been understood that poultry shows, properly managed, are one of the leading, if not the most important, branches of the business—in fact it is the very life of it. The wholesome rivalry which, necessarily, exists between lovers of poultry is here put to test and if defeat or success follows, in either case it is a benefit, because it teaches on the one hand, wherein the failure cropped out, and on the other, it drives the successful one to a further advancement through fear of being overreached in the near future. But it is very important that it should be done fairly and with an eye to equal justice, as nothing tends to degrade the business more than unfairness, deception and outright dishonesty in the show room.

By giving mankind credit for ordinary good sense it must be apparent that little tricks will be discovered, and the way to avoid them is not to commit them, and when no cause is apparent for distrust and suspicion, a fractious or quarrelsome exhibitor will have but slight ground to work upon, and will bring upon himself the distrust of all those who act upright-

ly, in case he makes a display of temper and bad blood.

Misrepresentations as to age, ownership or breeding of specimens on exhibition are often found out; bad feathers, trimmed combs, plucked plumage leave traces of such work in most cases and are sure to be discovered. While there is no objection to putting the fowls which are in competition into the best condition it is policy to avoid any semblance to dishonesty by attempting to overdo it—making fowls appear better than nature has made them.

The officers of associations should ever be on the alert and exercise such control over the arrangement of the exhibition, incorrect or changed weights, the doubling up of stock of two or more exhibitors to defeat certain birds they may be afraid of, allowing the entering of specimens to be made after the time for the same has expired without sufficient reason, delay in weighing such stock as must be weighed until they have lost more or less flesh, incident to being cooped up, delay in announcing the result after the score cards have been made, careless returns of birds left to the association to attend to, and so forth, throughout the entire show in all its branches.

As a rule, a large part of the labor of an exhibition is confined to a very few members who have not the time and strength to go into all the attendant details which results in neglect and confusion, and it might be here suggested that if the members of an association have not sufficient time to devote to the duties of the same, they should employ those who can do such work, to act as substitutes to the end that everything may be attended to or done at the proper time and in a proper manner. It is not necessary that the president should act as door-keeper or that the secretary should tack up entry cards and place the coops, as they have work of their own, but all of these places should be filled by men who will attend to them.

Feeding and watering fowls often give dissatisfaction as to the manner and time of doing them, to avoid which they should see that attendants be provided who understand how and are willing to do the work.

It takes a great amount of labor to run through from one end to the other of a large poultry show, which if properly done leaves a good impression and causes the exhibitors to return home with kindly feelings, and altogether it leaves a sense of satisfaction to everybody connected with the association.

JOHN J. LENTON.

Park Farm, Oshawa, Ont., Canada.

Awards at Dallas, Texas, State Show.

The poultry department under the superintendency of Chas. W. Guild, has been the biggest success of any on record of the association. The birds exhibited were all Texas birds and showed that Texas breeders are wide awake and up to date in their line. Beside the number of fowls on exhibition being much larger, the quality showed a decided improvement. And as to the judging, Theo. Hewes of Trenton, Mo., a world's fair judge and a judge of national reputation, was selected by the state poultry association for the fair association. Better judging, it is claimed, was never done in the south or anywhere else.

Following were the premiums awarded:

LIGHT BRAHMAS.—Pair fowls, 1st, C. P. Randolph, Austin, Texas; 2d, Savage Bros., Belton. Pair chicks, 1st, R. A. Davis, Merit; 2d, C. P. Randolph, Pen, 1st, Randolph; 2d, C. C. Sanborn, Gainesville. Male, 1st, Savage Bros.; 2d, Randolph. Female, 1st, J. F. Taylor, Groesbeck; 2d, Randolph.

DARK BRAHMAS.—Pair fowls, 1st, W. O. Vandiver, Belton. Male, 1st, C. L. Lester, Dallas. Female, 1st, 2d, Lester.

BUFF COCHINS.—Pair fowls, 1st, Charles L. Dealy, Dallas; 2d, Taylor. Pair chicks, 1st, Savage Bros.; 2d, R. A. Corbett, Baird. Pen, 1st, 2d, E. E. Branch. Male, 1st, Dealy; 2d, Corbett. Female, 1st, Branch; 2d, Savage Bros.

PARTRIDGE COCHINS.—Pair fowls, 2d, W. A. Hinchliffe, Mexia. Pair chicks, 1st, Savage Bros.; 2d, O. Brashea, Black Jack.

WHITE COCHINS.—Pair fowls, 1st, Savage Bros. Pair chicks, 1st, Brashea; 2d, Mrs. S. E. Jenkins, Black Jack Grove. Pen, 1st, Savage Bros. Male and female, 1st, Savage Bros.; 2d, Brashea.

BLACK LANGSHANS.—Pair fowls, 1st, Savage Bros.; 2d, Service & Thomas, Dallas. Pair chicks, 1st, Savage Bros.; 2d, Corbett. Male,

1st, Savage Bros.; 2d, Corbett. Female, 1st, Savage Bros.; 2d, Mrs. Jenkins.

WHITE LANGSHANS.—Pair fowls, 1st, Savage Bros. Male, 1st, Savage Bros. Female, 1st, Savage Bros.; 2d, Mrs. Jenkins.

PLYMOUTH ROCKS.—Pair fowls, 1st, Geo. S. Hefleybower, Austin. Pair chicks, 1st, Hefleybower; 2d, John W. Stewart, Jr., Sherman. Male, 1st, 2d, Stewart. Female, 1st, Hefleybower; 2d, Stewart. Pen, 1st, Stewart; 2d, Hefleybower.

WHITE P. ROCKS.—Pair fowls, 2d, B. R. Hagan, San Antonio. Male, 1st, Mrs. Wylie, Dallas; 2d, Hagan. Female, 1st, Corbett; 2d, Vandiver. Pen, 1st, Mrs. Wylie.

BUFF P. ROCKS.—Male, 2d, Savage Bros.

SILVER WYANDOTTES.—Pair chicks, 1st, Davis; 2d, J. L. Nothaf, Sherman. Male, 1st, Hagan; 2d, Savage Bros. Female, 1st, Corbett. Pen, 1st, Louis Makemson, San Antonio.

BUFF WYANDOTTES.—Pair chicks, 1st, E. B. Hayes, Dallas; 2d, Hayes.

WHITE WYANDOTTES.—Female, 1st, Davis.

GOLDEN WYANDOTTES.—Pair fowls, 1st, J. J. Ringness, Clifton; 2d, Ringness. Chicks, 2d, Savage Bros. Male and female, 1st, Ringness; 2d, Savage Bros.

S. C. WHITE LEGHORNS.—Pair fowls, 1st, Savage Bros.; 2d, Corbett. Pair chicks, 1st, Savage Bros.; 2d, A. M. Prather, Dallas. Male, 1st, Savage Bros.; 2d, W. W. Farley. Female, 1st, Farley; 2d, Hayes. Pen, 1st, Prather; 2d, Corbett.

R. C. WHITE LEGHORNS.—Male, 1st, Prather. R. C. B. LEGHORNS.—Pair fowls, 1st, Savage Bros. Male and female, 1st, Savage Bros.

S. C. BROWN LEGHORNS.—Pair fowls, 1st, Corbett; 2d, Savage Bros. Pair chicks, 1st, Davis; 2d, Taylor. Male, 1st, Taylor; 2d, W. C. Oliver, Dallas. Female, 1st, 2d, L. A. Stroud, Sherman. Pen, 1st, Corbett; 2d, Davis.

WHITE MINORCAS.—Pair chicks, 1st, Corbett. Male, 1st, Corbett; 2d, Mrs. Wylie. Female, 1st, Mrs. Wylie; 2d, Corbett. Pen, 1st, Corbett; 2d, Mrs. Wylie.

BLACK MINORCAS.—Pair fowls, 1st, Savage Bros. Pair chicks, 1st, Hinchliffe; 2d, Stribling, Dallas. Male, 1st, Branch; 2d, Taylor. Female, 1st, 2d, Branch. Pen, 1st, Taylor; 2d, Hagan.

S. S. HAMBURGS.—Pair fowls, 1st, Corbett. Pair chicks, 1st, W. L. Peacock; 2d, Davis. Male and female, 1st, Peacock; 2d, Peacock. Pen, 1st, Davis; 2d, Corbett.

SILVER POLISH.—Pair fowls, 2d, Hagan. Male, 2d, Hagan.

WHITE CRESTED POLISH.—Pair fowls, 1st, Davis. Female, 1st, Savage Bros.

B. B. R. GAMES.—Pair fowls, 1st, 2d, R. H. Coleman, Plano. Pair chicks, 1st, Coleman; 2d, Savage Bros. Male and female, all to Coleman.

RED PYLE GAMES.—Pair chicks, 2d, Jenkins. Male and female, 2d, Jenkins.

SILVER DUCKWING GAMES.—Male, 1st, Brashear.

PIT GAMES.—Cock, 1st, J. G. McReynolds, Neches; 2d, Coleman. Hen, 1st, McReynolds; 2d, Coleman. Stag, 1st, Vandiver; 2d, Coleman. Pullet, 1st, Coleman; 2d, McReynolds. Pair fowls, 1st, Coleman; 2d, Savage Bros. Display, 1st, McReynolds; 2d, Coleman.

GOLDEN SEBRIGHT BANTAMS.—Pair fowls, 1st, Savage Bros. Pair chicks, 1st, Jenkins.

B. B. REDS.—Pair fowls, 1st, Savage Bros; 2d, Davis. Pair chicks, 1st, Savage Bros.

BUFF PEKIN BANTAMS.—Pair fowls, 1st, Savage Bros.

B. R. C. BANTAMS.—Pair fowls, 1st, Farley.

S. D. GAME BANTAMS.—Pair chicks, 1st, S. B. Ferrell, Granbury.

G. D. GAME BANTAMS.—Pair fowls, 1st, 2d, Savage Bros.

INDIAN GAMES.—Pair fowls, 1st, Savage Bros; 2d, S. P. Kling, Sherman. Pair chicks, 1st, C. S. Doubleday, Hico; 2d, Savage Bros. Male, 1st, Savage Bros; 2d, Brashear. Female, 1st, Savage Bros; 2d, Doubleday.

RED CAPS.—Pair fowls, 1st, Jenkins. Pair chicks, 1st, Brashear; 2d, Jenkins. Female, 1st, Jenkins; 2d, Brashear.

HOUDANS.—Male, female and pen, 1st, Brashear, Dallas.

TURKEYS.—Bronze, 1st, C. Thomas. White Holland, 1st, J. McCabe. White Guineas, 1st, Savage Bros; 2d, Sanborn.

DUCKS.—Pekin, 1st, Donnell; 2d, Savage Bros.

RABBITS.—Angora, 1st, 2d, Gersert. Lop-eared, 1st, 2d, Gersert.

PIGEONS.—Black Fantails, 1st, Farley; 2d, Savage Bros. White Fantails, 1st, 2d, Farley. Pouters, 1st, 2d, Farley. Carriers, 1st, Savage Bros; 2d, Farley. Best display standard bred, 1st, Farley; 2d, Savage Bros.

Largest and best display of poultry by Texas exhibitors, 1st, Savage Bros; 2d, Corbett.

Macon's Big Show.

[Special to THE AMERICAN FANCIER.]

Macon, Ga., was the scene of the largest poultry and pigeon show ever held in the far south, nearly 4,000 birds being entered. Splendid building, birds well cooped and fed. Large attendance. D. M. Owen judged poultry. T. Farrar Rackham superintended. Following is a list of different classes represented: Asiatic, 348; American, 360; Mediterranean, 300; Hamburgs, 100; French, 30; Bantams, 300; Polish, 80; Dorkings, 40; Games, 320; Andalusians, 20; Ducks, 100; Turkeys, 70; Geese, 50; Cage Birds, 200; Pigeons, 1,000. Indian Games and Buff Cochins best classes ever shown in the south. Will send awards soon as they can be obtained from secretary. T. Macon, Ga., Nov. 7, 1894.

SOLD FIFTY-PLYMOUTH ROCKS.

I enclose copy for advertisement in next week's paper. The last "ad." I had in THE AMERICAN FANCIER was for one time and sold the fifty Barred Plymouth Rock hens in *just ten days*, and I had orders for more that I could not fill. Your paper is a *dandy* and no mistake. C. M. BATTIE.

Cambridge, N. Y., Nov. 7, 1894.

Random Notes.

BY BLACK WYANDOTTE.

[Written for THE AMERICAN FANCIER.]

It would seem that the poultry associations of a state could easily manage to avoid clashing of dates, yet a reference to the very full list of shows which weekly appears on the second page of THE AMERICAN FANCIER will reveal the fact of endless and seemingly unnecessary clashing. Take for instance our own state of Ohio and we find the Cleveland show in December clashes with the Canton show and Findlay clashes with Dayton. In January the Tiffin show clashes with Cincinnati while the dates of the latter clash with the Ohio state show at Columbus. This is very inconvenient to the exhibitor who wishes to make the circuit as there are few exhibitors who have enough show birds to divide up and show at two shows at once.

Both sweet and sour milk have long been a favorite ration with me for both young and old fowls and I cannot remember ever seeing any ill effects from its use. An Australian writer, however, considers the value of sour milk a good deal a matter of climate. This view is new to me and perhaps may be so to many readers of the FANCIER. Personally I consider the poultryman who has a supply of refuse milk for his flock, very lucky. The Australian writer gives his views as follows:

"I notice that most of the poultry journals advocate the use of plenty of milk, both sour and sweet, for the poultry. I do not agree with them at all. Doubtless milk is excellent when sweet and in the colder parts of the country the freshly turned sour milk is good for them. But in the warmer districts I have found that sour milk is anything but beneficial, particularly for young chickens. It may be that the heat causes some chemical change to take place quicker in the hotter parts, but I know sour milk frequently causes diarrhoea, and where much is given the hens lose color and get a yellowish or bilious hue, while the eggs become watery. A little thick milk once a week or so may do good; but where it is at all warm it should be given out soon after it has turned. Sweet milk is excellent and chickens can never get too much of it, while mixed with oatmeal, pollard, etc., nothing is better for rearing young chicks."

The Andalusian is almost identical with the Minorca except in the required slaty blue color. It is well known however, that this blue plumage is hard to obtain in anything like uniformity. In fact there is foundation for the assertion that culls from Andalusian yards were sold in this country for White Minorcas during the "boom" of that breed some years ago. The Andalusian quite often throws pure white and solid black chicks while the cocks and hens are much apart in shade of plumage. There is little difference in actual characteristics between the Andalusian, Minorca and Spanish. The difference lies almost wholly in color of plumage and face. There is little choice when it comes to practical value as all are excellent egg producers and very indifferent table fowls. The Andalusian has never gained much attention probably on account of its well known disposition to throw a big percentage of unmarketable (from a fancier's view) birds.

A conference of Methodist ministers has just departed from our village leaving desolate hen roosts in its wake. The remaining few disconsolate fowls left in the coops of entertaining brethren were only spared because they lacked the requisite yellow legs. This invitation reminds us of the following (not new) joke from the pen of a reporter:

"At the close of the annual session of a western conference, a few years ago, a correspondent of the Cincinnati Times wrote to that paper saying that the preachers had gone home, and the chickens had come forth from their hiding places. He observed that these timid creatures were evidently slow to believe that it was safe for them to venture out in daylight. But one pullet, no longer hearing singing and praying in the

church and neighboring houses, made bold to go out on a reconnoitering expedition. Carefully and silently she picked her way down a back alley until she met a bird of her species on the same errand. They stopped, and stood on one foot, and turned their heads from side to side, eyeing each other with astonishment, and then began to sing:

"And are we yet alive,
And see each other's face!"

Rhode Island Poultry Association.

TO THE AMERICAN FANCIER:

The premium list of the Rhode Island Poultry Association of which Herman S. Babcock is president and Samuel Cushman is secretary, has been received. The society's next show is to be held in Music Hall, Providence, December 11th to 14th. This publication is one of the best that has been issued by a poultry society. It is attractively arranged and illustrated with half tone cuts used in the poultry publications of the Rhode Island Experiment Station. The premiums for each variety are printed in full and everything is made as plain to understand as possible. One thousand seven hundred and seventy dollars is offered in regular society premiums. The entrance fee on single birds is 50 cents, and except for collections the premiums are alike on all varieties. Collection premiums are very liberal, there are a number of new classes and premiums are offered on fowls regardless of purity of the breed as follows: On first crosses for general purposes, on first crosses for laying, for capons pure bred and those not of a pure breed. Wild cross turkeys and turkeys that are not of a pure breed, and the largest gander and goose whether they are of a pure breed or not also receive premiums. On dressed poultry, \$60 is offered in regular premiums as well as a number of valuable special premiums. This feature will probably be of even more interest than last year. The entrance fee on incubators hatching chickens is \$5, with first prize \$17, second prize \$8, and a special of \$50 also offered in this class. Entrance fee on brooders in operation is \$3, and prizes are \$10 and \$5. Several specials are offered for exhibits of eggs. Entrance fee on brooders in operation is \$3, and prizes are \$10 and \$5. Several specials are offered for exhibits of eggs. Entrance fee for fowls entered for sale or exhibition only is 25 cents each bird, and they may be sold and delivered by permission of the secretary during the show.

On pigeons, premiums are offered only on collections. The list of special premiums offered by the friends of the society is a very large one. The Rhode Island State Fair Association offers a \$200 oil painting, Hon. Rowland Hazard of Peacedale, offers \$25 on Plymouth Rocks, Gov. Brown offers \$10 on Light Brahmas, the Providence Journal Company offers \$10 on Light Brahmas, and the Providence News offers \$5 for the best White Wyandotte cockerel, E. L. Freeman & Son offer \$5 for the largest Rhode Island turkey in the show, Cumstock & Co. offer \$5 on exhibit of Pheasants, Geo. R. Vial & Co. offer \$5 on dressed poultry, subscriptions to farm and poultry papers and useful articles almost without number are offered by business firms and dealers in poultry supplies. The advertisements in this list are of value as a directory of dealers in poultry supplies. The total amount of the special premiums is about \$475. The society holds a poultry institute with the state board of agriculture in Blackstone Hall on two days, 12th and 13th, of the show, and there is to be a banquet for all interested, on Thursday evening. There will also be excursion rates on the railroads for the two most important days of the show. It is expected that if the weather is good, this will be one of the most largely attended shows ever held in this state, if not in the east.

SAMUEL CUSHMAN,

Secretary.

Kingston, R. I.

Entries for the Troy Show.

Secretary John H. Duke is very enthusiastic. He says: "The Troy show struck a boom this week. We will have a larger entry than I expected. Whoop it up in this week's FANCIER."

Practical Pointers.

BY GEORGE E. HOWELL.

[Address all Communications for this department "Practical Department," AMERICAN FANCIER, Johnstown, N. Y.]

The number of eggs used in New York city and Brooklyn is something appalling. If the report in a recent Sunday edition of a New York daily is authentic, the hens of this great and growing country of ours have a large task to perform each year, just to keep these two cities supplied. As these figures go from Jan. 1st to Oct. 1st, the receipts amounted to 35,090 barrels and 1,865,411 cases. Some of these are exported, but it is safe to assume the majority are consumed in the metropolis and vicinity. For convenience, the receipts for the year, 1894, may be safely placed at 2,400,000 cases and 45,000 barrels. A case holds 30 to 35 dozen and a barrel 70 to 75 dozen. Averaging these figures the total number would be, in round numbers, 80,400,000 of dozens. This would mean 964,800,000 individual eggs, or a little short of a billion. If laid in a line they would reach, allowing 6 to the foot, 30,000 miles, or twice across the continent of North America, the latitude of New York. This seems like a big story and one would almost imagine the average New Yorker was particularly fond of egg flip and other concoctions of a hilarious nature in which eggs figure, but as a matter of fact it only allows 6 eggs a week to each individual.

At a cost of only 14 cents per dozen it would need \$11,256,000 to pay these cities' egg bill at wholesale. The consumer pays an advance of one-third over this estimate. This illustrates an oft repeated remark of mine, that the extra profit for strictly fresh eggs will pay the feed bill of the entire flock. In this case the four cents per dozen advance between wholesale and retail prices is \$3,216,000. I have not reproduced these figures as an awe inspirer, but to emphasize this last point. An advance of 4 cents on 30 dozens of eggs is \$1.20 in the pocket of the shipper. A very insignificant item when standing alone, but the advance of even one cent on the supply of New York city and vicinity means \$804,000 or four-fifths of a million a year.

Some fanciers are born, others are manufactured and others drift into the poultry business as a matter of pleasure and pastime. The list is constantly growing. In the sections where, a few years since, there were either none at all or scattering, fanciers you find today, the greatest amount of enthusiasm and interest taken in poultry shows.

A poultry show is a great harmonizer. Factions and factional jealousy never made a show a success yet, and never will, any more than one type of a breed for the north, another for the west, a third for the east and a fourth for the south will improve the breed in question. Types should be similar in so much as is not affected by climate, influence, that no society or set of rules can govern.

Different breeds flourish better in different localities, we are told. If this be so, it naturally follows that in selecting our favorite breed we bear this in mind. How shall we find out which breed is the one we want? Why, get the candid opinion of your neighbors, or if unwilling to do this, then in the original language of the irrepressible wheel of fortune fakir, step up, gentlemen, and try your luck.

In buying stock to start with, future successes depend not a little on that important proceeding, because the seller sometimes tells us he has, and shows the most typical specimens of the breed. When in looking up the report of the show he graced by his presence, you find some other fellow has gone him one better, possibly two and he has received nothing or a second at best. This has happened recently, to my knowledge, and the exhibitor goes as far as to presume to dictate to the society how the show should be run, and how the birds be judged on an exhibit of a dozen birds. To what length he would have gone had he shown a couple of dozen, it is hard to tell; perhaps, wanted to revise the constitution and by-laws. This is no reflection on such well disposed ex-

hibitors, but simply illustrates a case of big head and that one sometimes pays considerably more for pedigree than for the bird itself.

* * *

TO THE AMERICAN FANCIER:

I intend to buy a lot of pullets with the intention of forcing them for eggs this winter and then disposing of them in the spring. I wish to find out what food or foods you regard as the best for this purpose. Please answer through the columns of your paper and greatly oblige,

ALBERT R. MANNING.

Cleveland, O., Nov. 9, 1894.

It will be necessary for you to supply your poultry with a variety of food, and feed heavily, such as wheat-middlings, (shorts,) bran, cornmeal, ground barley, oats, etc. In connection with these, feed whole grain. This is but one of the many requisites. A supply of fresh cut bone and meat will be necessary, also warm roomy quarters, plenty of sunlight and exercise, boiled vegetables thickened with ground feed, grit, etc., and above all never ending attention. It takes all these to get eggs in the winter; anyone can make hens lay in the summer.

Tiffin's (Ohio) Big Show.

TO THE AMERICAN FANCIER:

The Ohio State Langshan Club will hold its first annual exhibition in connection with the North-Western Ohio Poultry and Pet Stock Company (Incorporated), to be held at Tiffin, Ohio, January 9, 10, 11, 12. This club and our liberal cash and large cash special premiums assure us the largest poultry show ever held in the State of Ohio. B. N. Pierce, of Indianapolis, and Sharp Butterfield, of Windsor, Canada, are engaged to do the judging. Last year our show was the only one in the State that made money and paid its premiums promptly. We also had the largest attendance. Last year we had more birds than any other two shows in the State, and we will have them again. Our entry fee is twenty-five cents for single birds and \$1.00 for exhibition pens. Premiums for single birds are: 1st, \$1.00; 2nd, 50c.; 3rd, 25c. Exhibition pens: 1st, \$2.00; 2nd, \$1.00. We also give the following cash specials, for which we charge no extra entry fee: For largest display, each bird scoring 90 points or over, \$20.00; 2nd ditto, \$10.00; 3rd ditto, \$5.00. For best 10 Barred P. Rocks, \$5.00; ditto White P. Rocks, \$5.00; ditto Silver Wyandottes, \$5.00; ditto Golden Wyandottes, \$5.00; ditto White Wyandottes, \$5.00; ditto Light Brahmas, \$5.00; ditto Dark Brahmas, \$5.00; ditto Partridge Cochins, \$5.00; ditto Buff Cochins, \$5.00; ditto Black Cochins, \$5.00; ditto White Cochins, \$5.00; ditto Black Langshans, \$5.00; ditto White Langshans, \$5.00; ditto Black Minorcas, \$5.00; ditto White Minorcas, \$5.00; ditto Brown Leghorns, \$5.00; ditto White Leghorns, \$5.00; ditto Buff Leghorns, \$5.00; ditto Indian Games, \$5.00. For the highest scoring exhibition pen (not Bantams), \$5.00; for the highest scoring exhibition pen of Bantams, \$5.00; for the highest scoring cock or cockerel (not Bantam), \$2.50; for the highest scoring hen or pullet (not Bantam), \$2.50; for the highest scoring Bantam, \$2.50. Premium lists are now ready for distribution. Be sure and send for one.

On behalf of the North-Western Ohio Poultry and Pet Stock Company,

THOS. S. FALKNER, Sec'y.

Tiffin, Ohio.

American Langshan Club.

TO THE AMERICAN FANCIER:

The American Langshan Club will meet with the Mid-Continental show at Kansas City, December 21, 1894, at 1 P. M. Poultry papers are requested to copy this matter.

WM. H. HAMILTON, Sec'y.

Danielsonville, Conn., Nov. 11, 1894.

* * *

BESIEGED.

I am besieged with letters. I sold fifty pullets two days after my advertisement appeared, and all cockerels the first week. THE AMERICAN FANCIER sells farm raised poultry.

B. M. LINDSEY, Prop'r of Cliff Farm, Monticello, N. Y.

Some Comments and Comparisons.

TO THE AMERICAN FANCIER:

Appended to my letter which appears in your issue of November 3rd respecting my report of Orange County show is a reply from your coadjutor, George E. Howell. But for the fact that he draws in an assertion as a quotation from what he says is a confidential letter he has received on the subject, containing a statement that part of the rubbish exhibited at Newburgh was owned by me, I should have taken no further notice of the subject. The birds I owned at Newburgh show were two pair of Buff Cochins, one breeding pen Brown Red Bantams, and a pair of Pit Game chicks.

If this "confidential correspondent" of Mr. Howell's asserts that either of those birds were *trash*, until he has the manliness to let his identity be known I take the liberty of saying he is not only a liar but a coward. I am aware those words are somewhat unparliamentary and not of a class I usually indulge in when intended to be printed. Either of the exhibits owned by me at Newburgh show are typical specimens of their kind, and I do not consider any language too strong applied to an individual who would send either an "anonymous" or "confidential" letter with a view to injure the reputation either of a specimen or an exhibitor.

In my capacity of pigeon editor of the *Live Stock Monthly* I receive quite a few of those "confidential" communications intended to give some poor devil a poke in the ribs without disclosing the identity of the "poker." They find a fitting receptacle in the waste paper basket, and I venture to think Mr. Howell would have shown wisdom had he treated the letter as requested confidentially instead of publishing any part of it.

Referring to the question of the Pit Game classes, I send herewith a letter received from one of the exhibitors, who has not written to me in confidence, which I shall be glad for you to publish. What object Mr. Howell had in cutting out the names of the winners in those classes can best be answered by himself. I confess I am too ignorant to see the point.

I should not have troubled you with this letter but for the unfounded assertions contained in the extract from what Mr. Howell says was a confidential letter respecting birds I owned and exhibited at Newburgh. I will not again trespass upon your valuable space on this subject.

JOHN GLASGOW.

Mahwah, N. J.

The letter Mr. Glasgow received is as follows:

DEAR SIR:—I saw your article in THE AMERICAN FANCIER, and I think you are right. George E. Howell said some of the exhibitors took advantage of the liberality of the society, and said it was done in the Game class. I was an exhibitor and also winner of 2 firsts and 1 second. I entered my birds as Pit Games, having sent four different strains. You speak of Irish Greys taking first. I entered them as Irish Grey Pit Games. It matters not what name you call them, they are Pit Games. I think you did right in telling the judge to judge them as Pits.

Yours respectfully,

D. C. PAULDING.

East View, N. Y., Nov. 6, 1894.

[By referring to Mr. Orr's letter in our last issue it will be readily understood why Mr. Howell criticised the Pit Game awards.—ED. A. F.]

Mr. Glasgow says he had no trash on exhibition. All right. I judged his birds without seeing them, and offer him an apology for my poor judgment.

Now, then, Mr. Glasgow has apparently replied to my first article without reading it. Will he do me the same honor? Let us see.

Mr. Orr, in last week's AMERICAN FANCIER, explained that the error was his, although unintentional on his part, and not ours. This ought to appease the anger of any reasonable human being. Further, Mr. Orr told where correct reports could be had, and wound up by paying a high compliment to Mr. Glasgow.

Since his coming to America and identifying himself with the fancy here, THE AMERICAN FANCIER and all connected therewith have shown Mr. Glasgow every courtesy, perhaps more than any other paper, and as much as would those of his native land. It seems silly that our readers should be burdened with a local issue of this kind, in which so few are interested.

GEORGE E. HOWELL.

Table Fowls.

TO THE AMERICAN FANCIER:

At the Dairy show in England the display of table poultry is always large, but that for 1894 broke the record of all previous displays. The classes, entries, and exhibits were as follows:

Pure bred Dorking cockerels, 29 entries, 20 exhibits.

Couple of Dorking pullets, 20 entries, 16 exhibits.

Any Other Variety, cockerels, 27 entries, 22 exhibits.

Any Other Variety, couple of pullets, 24 entries, 19 exhibits.

Cross-bred cockerels, 43 entries, 36 exhibits.

Cross-bred, couple of pullets, 47 entries, 41 exhibits.

Couple of drakes or ducks, 43 entries, 40 exhibits.

Gander or goose, 33 entries, 30 exhibits.

This gives a total of 266 entries, 227 exhibits, and 343 specimens.

The Rhode Island Poultry show would gladly beat this admirable record, and it would delight the secretary's heart if it did.

In the Any Other Variety cockerel class the first and second prizes went to Indian Games, and the *Fanciers' Gazette* says of this award: "Certainly the finest birds in the pure-bred classes, showing the very perfection of the fatterer's art. These birds were enormously long in body, carrying a large amount of flesh, the skin was delicate, and they were finished off in a splendid manner. This pair was worth going 100 miles to see." All of which only proves what Indian Game breeders all along have claimed, that their fowl is the table fowl of the world. The third prize in this class went to a Langshan; the fourth, reserve and v. h. c. also to Indian Games, with h. c. cards for Indian Game, Silver Wyandotte, Langshan and Malay fowls.

In the pullets of the Any Other Variety class, what must have been a surprise to many bold Britons occurred, the first prize going to "a beautiful pair of Plymouth Rocks, very well fattened, long in body, the flesh and skin very white, remarkably so, in fact, for this breed; this was as pretty a pair as we saw in the show." So says the *Fanciers' Gazette*, and this is certainly quite an indorsement for the truly American breed, the Plymouth Rock. The second prize in this class went to Indian Games, the third to Plymouth Rocks, the fourth to Silver Wyandottes, reserve and v. h. c. to Indian Games, and h. c. to Malays. From such a distribution of prizes among several breeds it would seem that American fowls are looking up in England as table birds.

In cross-bred cockerels there was more than the usual mixing up of breeds, and the prizes went as follows: First to Houdan-Plymouth Rock; 2nd, Brahma-Silver Grey Dorking; 3rd, Houdan-Indian Game; 4th, Indian Game-Dorking; reserve and v. h. c., Sussex cross; v. h. c., Brahma-Dorking, Indian Game-Dorking; h. c., Barndoor-Brahma, Brahma-Dorking, Plymouth Rock-Malay.

In cross-bred pullets the awards were placed as follows: First, Houdan-Indian Game, a cross which is strongly recommended by French connoisseurs; 2nd, Indian Game-Dorking, as were also 3rd, 4th, reserve, and v. h. c.; h. c., Brahma-Dorking-Malay, Indian Game and cross-bred, Game-Dorking, Brahma-Dorking.

In ducks the prizes all went to Aylesburys, and in geese to cross-breds and Embdens, with the exception of two v. h. c. cards to some Irish geese, whatever they may be. The first prize went to a cross-bred goose, evidently largely of Embden blood.

Such an exhibit as this certainly must have been both instructive and interesting, and a feature that deserves more attention in this country than it receives.

In most of our poultry exhibitions the dressed poultry department is either altogether omitted or becomes an insignificant one in size. The Rhode Island Poultry Association is the only society, I believe, in this country where this feature has risen to one of interest and importance. This society offers a liberal amount in cash as premiums in this department, and it gets a fine exhibit. Whether that is telling a secret or not, it seems to me other societies might profit by the hint. We fanciers never ought to lose sight of the practical in our exhibitions or our breeding, for the practical is, after all has been said, the broad foundation upon which the fancy rests as a graceful superstructure.

H. S. BABCOCK.

In and In-Breeding.

In the Game cock, not bred for mere show purposes, but for the pit, the qualities mainly sought to be perpetuated have been uncommon vigor, fast, true striking with the heels, and such indomitable gameness, that no amount of punishment in fair battle would make the birds turn from their adversaries. Now, very close breeding, the stock being good to begin with, has been found quite compatible with the preservation of these qualities, and when good selections have been made, there has been an improvement in the most essential qualities as well. Of course, in-breeding will not make slow, clumsy fighters good, nor will it enable anyone to breed game fowls from a strain which would run away when sorely punished or much distressed in wind. On the other hand, a wide cross is always dangerous. Even when both the elements of such a cross have been well known to be good, it has often happened that the chickens so bred have not been as good as either of the strains from which they sprung. Then, again, when a breeder often resorts to crossing, it is probable that some cross will be tried not so good on one side as the other, and then deterioration is nearly sure to follow. Even when the cocks of the first cross turn out to be splendid fighters, as those of the Walton Derby cock, and Mr. Reed's Long Island hens did, it is often found that they do not breed such good fighters as they are themselves, except when bred back to the sisters, or other close relations of their own mother. Men use a cross in the first place for some vague reason they know not what, but principally because people who know nothing about it tell them that in-breeding is a bad thing; and then, having indulged the popular prejudice against it to a certain extent, they get back to their old, well tried strain again as quickly as possible. We have known some to maintain that a cross is a good thing in itself. And so it is, as Prof. Miles substantially remarks, when the stock crossed upon is itself very bad. Almost any cross then works an apparent improvement, for the cock selected to make the cross is almost always a good fighter, and of superior breed, and the hens having little potency, the chickens take most after the cock. When mains of cocks were fought in England for large sums of money the great breeders bred very close in. The Earl of Derby, the Earl of Sefton, the Earl of Mexborough, Mr. Leigh of Lyme, Mr. Bold Houghton, the Featherstonchaughs, Doctor Bellysee, General Yates, Colonel Mordaunt, Mr. White and other eminent men made it a rule to be very wary of crosses. A friend of ours has suggested that in-bred fowls then prevailed in fights, because all the game fowls in England were at that time in-bred. This is a mistake, for crossing was practiced, and many first-rate cocks and hens were brought over to England from Ireland for the purpose of crossing tentatively. But it was found that, upon the whole, it did no good, but sometimes did harm. We have the means of knowing that at least four of the strains then so jealously guarded and kept pure have been in-bred to this day. These are the old Derby strain, the Featherstonchaughs, the Bold Houghtons and those fought by Old Gilliver for Mr. Leigh of Lyme, and Lord Mexborough. The Derby cocks are best represented in this country by the Clairborne's, and after being bred in-and-in here for half a century and perhaps

more, they are larger and stronger to day than they were when first imported fine, fast fighters and game as flint. The Bold Houghtons have been in-bred in England for nearly a century, with the same results. They are only represented here on one side, the two hens sent from Cheshire with the cock to a friend of ours having unfortunately died. The same thing happened with the hens sent with the cock sold to another friend of ours by Old Gilliver's son the year before last. Gilliver said they were the same breed that his father fought forty years ago in a main, 1,000 sovereigns a battle and 5,000 sovereigns the main. That cock was purchased out of the coops in which some thirty were being fed for the pit, and the hens were taken off Gilliver's own yard. We are also assured by a gentleman whom we have good reason to believe that he has fowls of Lord Sefton's strain, bred in-and-in ever since he used to fight against Lord Derby. Now, it is true that the produce of these fowls, bred in this country, are larger than they were in England, and some insist that this results from there having been crosses introduced here. This is a great mistake. The Clairbornes, originally Derbys, have been in-bred here for half a century, and they had no doubt been in-bred at and about Knowsley for as long a period before that. The increase of size is due to selection solely. When mains of cocks were fought by the gentlemen of England at the race meetings, the highest weight in the mains within the articles was 4lbs, 8oz. The heavier cocks could only fight in by-battles. Therefore the breeders purposely bred for medium-sized, compact cocks. This was just the style of Walton Derby, the last cock sent here direct from Knowsley, and bred by the father of the present Earl of Derby. It is also the exact style of the cock purchased of young Jim Gilliver the year before last. The Bold Houghton cock was also of that type. The gentleman who sent him from Cheshire says that the favorite fowls of the old Earl of Derby, after whom the great race is named, grandfather to the present Earl, and those of Mr. Bold Houghton were the same breed. The following is an extract from his letter: "My friend, Mr. —, told me you wanted them to go to America, otherwise we would not have let the breed go on any consideration. They are a pure strain from the Bold Houghton and Early Derbys, and in all our mains have never been beat yet. I have about forty more, and should be glad to have a fly with any gentleman for £100 a side, and 75s each battle, to show twenty-one birds each, 4lbs, 4oz, to 6lbs, 4oz, allowing 2oz. each way." The writer is a gentleman of old family and great estate in Cheshire. Other strains long in-bred in England and Ireland have been brought here, and sustained their reputation as long as the owners had care and resolution to breed in-and-in. Such was the strain brought over with imp. Priam, which we have heard were of the old strain bred for so many years near Newmarket by young Sam Clifney. Such was the Radford strain from Ireland. These were obtained by a servant from her brother in the Emerald Isle for her employer here, and we never saw better cocks. She was asked by Mr. Radford how long they had been in-bred, and her reply was "All our lives; my father and brother never crossed them." Those brought out with Priam were called the Stonefence cocks for the reason that the English hen had her nest near a stone fence. If you should ask those who knew them best when did the Stonefences and the Radfords begin to decline in fighting qualities, they would reply, "When those who had them began to cross the blood." Cock fighting is now out of fashion, but the game cock is as strong an instance against the theories of those who argue that in-breeding is a bad method of breeding in itself, and that out crossing is a good method in itself, as any that can be cited. The contention of those who oppose in-breeding is that it impairs the constitution, and renders the subjects of it weak, diseased, and infertile. It has been found, however, that cocks in-bred for many years retain their strength of constitution and perfect gameness. Prof. Miles establishes the fact that in-breeding is the only method by which the best varieties

can be preserved and improved.—*New York Sportsman.*

Poultry Points.

There is no season of the year so prolific of disease in the poultry yards as in the months of October and November. Truly says the *American Cultivator*. The cold winds and rains, coming before the fowls have all renewed their feathers after moulting, are particularly dangerous to them, because more severely felt than when in full feather. Then, too, if there are broken windows in the house or cracks open in the side the owner has not yet thought it necessary to mend them or to close the ventilators, and the rain often comes in, as well as the wind, and the floor of the house is damp, if not actually muddy, which is unwholesome at the best, and doubly so if there is an accumulation under the roosts or around the feed boxes.

In all of these cases the method of preventing disease is obvious. To protect the house against draughts of wind, especially opposite the roofs, and to keep water from coming into it, is as easy now as it will be in December. In fact, it is easier, as we have known those who waited until December to fail to find a time not taken up by other duties when it was warm enough to set glass in the window, or when they could easily get material for banking up the building. It is easy now to make gutters that will keep the yards dry in the fall rains and the winter thaws, and to do all else that is needed to fully prepare for winter.

But beside these measures of precaution something more may be done to keep disease from the flock. After a cold night or a storm give a warm mash in the morning early, with a little cayenne pepper or ginger in it to warm them up and stimulate them. One objection to a regular warm feed in the morning during the summer is that it thus loses the effect it should have when more needed at this season, and thus we prefer the smaller grains as a morning food until the cold storms begin.

Waste vegetables are very good, whether cooked or simply cut up so that they can pick at them, which some think the better way. Turnips, potatoes and beets not good enough for market can now be obtained cheap enough from the gardeners to be used as feed for the poultry. It is not a good plan to give pepper in the food every day. Save it for such times as they need an extra warming up or stimulating.

Those who desire to stock their poultry yards with thoroughbred fowl at as small a cost as possible, may often do so in the late fall by taking a little time and trouble to find breeders who have old fowl of which they wish to dispose to make more room for the growth of this year, or chickens which, although thoroughbred, are not quite up to the highest standard for marking. The breeders of high reputation for breeding fancy stock usually prefer to kill and dress such fowl instead of selling them alive, but less experienced breeders and those who have not yet attained to the honor of showing prize-winners are not so particular and will eagerly seize on the chance to get a little more than they would bring if killed and dressed.

One may get some good birds in this way, and some that may, if properly mated, produce a proportion of chickens better than themselves, but of course it must not be expected to obtain those or to grow chickens that will be quite equal to those obtained by the fanciers, who pay \$75, \$25 or even \$10 per trio for high-scoring birds.

But even if one has not prize-winners, there is a certain fascination about a flock all of one breed and reasonably true to markings in form and feather which there is not to a mixed lot of all sorts and colors, and by selection one may obtain some chickens another year better than the flock he starts with, especially if he is careful to get a good male bird to mate with the best he has.

Some breeders who began in this way have succeeded better than those who began by buying high-priced birds. The care they took in selecting birds for mating gave them more insight into the business than those who purchased fowls

already mated, and who did not know how to select their birds another year. In poultry-breeding, as in many other things, the overcoming of one obstacle is the best preparation for meeting the next.

"I do not keep any account with my hens, and it may be that what eggs I get cost me more than they would if I bought them at the store," says an amateur, "but I have all I want when the hens lay well, and can go without them for a while when they do not lay, and never ask the price of them, so that they taste as well at one season as another. And my wife never has to 'try' them when she breaks them before cooking, and if I want a boiled egg for breakfast, it never drives me away from the table by its odor." There is a comfort in keeping poultry in that way, if there is not a profit.

"Get into Gear."

TO THE AMERICAN FANCIER:

Obedying the above command means that you will not be left when the gates close, referring, of course, to the projected Troy show. To say that the latter is going to be a howling success is justified by the interest shown by the breeders and fanciers of thoroughbred poultry and pet stock. Just think, nine silver cups, to say nothing of twenty cash prizes of \$5 each. These, taken with the cash prizes offered by the association, are certainly going to make the Troy show the "Palace show of America." Every breeder of rabbits and pet stock should not miss this chance to exhibit in a community well known for its appreciation of thoroughbred stock, so "get into gear" and when the train starts be on it. Our hall is a large one, in the heart of the city, and is equipped with steam heat and electric light. Spratts Patent do the cooping and feeding, while a corps of experienced superintendents will see to the comforts of their respective departments. In view of these facts, which are embodied in the premium lists, entries are coming along quite gaily; they are "getting into gear."

One word especially to pigeon and pet stock fanciers. Mr. J. C. Long, Jr., of New York, an expert on these specialties, has been engaged to judge, and his coming will be welcomed by all, for seldom is a judge engaged for these departments alone. I have been appointed superintendent of the pet stock division, and shall give it my personal attention, while not competing for any of the association's prizes. Exhibitors showing stock and being unable to be present can rest contented that their exhibits shall be properly and carefully attended to while in our care, and if any exhibits are for sale I shall act as agent for the exhibitor, and at no expense to him whatever other than necessary charges for stamps, etc. So "get into gear."

W. N. RICHARDSON,
Sec'y of American Belgian Hare Club.
Troy, N. Y., Nov. 10, 1894.

Breeding Pens.

TO THE AMERICAN FANCIER:

There are innumerable matters of importance to the poultry fraternity which can be best ventilated by the expressed idea and experience of others.

It is amusing on visiting a show room to notice the quality of the exhibits claiming to be shown under the above caption. If they were to be used for the purpose which their names designate their happy owner would surely be surprised at the quality of their progeny. An exhibitor may show a pen of fowls or chicks, composed of a high scoring male bird and four high scoring females. Such a pen is valuable as an *exhibition pen*, but there are two points worth noticing. These are: First, that prize winners indiscriminately mated together irrespective of 'balance' do not produce winners; second, birds properly mated to produce winners need not be prize winners. Of course there are exceptions where these rules are off.

If birds exhibited as breeding pens were intelligently mated for breeding purposes they would prove object lessons of great value to the beginner, and if poultry associations would offer prizes on

pens mated on these lines with explanatory notes by the exhibitor and the judge who carries out the wishes of the association in awarding the prizes for this object, will receive the thanks and support of young and comparatively uneducated fanciers who are seeking information. In no other way can it be so well and so easily given. If the time ever comes when poultry associations will give premiums on *breeding pens* mated for breeding purposes alone, then the fancy will increase and there will be less failures and less discouraged breeders and the fanciers at large will be greatly benefited.

JUDGE L. P. HARRIS.
Lincoln, Neb.

PIGEONS.

Standard Announcement.

For the benefit of our pigeon readers, we have made arrangements whereby we can furnish the Pigeon Standard at 50 cents a copy.

Editorial Squibs.

Look out for the Peoria, Illinois, show. It will be a corker.

The west is full of pigeon cranks, a fact some of our eastern fanciers seem to forget. That little (?) Peoria show will open the eyes of the boys who move in a small circle.

Then what's the matter with Cincinnati? She's all right. We are afraid our friends in Boston forget that "Cincy" and Peoria are on the map, to judge by the letters we have received. Boston and New York are fine places to show pigeons but they are not the only cities in the United States by a jugful where birds can be exhibited.

Geo. W. Eckert of Allentown, Pa., who bought all of Tanner's famous Magpies, has just completed a model pigeon loft, 39 feet long and 25 feet wide. It is heated by hot water and Mr. Eckert expects to breed his birds all winter.

R. Grimshaw, the well-known fancier of Tipplers, returned to his home in Philadelphia, after a three months' sojourn in England. He writes: "I called on most all the principal Tippler fanciers while on the other side. I had the pleasure of meeting Mr. Minoprio of Liverpool, whose article on Tipplers appeared in your most excellent paper a few months ago. The show Tippler is taking a very strong hold on the 'boys' and they have succeeded in breeding some very nice birds. I asked several of the leading fanciers to favor THE AMERICAN FANCIER with their experiences re Tipplers. The Show Tippler Club has already 52 members and is only three years old."

Of the Tippler Flying fanciers, Mr. Grimshaw writes: "Mr. George Smith of Nottingham is trying to get up an All England handicap for a valuable Silver cup to be flown for next spring. Mr. Smith's book is an excellent work for the amateurs, and I can heartily recommend it to all that wish to take up the Tippler or Tumbler for their hobby."

Mr. Grimshaw brought a number of crack birds home with him, including the champions of 1894. There is no reason to doubt the coming popularity of the Tippler pigeon in America.

We are indebted to Mr. Frank C. Minoprio for an excellent pencil drawing of a famous Tippler cock, a winner of many prizes in England. We shall shortly present it to our readers.

M. B. Blauch, the Jacobin enthusiast of Lebanon, Pa., reports a pleasant visit to his lofts by A. B. Hoskins and Dr. T. W. Tuggle last week. That was certainly a great trio of Jacobin fanciers and needed only H. V. Crawford to make up an incomparable quartette.

We received from C. M. Sweeney of Detroit, Michigan, two excellent photographs of his English Carriers. Mr. Sweeney has sold nearly all his crack birds, several fine Carriers going to G. S. Boller's lofts.

Speaking of photographs reminds us of the fact that no better illustrations of pigeons can be presented than the half-tone pictures made from a good photograph.

Pigeon Notes.

BY JOHN HOPEWELL.

[ALL RIGHTS RESERVED.]

Continued from November 10th.

ORIENTAL FRILLS.

Those members of the family Columba known as the Oriental Frills, are among the most beautiful and attractive of this great family. In form they much resemble the Turbits and many on first acquaintance regard them as another variety of these favorite birds. They are, however, a trifle larger and all have feathered legs, a feature not permissible with Turbits. They are natives of Asia Minor, and while comparatively new to us, it is said they have been bred for a century in their native country. While resembling each other in general characteristics of form and size, they differ materially in color, and this variation in color gives them a corresponding variety of names. Hence we have the Satinette, Blondinette, Brunette, Bluet, Silverette, Turbeteen, Vizor and Domino. They are rather difficult to breed to color, consequently it requires much care and good judgment in mating them. For this reason they are not general favorites and by no means plentiful. Their standard qualities are:

Size.—A trifle larger than the Turbit.
Carriage.—Erect, proud and graceful.
Form.—Compact and plump and well rounded.

Head.—Of good size, broad and well arched, gracefully rounding from base of beak to back of the skull. Well filled out between eyes and beak.

Beak.—Very short, thick upper mandible curved downwards in continuation of the line of the skull. Lower mandible straight and fitting closely into the upper.

Beak Wattle.—Small, fine and powdery white in color.

Eye.—Large, prominent and bright. Located about in the centre of the head. Color, dark hazel.

Eye Cere.—Small and fine in texture.
Crest.—Rising neatly from base of skull and narrowing to a fine point reaching just above the top of skull. In some specimens of all these varieties the crest is wanting where they are known as plain heads.

Jowl.—Full and round.

Gullet.—Full and well developed, beginning near the point of the lower mandible and reaching well down till it meets the frill.

Neck.—Short, nicely arched and tapering gracefully from shoulders to junction with the head.

Frill.—Large, formed of small feathers curving outwardly from centre of the breast and reaching from the junction with gullet well down the front of the breast.

Body.—Short and well rounded, tapering to the tail.

Breast.—Broad and full and carried well forward.

Wings.—Broad at shoulders.

Flights.—Moderate in length and carried close to the body and in a line with the tail.

Tail.—Short and closely folded.

Legs and Feet.—Medium length and covered with short soft feathers reaching to toe nails. What is known as Grouse muffed.

THE SATINETTE.

Color.—Head, neck, body and thighs pure white; beak, flesh colored; eyes, hazel or bull. The shoulders have a ground color of a delicate pinkish cast gradually deepening to a rich brown at the end of each feather which is finally pencilled with a purplish black line. This pencilling takes two different forms, one known as arrow pointed, the other as laced. Either is admissible, but need to be clear and well defined.

Flights.—From seven to ten in number and pure white.

Tail.—From a well defined line across the rump is of a purplish blue color, ending in a band of a darker shade about one and a half inches in width. About in the centre of this band and on each tail feather is a round white spot about half an inch in diameter, the dark shaft of the feather showing plainly through it, the outer web of the outside feathers being usually white.

Leg Feathering.—Pure white.

BLACK SATINETTES.—Same as above, only showing black and white alone in its markings.

SULPHUR SATINETTES.—Same as above, only showing sulphur ground color, instead of pink with the darker shadings on its shoulders.

Questions Answered.

J. Hopmans, Buffalo, N. Y., writes: Can you tell me through THE AMERICAN FANCIER why one of my Pouter hens laid only one egg each time? During the past season she laid three times, her eggs being very small compared with those of other seasons. My birds are also troubled with long flat lice. What can be done for them?

Answer.—There is no reason I can assign for this lack of fecundity except age. I should judge the bird to be quite old and that she has laid her litter out. If not old it may arise from too close breeding, so that her fruitfulness has been affected. As there is no reason, if a bird is young and strong, that she should not lay a good sized egg and two of them at a litter. The long flat lice are feather lice, and can be driven away by the use of Persian insect powder dusted into the feathers. These lice are supposed to be rather a benefit than an injury to the bird, by eating the fine fluffy feathering and so thinning the coat for hot weather. When a bird moults in the fall they generally disappear.

L. E. Ruge, Brooklyn, N. Y., asks: What ails a pigeon, its bill being all covered with a slimy matter and in its mouth is a sort of a swelling—yellowish—and the bird is unable to close its mouth? What way should it be treated? Could you give me the address of some flying club of Homing birds that is in or near the city of Brooklyn? I am thinking of joining one, and, of course, would like to know who to correspond with.

Answer.—Your pigeon has what is known as roup. Wash its bill and nostrils with a solution of carbolic acid and water quite weak. At same time wash the roof of the mouth with the same. After being well cleaned make a syrup of lemon juice and sugar, and with a camel's hair pencil paint the canker spots. Do this twice a day. Also, give two or three pellets of the homoeopathic remedy, spongia, twice a day. A solution of borax and water will also do as a wash for the beak and nostrils in place of carbolic and water. Make inquiries of Mr. T. F. Goldman, 1694 Dean street, Brooklyn, for name of a Brooklyn flying club.

G. L. B., Hartford, Conn., writes: Please give dimensions of the Pouter pigeon. I am a new beginner, and would like to know what a first-class Pouter is.

Answer.—A Pouter should measure from end of beak to end of tail when stretched horizontally at least 18 inches. His legs should measure at least 6½ inches from hip joint to end of middle toe. It should have a full, round, globular crop, narrow girth or waist, fine upright carriage, and of whatever color it be, this color should be bright, clear and glossy. In issue of September 15 there is a full description of what a good Pouter should be. JOHN HOPEWELL.

Transfers.

From lofts of C. M. Sweeney, Detroit, to G. S. Boller, Cherry Creek, N. Y., one imported Dun Carrier hen, "Lady Leah" 1890 hatch, "Ludlow" strain and one black English Carrier cock, "Chauncey M." 1893 hatch, price \$75 for the pair. To George Quintin, St. Joseph, Missouri, one pair Silver-Dun English Carriers. To J. H. Baugh, Port Hope, Ontario, one Silver-Dun English Carrier hen. To

L. Schmidt, Quincy, Illinois, one pair Red Barbs and one pair of Homers. To Fred. R. Phillips, Chicago, Illinois, 12 pairs Homers. To Chas. W. Clark, Gloversville, N. Y., 9 pairs Homers. To F. F. Bock, Battle Creek, Michigan, 8 pairs of Homers. To G. H. Kinzel, Winchester, Va., 3 pairs of Homers. To Alfred-Geddes, Ottawa, Canada, 2 pairs of Homers. To R. L. Davis, Battle Creek, Michigan, 2 pairs Homers. To J. D. Hopkins, Springfield, Illinois, 1 pair Homers. To H. J. Nielsen, Chicago, Illinois, 1 pair Homers.

Extra Classes at the Boston Pigeon Show.

TO THE AMERICAN FANCIER:

In addition to the regular classes printed in the premium list of the Boston Pigeon show, the following classes have been made:

ORIENTAL FRILLS.

Best Blondinette cock or hen bred in 1894.

Best Satinette cock or hen bred in 1894.

Best any other Oriental Frill cock or hen bred in 1894.

N. B.—The class for any other variety Oriental Frill includes Oriental Turbits and Turbites.

SHORT-FACED TUMBLERS (OPEN CLASS).

Agate cock.

Mottle or Rosewing cock.

Self-colored cock.

Agate hen.

Mottle or Rosewing hen.

Self-colored hen.

LONG-FACED TUMBLERS (CLEAN LEG).

Best Mottle or Rosewing cock or hen, bred in 1894.

Best self-colored cock or hen, bred in 1894.

The above are what will be known as special or supplementary classes, and, unless there are more than five entries in a class, first money will be withheld and second money given to first prize winner. A number of additional special prizes have also been offered.

C. E. TWOMBLY, Sec'y.

Boston, Mass., Nov. 12th, 1894.

Where Specialty Clubs Should Meet.

TO THE AMERICAN FANCIER:

The Boston Pigeon Show Association wants the specialty clubs to meet at their coming show in December.

They should meet in the east for the following reasons:

1. There are two pigeon fanciers in the east to every one in the west.

2. We have two first-class shows guaranteed in the east—New York and Boston.

3. The west has but one—Peoria.

They should meet in Boston in preference to New York for the following reasons:

1. There are more fanciers in the north-east than in New York.

2. The Boston show will be an exclusive pigeon show. New York will not be.

I might add that the Boston show has already \$300 offered in specials, and we expect \$25 more at least.

The classification is liberal and entry fees light. Entry fees 50c. a bird. Premiums \$2.00 to first, \$1.00 to second.

F. TUDOR, JR., Treasurer.

Boston, Mass., Nov. 1, 1894.

The National Federation of American Homing Pigeon Fanciers.

[FROM OUR SPECIAL CORRESPONDENT.]

A meeting of the National Association Executive Committee was held at the rooms of Race Secretary C. H. Jones, 10 South Broad street, Philadelphia, Pa., on Monday, October 12, President James Work in the chair. The following members were present: T. Fred. Goldman, Brooklyn, N. Y.; Wm. Verrinder, Jr., Jersey City, N. J.; H. B. Lippincott and C. H. Jones, Philadelphia, Pa.

It was decided to hold the annual meeting in Philadelphia on Thursday, December 13th, afternoon and evening sessions, as customary, and other minor items of business were dispatched.

MANY SALES.

I have made many sales through my "ad." in your paper, and I am as well pleased with the benefits I derived as from any paper I advertise in.

O. F. CONNELLY.

Carlisle, Pa.

Pigeon Flying.

Homing Gossip and Echoes From the Flying Fancy.

BY "FRITZ."

I regret that the closing race of the Philadelphia District of the National Federation with young birds from Bedford City, Va., air line 300 miles, scheduled for October 29th last, proved to be a *Waterloo* for the Quaker City fanciers. The birds were held over the day appointed on account of rain, but the weather cleared on Sunday, October 28th, and they were let go in a light westerly wind, at 8:16 A. M. Throughout the home district the flying conditions were anything but favorable, and as east, and north-easterly winds prevailed pretty generally throughout, not a single return was reported day of toss, a result not unexpected. The birds were also engaged for the *Item* 300 miles championship, but both this and the Federation 300 miles honors are of course now off. Mr. Jas. A. Stovell will retain the *Item* trophy until next flying season. At this late season of the year it seems unreasonable to look for flying conditions over a 300 miles course from the south-west, which would enable a bird to home speedily and successfully from the distance. Such days are few and far between, and the distance is altogether too far for young birds particularly. Although I learn that the returns proved fairly good in numbers, even if late, yet such hard experience for young birds very frequently does much harm, and it is very exceptional that they acquit themselves creditably the following season, *if ever again*. Many excellent authorities contend that the fit moral and physical condition of the birds cannot be fully recovered, if at all, until after the second moult at least, and for this reason many rarely fly such young birds in their second year.

I have often pursued such a course with a few youngsters and with some that had met hard weather and with such excellent results that I have no hesitancy in advising young fanciers to specially reserve and prepare a few such subjects in their loft to put on their racing team as *three year olds*. The necessary patience will I think be amply repaid, and it is quite unnecessary that the birds should have had a hard experience in their first flying season. Quite the contrary, young birds that have done a hundred or a hundred and fifty miles, *and done it well*, and without any nights out, or hard experiences, are splendid chaps to depend upon as 3 year olds if allowed the freedom of the loft, and not overbred during their second year.

* * *

This is now the particular period of the year for flying fanciers in either their local or national organizations to overhaul their by-laws and race rules, to consider proposed changes for the more complete enjoyment of the sport, and in the better protection of the records. Changes that have been prompted and rendered necessary by the past year's experiences in the flying fancy, points not fully covered by by-laws and race rule, are frequently cropping up, and it is only by close observation and experience that we may so amend our laws and rules annually to render them as nearly perfect. There is scarcely a flying season passes over without some disagreeable and puzzling point being raised by some one, and in many cases the point is of vital importance, rarely decided satisfactorily to both sides, and yet strange to say is often permitted to pass over into a new year without any provision being made to cover a recurrence of the point. Fanciers should now put on their thinking cap and review the discrepancies of the past year. It will pay them to do so, and perhaps relieve them of bitter argument and strife during the 1895 season.

* * *

During my long and active experience in the flying fancy, if there is any one thing that I have noted more than another, it is that of the different ideas which appear to exist among flying fanciers

upon the question of *loft fixings* and *general neatness*. I have of course visited very many lofts both in my own vicinity, and away from it, but the percentage of flying fanciers whose lofts I have inspected, that one could justly term *good*, is very small indeed, so far as appearance goes. Can one wonder at the common objection that prevails outside of the fancy against keeping pigeons, when the non-fanciers cannot fail to observe the shabbiness, filth, and primitive fixings which marks the coop or loft of many of their fancier friends? It needs no long purse to enable the Homing fancier to maintain a neat and clean establishment, one that is attractive to the eye, both inside and out, but it does require care and constant attention, and no light amount of labor, and a certain degree of taste. Neither is a large or expensively constructed coop or loft essential to success in the flying world, neither is it necessary to have the birds *daily* disturbed and annoyed with the use of scraper and broom in the loft. It is a time honored saying in the fancy that the *extremist* in cleanliness in the loft is rarely among the winners, but it is equally true to observe that the extremist in slovenness and dirt in the coop or loft is about the same thing, only with this difference, they vastly predominate in the flying fancy.

* * *

It is positively surprising to me and no doubt doubly so to non-fanciers, how any fancier who loves his birds and sport, can house them so miserably as many do and take so little pride in the general appearance of his establishment.

I have visited many good fanciers whose lofts contain valuable and grand workers, and while their feeding is correct, their loft weather proof and practical, yet there is a something lacking that mars the whole hobby.

This something is unquestionably the broken down, rickety and altogether sloven appearance of the loft and its primitive fixings.

There are too many patches in its make-up and the bob wires, alighting board and inside fixings are often of the most primitive and sloven construction.

The weather beaten appearance of coops which I have visited show urgent need of whitewash and paint, and the dilapidated condition of wire and lath work would proclaim either a chronic laziness on the part of the owner or a lack of the simplest knowledge of carpentering and an indifference altogether inexcusable.

I can now recall some very neat lofts and coops which I have visited during my connection with the flying fancy, and in every instance was the owner able to boast of having accomplished creditable flying work with his birds, and a visit to such a loft is always enjoyable. The snappy appearance of the stock, the air of general neatness throughout, the thorough dryness and cleanliness of birds and perches and the light and cheerfulness of the whole structure proclaimed at once the racers' home and a freshness that was charming to behold.

I would caution all young fanciers against this very common shortcoming of the homing pigeon fancier, *neglect of the loft*, for such indifference very frequently widens into neglect of the birds, and it then needs but a season or two of hard luck in training to induce the complete withdrawal from the sport.

And thus ends many cases of Colombo-philic aspirations. He has little to induce him to remain. There are some lofts which I occasionally visit with extreme pleasure, but there are many more in my visiting experience which I prefer to avoid.

A real good fancier is, or should be, as proud of the home of his pets as he is of the birds themselves, and though his stock be of the very best, and with a racing record way up, a sloven or dilapidated looking loft or coop cannot but mar his standing in the fancy, and the example prove hurtful to the novices of his acquaintance.

* * *

American fanciers can form some idea of the many difficulties and obstacles attending 500 miles racing into England from France when it is stated that up to date but 135 birds have been advised as

at home from the Grand National toss at La Rochelle on July 23d last, when 510 birds were sent up, and yet I believe the southeast course from France will be the choice of the northern fanciers for 500 miles work during 1895, notwithstanding.

* * *

An interesting, yet stale subject, has been warmly discussed of late by the English fanciers abroad, viz: Whether *sight* alone enables birds to home or whether other faculties are more directly called into play when the birds are tossed far from the home loft.

Some of the articles on *Sight vs. Instinct* published, (particularly one in the *Homing News* by A. H. Osman) while they make highly interesting reading matter, quoting as they do from many of the best scientists and authorities on the Homing Pigeon, yet do not appear to be any nearer the solving of the vexed question than those that have been written by experts years ago, when the marvellous faculty of Homing Pigeons claimed the interest of intelligent writers and authorities. It is on record that one claims *smell* as the chief factor, and not unreasonably. Another, and a high one at that, the chief of the Prussian Military lofts, says, that neither sight nor smell enables the bird to home from long distances, but it is *animal magnetism*, whatever that may mean.

Another claims *intelligence*, which of course we all know the bird has to a high degree, and yet on race dates, when we see the early arrival walking up and down the alighting board and half raising the bolting wires, *through which he has promptly passed often*, and then *backing out again*, to resume a walk back and fro on top of the trap or roof of the loft, while the precious minutes are slipping away and *average velocity* is getting a bad set back, one is inclined to wish he had a double barrelled shot gun with which to shoot the *stupid*. It is hard to accept *intelligence* as the main factor of homing, for intelligence would tell this early arrival to get *inside the loft* after an absence of several days, as quickly as possible. Perhaps a due appreciation of *average velocity* might not prompt this quick entrance through the trap, but a natural sense of "*who has been here since I have been gone*," which all fanciers know is common with our pets, would seem to spur the traveler forward, and also the natural knowledge that feed and water is to be found inside, both of which are no doubt required.

But, no. Many aggravating minutes are frequently allowed to elapse before his lordship, or her serene highness, sees fit to pass the wires, and we well know that jealousy, hunger, thirst, and, above all, *suspicion*, which calls into play the *very highest degree of intelligence*, would be the incentive to prompt quick trapping, and yet how often this supposed intelligence is found wanting.

Also, how persistently will youngsters who are being settled, and oftentimes old birds too, try to force an entrance to the loft through all kinds of impossible ways, concentrating their entire energy upon every point but the right one, which they have oftentimes passed through correctly but now forget. That excellent authority, Tegetmeier, believes implicitly in *sight*, and many practical fanciers agree with him. I, for one, *don't*, that is, *sight alone*. I agree with Rodenbach—Monsieur Felix Rodenbach, of Ixelles, Belgium—that it is by memory, also by intelligence and a degree of instinct inherited by the birds and cultivated that enables them to home from distances.

That our birds home *entirely by sight* I have shown in former notes is an impossibility, and while sight is unquestionably a highly important factor by which they pick or work their way home from 500 mile distances and beyond, with often two, three, and four hundred mile jumps, yet it must be *memory and intelligence*, with perhaps *magnetic currents* of which we know nothing, as an important aid. The bird is highly sensitive to heat and cold. We may discuss what we please, but we are really no nearer the true cause of the Homing pigeon's ability to reach its home from far distances to-day than we were many years ago.

How often we hear of an old time homing pigeon fancier who has retired from active interest in the sport, becoming again smitten with the hobby of handling and keeping a few racers.

The latest exemplification of this is the rumor that Mr. A. A. Allen of Newark, N. J., whom many will recall as a highly successful flying fancier some few years ago, again seriously contemplates re-entering the sport in Newark, N. J. I hope it is so, and as he and W. B. Garrabrants were always very close to each other, I hope further that Mr. Garrabrants may be similarly influenced.

These two gentlemen would prove a valuable acquisition to the Newark section of the New York vicinity, for both fanciers in their day were strictly first class, and their birds also. The name of S. G. Lambertson is also spoken about as an acquisition to the Brooklyn section. Another good old timer.

Philadelphia Items.

In answer to several inquiries it may be stated that the homing pigeon race for the 50-mile championship will be flown from North-east, Md., on Thanksgiving Day, and not from Charlestown as originally proposed. The race is open to any fancier residing within the city limits upon the payment of an entrance fee of one dollar per bird.

Entries will be received by A. M. Wood, 4305 Fairmount avenue; C. H. Jones, 10 South Broad street, or the Sporting Editor of the *Item*, any time between now and Thursday preceding Thanksgiving Day. The amount received in entry fees will be divided into cash prizes. The birds will all be tossed in a bunch about 9 A. M. on the day of the race, which will be flown under the same rules as those governing the *Item* 100-mile championship.

This will be the last long-distance race of the season and it is expected that a big entry will be received. Many fanciers are already training their birds for the event.

C. H. Jones, race secretary of the Federation, will shortly change his place of residence from this city to Clifton. He will move his birds and make an effort to use them to the new loft. His headquarters at 10 South Broad street will of course be retained.

Quite a number of short-distance races will be flown on Thanksgiving Day.

The World's Fair medals have not yet been distributed, but it is learned the fanciers entitled to them will get them in a few months if they have patience. The medals should be well worth waiting for if all the reports concerning them can be relied upon.

Perry C. Clark, secretary of the Hamilton Homing Club, who sold his loft and birds a few months ago, has built a new loft and will soon be in the thick of it again.

A. M. Wood is selling out his entire stock of birds, and as his loft contains some of the best strains to be found in the United States, his batch of birds will no doubt be snapped up in short order.—*The Item*, Philadelphia.

Richmond Flyers.

From the Richmond *Dispatch* of November 3 we glean the following: Mr. F. H. S. Morrison, of Leesburg, who has been in the city since last Sunday, will return to his home to-day. Quite a number of people have called to see Mr. Morrison in reference to his homing pigeons, having read the account published in the *Dispatch* Tuesday of the flying from this city of the two birds "Yours Truly" and "Nonpareil." Among those interested was Mr. George T. King.

Mr. King invited Mr. Morrison to his loft yesterday and the Leesburg lawyer says he has never seen a finer equipped place in his life, and he has visited them from Boston to Washington. He also affirms that some of Mr. King's birds could win in the Madison Square Garden show at New York, as he has seen better nowhere.

Several days ago Mr. King flew ten of his homers from Clover Depot, eighty-five miles from Richmond, and the time made was excellent for youngsters. His next fly, which will be made shortly, will be from South Boston, 100 miles from Richmond.

It is rather dangerous flying birds at this season of the year, as gunners are out hunting. A law was passed at the last session of the Legislature providing for a fine of not more than \$300 for shooting or detaining homing pigeons.

Welcomes "Fritz" Back.

TO THE AMERICAN FANCIER:

What a relief it is to get our esteemed "Fritz" back among the correspondents of THE AMERICAN FANCIER! The nights are dark and drowsy when we sit and think over our own birds and have no knowledge of what the birds of the other "boys" are doing. I am glad we shall get fresh news from all corners now, so pull together, Homing fanciers, and send in your "subs" and "ads." All the "boys" are in good humor now. A TRUE FANCIER.

Newark, N. J., Nov. 7, 1894.

NOT A CHICKEN CRANK, BUT LIKES THE PAPER.

Enclosed find renewal of my subscription to THE AMERICAN FANCIER. I am not a chicken crank, but like your paper very much.

E. L. ALBRO.
Geneva, N. Y., Nov. 13, 1894.

E. LATHAM, Flatbush, Long Island, N. Y., originator and breeder of the Golden Rod strain of Buff Cochins Bantams. Winners at the leading shows last season. This strain is carefully bred from selected breeders. When writing state particulars. Gungywamp Poultry Yards. *52t8

WESTERVELT HAYWOOD & CO., Rutherford, N. J., 15 years importers and breeders of Bantams, every variety. Only the best strains. Also Fantail Pigeons. Won 200 premiums past season. At great New York show won on every bird exhibited. Circular for stamp. *52t3

Turkeys, Ducks, Geese.

GREENWICH POULTRY FARMS CO.—It's so long since we've talked Turkey that somebody must have forgotten our hobby. It's a good hobby; it ought to be, as a matter of course. But if we took it as a matter of course and said nothing about them, you'd think that ours didn't win. Here's the facts: our Bronze Turkeys are winning on their merits. This is the great American Turkey month. Come and see them; or, if not convenient, write us for our book; it's free. Males, \$5; females, \$4. Cockerels, Barred and White Rocks and Indian Games, \$2 and \$3 each. VAN WAGONER BROS., box 3333, Greenwich, N. Y. *4t64

FOR SALE.—Mammoth White Turkeys, P. Ducks, R. C. W. and B. Leghorns, S. S. Hamburgs; a grand lot to spare at living prices. Write for wants; stamp if convenient. Address MRS. P. L. REITZ, Pansy, Jeff. Co., Pa. *8t62

MISCELLANEOUS.

AMERICAN POULTRY ADVOCATE, Clarence C. DePuy, publisher, Syracuse, N. Y. Handsomely illustrated, 16 pages, 25c. per year; 64-page illustrated practical poultry book free to yearly subscribers. Book alone, 10c; paper 4 months on trial, 10c; sample copy free. *t64

SALE OF EXHIBITION BIRDS.—Breeding pen of Mottled Java fowls, \$18; pairs of fowls or chicks, \$5; White and Buff Cochins Bantams, \$4 per pair; R. C. White Leghorn fowls, \$3 per pair; White Polish and S. P. Hamburg cockerels, \$3 to \$5 each. Write for show record on above birds. *4t63
ARTHUR L. GARDNER, Vermillion, N. Y.

FOUST'S HEALTH GRIT is now used as a standard all over the country. Practical pigeon culture impossible without it. Gilbert, Joos, Hager, Levering, Blauch, Tieman and Schmidt endorse and use it exclusively. Price, \$2.50 per bbl. Some extraordinary fine Turbits at \$5 a pair. *3t62
G. FOUST, Rhinebeck, N. Y.

A GODSEND.—Mr. Chas. G. Ebisch, Erie, Pa., says: "Your Burglar Alarm is a godsend to owners of high-class poultry. How can you give so much for so little money?" Send for circular and learn for yourself. *4t61
J. H. RAINSBURY, Tibbits Ave., Troy, N. Y.

FOR NEAT 60 DAYS.—We have reduced prices of Eggs to \$1.50 for 13 and \$3 for 30. See our "ad" elsewhere in this paper. Address PECK & DREW, Lake City, Fla. *tf42

CHAS. ENGLAND, dealer in pigeons, birds, cages and food of every description. For prices and further information, address CHAS. ENGLAND, 316 South Castle street, Baltimore, Md. *4t61

POULTRY AND PIGEON FANCIERS.—Would a sure, quick, clean, easily administered roup cure be of use to you? Would such men as Butterfield, McKenzie, Haynes, Loque and W. H. Kirby, of Canada, endorse a humbug? Not likely. I have a roup cure; the best men in the world say so, and I have their letters to prove it. Need I say more? Now is the time you need Combination Spongia Tablets; 35c. per box, three boxes for \$1. *13t53
F. M. BRONSON, Vermontville, Mich.

SILVER CAMPINES.—I can spare at once a limited number of pairs of these fowls. My experience with them for the past season is so favorable that I confidently recommend them as very superior layers, hardy, quick growing, and a most desirable farm fowl. They are very handsome and breed true. *tf60
THEODORE STERNBERG, Ellsworth, Kan.

WANTS.

WANTED.—A secondhand Mann Bone Cutter, in good order, for cash. Say how long been used. Address *rt64
C. A. BUMP, Cambridge, N. Y.

EXCHANGE.

WANTED TO EXCHANGE.—Light Brahmas for a Great Dane dog, from three months to one year old. *tf64
JOHN L. COST, Hagerstown, Md.

EXCHANGE.—Rifle, muzzle loader, 42-cal., with full set of tools, walnut stock, and in first-class order for target or game. Want Collie or Black Cocker Spaniel pups, or offers. Write. *4t62
E. F. TIFFANY, Brooklyn, Pa.

INCUBATORS.

FOR SALE.—One 600-egg Monarch Incubator, good as new, price \$40; cost \$100. Satisfactory reason for selling. *tf64
ORR'S POULTRY YARDS, Orr's Mills, N. Y.

PIGEONS.

FANS.—Owing to business changes, I am reluctantly compelled to sell my entire stud of white and solid color Fans, bred from premium stock. To effect a speedy clearance, I will make exceedingly low prices. *4t64
W. C. WEBER, Mahwah, N. J.

FOR THIRTY DAYS.—Greater reductions than ever before; former price cut into. A grand chance to secure first-class stock at a bargain. White Smoothhead and Crested Fantails, Black Carriers and Nuns, Blue Chinese Owls, Jacobins in several colors, Inside Tumblers and odd birds. Send for complete price list. *4t64
H. P. HARTER, Huntington, Ind.

HOMERS FOR SALE.—Twenty-two 304-miles, youngsters of '04 hatch; fifteen 200-milers and eight pair of breeders. Birds in excellent shape; flown under club management. They must go, and at your price if I can't get mine. I mean exactly what I say. This is a chance of your life time to buy good stock cheap. Address with stamp. *tf64
DR. A. LEE PENUEL, Leesburg, Va.

J. H. MEHRING, Littlestown, Pa., offers in pairs and odd birds Red, Dun and Black Dragons, at \$3.50 a pair; Yellow, \$4 a pair; White, \$5 a pair. Also 1 pair Red, 1 pair Black and 1 pair White English Carriers and 1 pair Silver Dragons, \$3. *4t64

BARBS.—A fine pair of Barbs for sale, bred from imported prize winners. A. BESCHE, 1241 William street, Baltimore, Md. *4t61

BIG BARGAIN.—Having bought C. J. Tanner's Magpies, to make room will sell or exchange eighty pairs of Owls for Black Minorcas or Barred Plymouth Rocks. My Owls have won more 1st premiums than any other Owls in the country. *4t63
GEO. W. ECKERT, Allentown, Pa.

HOMING PIGEONS.—H. F. SCHROEDER, 332 Seymour Ave., Utica, N. Y. I will sell a few pairs of surplus stock Homers, 1894 hatch; flew 130 miles. Made 1,489 yards per minute in a 55-mile fly, in No. 1 Fulton County Flying Club race. Write for prices. *4t63

FOR SALE.—Eleven Jacobins, black, white, red and yellow; pair Black Pouters, pair Blue African Owls, pair Blue Swallows, pair Red Homers, 1 yellow Barb cock, fine bird, 3 Archangels; all good birds, and the lot at \$25. *13t63
L. D. HOLMES, 126 Beacon St., Syracuse, N. Y.

FOR SALE.—Lot of White Tumblers, bare legs; also few pairs each of Black, Blue, Yellow and Red Booted Tumblers, to make room. All good performing birds. H. L. WICKLEIN, 1205 William St., Baltimore, Md. *13t62

MUST BE SOLD AT ONCE.—My entire lot of Tumblers, consisting of thirty-three birds, all good performers; or will exchange for Homers, must be good birds. R. S. ROBBINS, 436 Hamilton Ave., Columbus, Ohio. *4t62

Dr. Wiant & Beringer

MARION, O.,

.. Importer and Breeder of ..

Buff Leghorns

EXCLUSIVELY,

HAVE THE FINEST LOT FOR SALE WE EVER SAW OWNED OR RAISED.

They were sired by "JOKER," the World's Fair winner, and "BROTHER JONATHAN," the winner of more first prizes in England than any bird ever imported.

Remember, we are the only importer of the Geffcken strain in America, and have crossed them on the Kay, and the results, both in the show room and breeding pen, has been simply elegant.

The prices for fine breeding birds are, for Cockerels, from \$5 to \$20; Pullets, from \$3 to \$10. Exhibition birds a matter of correspondence. We guarantee every bird just as represented.

SPONGIA,

The great Roup Cure. Put up in 25c., 50c. and \$1.00 packages. 50W1361

Golden Wyandottes

The Best in America, are bred at

SYCAWAY POULTRY YARDS,

John H. Duke, Proprietor.

EGGS, \$3 PER 15, \$5 PER 30. 5256

SPRATTS PATENT

POULTRY MEAL.

The Greatest Egg Producing Food. For getting fowls into exhibition form it has no equal. The best food for assisting fowls through the moult. The best and the cheapest food. It is a staple food, not a condiment, spice or medicine. For rearing young chicks it has no equal, reducing mortality to a minimum. Try a sample bag or write for circular.

The Common sense of Poultry Keeping, 10c. "Cardiac," a tonic powder for poultry; excites a healthy action of the stomach, strengthens and invigorates the young chicks; 50c. per packet, or \$1 for 5 lb. bag. Granulated Prairie Meat "Crissel," takes the place of Insect Life and Ants' Eggs. Bone Meal for poultry and chicks. Roup Paste, 50c. Tonic Condition Paste 50c. Gape Cure for chicks, 50c. 50W2654

LINCOLN POULTRY FARM,

THE HOME OF

Warner's B. P. Rocks.

THE GREATEST SOUTHERN CHAMPIONS. Their reputation in the Show Room is familiar to many. At America's largest show, 1892, Hagerstown, Md., they were unconquerable. This, with other enviable records, has placed my birds at the front.

My matings this season are headed by males of unsurpassed barring and color, and will produce such birds that will win in any Show Room. EGGS, \$3 PER 13.

Single and R. C. BROWN LEGHORN EGGS of high merit \$2 per 13. 136

Has for sale a limited number of superb full feathered

BUFF COCHINS,

bred from his own importations, and up to the American Standard.

PARTRIDGE COCHINS, of the highest quality, grandly pencilled.

BUFF COCHIN BANTAMS, sound in color, small in size.

SILVER GREY DORKINGS, the fowl for the table.

SILVER CAMPINES, the famous egg producing fowl from Belgium, the best all around farmers' fowl. 50W1354

Ellsworth, Kansas, U. S. A.

OAKLAND FARM

Taunton, Mass.

BUFF COCHINS. Our American Standard Buffs are unsurpassed in this country, as their great record in the show pen will attest.

LIGHT BRAHMAS. Our Light Brahmas have won their full share of prizes wherever shown and we seek the keenest competition.

BUFF COCHINS. We have imported this season, as we have

for the past three years, the best Cochins to be purchased in England. This year we have the winner of the **LORD MAYOR'S CUP**, the acknowledged champion cockerel; the champion pullet, winner of 1st **DAIRY, CRYSTAL PALACE** and **BIRMINGHAM**; also others of highest merit. We have probably the finest collection of these fowls in America.

We shall sell eggs from our English Cochins this season. Send for circular. Birds for sale at all times. 1363

Ideal Strain of Turbits,

Combining the Purest Blood of England and America.

NOTED FOR THEIR BEAUTIFUL CARRIAGE, SMALL SIZE, AND WONDERFUL HEAD AND BEAK PROPERTIES.

The following recent winnings, in the keenest competition ever brought together in this country, attest their merits:

BALTIMORE, 1894.—Five Firsts, six Seconds, six Thirds, Special for best Young (1893) Turbit in Show. Also, Specials for Best Blue bred 1893, Best Red bred 1893, Best Yellow bred 1893. Winners of largest amounts of money of any exhibitor, viz., \$92 in prizes.

ATLANTA, 1894.—Seven Firsts out of possible eight.

NEW YORK, 1894.—Four Firsts, three Seconds, five Thirds (in standard colors only) Also, Grand Gold Special for best collection of Turbits.

Requiring the room, I will sell seventy-five pairs Turbits, in all colors, from above stock at prices to suit the times. Anyone taking several pairs will be liberally treated. Embrace this opportunity to get fine birds. On writing state most you will pay and I will try and suit you.

W. T. Levering,

BALTIMORE, MD. 52t21

Havemeyer Bros.,

MOUNTAIN SIDE LOFTS,

HAMBURG

For Fall and Winter Exhibitions

My young stock of Silver and Golden Pen-
cilled and Black Hamburgs is bred exclusively
from First Prize winners at Crystal Palace
show last winter. I have none but A-1 stock
for sale. Parties wishing stock for exhibition
or breeding purposes will please apply toCHAS. ELDREDGE,
*16154 Rye, Westchester Co., N. Y.Buff Plymouth Rocks
(COLUMBIAN STRAIN.)I have 30 females in my breeding pen that are
geniting Buff, without penciling on hackle or
slaty undercolor. Since January, 1893, my birds
and eggs have taken 34 premiums, 16 being
first, and two medals. I have sold 27 trios and
71 settings of eggs, and on account of a scarcity
of circulating medium caused by the changing
of our administration, I have reduced my price
of Eggs this season from last year to \$2.50 for 15,
\$4 for 30, \$5 for 45, \$10 per hundred, after June
15th \$1 per sitting. Cockerels after October.

BLACK LANGSHANS

Dr. F. M. Robinson, Box 69, Pawling, N. Y.

At Madison Square Garden, New York, 1894, the largest show ever held in America, I was awarded the Grand Special Prize of Silver Cup, value \$100, for best exhibit. 1st, 3d and 4th cockerels; 2d and 3d cocks; 2d, 3d and 4th pullets; 2d and 5th hens; 2d and 5th breeding yards. 200 grand chicks, bred from "Gorden Champion," "Parnell," "Parnell, 3d," "Manhattan, 2d." Buy your birds from a race of prize winners; buy from a breeder who breeds his own birds, exhibits his own birds and advertises honestly what he wins, not what someone else wins. The above record has never been beaten in Madison Square Garden on Black Langshans. Illustrated circular on application, giving full list of awards for the past seven years at the largest shows in America. You need this stock to show; you need this strain for new blood. 52t25

PEDIGREED BARRED PLYMOUTH ROCKS

At New Haven, 1893, I won all firsts and 15 specials on my birds. Cockerel scored 95, weight added; cock, 92½; hens, 94, 93, 92½, 92½; pullets, 94½, 94, 93, 92½. At Shelton, 1894, first on cock, hen, cockerel and pen; also Silver Challenge Cup for largest and highest scoring collection. Eggs \$2 per setting. 52t25

THE GREAT ANGLO-FRANCO

COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Canker, Colds, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. TESTIMONIALS ON APPLICATION.

PRICES:---In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

AT THE NEW YORK SHOW, 1894,

The greatest and largest one ever held in America, my birds won the following: Cocks, 2d and 4th; Cockerels, 1st, 2d and 4th; Pullets, 3d and 5th; Pens, 2d, 4th and 5th. My birds have won hundreds of premiums in the hands of my customers. I have choice birds and eggs for sale at all times. 52t25

PHILANDER WILLIAMS, Taunton, Mass.

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of Perfection

This is the only authorized publication giving a complete description of every breed of fowls recognized by the American Poultry Association, the only representative body of poultrymen in this country. Remember this invaluable book is fully protected by the United States; it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar, but

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24 page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it

For Nothing

By simply sending the amount to

BLUNCK & DREVENSTEDT, Publishers,

HATCHED 100 PER CENT! THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889, and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our **HOT WATER SYSTEM** is the only practical system in use, as hundreds of testimonials will prove. We also have the best **HOT AIR BROODER** ever invented; and by our new method *do away with the bottom heat*. This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and **BROODER LAMPS** that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$2.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

The AMERICAN FANCIER

A WEEKLY JOURNAL DEVOTED TO
POULTRY, PIGEONS AND PET STOCK.

Vol. III, No. 14.

JOHNSTOWN, N. Y., DECEMBER 1, 1894.

Whole No. 66.

Indian Game Cockerel "Matchless" and Pullet "Sunshine,"

Winners of Firsts and Specials at New York, 1894, bred and exhibited by C. A. SHARP & CO., Lockport, N. Y.

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition.....\$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth.....\$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price.....\$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price.....\$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth.....\$1.00
Paper......40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price.....\$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price......50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price......50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price......50

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price......50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price......25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price......25

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published.....\$8.00

THE AMERICAN FANCIER,

Johnstown, New York.

POULTRY.

From the Editor's Perch.

The illustration on our title page this week gives a good idea of the winning Indian Game cockerel and pullet at the last New York show. Mr. Sewell the artist writes: "I believe you will like the spirit of them. I have tried in these to portray the truth and I think they will be appreciated." We learn that Messrs. Sharp & Co. have been successful in raising a very large number of Indian Games during the past season. They report a great demand for the White Indian Game. The latter, in our opinion is a remarkable table fowl, one that when better known will be thoroughly appreciated by practical poultry raisers.

F. D. Branday, editor and publisher of the *Practical Poultryman* informs us that he will issue the latter in semi-monthly form after December 1st. We congratulate Mr. Branday on his enterprise, and trust the new departure will meet with the success it deserves. The price of the *Practical Poultryman* will remain the same, viz: Fifty cents a year.

Dogs, is the title of a new weekly paper published by the *Stock-Keeper* company, Limited, of 77 Fleet street, London, England. It is a publication for the lovers of the canine race, who care little or nothing for the technicalities beloved by the breeder in a large way. It is just the publication for the amateur owner of dogs. The series of articles on various breeds by an eminent authority is to be a feature. *Dogs* is excellently printed and full of excellent reading. It is published every week. American subscribers can obtain the above publication through the office of THE AMERICAN FANCIER. Two dollars and twenty-five cents brings it fifty-two times a year.

The English poultry papers for November 16th, are of course full of interesting details of the great Crystal Palace show. The reports and criticisms of the exhibits are very complete in nearly all our exchanges. THE AMERICAN FANCIER presents a brief report of the poultry exhibits written by its English correspondent, on another page of this issue.

Our friend, John Glasgow, did not capture the cup, neither was he in the money with his pair of White Wyandottes. When Mr. Glasgow sent these birds to England to be prepared for and entered at the Crystal Palace show, we had our doubts as to their being able to win. They were excellent specimens from the American point of view, but our English cousins do not adhere to the Wyandotte type. They prefer a heavier, more Dorking shaped bird, to judge by the English illustrations. The trim, shapely and graceful Glasgow birds lacked beef, and

to judge by our English correspondent's criticisms, lacked in comb and color of legs. We saw these American birds at Syracuse last September, a few weeks before Mr. Glasgow purchased them. They were then unfinished, i. e. not filled out, but had true Wyandotte symmetry, good white plumage and combs that would suit American breeders. We thought them extra fine specimens.

This leads us to remark that an international standard would be a mighty good thing for the fancy of both sides of the water. In this country the American Standard is observed by all the judges, in England there seems to be a disregard for a fixed standard, to judge by the rules adopted for the guidance of the wearers of the ermine by various specialty clubs and the comments of the press on the same. There is no earthly reason why American fanciers cannot join hands with their foreign cousins and make a fixed standard of value for fowls. It makes no difference whether birds are scored or judged by comparison, as long as the standard laws are obeyed. The fact of England supplying America with many choice birds of certain varieties and the equally important fact of American fanciers sending many of their choicest specimens abroad is a most eloquent argument in favor of an international standard. Why cannot a truly international show be held where fanciers and judges from both continents can meet, discuss and adopt such a standard? The fancy is a fraternity that knows no sectionalism, recognizes no creed or race but is on earth for the one fixed purpose, and that is the improvement of the feathered races of the entire world.

THE AMERICAN FANCIER recognizes the immense impetus given to the fancy by England's nation of fanciers. It gladly gives them the credit they deserve. They started the grand work of building up the beautiful races of fowls that to-day interest thousands of fanciers and others in both hemispheres. Their descendants in America followed along the same lines, and improved on many of the old country ideas of poultry raising, while on others they must still take a back seat. It is useless to make the American eagle scream and pull the British lion's tail when we know we are in no safe position to do so. We would like to beat our cousins on the "tight little isle" across the sea, in the show room, and no doubt they feel the same way, but let us be fair above all things. We hope to see the day when America can send over to the Crystal Palace, Dairy or Birmingham shows, birds that will not only be in the money but gobble some of there grand cups as well.

We received a letter not long ago from a fancier who is ambitious to become a judge of poultry. He wants advice as how best to equip himself for the position and also wishes to know what personal qualifications are most necessary in becoming a good judge. The drift of the entire letter leads us to suppose that the writer is very conscientious and very young. He also seems imbued with the idea that professional judges of fowls are very august personages and are blessed with an unusual store of knowledge. While the latter may seem natural enough to him, an experienced and uninitiated amateur, to the veteran fancier

and poultryman is amusing. Judges are no better and no worse than the rank and file of intelligent poultry fanciers. Some have become judges by choice, others by chance, and all have graduated from the ranks of breeders of poultry. To explain to our friend how he had best proceed to qualify himself for judging is no easy matter. We know nothing of his mental make-up, and can only surmise that he is intelligent, but we will endeavor to throw out a few hints for his guidance.

In the first place, he must be cocksure in his own heart that he really is a fancier. By that we mean he must love the feathered races not for the money there is to be made from the sale of a bird, but for the bird itself. He must have an ideal in his mind of what a perfect specimen of each breed should be like. He may not find this ideal in a living bird, but he may see it so closely in the latter at one time or another that he should study it carefully in every part. He must never condemn a bird because it fails to reach the exalted plane on which his mind has placed the mental picture or ideal.

In handling the birds he breeds he will gain a practical knowledge which he can acquire in no other way. The American Standard of Perfection is his guide for judging, but a thousand standards will not enable a man to judge birds correctly who has not had practical experience in handling and breeding fowls. A judge must obey the Standard and not his own prejudices when passing on the merits of the classes assigned to him. The Standard may seem wrong to him, but that "cuts no ice" when all the birds entered have been selected by the exhibitors according to a fixed standard. He has no right to disregard any of its rules if he wishes to be classed among the good judges.

Then comes another point. The Standard permits the judge to give the benefit of any doubt to the bird. A surpassingly good specimen, the best in a class, may have some defect so near to the disqualifying limit that an overzealous young or old judge will be arbitrary enough to throw the bird out. This is placing a radical and literal construction on the laws laid down by the Standard certainly not intended by its framers. Suffice it to say, a judge must exercise his common sense in this matter. To throw out the gem in any class because a tiny speck of down may be found between the toes or on the shank, or a pinhead spot of black appears in a white feather, is both suicidal to the breed and the judge.

Lastly, a judge should take Davy Crockett's advice, "Be sure you are right, then go ahead," when judging any class. Under any circumstances let him make his decisions without fear or favor, and care naught for what exhibitors may say. A judge is an individual having but one opinion. That one he should stick to. Others may have different ones, but that need not influence him in the least. It is, however, his duty toward exhibitors that may be present and who courteously ask him for an explanation of his awards to satisfy them. It is well to remember that many exhibitors are as well posted in the merits of the birds as the judge, and some may know even better than he does the strong points of the best birds. These exhibitors are not

kickers as a rule, for no true fancier and gentleman is a kicker, unless deprived of his just dues by trickery or fraud. It pays a judge to associate with exhibitors after the judging is over. It is mutually beneficial.

As to the ignorant set of kickers who in their own narrow minds see only evil in a judge's work, who never fail to criticise him, who are too cowardly to say to his face what they gloat over behind his back, to such cattle no self-respecting judge will pay any attention. He may hear of their petty and malicious charges, he may be subject to attacks by anonymous writers and all that, but silence on his part is the only sensible course. No better application of the old saw, "Honi soit qui mal y pense," can be found than when applied to a senseless and malicious kicker in the showroom. In plain English it means, "Evil he who evil thinks."

W. Atlee Burpee & Co., of Philadelphia, Pa., want everyone interested in turkeys to write for price lists. They have an immense stock of Bronze and the New Mammoth Whites on hand.

The American Plymouth Rock Club will meet at Kansas City, Mo., December 20, 1894.

One of the handsomest premium lists ever issued by a poultry society is that of the Mid-Continental Poultry and Pet Stock Association. The cover is printed in colors, a Buff Leghorn cock being conspicuous in the centre of the page. Every fancier in the country, who has a good bird to exhibit, should send for the above list. The Mid-Continental show will be a record breaker. It was started by live, wide-awake fanciers who kept kindling from the start. The magnificent list of specials, the liberal cash prizes, the many other inducements offered to fanciers to meet at Kansas City, indicate thoroughly the calibre of the men behind that great show. The list can be obtained by addressing a letter to F. M. Slutz, secretary, 424 New Ridge building, Kansas City, Mo.

B. J. Dodge, of Verona, N. Y., writes us that a meeting of breeders and fanciers of American Dominiques will soon be called for the purpose of organizing a club. It is about time something was done to reclaim that grand and popular old American favorite, the Dominique, from the list of good but neglected breeds.

The following letter was received from a well known breeder of Hamburgs:

"Will you please give me your valued views of what class of fowls a breeding pen should be composed of? There seems to be a diversity of opinion especially among judges as to what a breeding pen is. Is it a pen of fowls to be gazed at and admired for its high standard of perfection, or because it is made up of fowls which will produce high scoring stock? Take any of the penciled varieties and the majority of judges will give first prize to the pen scoring the highest, according to the Standard of Perfection, and yet as a breeding pen it may be practically worthless for imparting a high grade of stock."

A breeding pen should consist of birds mated for producing exhibition birds. This is the rule at the New York show. Breeding pens at most other shows are simply exhibition pens, and, as many breeders are aware, the highest scoring pen is not necessarily the best breeding pen. Where pens are judged by the

score card, the word "Breeding" should be left out and the word "Exhibition" substituted. Weight, in those breeds subject to it in the scale of points, counts against a breeding pen, shown in *breeding condition*. A pen fixed up for exhibition may be over fat, but saves cuts for weight. This would throw the prize to beef and not to quality. We have seen many a crack bird beaten by the weight clause in the open class, but this is one of the peculiar features of the score card and Standard, but when such is applied to breeding birds it is arbitrary and does a grave injustice to the breed affected by it.

Sec'y Latham writes: "The National Bantam Association has made elaborate plans for its next annual show to be held in New York. Every breeder of Bantams should join our club, in order that we may further the interests of these attractive little birds. We have a large number of cash specials to offer." The above society is doing excellent work and we hope every lover of Bantams will send in his or her name to E. Latham, Flatbush, L. I., N. Y., to be enrolled on the list of members.

We are glad to learn that J. W. Wale has been added to the list of judges at the Mid-Continental show. He will, no doubt, judge the Langshans, a breed he is thoroughly familiar with, in fact he is a three-ply-dyed-in-the-wool Langshan crank, and scores the black beauties with more pleasure than any other breed he handles.

The Troy show, next, week will be a great one, to judge by reports circulated from headquarters. The entries are heavy, many leading breeders and fanciers having decided to exhibit in the city of collars and cuffs. It is the first of the great shows of the year.

Rochester will hold its show in January, and it promises to be a rouser. The excellent management of last year's show has imparted confidence, so we may expect that a show in the flour city is an annual fixture. Troy, Rochester, Hamburg and New York make up a grand quartette for the Empire State, with numerous smaller shows in other parts of the state to fill up the gaps.

The awards at every show held in America will be published in THE AMERICAN FANCIER, provided our correspondents and the secretaries do not disappoint us in mailing the "Copy."

Secretary Cushman, of the Rhode Island State Poultry Association, is anxious that every exhibitor of live thoroughbred poultry should also enter dressed specimens of the breed he enters. A dressed cockerel and pullet of each variety exhibited would just about suit Bro. Cushman, and we hope his wishes will be honored in this matter, as no man in this country has worked harder to make dressed poultry a feature at our shows than Samuel Cushman.

State Poultry Association of New Jersey.

To THE AMERICAN FANCIER: The annual meeting of the State Poultry Association of New Jersey will be held at the rooms of the State Board of Agriculture, State House, Trenton, N. J., Wednesday, December 5th at 11 A. M. A. A. PARKER, President. C. W. JOHNSON, Secretary.

England's Greatest Show. Over Six Thousand Entries at the Crystal Palace.

[Special to THE AMERICAN FANCIER.]

By the time you present this to your readers, this great English meeting will be a thing of the past. The quality was both in poultry and pigeons of very high class. In many cases birds that were pronounced by the fancy "the best they ever saw penned," were on view. The total number of entries were 6189, which included exhibits from your great country, but am sorry to say that America got left and that in a variety of your own creation. The following notes are by a fancier who has been the round of American exhibitions. The catalogue opened with:

DARK DORKINGS.—Numbering 102 exhibits. The challenge cup cockerel exhibited by Messrs. Smyth, worthily upholding these noted exhibitors' name. Mr. Padwick won the challenge cup for best pullet.

SILVER GREY DORKINGS.—Capt. Hornby and Mr. Cranston took the best prizes with meritorious birds.

WHITE DORKINGS.—A very nice variety and mustered in large numbers.

SPANISH.—Were noticeable for the grand entry in pullets by Mr. Hyde, who won cup 1st, 2d, 3d, 4th and H. C. Truly a big feat.

COCHINS.—As usual, a great show. In Buffs, Mrs. Harris was well nigh invincible, winning 2d cock, cup 1st and 2d, hens, cup, 1st and 2d in cockerels, 1st and 2d in pullets. A grand team, size, color and shape all that could be desired. Partridge Cochins were not numerous but many good birds were found in these classes. The 1st and cup cock of Mr. Stretch deserved its position. Mrs. Harris and Mr. Wood both had capital birds on view. White Cochins found Mr. Walton with his noted old hen 1st, Mr. Partington taking a good share of the prizes in young birds. Mr. Ward, however, got the lion's share with birds in grand trim.

DARK BRAHMAS.—A grand entry of 109 pens, combining quality as well as numbers. Mrs. Holland's 1st hen and 1st pullet were wonderful in shape and color, and I heard changed hands after the close of the show at long prices.

LIGHT BRAHMAS.—Mr. Ward took three 1st prizes out of the four, also two cups with birds that were shown in faultless condition, and though to American fanciers our Light Brahmats with their foul under color, might not quite please, yet for top color and feathering they please the tastes of critical fanciers here.

FRENCH VARIETIES found the Houdans in great force. Mr. Ainsworth got two 1st prizes with capital birds. La Fleche and Creves don't turn out in large numbers, but many fine birds were on view.

GAMES, were a very high class collection commencing with Black Reds, numbering 75 exhibits in 4 classes. Mr. Mather winning 1st in old cocks with a grand bird. I believe he was bred at Parbold Yards and now returns to his old quarters. Capt. Heaton claims Mr. Strachan's H. C. bird in this class for £50. In Black Red hens, Ainscough won 1st and 2d with two birds of their usual stamp. Black Red cockerels found Ainscough winning 1st, cup and challenge cup, and 3d. The cup winner being considered one of the best seen out for a long time, this being his first appearance. He is grand all over and should take a prominent part at Birmingham later. The 3d bird was short feathered, grand in color and style, a good eye; 2d, Wishart, a nice tailed bird with a pale eye and wants redubbing. In Black Red pullets, Ainscough won 1st and cup with a good big one, extra in style and shape, sister to pullet 1st, "Dairy," an easy win; 2d, Gill, reaching and stylish, faulty in color; 3d, Gulliver, better in color, but not so reachy as others. Brown Reds, few in number but quality of average merit. Messrs. Firth, Brown, Bond and Corless taking the prizes. Golden Duckwing Games, good in quality. Messrs. J. & F. Taylor had two grand cockerels on view, winning 1st and 2d. Other good birds were shown by Messrs. Rainforth and Mather. Pile Games were notable for the success of Mr. I. Colgrove's, Jr., who only returned home from a sojourn in Canada last year.

He won 1st, 2d and 3d in cockerels with a grand team. Walter Firth won 1st and 2d in old cocks with two grand birds, while Mr. J. Lewis got 1st on hens and 1st on pullets. Old English Games, very popular and the quality high class, 94 entries and certainly a grand show. Mr. Ashley getting a nice share of the honors. Malays, few in numbers and quality about average. Indian Games, strong classes of fine birds, Messrs. Frayn, Birch, Hawkey, Brent and Goff taking the leading honors.

ASEELS.—Two classes, containing 20 entries, very useful birds for crossing purposes, being very solid and plump birds.

MINORCAS.—Heavy classes of high quality birds, Mr. Pitts winning 1st and cup on cockerels, 1st and cup on pullets. Magridge & Garlick and Lund Bros., following close up with grand birds.

LANGSHANS, 13 cocks, 17 hens, 44 cockerels, 43 pullets. A grand show, Mr. Walker won cup and medal for best cockerel, Capt. Terry winning 1st on pullets. Langshan fanciers here are troubled to find the proper type and I don't care to pass much on this variety. The winning birds were grand in plumage and condition, and the judge was considered competent by the authorities, and by the entries he secured must have been popular to exhibitors.

PLYMOUTH ROCKS.—There were 113 entries in 6 classes, a fine lot of this popular variety, but darker in shade and more open in marking than American exhibits. The winning birds were large in size with good yellow legs and feet, and were a much admired variety.

ANDALUSIANS.—There were 74 entries in 4 classes, Capt. Egerton Jones winning 1st and medal on cockerels, 1st, 2d and 4th on pullets. This beautiful variety improves in lacing and are certainly a very handsome variety.

LEGHORNS.—Brown, cock 1st, Cook & Fletcher. Hens, 1st and cup, Mr. Hay; 2d, Wilmot; 3d, J. Hurst. Larger in size than American birds, perhaps males are not so perfect in color but very nice in head points. White Leghorns, strong classes of fine birds, purity of color being a strong feature. Pile Leghorns, two classes, 16 birds. Improving rather slowly and plenty of room, yet in color they are lacking. Buff Leghorns, found Miss Pulford winning 1st and cup on cocks with a very large sound colored bird, tail a solid buff throughout; 2d and 3d, Mrs. Lister Kay. Fairly beaten; not a sound buff in tail. Mrs. Lister Kay however won 1st and 3d on pullets with good shaped birds; 2d, Miss Pulford failed slightly in color of tail. Duckwing Leghorns, wonderfully improved in color. The 1st and cup male bird wins well, very good in color, hackle rather stripy as judged from a Duckwing Game point, but sound body color and good legs and feet. Females, 1st, Gerahty, (the owner of winning male) a nice bird, good in breast color and very typical in shape. Black Leghorns, 11 entries, not a popular variety here yet.

ORPINGTONS.—Noticeable for the wonderful success of Mr. Partington, who after winning 1st and 2d on cockerels, and 1st and 2d on pullets at the Dairy show, comes out with a team and wins 1st and cup on hens. Cockerels, 1st cup, 2d and 3d in cockerels. Pullets, 1st, 2d and 3d, and only 7 entries, a clear win with marvelous birds of this new variety.

HAMBURGS.—Very good entries and the best birds in competition, Messrs. Kerfoot, Wood, Pickles, Rev. S. Ashwell, Meadow's, Ashley and Smith winning the majority of the prizes in their respective colors.

POLISH, found Mr. Partington winning both 1st prizes with birds of his usual excellence.

WYANDOTTES.—In this variety I had the assistance of one of our most noted judges in taking notes. Silvers, cock or cockerels, 28 entries. Cup, Heath. Pale in lobe, double laced on breast, good top color, nice size, moderate comb; 2d, Spencer, capital top color, good breast, fails in thighs; 3d, Anthony, capital breast, dark on top, good bars, good comb and legs; 4th, Abbott Bros., fails in top color, deserved its place. Hen or pullet, 22 entries; 1st, Heath, well laced bird, rather dark in hackle; 2d, Heath, good bird, well laced, but rather on the small side; 3d, Hunter, rather small and light in tail markings; 4th, Abbott Bros., nice

bird, an easy winner of 3d prize. Golden Wyandottes, cock or cockerel, 41 entries, cup, Heath, rather small, faulty breast, lacing light in tail and not a good comb; 2d, Pollett, nice color but double lacing on breast; 3d, Matthews, extra nice in color, grand breast and bars should have been 2d. Hen or pullet, 36 entries, cup Heath, good all round pullet, a gem, wins well; 2d, Bates, nice all round; 3d, Blake, rather pale in color. Any Other Color cock or cockerel (19 entries), 1st and cup, Anthony, a white, large in size, good shape, nice head points, pure in color, wonderful legs and feet; 2d, Miss Graham, a white, very much the type of winner, hardly so pure in color and smaller, good comb; 3d, Wren, a buff, but uneven in color, dark in hackle and tail; pen 2034, Glasgow, a white, poor comb, not enough work in it for English fanciers, slightly white in lobe, not a pure color, too narrow in body. Hen or pullet (19 entries), 1st, Miss Graham, a white, very fine hen, pure color, good head points; 2d, Readwin, a white pullet, very pretty, good comb, best of color, wonderful legs and feet; 3d, Brown, a buff, slightly tipped in hackle, fair size, plain comb, moderate body color, rather mottled; pen 2056, v. h. c., Glasgow, a white, fails in comb, no work in it, not pure in color, pale in lobes, nice shape, leg color not rich enough, well shown, looking very fresh. I made 2066 (Mrs. Grimwade) one of the best whites in the class, and fail to understand why she was out of the money.

GAME BANTAMS.—Black Red cock, 1st and cup for best old male, Warburton, a very good bird, tall and smart; 2d, Cooper, bright in color; 3d, Ainscough, tall and stylish, fails in color on wing end. Hen, 1st, Ainscough, perfect color and nice style; 2d, Stretch, stylish and neat color; 3d, stylish, not perfect in color. Cockerels, a grand class, 1st and 2d, Ainscough, the first bird a small, tall, fine boned bird, beautiful tail, nice color; 2d, larger, very stylish; 3rd, Cooper, bright in color and stylish; 4th, Cooper, nice color. Pullets, a grand class, Ainscough's being well nigh invincible, winning 1st and cup, 2d, 3d, and 4th, the cup winner a gem, small, fine in bone, perfect color, and a good win; others very stylish birds, excellent in color; 5th, Cooper, a stylish bird. Brown Red or Birchen cock or cockerel, 1st and 2d Brown Reds, 3d Birchen. Brown Reds very nice and good in color; the Birchen a very smart one of this variety. Hen or pullet, 1st and cup, Stretch, a Brown Red and a good one, wonderful reach and color; 2d, Brown Red, very good; 3d, Birchen, very stylish. Duckwing cocks (only five entries), 1st, Warburton, an easy win, grand color and style; 2d, Stretch, very fair; 3rd, Sneddon, too big. Hen (five entries), 1st, Walton; 2d, Taylor; 3d, Anderson; only moderate specimens, failing in color. Pile cock, good class (12 entries), the winners good in color and stylish. Hen (11 entries), Walton winning with a grand hen; Stretch also had a very stylish bird, winning third. Cockerel (13 entries), 1st and cup, Walton, a new one and a good one, too, pure white in his breast and good all over, a very easy win; 2d, Brewer, a very nice bird; 3d, Walton, stylish bird and in good condition; Messrs. Stretch and Mr. Binns had nice birds with cards. Pullet (14 entries), 1st, Walton, the best out this season, good in color, and good style, won nicely; 2d, Smalley; 3d, Warburton. Duckwing cockerel (10 entries), 1st, Hughes, the 2d Dairy bird, bought from Ainscough, very tall, extra good color and well shown, an easy win; 2d and 3d, Stretch, nice cockerels, fairly good color. Pullet (5 entries), 1st, Ainscough, a very easy win, grand color and style, and a small one; 2d, Stretch, stylish and neat, not quite perfect in color; 3d, Barnes, very nice color, not much style. Black Rose Comb cock, 1st and cup, Heath, I thought an early cockerel of this year, most feather, and if of age a nice one; 2d, Hopkins; 3d, Walton, fair birds only. Hen, 1st, Walton, with a beauty; rest of class very moderate. Cockerel, 1st and cup, Hyde, a wonderful feathered bird, very neat head, and in grand trim, won nicely; 2d, Brook & Wright, a nice bird, but I preferred 3d, Walton, who ran the winner close in some fanciers' ideas, a bird in grand form and beautiful head

points; 4th, Worsley & Waddington, a very taking bird, neat all over, but rather purple in color; 5th, Hyde, neat and feathery. Pullet, 1st, 2d, and 5th, Brooke & Wright, a good team, excellent in color; 3d, Walton, very nice pullet; 4th, Hyde. White Rose Comb cock or cockerel, 1st, Brown, neat in head, only fair color; 2d, Worsley & Waddington, my choice, better in color; 3d, Walton, hardly this exhibitor's usual stamp. Hen or pullet, 1st, Walton; 2d, Ricketts, two good birds and little to choose in them, winner the fittest and smaller; 3d, Walton, close up. Golden Sebright cock, any age, 1st, Preston, nice shape and lacing; 2d, pale in ground color; 3d, very nice and good color. Hen, 1st and cup, Leno, a beauty, grand color and lacing; 2d, nicely laced, but large; 3d, nice size, smutty in tail. Silver Sebright cock, 1st, Serjeantson, rather large, nicely laced, but not deep enough in color; 2d and 3d, Preston, small birds, grandly laced; 4th, Butterworth, not small enough and faulty wings; about the best in class was 2647 (Preston). Hen, 1st and cup, Serjeantson, beautifully laced; 2d, Barnes; 3d, Serjeantson; 4th, Preston, a beauty, might have been higher. Cockerel, 1st, Serjeantson; 2d, Preston; 3d, Geary, two former Silvers, Geary's Gold. Pullet, 1st and challenge cup, a Silver of Preston's, nearly perfect in lacing; 2d, Barnes, a grand Silver; 3d, Lady Alington, a rare good Gold. Pekin or Cochon, any color cock, 1st and cup, Walton, the well known buff, very even in color and shapely; 2d, Southam, my choice, very low on leg and wonderful foot feather; 3d, Walton, white, nicely shown. Hen, 1st and 2d, Warburton, the winner a white and a good one, grand shape and lots of foot feather; 2d, black, coming in nice form, and when ready a nailer, very shapely and good in feather; 3d, Walton, a buff, grand color and shapely.

BANTAMS.—Cuckoo Clean Legged cock, 1st and cup, Schofield, a grand barred bird, small and stylish; 2d and 3d, not so even in marking. Hen, 1st and 3d, Schofield, winner best in tail; 2d, Frankland, rather large. Malay cock, 1st, a white; 2d, red; 3d, white. Hen, 1st and cup, Warburton, a white, nicely shown; 2d and 3d, rather large, but stylish and typical. Any Other Distinct Variety cock, 1st, White Booted, a beauty, lots of feather; 2d, Japanese; 3d, grand Frizzle, well shown. Hen, 1st, a wonderful Black Jap; 2d, Grey Jap; 3d, Frizzle, in grand form.

Ducks made a grand showing, Mr. Partington showing a grand team in Rouens and took three cups. Aylesburys very fine in quality, and some wonders on show.

The Selling Classes contained a large number of good birds, and many were sold. The most sensational sale was the third prize Black Red Bantam cockerel of Rev. Mr. Cooper's, which goes to Parbold at the record price of £51 (\$250). Capt. Heaton claimed the h. c. Black Red Game cock at £50. A Buff Leghorn cock, first prize in class, was sold for £20, and many other birds went at long prices.

Many fanciers went away with a year's keep for their flocks in winnings, Mr. Partington, I fancy, topping the list with winnings to the amount of £52. Still, American fanciers have a far bigger prize offered them to compete for at the Mid-Continental, I notice in my AMERICAN FANCIER, and I only wish I could be there and win the "piano." W. F. Accrington, England.

The Middletown (Ohio) Show.

TO THE AMERICAN FANCIER:

The premium list for the Butler and Warren County Poultry and Pigeon Association's exhibition, January 1-5, '95, is now in the hands of the printers, and will be ready for distribution about December 1. It will be a book 6 x 9 in size, of about 50 pages, and generously distributed. We anticipate a large number of entries. Several requests are now on hand for premium lists. We will give cash prizes on the per cent. plan—50 per cent. to first and 25 per cent. to second prize in each class. Every exhibitor winning a prize will be sure of getting same. We have a guarantee fund of \$200 to draw from if the show

does not prove a success financially. Our judge on poultry is F. H. Shellabarger. Pigeon judge, C. W. Buttles, of Columbus, O., who offers as a special a life-size India ink drawing of the best bird out of any four varieties owned and exhibited by person winning the prize. Mr. Buttles will also sketch some of the winners at this show for THE AMERICAN FANCIER.

We invite all fanciers from far and near to exhibit with us, assuring them that their birds will receive the best of care and prompt return at the close of the show, with the premiums won, both cash and specials. J. H. BREDE. Middletown, Ohio, Nov. 22, 1894.

How to Prepare Fowls for Exhibition.

In the following essay it will be my endeavor to give a few plain and practical hints, such as I trust will prove useful and profitable.

Although this matter has been fairly well thrashed out through the medium of the poultry press, there are new beginners who are still thirsting for information and instruction. It is with a view of enlightening such beginners this paper is written.

It is a mistake to suppose that a few weeks' time is sufficient to get fowls into condition for exhibition, especially when we take into consideration the conditions under which beginners' fowls are generally kept.

It frequently happens a person is suddenly struck with the "hen fever," and without sufficient or suitable accommodation buys stock which may at the time be fit for exhibition; but, in consequence of inadequate accommodation, such as unsuitable houses and runs almost void of shelter, his once valuable exhibition birds fall out of condition, and their chances of winning prizes are hopelessly lost. If, therefore, you wish to get and keep fowls in condition, you must begin at the very root of the tree of success. Be sure your houses are large enough for the quantity of birds you intend keeping, that it is watertight, that it is properly ventilated, and yet free from draughts upon the birds when at roost. If your runs do not afford natural shade in the shape of shrubs and trees, it will be necessary to erect sheds for shelter, not only from rain and cold winds, but they must be so arranged that the birds are protected from the scorching rays of the hot spring and summer sun; for if the plumage is once tanned by the sun no amount of care and attention can bring them into fit condition for successful competition, until after their moult. Knowing exhibitors very rarely turn out, or attempt to breed from the birds they exhibit at our summer shows. Nearly all the winners at our agricultural societies' exhibitions are "bottled," i. e., they are confined in small runs, where they have sufficient light and air, but sun and rain are never allowed to touch their plumage, neither are they allowed the luxury of a dust bath for fear of damage to the plumage. They are, however, treated to a good wash now and then, and a sharp lookout for insect pests is kept, and if any should be found upon them, Keating's insect powder is at once resorted to. Suitable articles of diet, fresh water, grit, and constant removal of the run on to fresh ground, receive due attention from old hands, and, if you wish to succeed, you "must go and do likewise."

Fowls for exhibition must be kept in robust health, for without good health it is impossible to get them into condition for exhibition. Without health there is absence of that beautiful vermilion red color in the comb, face and wattles; there is also absence of natural bloom on the plumage, and without these natural characteristics in an exhibition fowl, all efforts to prepare it for successful competition will, undoubtedly, be in vain.

First of all, then, see to your houses and runs; make them fit for the occupation of exhibition birds; and, in the second place, attend to your stock in a common-sense manner, consistent with the object you have in view. These details having received due and proper attention, your birds will generally be in perfect health, and their plumage in the best of condition. Even then a good wash will often add greatly to their chances of winning. White or light colored fowls always look all the better for a thorough washing, for no matter how good your accommodation

for keeping them clean may be, their plumage becomes more or less soiled by being handled, and by being occasionally put in training pens in order to get them as tame as possible. A good wash is also beneficial to dark colored or even black birds. Their feathers and fluff are opened out and made more bulky by the process, the colors are also brightened, the birds look larger, and in many cases alters their appearance to a considerable extent.

The washing day should be three or four days prior to the exhibition, in order to give plenty of time for the feathers to dry and web properly.

Where there is convenience it is best to have three large vessels—viz., tubs or zinc baths, or the ordinary yellow washing bowls; arrange them so that one can be used after the other, without leaving hold of the bird you are washing. Two out of the three vessels should be a little more than half filled with soft warm water, rain water being preferable to any kind of water which has to pass through iron or lead pipes. The water in No. 1 vessel should be made into a good lather by means of a piece of good brown soap, or white soap and a sponge. No soda or washing powder should be used, as anything stronger than good soap is apt to take too much nature out of the plumage, leaving it a dead color, instead of a bright natural lustre. When you find it necessary to wash a bird at all, be sure you think of the proverbial saying, "If a thing is worth doing, it is worth doing well," for to half wash a bird is infinitely worse than being left unwashed. Having all your waters ready, No. 1 vessel containing warm water made into a good soap lather; No. 2 vessel containing clean warm water, about the same temperature as No. 1; No. 3 vessel should contain about the same quantity of water as Nos. 1 and 2, but this should be as near cold as possible, and should be very slightly colored with blue, squeezed through a flannel. Now proceed to take your bird well and firmly in both hands, clasp the wings and body, put him gently, feet first, into No. 1 vessel, and when his feet touch, the bottom you may expect him to make a spring, and if you are not careful he will jump out of his bath and very likely give you a share of it. This must not be allowed; hold your bird firmly, still gently, press the body down into the water until all except his head is immersed; move the bird about in the water until he ceases to struggle, by which time his plumage will have become thoroughly saturated. If the bird submits quietly to the operation, you may begin to use your sponge pretty freely; but if he is still determined to oppose you in your endeavors, place your left hand on his shoulders, pass your thumb under his left wing and your four fingers under his right wing, close your hand, and bring the two wings close together over his shoulders. The bird is then helpless, and you may proceed to sponge or scrub him as you like. The sponge of itself is scarcely sufficient for heavily feathered or very dirty birds; they require brushing with a soft brush, and the fingers of the operator may be used among the fluffy feathers to advantage. The neck and saddle hackles, also the thighs and fluff, must be thoroughly washed to the very skin, or your labor will be wasted. The head and legs sometimes require scrubbing with a soft brush. I prefer washing the head first of all, when the plumage is dry. A towel can then be wrapped around the bird's body, which can be placed under the left arm, held firmly in this position, leaving both hands at liberty for dressing the head. As for the legs, it is easy enough to scrub them after the plumage has been washed, for, as a rule, birds which have undergone the process of the first washing tub are ready and willing to submit to anything, especially if they have been thoroughly washed. Many good birds are not only spoiled for the time by being badly washed, but they are spoiled for a whole season. Therefore let me impress upon you the importance of thoroughness in this matter. Being satisfied that you have got all the dirt out of the plumage, squeeze out as much of the soapsuds as possible, wring out your sponge, and proceed to wash out all the soap in vessel No. 2. Take plenty of time in this matter, and satisfy yourself that you have rinsed all

the soap out of the plumage. This being done effectually you will now proceed to rinse your bird in vessel No. 3, which contains water as near cold as possible. Some fanciers use perfectly cold water for this purpose, asserting that it is more effectual in closing the pores of the skin, and so preventing the birds taking cold afterwards.

There are, however, in my opinion, many objections to rinsing birds in very cold water, and I find tepid water answers the purpose equally well.

After rinsing in No. 3 bath, spread a piece of clean canvas or a towel on a table; take your sponge, and squeeze as much water out of the plumage as it is possible to get, after which take a soft, dry towel, and dry the feathers as well as possible by this means.

Then place the bird in an exhibition hamper, with sufficient of the canvas let down to admit the heat from the kitchen fire.

There are, of course, proper and improper times of the day to wash fowls. The fore part of the day is best, for as the plumage dries the bird regains strength, and naturally rises on to his legs, moves about in the hamper, shakes and plumes his plumage during the day-time; whereas if he were washed in the evening he would lie still on his comfortable bed of straw till morning, when some parts of his plumage might not be thoroughly dry, and if the sickle feathers happened to be pressed against the lining of the drying basket they might dry in an unnatural position.

If, however, necessity compels you to wash a bird in the evening, I would advise you to hold it in your hand before the fire, until the sickle feathers are thoroughly dry; you may then place it in your drying basket and leave it for the night. Care should be taken not to put the hamper too near the fire, or the result will be blistered lobes and scorched plumage. Another caution is still advisable, viz., never wash a bird with a full crop; a little food will do no harm, but a full crop might be the means of losing your bird. It is my opinion that scores of birds have been killed in consequence of being washed soon after partaking of a hearty meal, therefore let me advise you to pay particular attention to this matter. When your bird is thoroughly dry, place him in a clean, roomy pen, well bedded with straw, and don't on any account give him the chance of a dust bath, or he will most assuredly take advantage of the opportunity.

After a good wash a healthy bird requires no further preparation for exhibition, and on no account would I advise you to put oil, vaseline, or any kind of grease on his comb, face, and wattles, for by doing so you close the pores of the skin, and in many cases bring on disease, which would never have visited your healthy stock had the grease not been applied to their skin.—Henry Digby in *Stock-Keeper*, England.

From "Ole Kaintuck."

Your paper is now a welcome visitor to many of our section, and will continue to grow in favor as it is better known. Our people are fully aroused to the good work of building up the poultry and pigeon interest in our State. I enclose under another cover a catalogue of our poultry and pigeon exhibition, December 5, 6 and 7. Nine hundred dollars in premiums. This will be much the largest show ever held in our State.

We regard yours as about the most beneficial poultry journal that we get from the north or east.

We will have reduced fare by rail and river, and the express company will return all coops to owners free of charge.

During the months of September and October we have chicken pox or sore head to contend with. This disease when taken in hand in time can be cured, but if allowed to run will develop in canker or roup, and then we find it very obstinate indeed.

Our club is in sympathy with the brethren, and will do anything to advance the poultry and pigeon industry.

ROBT. F. DULANEY,
President of Warren County Poultry and Pigeon Club.

Bowling Green, Ky., Nov. 22, 1894.

Awards at Warrensburg, Mo.

LIGHT BRAHMAS.—Cock, 1st 93, 2d 92½, B. F. Wood, Warrensburg, Mo.; 3d 89½, Mrs. Jas. D. Dyer, Hoffman, Mo. Hen, 1st 93½, Wood; 2d 93, 3d 92 (tie), Wood and Mrs. Dyer. Cockerel, 1st 95, 2d 94½, 3d 94, Wood. Pullet, 1st 95½, 2d 95, 3d 94½, Wood. Pen, 1st 190½, 2d 189½, 3d 188½, Wood.

BARRED P. ROCKS.—Hen, 1st 92 (tie), Rolla G. Carroll and G. A. Luvin, Warrensburg, Mo.; 2d 90½, Carroll; 3d 90, Luvin. Cockerel, 1st 92 (tie), Carroll and Wood; 2d 91½ (tie), Mrs. Dyer, Carroll, Wood, and Luvin; 3d 91 (tie), James Elliott, Warrensburg, Mo., and Mrs. J. A. Slifer, Chilhowie, Mo. Pullet, 1st 93½ (tie), Carroll and Wood; 2d 93 (tie), Emil Hinkle, Warrensburg, Mo.; 3d 92½, Elliott. Pen, 1st 184½, Carroll; 2d 183, Elliott; 3d 182½, Wood.

WHITE P. ROCKS.—Cock, 1st 94, 2d 93½, Mrs. Wm. Parker, Hoffman, Mo. Hen, 1st 95½ (tie), Mrs. Parker and Max Christopher, Warrensburg, Mo.; 2d 94½, 3d 93, Mrs. Parker. Cockerel, 1st 95 (tie), L. B. Thomas, Knob Noster, Mo., Mrs. Parker, and Chas. Shaffer, Knob Noster, Mo.; 3d 94 (tie), Mrs. Parker, Christopher, Shaffer, and J. M. Moore, Holden, Mo. Pullet, 1st 96 (tie), Shaffer, Mrs. Parker, and Thomas; 2d 95½ (tie), Mrs. Parker, Shaffer, Christopher, and Moore; 3d 95 (tie), Thomas, Shaffer, Mrs. Parker, and Moore. Pen, 1st 190½ (tie), Mrs. Parker and Shaffer; 2d 190½, Thomas; 3d 189½, Shaffer.

BUFF COCHINS.—Cock, 1st 92, Mrs. Dyer. Cockerel, 1st 95, 2d 94½, 3d 94, Mrs. Kate E. Lease, Knob Noster, Mo. Pullet, 1st 96, 2d 95½, 3d 95, Mrs. Lease. Pen, 1st 190½, 2d 189½, 3d 188½, Mrs. Lease.

S. L. WYANDOTTES.—Hen, 1st 89, Mrs. Slifer. Cockerel, 1st 92, Mrs. Venia Ramsey, Columbus, Mo.; 2d 91½ (tie), Mrs. Ramsey and Mrs. Flora Mabry, Odessa, Mo.; 3d 91, P. E. Gowdy, Warrensburg, Mo. Pullet, 1st 93, Mrs. Mabry; 2d 92½ (tie), Mrs. Ramsey and P. E. Gowdy; 3d 92, Mrs. Ramsey. Pen, 1st 184½, Mrs. Ramsey; 2d 182½, Gowdy; 3d 182½, Mrs. Ramsey.

WHITE WYANDOTTES.—Cock, 1st 92½, Asbury Hirsch, Warrensburg, Mo. Pullet, 1st 95, 2d 94½, Hirsch.

BLACK MINORCAS.—Hen, 1st 95½, Mrs. Dyer. Cockerel, 1st 95½, Lee James, Leeton, Mo.; 2d 94½ (tie), James and Mrs. Dyer; 3d 94, James. Pullet, 1st 97, 2d 96, 3d 95½, James. Pen, 1st 191½, 2d 189½, James; 3d 189½, Mrs. Dyer.

S. C. B. LEGHORNS.—Cock, 1st 94, James; 2d 92½, Luvin. Hen, 1st 95, 2d 91½, James; 3d 91, Mrs. Dyer. Cockerel, 1st 94½ (tie), James and Mrs. Dyer; 2d 94 (tie), James; 3d 93½ (tie), James Hamisfar, Warrensburg, Mo., and Mrs. Dyer. Pullet, 1st 94½ (tie), James, Mrs. Dyer, Luvin, and Hamisfar; 2d 94 (tie), James, Luvin, Hamisfar, and Mrs. Dyer; 3d 93½ (tie), James, Luvin, Hamisfar, and Mrs. Dyer. Pen, 1st 189½, James; 2d 188½, Mrs. Dyer; 3d 188½, James.

S. C. W. LEGHORNS.—Cockerel, 1st 94, 2d 93½, 3d 92, pullet, 1st 95½, 2d 95, 3d 94, pen, 1st 189½, all to Mrs. Venia Ramsey, Columbus, Mo.

BLACK LANGSHANS.—Hen, 1st 94½, Mrs. Jas. D. Dyer, Hoffman, Mo. Cockerel, 1st 94½, 2d 94, J. V. Campbell, Knob Noster, Mo.; 3d 93½, Mrs. Dyer. Pullet, 1st 95, Mrs. Dyer; 2d 94½, Fred. Puckett, Warrensburg, and J. V. Campbell, Knob Noster, tie; 3d, Mrs. Dyer and J. V. Campbell, tie.

W. F. B. SPANISH.—Cockerel, 1st 94, 2d 93½, 3d 93, pullet, 1st 96, 2d 95½, 3d 94, pen, 1st 188½, all to Mrs. Ramsey.

S. S. HAMBURG.—Cock, 1st 90, Chas. Owings, Centerville, Mo. Cockerel, 1st 91½, Owings and Max Christopher, Warrensburg, Mo., tie. Pullet, 1st 92½, 2d 91½, Owings and Christopher, tie; 3d 89½, Owings. Pen, 1st 183½, Christopher; 2d 182½, Owings.

B. B. R. GAME BANTAMS.—Cock, 1st 95½, hen, 1st 95½, James Hamisfar, Warrensburg. Cockerel, 1st 95, Emil Hinkle, Warrensburg; 2d 94½, 3d 94, Lee James, Lerton, Mo. Pullet, 1st 95½, Hinkle; 2d 94½, Hinkle, Hamisfar and James, tie; 3d 94, James and Hinkle, tie. Pen, 1st 189½, Hinkle; 2d 187½, James.

BLACK SUMATRA GAMES.—Hen, 1st 94, cockerel, 1st 94½, pullet, 1st 96½, 2d 96, 3d 95½, pen, 1st 190½, all to Hamisfar.

B. B. R. GAMES.—Pullet, 1st 96, 2d 95½, 3d 95, James Rice, Columbus, Mo.

INDIAN GAMES.—Cock, 1st 92½, cockerel, 1st 95½, 2d 95, 3d 92½, pullet, 1st 94, 2d 93½, 3d 92½, pen, 1st 188½, Mrs. Dyer.

GOLDEN SEBRIGHT BANTAMS.—Cock, 1st 93, hen, 1st 96, 2d 94, pullet, 1st 95, 2d 94½, 3d 93½, pen, 1st 188½, M. Y. Barnum, Warrensburg, Mo.

BRONZE TURKEYS.—Old Tom, 1st 97½, Mrs. Belle Butterfield, Knob Noster; 2d 97, Owings; 3d 96½, Mrs. Slifer. Hen, 1st 97, Mrs. Butterfield and Mrs. Dyer, tie; 2d 96, Mrs. Dyer and Mrs. Slifer, tie; 3d 95½, Mrs. Dyer, Mrs. Slifer and Chas. Owings, tie. Cockerel, 1st 97, Mrs. F. W. Ives, Knob Noster; 2d 96½, Mrs. Ives and Mrs. Butterfield, tie; 3d 96, Mrs. Ramsey and Mrs. Slifer, tie. Pullet, 1st 97½, Mrs. Butterfield; 2d 97, Mrs. Ives; 3d 96½, Mrs. Ives and Mrs. Butterfield, tie. Pen, 1st 194½, Mrs. Butterfield; 2d 193½, Mrs. Ives; 3d 192, Mrs. Dyer.

C. A. Emry, judge.

Illinois State Poultry, Pigeon and Pet Stock Association Organized.

TO THE AMERICAN FANCIER:

At Springfield during the progress of the State fair the Illinois State Poultry, Pigeon and Pet Stock Association was permanently organized by the election of officers as follows: President, Grant M. Curtis, Quincy; vice-president, Rhoda A. Judy, Decatur; secretary, Edward Levings, Paris; treasurer, Rainey Miller, Champaign; executive committee, Israel Root and S. S. Noble, Bloomington; M. W. Summers, Curran; S. T. Jones, Williamsville; and Daniel Robertson, Palmyra.

Leading breeders of the State were present at the above meeting, Judge

Heimlick, of Jacksonville, acting as chairman. The first annual show of the new association will be held at Bloomington on January 14-17, 1895, with D. T. Heimlick, of Jacksonville, and Theo. Hewes, of Trenton, Mo., as judges. Cash prizes will be offered on singles, pairs, and breeding pens. Mr. S. S. Noble, of Bloomington, will be superintendent of the show. A \$50 solid silver cup will be offered by the association on the largest number of highest scoring birds shown by one exhibitor, competition to be open to the world. This cup must be defended each year by the fortunate winner, otherwise it passes into the possession of the person showing the largest number of highest scoring birds at the last annual show.

The State Association is devoted to the general advancement of poultry culture and the poultry industry in the great Prairie State, and solicits the aid and good wishes of all concerned.

For further information address

RAINEY MILLER, Champaign, Ill.,
Acting Secretary.

Asiatic Fowls.

There are many people who keep the Asiatic breeds of poultry and never secure very satisfactory results. After a time they give them up and declare they would not again keep them for any consideration whatever. It is not the breed that is at fault for the lack of success, but the owner, who does not understand their management. There are also people who years ago saw the old-time Shanghai fowls, and those who have heard others tell about their peculiarities, who appear to think the Asiatic fowls of today are still the long-legged, long-necked specimens of by-gone days whose chief points of notoriety were the fact that they could stand and eat corn from the head of a barrel and lay the smallest eggs for their size of any winged specimens known. Their shambling gait and remarkable lankiness made them objects that always impressed the observer with the idea that they were just the breed he did not want to keep. The Brahmas of to-day are of a very different type from the Brahma-pootra of by-gone days, and the old Shanghai fowls have evolved to the magnificent Cochins that now grace our shows and are noted for their fine plumage and "great" Cochin shape. For years the light Brahmas have deservedly stood at the head of the Asiatics, their general excellence being the reward of merit that won them their popularity. Their plumage of pure white, with neck hackles of black running to a point and laced around with white and fine black tail points, gives them a beautiful appearance. As they move around on a closely shaved green lawn well-bred specimens present a most attractive and charming spectacle. The Light Brahmas lay the largest egg probably of any of the Asiatics. The Dark Brahmas, when bred to standard requirements, are a very handsome breed. The fact that it is necessary to have two sexes to produce standard plumage has been a great drawback to this fine breed. Highscoring specimens are comparatively rare, and in consequence command good prices. Well penciled females that are of the right color are rare. Many of the best penciled ones show too much of a shade of brown, and are inclined strongly to Cochin shape, thereby giving strong evidence of a Partridge Cochin cross to secure improved penciling. In comparison with the eggs of the light Brahmas those of the Dark Brahmas are small.

During the past few years there has been great improvement in all breeds of Cochins except the black. The Buff Cochins have been brought to wonderful perfection—the color has become simply perfection—and it is not mere surface color, either. Excessive leg and toe feather are points that have lately become a fad with Cochin breeders, and some of the finest specimens show little or no daylight under their body. Eggs are of the medium size.

The Partridge Cochin of today is a marvel of beautiful bright colors. The male, with his black-pointed neck hackle, laced with bright orange red, and a saddle similarly marked, broad, black breast, wings with their brilliant, greenish-black

and red-maroon colors, and tail greenish-black, make a combination of beautiful colors so harmoniously blended that those who see such a specimen for the first time are delightfully astonished to find such things really exist with poultry. The females, when properly penciled and of the right color, are also remarkably handsome.

The White Cochins—good specimens are scarce. It appears to be more difficult to retain the true Cochin type with the whites, and there is also a tendency to scant leg and toe feathering a fault not to be tolerated with Cochins. When the true type of the Cochin family is found among the white they command attention and admiration. The Black Cochins are becoming notably scarce. Before the advent of the Langshans in this country this breed used to be extensively shown in the poultry exhibitions. The Langshan is fast crowding them to the wall, and it is now rare to find a Black Cochin at the shows in its purity, but quite often some that have more or less Langshan blood in them are shown as Black Cochins. The pink skin between the toes and absence of yellow on the bottom of the feet are reasons why many so-called Black Cochins are thrown out by the judges. The Langshan is prominently distinctive—it is neither a Brahma nor a Cochin, but has a shape of its own. The head and tail of the male when in proper shape forms a line like the letter U. The leg and toe feathering is scant and the plumage is a fine black that has a remarkable stem of a metallic greenish lustre, possessed in a much greater degree than probably any other breed. The brilliancy of the plumage of the Sumatra has been frequently noticed, but the Langshans excel them in this respect. The Langshan is fast winning its way to fame as the best breed of the Asiatics. The chicks are rapid growers, feathering quicker than any other Asiatics. The pullets commence laying early, and eggs are fine in size. Hens are good mothers. Asiatics are not the kind of poultry for lazy men to raise—that is, those who imagine all that is necessary to make a great success with poultry is to let them have all the corn they will eat. Unless judiciously managed the Asiatic breeds become very indolent, and if they can get plenty of food will lie around and become so exceedingly fat that the hens will yield but few eggs. Especially is this the case where corn is the main diet. They should be made to work for their feed—the grain should be scattered, of course, when weather and surroundings are suitable, among litter, where they will have to scratch for it. Their food should be varied as much as possible, and one feed each day should be of a bulky nature. A good morning feed is made of ground oats, ground or crushed wheat or barley, cornmeal and wheat bran. To prepare this, take the following parts: Two quarts of the ground oats, one quart of crushed wheat, two quarts of cornmeal, two quarts of wheat bran and mix all thoroughly together while dry, and then pour on enough boiling water to mix to a consistency that will be of a crumbly nature—not sticky. This for one morning's feed, the next morning change feed by leaving out the cornmeal, then make for the third day another change by using two quarts of the crushed barley or barleymeal instead of the cornmeal. In fact this combination can be varied in many ways. The food advised is a good flesh-former and egg-producer and will be found excellent for laying hens. Of course the growing chicks should have this same food, but an addition of raw bonemeal should be made to it at the rate of a heaping tablespoonful for each quart, and the chicks should be given raw bone, cut or crushed, every two or three days. Asiatics can be taught to look around for their food by scattering the grain among litter in out-of-the-way places. For winter sheds should be provided and a good supply of dry leaves secured to put in them to scatter the grain among. On farms there are generally plenty of broken straw and coarse litter that is just the thing for this purpose. When the lands are rough and the sedge grass grows near the hen house it is a grand place to scatter the grain, and the hens will soon learn to hunt and scratch for it. The Asiatic fowls, properly handled, be-

come great favorites, and as much so on account of their proving to be profitable as from their attractive beauty.—[G. O. Brown in Baltimore Sun.

Getting Ready for Winter.

If we expect to keep poultry for profit this winter there are three things we must decide upon immediately: First, the number and class of fowls we shall keep; second, what accommodations we can afford to give them; and third, what we are going to give them to eat.

In Kentucky, where I live, chickens having free range on the farm can pick up the greater part of their living during seven or eight months of the year. They can roost out-of-doors at night during that length of time, and in fact, are better off for so doing, so it does not greatly matter with us if their number does exceed our allotted limit. But for the remaining four or five months of the year all this should be changed—comfortable quarters the chickens must have if we expect them to do anything, their number must be suited to their accommodations, and sufficient food of a suitable variety must be provided for their consumption.

In the Northern and Eastern States, where poultry keeping as a business, is much more largely engaged in than it is with us, chickens in winter have to be housed the greater part of the time; hence poultry houses there must not only be larger, in order to give the hens room for exercise by day, but also have to be built much warmer than ours, in order to enable the fowls to endure the long cold winters. There, a house 10 by 10 feet is advised as the proper size for keeping a dozen hens, but here where it is seldom necessary to keep up the hens for more than a few days at a time, only during an occasional cold spell, we may keep twice that number in a house of that size, especially if a porch be added on the sunny side where the hens may be sheltered and yet enjoy the sunshine and fresh air which they dearly love.

If a poultry house is to be built, remember that it is the floor space which is most utilized by the fowls, and also that the taller the house, the colder it is likely to be. It is a common sight to see a hen-house 12 or 15 feet to the combs with a floor space sometimes of no more than 10 by 10 feet. We cannot get it into our heads that our hens do not need as tall houses as we ourselves do.

It is only for our own convenience in caring for them that the ceiling need be high enough for us to stand erect under, for if the perches be only two or three feet from the floor, the hens are all the better off for it.

We never think of heating a poultry house artificially in this country, but we ought to try to make their houses snug and close for the winter, and to have in them one or two glass windows, so that our hens may have cheery, comfortable quarters in bad weather.

A good, tight floor the house should have by all means and to make it warmer still, cover the floor at the beginning of winter with an inch or two of dry earth, and add three or four inches of dry leaves or chaff upon which to scatter grain, so as to give them a good scratching place.

Made comfortable and happy in this way, the hens will delight to stay indoors in cold weather, instead of standing around outside trying to endure the cold and sleet, shivering in the biting winter winds and getting their combs and feet frosted over and over again. The hens will gratefully repay us for our extra care and expense by their increased egg-production. But indeed the expense is not so great as many persons seem to think; the winter price of three or four dozen eggs would pay for all the glass windows a house needs—for I am not an advocate of very much glass.

The litter, well mixed as it will be with dry earth and manure, should be taken out every month or two, and new fresh litter supplied. This old litter I used one spring when planting the early potatoes, spread it in the furrow, and it brought the largest, finest potatoes we ever had. How we did enjoy them, coming in so early, and so big and mealy! The mixture seemed just to suit them.

The size of the house should regulate

the number of hens that may be profitably kept. But be sure that every hen is a good one. Superannuated fowls should be promptly disposed of; neither would I start out with a lot of immature pullets. A pullet that is not grown at the beginning of winter is a dwarf, nor will she lay a single egg to pay for her keep until spring.

A young cockerel must be very fine indeed to pay for wintering, and as for old roosters—better cut their heads off at once and throw them away. I know numbers of people whose flocks contain 50 per cent. of just such worthless members. It is much more satisfactory to keep just the ones we need, and feed and care for them in such a manner that they shall be both a pleasure and a profit.

Before the cold weather sets in, the winter feed for the flock should be stored away in some convenient place. If grain is to be bought, it is cheaper to buy it in large quantities in the fall. Some ground food I would also have—wheat bran, middlings and cornmeal. Provide some small grain to scatter in the litter—wheat screenings are cheap and answer the purpose admirably; and for cold winter evenings give whole corn.

Other grains may be substituted to advantage for these mentioned, for our flocks enjoy a variety just as we ourselves do. And on the farm, if one only thinks about it, some change may be made in their diet every few days. Chickens are such thankful things, they accept gratefully what other live-stock refuse with disdain. When the potatoes are dug, put aside for the poultry the small, unsalable ones; and if sorghum be raised for the cattle, by all means let the chickens have the seed. There is nothing they like better, and it is certainly very wholesome. One of my neighbors has stock peas gathered, and lets the chickens have the pleasure of getting them out. Some green food should be given every day if possible. Ensilage is excellent, and good clover hay cut in half-inch lengths, steamed and sprinkled over with wheat bran, is gladly welcomed.

Instead of abusing the chickens for getting over into the garden and stealing winter cabbage and turnips, I think we ought to provide some of both especially for their benefit. A small lot adjoining their yard sowed in hardy winter turnips, would, in this locality, afford them grazing nearly all winter. Crimson clover is also good. That grows in cool weather, and would moreover come in finely in early spring, several weeks before anything else. And why not sow a little patch of wheat or rye for them? We all know how hard it is to keep the chickens off the young wheat in the fall.

We should provide some sort of grit, too, for our flocks in winter. It is too bad to make the poor things go hunting around for it in the bleak wintry weather. The fowls should have some meat, if possible, every day in winter. And we must not forget the dust bath—the hen's toilet, as some call it. No one can say this year that he could not get enough dry dust.

Before putting the flock into winter quarters, cleanse the house thoroughly and apply some sort of disinfectant and insect destroyer. My favorite is a white-wash made of unslaked lime containing salt, coal oil and a generous quantity of crude carbolic acid.

I do not mean that poultry in this country should be kept confined all the time. Let them out by all means on warm, bright days; but see that they are comfortable and happy indoors in the bitter freezing weather, and they will repay us gladly and liberally.—"A Farmer's Daughter" in *Country Gentleman*.

Poultry at Fairs.

In too many cases the poultry exhibits at the agricultural fairs are not given the encouragement or prominence they deserve. The poultry industry in this country has grown in the past few years wonderfully, and the amount of capital invested alone in broiler-raising and large exclusive poultry farms has simply become enormous. Broilers are raised in towns by fifty to one hundred thousands, and there are several duck farms where the annual product of ducklings is from five to twelve thousand. There are specialty egg farms, and those engaged

in raising pure-bred poultry in medium-sized and small flocks have increased so that all sections of the country are becoming conspicuous with the flocks of well-cared-for poultry. This has been brought about from very little encouragement offered by agricultural fairs. On the contrary, the accommodations and treatment afforded the poultry at many agricultural fairs has been such as to completely disgust poultry-raisers. Other branches of live stock are supplied with appropriate accommodations and are shown singly, so that each specimen has a chance to win a prize on its individual merit.

At many fairs the poultry is generally shown in a leaky tent or a corn-crib affair that is masquerading as the "poultry building." Even these poorly contrived arrangements are often so constructed that it becomes necessary to pile the coops up two or three tiers high, often shutting off what little light there is struggling through the measly windows. These are not all the tribulations the poultry exhibitor has at many agricultural fairs, for the judging is too often done by a committee who seem to be selected for their inexperience and entire lack of knowledge of the different breeds of poultry. Disqualified birds are given premiums, first-class birds are set aside and inferior specimens (to use an emphatic, but perhaps inelegant expression) "get there."

It is time to call a halt on this business. The ignoring of such an important interest as the poultry industry has grown to be should cease. The prize money offered to white rats, rabbits, squirrels, guinea pigs, to-day stands on a par with the poultry prizes with some of these fairs.

What the poultry-breeders want is prizes on single birds and not on pairs. Let each specimen stand or fall on its merits. When shown in pairs a good bird in bad company suffers, and often a pair gets first prize because their points added together place them in advance of some other pair, one of which may be greatly superior to either of the pair winning first. Were the birds judged singly, instead of in pairs, probably neither one of the birds that won as a pair would get a place. Whether the agricultural societies can be induced to give an increased amount of prizes and have them competed for singly is a question. Doubtless poultry-raisers would rather have the amount of prize money given on a pair divided and let the male and female specimen stand their chances. Single bird prizes is the only method that permits the best specimen to secure the awards.

There are, it is most agreeable to note, exceptions to the state of affairs mentioned above. There are some agricultural societies that have long since recognized the immensity and importance of the poultry industry. Such have excellent poultry buildings on their grounds and prizes are offered on single specimens, both fowls and chicks. Maryland is behind no state in this respect, and the poultry exhibit at the Hagerstown agricultural fairs for a number of years have been noted for the great numbers and excellence of the stock. The single-bird system has been adopted and well known poultry judges are secured. Last season five thousand head of poultry were shown at the Hagerstown Fair, and this year the number was still greater. The methods that have brought about this state of things is single-bird prizes and having them judged by experts. Many of the winners at this fair are subsequently sent to the leading poultry shows during the winter, where they also often are selected for the highest honors. The agricultural fairs should offer inducements for specimens of dressed poultry. This is a practical branch that does not receive proper encouragement. Prizes properly given in this branch would be very interesting. Premiums could be offered for the best specimen (dressed) of the different breeds and a sweepstake prize for the best over all. Two prizes could be given in each, one for best dressed chick under six months old and another for best dressed fowl over one year old. The judging of these specimens should be governed by a set of rules and points same as judging poultry by the standard. The carcass, for in-

stance, should receive points for plumpness, condition, firmness, neat appearance and other essentials.

To prevent fraud, each exhibitor should furnish a sworn statement as regards age of specimen. The neck hackle and wing (flight) feathers, should remain on the specimens to prevent passing off one breed for another.

A little study in arranging a method for conducting these exhibits would result in making such a department of great practical interest in the fairs. The winter poultry shows might also give this branch of poultry more substantial encouragement than they do. Wherever agricultural fairs have given proper attention to the poultry interest the poultry exhibits have grown to be one of the leading features. In many sections the agricultural societies are permitting the local poultry clubs to have the poultry exhibits held under their auspices. This is well enough, but the poultry interest has now become extensive enough for the fair authorities to give it the place it merits, both in good, weather-proof accommodations and the allotment of a proportionate share of prize money.

Poultrymen in all sections should unite and demand that the poultry industry receive proper recognition at the fairs. The employing of recognized poultry experts and offering prizes on single specimens will soon bring about a great difference in the excellence of the stock. The extra compensation that expert judges would have to be paid would be more than counterbalanced by the prize money that is usually given away on inferior disqualified specimens, as a single trial will convince any agricultural society.—[G. O. Brown in Baltimore Sun, Oct. 6, 1894;

Practical Pointers.

BY GEORGE E. HOWELL.

[Address all Communications for this department "Practical Department," AMERICAN FANCIER, Johnstown, N. Y.]

Last week I answered a query relative to soft shelled eggs, and finished by advising the party to feed wheat moderately in such a shape that every kernel had to be worked for. Perhaps some have wondered why I selected wheat wholly. It was not because I consider wheat to be the hen food par excellence.

If the egg organs of those hens were healthy and they have plenty of grinding material the sole trouble was too much feed. No hen will lay a soft shelled egg if she has to scratch for her living, and the masters of chemistry tell us wheat contains a large proportion of lime.

A hot wash in the morning composed of bran, cooked vegetable and fine quality shorts scalded and mixed together, plenty of sunshine and fresh water during the day, and at night a generous feed of oats and corn whole, at a ration of 1 to 8 in favor of corn, is all the food necessary for a flock of hens.

If I wanted eggs from a flock fed in this manner, I would not look for them through an extra bucket of feed at noon, but I should litter the floor nicely with leaves, straw, chaff, anything clean, and into this I would scatter a thimbleful of wheat. It will keep them scratching a couple of hours, whereas a bucket of feed would incline them to sit on the edge of the feed trough and nest boxes, teaching them to get fat and lazy, and to eat eggs and pull feathers.

This method of handling does not admit of hallways and patent constructions for feeding and gathering the eggs; you must go right in among them, and I want to say to you, here comes the greatest pleasure of a fancier's life. Fowls get to know you, Leghorns will come up fearlessly to see what you have for them, you can pick the eggs out of the nests without having a general commotion and perhaps a broken window light or so. A hen has a conscience and don't you forget it. Make your houses so you like to go in them yourself, and on cold stormy days give the fowls a mess of boiled oats or steamed clover, something to set their blood in circulation. Hens attended to will lay. Those that stand around in the

snow on one leg with frozen comb and wattles, are the ones that never lay until the gentle zephyrs of springtime play through their whiskers, unless mayhap old Jack Frost and neglect cause them to lay for all time and from which there is no awakening.

When I started out I had no intention of running along in this style, but I can truthfully say, I found not a little pleasure in putting these hints into practice, and if any of these pointers benefit a reader my time has been well expended.

Fattening Geese.

As geese are sold at so much per pound, it is, of course, every breeder's aim to produce birds possessing as much weight as possible, therefore a few hints on the best method to attain this end may not be out of place. After harvest, farmers usually let their geese out in the stubble fields, where they get as much corn as they can eat, besides many choice pieces of green stuff, which they are very fond of, and they will often put on from 2 and 4½ lbs. each in weight, according to the size of the birds, after being out three or four weeks. In many instances before they are put out in the stubble they have nothing given them but grass, so that they are usually very thin when first put out, and it is a great mistake after the stubble has been cleared up to again give them grass and no corn, as they will lose almost as much in weight as previously gained.

Geese which are allowed to go in the stubble field when the corn is all picked up should be given a feed of corn once a day, then they do not go back in condition, and if treated in this way they will not require anything like so much food when being fattened. Any goose crossed with the Toulouse usually fattens quicker than other crosses, but there is not much difficulty in getting geese into prime condition if they are treated properly, and if in good order they do not require to be shut up more than three weeks and a few days, but if they are poor they require quite a different treatment. If thin they should be fed upon corn twice a day, which should be in a trough of water, and with a common of grass to run on, will soon enable them to pick up in weight. One feed should consist of barley or Indian corn, and the other may be oats or wheat, but the oats must be good. Just as much grain should be put in the water as they can clear up at once, as these birds eat more food in proportion to their size than any other variety of the feathered tribe. It is a well known fact if these birds have a good grass common to run on, their necks may be seen bulging out half way up with grass, as they are capable of taking as much food at one meal to last them for twelve hours. I specially mention this, as it is common to see people throw a lot of food down to last the geese during the night, which is not only wasted, but it harbors rats and mice.

Geese in good condition should be shut up from twenty to twenty-five days in a quiet place shaded from the light, so that they cannot see outside. They should be let out first thing in the morning for about fifteen or thirty minutes, and good nutritious (hot or warm) food should be given them, such as barley meal, wheat meal, a little maize meal, and boiled potatoes, all mixed together, and put into a large trough a little at a time, so that it can all be cleared up. About the last twelve days a little rough fat should be mixed with the meal, which has the effect of plumping them up, and rendering them much more palatable. They should be allowed out again in the evening before dusk for fifteen or thirty minutes, and fed in the same manner and on the same stuff as in the morning, after which a trough of clean water should be supplied them, so that each one has a little. If geese are fed well and are allowed to run about they do not have sufficient rest to enable them to make fat, and if they are shut up, where they can see other geese running about, it makes them restless.

Farmers should always use straw or rough chaff in the shed or house where the geese are put up to fatten; but in all cases they should have plenty of fresh air. Geese are very hardy, and can stand being shut up in a confined place. As a substitute for chaff, fine short shavings can be put down, as if the geese are

white, the feathers are kept much cleaner, and are more valuable when the geese are plucked. If shavings cannot be procured peat moss should be used; no water must be put inside the place for the geese to drink, but they must be let out, after they are fed upon soft food, for this purpose. A better plan still is to put troughs outside the house for the geese to feed from, and give them a little water to drink before they go in. If a little care is taken in this respect the white feathers do not get stained, and they pay well; but it is only during the last few days that the plumage need be studied in this way. If the geese are a little dirty they will soon wash themselves if they are allowed to go in a pond. I have known large geese put on from 4½ to 6½ pounds under thirty days when fed and treated in the way I have described.—Wm. Cook in *Poultry* (England.)

PIGEONS.

Editorial Squibs.

Major Gilbert's book, "Pigeon Keeping: Hints to Beginners," is now in its third edition. New chapters have been added and the entire book remodelled. The demand is still as large as ever for this popular book. We can supply it to the trade in large or small lots at most favorable figures. Single copies will be sent to any address in America or Europe on receipt of fifty cents.

The Peoria (Ill.) "boys" are hustlers. They have succeeded in getting up a rattling pigeon show, notwithstanding the fact that they offer no regular cash prizes. Over 700 pigeon entries is a fine showing. What is more, they presented a petition to the Common Council of the city asking for its endorsement of the coming exhibition, which was readily granted. The interest taken in the show by the citizens is highly gratifying to the managers and members of the Peoria Association.

Our Peoria correspondent sent us a short letter for publication, which will be found in this issue of *THE AMERICAN FANCIER*. It contains some excellent suggestions regarding the holding of a great show in Louisville in '95 or '96.

Thieves entered John H. Kuhn's lofts recently and stole many of his best birds. Although Mr. Kuhn has offered a large reward for the recovery of his birds, the latter and the thieves are still untraced. We trust that both may be found and the robbers punished to the full extent of the law in such cases. A chicken and pigeon thief is the meanest specimen of humanity that walks the earth, yet there are few shows where one or more of such rascals do not get in their fine work. In a number of instances in past years, certain individuals were spotted, who held reputations of considerable importance in the fancy and elsewhere. This is the most dangerous class, as they are never suspected, and, when detected, crawl out of the scrape by claiming the theft was an accident, they got the wrong bird, &c. Leniency on the part of show managers and the press has prevented several exposures in this line of thievery, but we are afraid such a course is the wrong one. If a pigeon thief or "transferrer" of birds is detected in the act, he should be punished. This is the only safeguard an honest exhibitor has when sending valuable birds to a distant show. To allow the rascals to escape is simply to give them another chance.

Major F. M. Gilbert has gone to Evergreen, Alabama, for his health. Every pigeon fancier in America will wish him a speedy return of that most cherished gift of God, good health. When we recollect the bubbling spirits and trenchant wit of the "good old Major" at Chicago last year, we can hardly realize that he is now engaged in a struggle between life and death. May the veteran be spared to the fancy for many years to come.

H. C. Norton, one of the veteran Fantail breeders in America, started advertising in *THE AMERICAN FANCIER* last week. Mr. Norton is now located at Newburgh, N. Y.

Another new advertiser in this week's issue is the Rev. J. J. Hanselman of Brooklyn, N. Y., whose columbary is one of the finest and most complete in this section of the country.

In the same issue C. A. Koehler, also of Brooklyn, N. Y., begins advertising his Jacobins. It is with particular pride *THE AMERICAN FANCIER* looks upon its pigeon advertisers. They are among the best and most representative fanciers in this country.

E. F. Webb sends us several samples of his improved 1895 pigeon bands. The year and loft numbers are raised, not sunk in. No initials are placed on these bands unless specially ordered. They are made in all sizes and are well finished. Mr. Webb also makes open aluminum bands, marked to suit.

Louis Korb, of Louisville, Ky., sold his entire collection of Swallows, including his prize winners, 26 birds in all, to George Zanone of the same place.

Mr. Korb will, in the future, breed only Pouters. He has a fine steed of American bred birds on hand now, but writes us that he will import some of the finest to be obtained in England. He has built a fine loft back of his new residence.

Peoria Show.

Weil, what do you think of an entry of more than six hundred pigeons closed Nov. 15th, 1894, for the Peoria show? The poultry department entries close Nov. 24th, many entries are already made in this department. Fantails take the lead with 85 entries for competition. Fanciers from one fourth the states of the Union have patronized this show of "ribbons," as it has been called, owing to the lack of cash premiums. A glance at a list of a few of our patrons will suffice to show what is thought of Peoria and Peoria fanciers, Edward Hazeldine, Terre Haute, Indiana; M. B. Blauch, Lebanon, Pa.; Louis Farr and Fred C. Weiss, Evansville, Indiana; P. F. Hager and J. H. & J. B. Howe, Nashville, Tenn.; Chas. Henschel, St. Joseph, Mo.; Harry Hoffman, Chas. Tanner, Page & Shippen, Ormsby Bros., of Louisville, Ky.; John Reid, Sumpter, S. C.; Peacock & Smith, J. H. Whitman, Chicago, Illinois; Geo. Ewald, Cincinnati; C. M. Sweeney, L. W. Schimmel, Detroit, Mich.; Henry Tieman, Baltimore, Md.; Carl J. Weick, Ellsworth, Kansas; F. Tudor, Boston, Mass.; F. A. Rommel, Baltimore, Md. and many others. In my estimation this speaks volumes for the principle of no cash premiums except for specials and also is an excellent compliment to the Hon. John H. Kuhn, who is to judge pigeons. One of the most ardent fanciers and breeders recently wrote me, and to quote him will explain his and many other true fancier's views, "It is better to give no cash prizes than to offer them and fail to fulfill your agreements." Now I believe by the formation of a Middle States Association, one or even two good exhibitions could be given each year in the Middle States without conflicting dates, and the association could well afford to pay liberal cash premiums to compensate shippers for their trouble and expense. Cincinnati will have her show this season, Nashville and Peoria theirs. Now let these three cities join hands with Louisville, Ky., for the season of 1895, each and every one of us put our heads and shoulders together, give Louisville a push, which will result in giving to the west a mighty exhibition. In advocating Louisville it is understood that they want a show next season. "In union there is strength."

C. W. ROBISON,
Peoria, Nov. 21st, 1894.

THE BEST HE EVER TRIED.

THE AMERICAN FANCIER is the best advertising medium for the price I ever tried. Honest stock at fitting prices goes like hot cakes. B. E. DAVIS.
Bethel, Vt., Nov. 29, 1894.

Pigeon Notes.

BY JOHN HOPEWELL.

[ALL RIGHTS RESERVED.]

Continued from November 24th.

The variety of Oriental Frills known as Blondinettes are said to have been produced by a cross of Blue and Silver Owls or Satinets. In this variety the head, neck, body, breast and thighs are of a solid color, while the wings are white, tinged with pink, each feather being edged or laced with black or very dark brown, and ending at the point in the form previously mentioned as arrow pointed. The shaft of the feather should also be dark, shading outwardly to a lighter color, thus giving the feather the appearance of being laced both on edges and in the center. This lacing should extend to the saddle or rump. The flights are of some ground color as the wings on inner web, shading to a darker color on outer web. At the end of each feather is an oblong white spot with a dark lacing around it, this dark lacing being also found on the edge of each feather. The tail is of a darker shade than the body, ending in a still darker band, and in this band appears a round white spot edged with brown or black. The tail when closed, has the appearance of having a white band across it made by these spots. When spread and in perfect condition, these spots prove very attractive. The neck of this variety is beautifully tinged with a lustrous sheen embracing all the beautiful colors seen in the spots on the peacock's tail. The colors of the Blondinette are Black, Dun, Blue, Red, Yellow, Sulphur and Silver, and according to this color they are known as Black Blondinette, Blue, Blondinettes, etc. The color of their eyes vary from dark brown to orange and gravel according to the color of the body of the bird, and in like manner their bills shade from black to a lighter color.

BRUNETTES.

These are an offshoot or sprout from Satinets, and have a similarity of marking, except that the tint is of a delicate grey color, the marking or pencilling being of a darker grey. The tail is of some grey color ending in a darker band, and with the white spot at end of each feather.

BLUETTES.

These have the same color of neck and body as Satinets, but have blue shoulders with wing bars edged with black and then shading into a pink. Tail blue, with the white spots edged with dark blue. Wing primaries white.

SILVERETTES.

These have pale silver grey wing bows or shoulders, each feather edged with a darker shading of grey, but blending so with the main color as hardly to be noticeable. Bars should be white edged with brown or very dark grey. Tail, grey, with white spots edged with dark grey. Wing primaries white.

THE VIZOR.

This variety of Oriental Frills resembles the Bluettes in marking of wings and tail, but in addition the head should be of same color as wings. The line of color extending from the back of the head begins at the lower part of the crest and extends in a clearly defined line to the point where the gullet meets the upper point of the frill. This coloring closely resembles the coloring of the head of a Nun. According to the color so the birds are known as Black Vizors, Blue Vizors, &c.

TURBITEENS.

This variety of the Orientals much resembles a Turbit in form and general characteristics, having the same shaped head and body, with the frill, the peak, and colored shoulders. But in addition its legs and feet are covered with feathers like other Oriental varieties, and its forehead and cheeks or jowls are colored the same as the wings. The colored spot on the forehead is oval shaped, appearing as if someone had wet the ball of the finger with a dye, and pressed it against the forehead. Those on the cheeks are pear shaped, and extend from the beak to the base of the crest just below the eye, the narrow point of the marking being at the beak. The three spots should not run into each other, but be divided by a line of white one from

the other. Birds with only the forehead markings are allowed, but those with the three spots are preferred. Also, birds without peaks or crests are allowed. All the colors known to the Turbit family are admissible. These are a difficult variety to breed true, but very attractive when perfect. Upper mandible of beak dark, lower mandible white.

THE DOMINO.

This variety also is numbered among the Orientals. This bird's head should be colored like a Vizzor's, only the color should extend farther down the neck, forming what is known in Nuns as the bib. Its body and legs are white, but its shoulders and tail should be of one solid color throughout. Primary feathers white. Legs like the Turbit, free from feathers.

Common Defects and Disqualifications of Oriental Frills.—Foul breasts and thighs, scarcity of leg feathering, foul feathers in wings and tail, lack of spots, irregularity of wing lacing, poorly shaped peaks and crests, and absence of frill.

Mass. Columbarian Association.

TO THE AMERICAN FANCIER:

The semi-monthly meeting of the above association took place at the usual place, 133 Blackstone street, Boston, on Friday evening, November 23, when some 25 members put in an appearance, and this not being a business meeting the evening was spent in very pleasant pigeon chat.

Black Baldhead Tumblers were exhibited by Mr. Horsman and White Crested Fantails by the Messrs. Pratt and Christmas. Mr. Albee awarded 1st and 2d on both cocks and hens, Black Baldheads, to Mr. Horsman, and Mr. T. Willett awarded 1st and 2d on cocks and hens, White Crested Fantails, to Mr. Pratt, and 1st on Fantail cock, 1894 hatch, to Mr. Christmas.

The Boston show was the main topic of conversation, and the prevailing sentiment was decidedly in favor of supporting the show with as many entries as possible in order to bring the same to a successful issue. The promoters deserve a great deal of credit, and it behooves all fanciers in the States, and especially those of the New England States, to support the show in this way. I notice by the premium list that Mr. John H. Kuhn is appointed as one of the judges, and I think the majority of fanciers will bear me out when I say that no pigeon show would be complete without his presence. This gentleman seems to be the life and soul of any pigeon show, and I can compare him favorably with what the violin is to the orchestra and the clarinet to the military band. He is, indeed, a leader; so come one, come all, and let us give Mr. Kuhn that welcome he so richly deserves, and try and make the first exclusive pigeon show in Boston a decided success.

Unless postponed on account of the Boston show, the next meeting of the M. C. A. will take place on Friday evening, December 14th, and the varieties to be exhibited are: Trumpeters, any color, cocks and hens; Barbs, Black and Dun, cocks and hens; Runts, any color, cocks and hens; Florentines, any color, cocks and hens; Homing pigeons, Silver and Blue, cocks and hens; and all the same in young birds of 1894 hatch.

GEORGE FEATHER,

Corresponding Sec'y.

Ballou ave., Mattapan, Mass.,
November 26, 1894.

Stray Homers.

TO THE AMERICAN FANCIER:

I would like to find the owner of a light Red Checker Homer cock wearing seamless aluminum band, marked "W. A. H." This bird was picked up about six weeks ago by one of my neighbors and was in an exhausted and "ragged" condition. After keeping it confined in a small box several weeks, I at last succeeded in getting possession of the bird and turned him loose in my loft where he has fully recovered and is now a very fine and vigorous bird.

J. W. SOHN.

Aston Mills, Delaware county, Pa.,
Nov. 26th, 1894.

Tumbler Club Meeting.

TO THE AMERICAN FANCIER:

There will be a meeting of the Tumbler Club held in Boston, December 13th, at which all members are desired to be present as matters of importance as to the future of the club will be considered. The most important matters are: 1st, the election of a president and vice president for the ensuing year; 2d, a decision as to which section of the country the next annual show shall be held, whether in the east or west; 3d, a decision on what varieties of the Tumbler family prizes shall be offered at that show, and how money in hands of secretary and treasurer shall be divided among classes agreed on; 4th, a decision as to time on or before which annual dues shall be paid, also as to whether a member who has not paid his dues shall be allowed to compete for prizes offered; 5th, a decision as to how many members will be required for a quorum for transaction of business at future meetings. Being important, these matters should be settled that members may fully understand on what varieties of Tumblers prizes will be offered and how cash received for initiation fees and dues will be divided amongst the different classes. Any member unable to be present is cordially invited to send his vote to secretary as his proxy to vote on all the different articles above mentioned. Unless utterly impossible for me to be present I will be there, but, if not will appoint some member to act for me.

J. H. WHITMAN,

President of Tumbler Club.

Chicago, Illinois, Nov. 26th, 1894.

Pigeon Flying.

Homing Gossip and Echoes From the Flying Fancy.

BY "FRITZ."

It is with feelings of deep regret that I chronicle the death of Benjamin Elwell in Newark, N. J., on November 19th, and the flying fancy of the Newark district has indeed lost one of its best members, and a highly popular one. Mr. Elwell has been ailing more or less during the past year or so, and had ceased taking any active part with his birds owing to this unsettled state of his health. I knew the old fancier well and favorably, and I regret exceedingly that pressing business matters prevented my attendance at his funeral in Irvington, N. J., November 22nd. The interment was in Fairmount cemetery, Providence, R. I.

Mr. Elwell had reached the good age of 68 years, and was a thorough fancier of Game fowl and pigeons. If my memory serves me correctly, he became prominently identified with the flying fancy about 1886, in associating with Messrs. Bennett, Garrabrants, George Bowerman, and Pittenger in the formation of the "Newark Five" Club, of Newark, N. J. He trained and handled some excellent workers, and in hard weather and distance flying his loft always stood well up. He was ever ready to back his flying stock against reasonable and equitable competition, and was thoroughly sportsmanlike and game. He unquestionably leaves behind him an excellent name in the American flying fancy, and his home associations were of the most tender. I extend to his bereaved family my sincere and heartfelt condolence in their sad loss.

A correspondent writes me a letter this week the tenor of which recalls to my mind a highly interesting subject which I handled some ten years ago, and which perhaps now may be of service and interest to many of my readers, particularly the novices in the flying fancy. This correspondent, who has awakened in me some early recollections, asks me whether I consider a flock of young Homers hatched last June, who stay on the wing one, two, and sometimes three hours, as likely subjects to train next spring up to 200 miles. He says they go up every fair morning and speedily fly out of sight, remaining away and on the

wing the length of time stated, but his friends in the fancy won't believe it. Now, in the summer of 1885, I believe, I had a choice lot of young birds, whose superb behavior on the wing around home in their regular morning exercise completely infatuated me. I flew them in all weathers, and they had an abundance of exercise, frequently traveling out of sight and remaining away for two hours, never, however, going in any particular direction, much as my correspondent claims his does. I, therefore, made up my mind that they were undoubted clippers on the wing, and I frequently boasted of the length of time my birds were in the habit of keeping up without any long pole and red flag attachment. But I made a discovery which completely exploded a pet theory I entertained and my belief as to the extraordinary time my flight was in the habit of remaining on the wing. One morning threw open the trap, and standing near by I counted twenty-one go out and up. They rose very high. I went to my roof, from which I had an uninterrupted view of the country for miles. It was then half-past seven o'clock. I saw the birds fly in various directions, and finally take a straight course for the west and disappear. In the lot were two old birds. As the flight went from sight, eleven birds (three youngsters and eight veterans) left the trap. After going well up, these took a bee line for the east. Fifty-five minutes later these returned from a straight westerly direction. At 9:25 the twenty-one returned from the east. I naturally felt tickled at such good flying, and wished some of the doubters I knew had been with me. As the twenty-one alighted, I noticed their feet were discolored. Examining them after they were in the loft, I found sure enough their feet and legs were covered with dried mud. This was undoubted evidence that my flight had alighted on some marsh or wet, muddy country, and had not been on the wing for two hours as I had fondly imagined. I had then not the slightest doubt but that their frequent long absences had been spent at some feeding ground, salt marsh, or something of that kind. The conviction was anything but agreeable to me, not alone for so rudely dashing to the ground my faith in my youngsters' powers of flight, but it occurred to me that some day they would get badly left in their picnics by some gunner or other enemy. I subsequently, and up to the present day, had birds disappear mysteriously from the loft, no doubt knocked out as outlined. The little rascals may not have been up at any time more than thirty minutes or so, all told, and I had been blowing about their wonderful flights all spring and summer. And this was how my belief had been shaken and my fondest hopes decayed. When your birds go out of sight and stay away two hours or so, don't gamble on their having been on the wing all that time. Tipplers and High Flyers you can watch, but Homers travel and perhaps alight away from home.

While in Philadelphia recently, attending a meeting of the executive committee of the National Federation, race secretary Jones submitted to me a sample of the seamless bands for the 1895 season. They are to be made a trifle larger than those of last year, many fanciers having complained that the past supply very frequently proved too tight and small upon the leg of a well matched bird, and one inclined to be stocky and stout limbed, as very many good birds prove so to be in their second and third year. I think the position well taken, and the 1895 band in aluminum will be a beauty, and about as near perfection as one could desire, roomy for the bird, exceedingly tight, clean and legibly stamped. In this particular point considerable progress has been made. Now let our brother Jones direct his attention to similar improvements in the countermarking bands of the National organization. Many of those supplied to the districts last year were abominable, entirely too large and heavy, and often the marks illegible and puzzling. Here is room for improvement also.

Many fanciers whom I have met and corresponded with are a little surprised

that the annual meeting of the National Federation is to be held again in the Quaker City this year. It would seem to have been the correct thing for the New York and vicinity fanciers to have had the honor next month, Philadelphia having played the host so well last year, and yet when one considers the magnificent array of fanciers that the city of brotherly love can, and does usually turn out at an annual meeting, over any other section of pigeon flyers, Philadelphia is the proper center. Still a highly important reason was assigned for not holding the coming annual in the Empire City for 1894. It has for some time past been the desire of very many to renew the charming feature of a pigeon show of record Homers in connection with the annual meeting of the national organization as of old, so very many pleasing recollections in this direction exist I am sure. It is now too late in the year to make and consider the necessary arrangements for a show, but many of our leading spirits in the fancy are determined to do so for 1895, and to have it in the "empire city," when the National Federation's annual meeting will be held there in connection with it, no doubt.

* * *

I am asked by a correspondent for some information in connection with the government Homing lofts abroad. I have in former notes touched quite fully upon the importance of the Homer in this connection, and have neither the leisure nor space now in my columns to write upon the subject at any length. Germany I believe has one of the most superb systems. At Strasburg, Metz and Thorn, in the neighborhood of 1000 birds are maintained I believe, and at Danzig, Mainz, Kiel, Coblenz and Cologne, the lofts have several hundreds each. An appropriation of \$10,000 a year is made for the support of the lofts. The entire German frontier is connected by pigeon post with military headquarters and interior centers. Russia has now on her Polish frontier alone, some 3000 or 4000 birds and appropriates some \$10,000 a year for Homers. The French appropriation is much larger. Great Britain I believe the only country who has not made Homing pigeons a recognized part of the military organizations.

* * *

In discussing the question of how do our birds find their way home, the faculty of smell is oftentimes advanced as an important factor in the solution, and equally oft ridiculed by many in the sport. But why the sense of smell should not be considered as at least a part of the necessary combination, is to my mind very unreasonable. I read recently a communication published in a western newspaper upon the flying feats of Butterflies, and the writer goes on to say: "A friend of mine in New Jersey who is the owner of one of the finest collections of butterflies in the country, recently made an experiment which proves conclusively that butterflies are endowed with marvelously acute senses, as well as bright colors. Out of his collection, comprising almost every known variety, he chose two butterflies, which were only a few days old, and had never had their freedom. One of these he attached securely by a thread to a fence in the rear of the house; he placed the other in a small box. After marking it so he could identify it, and carried it to a point about seven miles distant, here it was turned loose. When the experimenter reached home about three hours later, he found the two butterflies on his back fence. The butterfly which he had carried away in the box had traveled the seven miles, crossed a wide river, and promptly found its way back to its mate. This seemed a most extraordinary feat, and for some time he was at a loss to understand how it had been accomplished. On telling the story to an eminent naturalist, he was told that it was undoubtedly the sense of smell that had guided the butterfly. This sense in many animals is so wonderfully acute that the feat of the butterfly did not seem so very remarkable, much less unbelievable. And why not in the Homer?"

* * *

"The winter months are the season of rest and recuperation with the working Homer. And it is apparent, therefore, that he should not now be fed on fight-

ing food. The foregoing is a quotation from former notes of mine, and the time is now very opportune for me to repeat my former advice to the novice regarding the handling of his pets during the winter months. *A fair meal once a day* is sufficient, and birds from now until early spring should be rather *underfed*, than overfed during this period. The birds are now vigorous and in the completion of their moult *or should be*, and at no period of the year does the working Homer appear more beautiful to the eye of the fancier than now. Plumage clean and new and close fitting, the eye snappy and carriage erect, and the whole bearing of the bird denoting intelligence, gameness and a *worker*. The object of the young fancier is now to *keep* his birds in such condition until the time arrives, early next spring, for making up, and the resumption of breeding operations.

This can be compassed by giving them daily flying exercise. I do not mean giving them their entire liberty in all kinds of weather during the winter, for we have, during November, December and January, many days of fog, mist, dampness and rain, that the birds are far better off in the loft, than outside. But I admonish the novice to take advantage of every bright, dry morning, and give his birds a half hour or so, exercise on the wing, and a bask in the warm sunshine.

See that the loft is *perfectly dry*, and yet *well ventilated*. Have no fears if your loft thermometer runs down to 30, 20 and even less. Good corn, the small round corn, now enters largely into my loft bill of fare, varied with good peas, hulled oats and, once a week, a mixture of such small seeds, as hemp, canary, millet and rape. Fattening food such as the foregoing should now be in order, *but in moderation*. Many good authorities are firmly opposed to any fattening food during this season of enforced idleness and rest, but my experience has taught me that when the birds are *separated* from October to February, and the weather is cold and dry, good small corn is one of the very best of winter foods, and particularly when the fancier takes advantage of all fair days to give his birds a fair amount of exercise on the wing. This is the true guide to health and condition during the winter, and essential for the loft's success the following spring in breeding and racing.

BEEN VERY PROFITABLE.

I like THE AMERICAN FANCIER very much. My "ad." has been a very profitable one for me. I shall always advertise with you as long as I am in the business.

WATSON WESTFALL.

Sayre, Pa., Nov. 24, 1894.

WHITE PLYMOUTH ROCKS

MAYO'S S. S. HAMBURGERS won in September, 1894, the following premiums: New York State Fair, at Syracuse, 1st premium; New Jersey State Fair, Waverly Park, 2 1sts and 1 2ds; Rhode Island State Fair, Narragansett Park, 1 1st, 1 2d and 1 3d; Western New York, at Rochester, 2 1sts and 3 2ds; Leight County Fair, at Allentown, Pa., 1st and 2 2ds. Eggs and stock for sale at all times. S. S. Hamburgs exclusively. *5253 JAMES MAYO, Pittston, Pa.

GAMES.

FOR SALE.—Some grand Games and Game Bantams of the following varieties: Black Reds, Brown Reds, Golden Duckwings, Silver Duckwings and Piles, all bred from the World's Fair and New York winners; cheap according to quality. Only showed at two shows this fall: Toronto, 26 firsts, 25 seconds, 7 V. H. C. S., silver medal for best collection of Games, also silver medal for Bantams; London, Ont., a few entries, 14 firsts, 16 seconds, 6 thirds. Old and young for sale to make room; also Fox Terrier dogs. Apply 242 Queen St., W., Toronto, Ont., Canada. *5225

GAMES.—A few choice young birds of the following varieties at give-away prices: B. B. Reds, Golden Duckwings, Red Piles and B. B. Red Game Bantams. Must be sold. *464 BERT G. PERRY, lock box 77, Randolph, Vt.

MELROY & CAPP, Butler, Ind., breeders of Exhibition and Pit Games (Spaulding and imported), B. B. R. Games and Bantams, Grade Japs, Grade Aseels and Irish Black Red Pits. Two hundred fine large birds for sale. If you want a fighter or show bird, we have them. Catalogue for stamp. *463

INDIAN GAMES.

FINE YOUNG INDIAN GAMES, by first winner at Atlanta. Collie pups, out of "Kate Howe," 21431, by "Josephus," 28167, combining the blood of "Roslyn Conway," "Ben Nevis" and "Charlemagne." Pups are sable, with white frills and collar, and black with same markings. *465 W. C. STRAWHORN, Greenwood, S. C.

L. C. PISER, Shushan, N. Y.—I offer some extra fine Indian Game cockerels; fit for any show room and extra fine breeders for \$2 to \$4; none offered weighing less than eight pounds; also a few pullets. At Cambridge Fair, this season, won 1st on pen, 1st and 2d on pair chicks. *1362

BANTAMS.

GAME BANTAMS. T. H. & A. STRETCH, Ormskirk, England, winners at all the big shows, have Black Reds, Brown Reds, Pyles and Duckwings to spare, same strain as all our champions, from 218 to 210 108, each. *1361

KINTER & CO., Dillsburg, Pa., have for sale fifty Black Tailed Japanese Bantams; will sell in trios and breeding pens. Also Black Minorcas, Barred and Buff Plymouth Rocks, extra fine Indian and White Malay Games and Buff Leghorns. All orders promptly filled. *466

BLACK TAILED JAPANESE BANTAMS for sale.—A few good cockerels. I took 1st, 2d, 3d, 4th and all specials on the above at Hartford last January. Silver Pencilled Hamburgs: a few pairs and cockerels for sale; took 1st, 2d, 3d, 4th and all specials at Hartford. *466 J. A. BLAKE, New Britain, Conn.

GRAND CLEARANCE SALE of Game Bantams.—Imported Black Red cock, 3d Madison Square, undoubtedly the finest colored bird in the fancy, \$25. Imported Brown Red cock winner 1st Hartford, 1st and special Madison Square, pronounced by best judges the finest of this variety ever seen this side, \$25. Imported Pile cock, 1st Hartford, 2d Madison Square, very reachy and stylish, \$15. Another imported Pile cock, equally good, same price. Pile cock, 1st Shelton, score 95½, \$10. Imported Golden Duckwing cock, 1st Hartford, 2d Madison Square, nice style, grand color, \$15. Silver Duckwing cock, 1st Hartford, 1st Madison Square, \$10. Imported Birchen cock, very tall and stylish, beautifully laced breast, \$15. Also a grand lot of Bantams in these varieties, both males and females, at from \$3 each up, according to quality. PEIRCE BROS., 4 Main street, Winchester, N. H. *166

100 BANTAMS FOR SALE.—Being overstocked, I will sell Black, Buff and Mottled Cochins at \$3 per pair; cockerels, \$1 each; White Cochins and Golden Sebrights, \$4 per pair. R. G. BUFFINGTON, box 677, Fall River, Mass. *466

B. B. R. GAME BANTAMS.—A few choice birds for sale cheap. My stock is from A. A. Parker's prize winners. Also Beagle Hound, 8 months old, well broke. Will exchange for Red Pile Bantams. *463 C. H. BROWN, Brookfield, N. Y.

"A CHOICE LOT" OF BANTAMS for sale.—My 50 Buff Cochins, cock and cockerel White Cochins, 2 Black Cochins cockerels, 2 cocks and 8 cockerels Silver Sebright. The above are A-1 in every respect, typical throughout, and will be sold cheap on account of room. *465 H. J. QUILHOT, Johnstown, N. Y.

RARE BARGAINS.—Trio Partridge Cochins Bantam fowls, Babcock strain, \$5; also cock, cockerel, four pullets and four hens, Black Cochins Bantams, Knox strain, the ten for \$10, or separately, \$1.50 each; two White Cochins Bantam cocks, \$1 each. *465 N. DEAN, lock box 66, Gowanda, N. Y.

WHITE COCHIN BANTAMS, the rarest and most beautiful of all. Winners of first premium at Charleston, 1891; New York, 1891-92; Philadelphia, 1892-93; Worcester, 1893; Camden, 1893. Have not exhibited since, but my strain in the hands of my customers has received the highest honors. Stock for sale. A. P. GROVES, Chestnut Hill, Philadelphia, Pa. *1364

BANTAMS.—Two hundred to select from in Buff, White and Black Pekins, White Japanese and W. C. W. Polish, all bred from World's Fair prize winners. Highest awards at leading fall fairs. 16 large White Cochins chicks, and Fantail pigeons, cheap. DR. E. H. WITMER, Neffsville, Lancaster Co., Pa. *1363

FOR SALE.—Cheap to clear, B. B. Red Game Bantams, \$1 a pair and upwards; Golden Sebrights, \$2.50 and upwards, and Black Tailed Japanese, \$4 a pair. Eggs in season. A. J. HILTON, Palace Bantam Yard, Amsterdam, N. Y. *1363

MESSRS. HAVEMEYER BROS., having bred more Red Pile Game Bantams than they require for stock, have a number of cockerels and pullets for disposal. Also a few Birchen cockerels; no pullets. The above are all from imported stock and the best blood obtainable. Communications should be addressed to their manager, 201f J. GLASGOW, Mahway, N. J.

10 VARIETIES BANTAMS.—Buff Pekins, Golden and Silver Sebrights, R. C. Blacks, B. T. Japanese, Black Japanese, B. B. Reds, Red Pyle, Red Malay and Gold Frizzles. Seven varieties Pheasants and high-class White Pans. Birds from many of these to spare this season. *1359 L. ROTTMAN, Prop'r, Benton, O.

E. LATHAM, Flatbush, Long Island, N. Y., originator and breeder of the Golden Rod strain of Buff Cochins Bantams. Winners at the leading shows last season. This strain is carefully bred from selected breeders. When writing state particulars. Gungywamp Poultry Yards. *5218

WESTERVELT HAYWOOD & CO., Rutherford, N. J., 15 years importers and breeders of Bantams, every variety. Only the best strains. Also Fantail Pigeons. Won 200 premiums past season. At great New York show won on every bird exhibited. Circular for stamp. *523

Turkeys, Ducks, Geese.

GREENWICH POULTRY FARMS CO.—It's so long since we've talked Turkey that somebody must have forgotten our hobby. It's a great hobby; it ought to be, as a matter of course. But if we took it as a matter of course and said nothing about them, you'd think that ours didn't win. Here's the facts: our Bronze Turkeys are winning on their merits. This is the great American Turkey month. Come and see them; or, if not convenient, write us for our book; it's free. Males, \$5; females, \$4. Cockerels, Barred and White Rocks and Indian Games, \$2 and \$3 each. VAN WAGONER BROS., box 338, Greenwich, N. Y. *464

GEESE.—Toulouse Geese, extra large and finely marked, bred from winners at the leading shows; no better stock in the country. Several pair for sale. *466 D. S. BAIRD & SON, Johnstown, N. Y.

BRONZE TURKEYS, bred from 45 and 47 pound toms and 22 to 30 pound hens. For great size, grand plumage and form, my strain leads all others. Write me before placing your order. Enclose stamp. *465 GEO. WOLF, Seneca Falls, N. Y.

FOR SALE.—Mammoth White Turkeys, P. Ducks, R. C. W. and B. Leghorns, S. S. Hamburgs; a grand lot to spare at living prices. Write for wants; stamp if convenient. Address MRS. P. L. REITZ, Pansy, Jeff. Co., Pa. *862

MISCELLANEOUS.

THE FOUR GRAND BUFF BREEDS, Cochins, Plymouth Rock, Wyandotte and Leghorn. Choice exhibition and breeding stock a specialty. Stock for sale reasonably and satisfaction guaranteed. A stamp will insure an immediate reply. *666 H. W. MORGAN, East Plymouth, O.

LAUGHS AT BLACKSMITHS! Fools the dog! That's what the chicken-thief does. But he swears at the Never-Fail Burglar Alarm. Why? Because it fools him. He cuts the wires and lo! the bell rings! and he can't stop it! Complete, with directions, \$5; fully guaranteed. Send for circular. *365 J. H. RAINSBURY, Tibbitts Ave., Troy, N. Y.

SALE OF EXHIBITION BIRDS.—Breeding pen of Mottled Java fowls, \$18; pairs of fowls, or chicks, \$5; White and Buff Cochins Bantams, \$4 per pair; R. C. White Leghorn fowls, \$3 per pair; White Polish and S. P. Hamburg cockerels, \$3 to \$5 each. Write for show record on above birds. *463 ARTHUR L. GARDNER, Vermillion, N. Y.

AMERICAN POULTRY ADVOCATE. Clarence C. DePuy, publisher, Syracuse, N. Y. Handsomely illustrated, 16 pages, 25c. per year; 64-page illustrated practical poultry book free to yearly subscribers. Book alone, 10c; paper 4 months on trial, 10c; sample copy free. *664

PEA FOWLS for sale.—Order quick! Two males and four females, two years old, \$4 each \$20 for the six; one young male and two females, at \$3 each, or \$8 for the three. All in fine condition. *465 J. H. GARST, Salem, Va.

FOR NEAT 60 DAYS.—We have reduced prices of Eggs to \$1.50 for 12 and \$3 for 30. See our "ad" elsewhere in this paper. Address PECK & DREW, Lake City, Fla. *462

POULTRY AND PIGEON FANCIERS.—Would a sure, quick, clean, easily administered rump cure be of use to you? Would such men as Butterfield, McKenzie, Haynes, Loque and W. H. Kirby, of Canada, endorse a humbug? Not likely. I have a rump cure; the best men in the world say so, and I have their letters to prove it. Need I say more? Now is the time you need Combination Spongia Tablets; 35c. per box, three boxes for \$1. *1351 F. M. BRONSON, Vermontville, Mich.

SILVER CAMPINES.—I can spare at once a limited number of pairs of these fowls. My experience with them for the past season is so favorable that I confidently recommend them as very superior layers, hardy, quick growing, and a most desirable farm fowl. They are very handsome and breed true. *466 THEODORE STERNBERG, Ellsworth, Kan.

WANTS.

WANTED.—"Sports" that occasionally appear in breeding, or established strain of yellow legged fowls that lay white eggs; following colored breeds only: Barred Plymouth Rocks, Silver or Golden Wyandottes or blue feathered pullets of any large breed. *165 S. N. WARFEL, Strasburg, Pa.

EXCHANGE.

FOR EXCHANGE.—My entire loft of fancy pigeons, Archangels, Inside Tumblers and one Scotch Terrier dog, for thoroughbred fowls of the following varieties: Red Caps, Langshans, Houdans, Polish and Wyandottes. *465 R. MELROSE, box 232, Wabash, Ind.

WANTED TO EXCHANGE.—Light Brahmas for a Great Dane dog, from three months to one year old. *464 JOHN L. COST, Hagerstown, Md.

PIGEONS.

10 PAIR, \$10, if taken at once.—Pearl eyed high-flying Tumblers in black, red, yellow; dun, agate, kite, splashed and mottled; five pair Homers, \$3; five pair Antwerps, \$3.50; four pair Fans, \$5. *466 F. H. ANTHONY, Corning, N. Y.

M. B. NOBLE, Oiterville, Ill., has for sale Archangels, Barbs, Carriers, Fantails, Jacobins, Magpies, Moorheads, Nuns, Owls, Priests, Rollers, Swallows, Turbitts, Trumpeters, Inside and Outside Tumblers. White and Barred Plymouth Rocks, R. C. B. Leghorns, Indian Games, Pekins and Rothen Ducks and Bronze Turkeys. Write your wants. *466

ENGLISH CARRIERS and Barbs cheap.—1894 hatch, from high-class imported stock. Carriers: 1 pair blacks, \$8; 3 dun hens, \$3.50 each; 1 blue cock, \$4. Red Barbs, show birds, \$8 pair; odd hens, \$3 each. These are bargains not heard of every day. *465 C. M. SWEENEY, 28 Locust St., Detroit, Mich.

HERE IS YOUR CHANCE for Homers.—I will sell a few of my very best Homers, which are noted racers and all in good condition. For want of room they must be sold at a great sacrifice, if taken soon. Correspondence solicited. *1357 L. J. POMEROY, box 68, Clinton, N. Y.

ONLY A FEW Blue English Owls left, \$1 per pair; White Fans, \$2; Black Barbs, \$1.50; Jacobins at low price. Must be sold. *465 ANDREW W. HALL, Garnerville, N. Y.

LOOK HERE! Closing out all my birds.—Typical Turbits, Blue, Black and Strawberry, \$3 per pair; all of the very latest up-to-date standard, and some bred from winners at New York and Philadelphia. Short-face Tumblers, Gaddess strain, fine stock, \$3 per pair. Pure White Tumblers, clean legs, not a foul feather in them and pure pearl eye, \$3 a pair. Four Red Jacobin cocks, cost me a pound each in England, will sell at \$2 each. One fine Archangel cock, \$1.50; 1 fine Black African Owl cock, \$1.50; 1 nice Black Carrier cock at \$4. At these prices cannot enter into long correspondence. The stock is as good as any in this country, so send your money for what you want and you will be treated fairly. *465 G. FOUST, Rhinebeck, N. Y.

WHITE FANS.—I have a few surplus cocks and hens for sale at \$2.50 and \$3 each; one cock, \$4; one crested hen, \$3. All nice birds; Gilbert strain; good value for price. FRED. S. ROBINSON, 970 North Del. St., Indianapolis, Ind. *465

FANS. Owing to business changes, I am reluctantly compelled to sell my entire stud of white and solid color Fans, bred from premium stock. To effect a speedy clearance, I will make exceedingly low prices. *464 W. C. WEBER, Mahwah, N. J.

FOR THIRTY DAYS.—Greater reductions than ever before; former price cut into. A grand chance to secure first-class stock at a bargain. White Smoothhead and Crested Fantails, Black Carriers and Nuns, Blue Chinese Owls, Jacobins in several colors, Inside Tumblers and odd birds. Send for complete price list. *464 H. P. HARTER, Huntington, Ind.

HOMERS FOR SALE.—Twenty-two 304-miles, youngsters of '94 hatch; fifteen 200-milers and eight pair of breeders. Birds in excellent shape; flown under club management. They must go, and at your price if I can't get mine. I mean exactly what I say. This is a chance of your life time to buy good stock cheap. Address with stamp. *464 DR. A. LEE PENUEL, Leesburg, Va.

J. H. MEHRING, Littlestown, Pa., offers in pairs and odd birds Red, Dun and Black Dragons, at \$3.50 a pair; Yellow, \$4 a pair; White, \$5 a pair. Also 1 pair Red, 1 pair Black and 1 pair White English Carriers and 1 pair Silver Dragons, \$3. *464

BIG BARGAIN.—Having bought C. J. Tanner's Magpies, to make room will sell or exchange eighty pairs of Owls for Black Minorcas or Barred Plymouth Rocks. My Owls have won more 1st premiums than any other Owls in the country. *463 GEO. W. ECKERT, Allentown, Pa.

HOMING PIGEONS.—H. F. SCHROEDER, 332 Seymour Ave., Utica, N. Y. I will sell a few pairs of surplus stock Homers, 1894 hatch; flew 130 miles. Made 1,480 yards per minute in a 55-mile fly, in No. 1 Fulton County Flying Club race. Write for prices. *463

FOR SALE.—Eleven Jacobins, black, white, red and yellow; pair Black Pouters, pair Blue African Owls, pair Blue Swallows, pair Red Homers, 1 yellow Barb cock, fine bird, 3 Archangels; all good birds, and the lot at \$25. *1363 L. D. HOLMES, 126 Beacon St., Syracuse, N. Y.

FOR SALE.—Lot of White Tumblers, bare legs; also few pairs each of Black, Blue, Yellow and Red Booted Tumblers, to make room. All good performing birds. H. L. WICKLEIN, 1205 William St., Baltimore, Md. *1362

MISS ETHEL G. HINES, 1400 Bolton street, Baltimore, Md., has for sale pair of Red Short-faced Tumblers, a pair of Red Agates, Red Rosewings and Yellow Agate, all 1894 (Gaddess stock); excellent head and beak, good color and carriage. Also pair of Long-faced Mottles, beautifully marked and rich in color. Pair Medium-faced Kites, from Almonds; almost as lustrous as Archangels. Prices moderate. *1362

INSIDE TUMBLERS CHEAP.—Old, \$3, young, \$2 per pair; close performers; Blue Muff Owls, \$2.50; Black Muff Owls, \$2.50; Blue Fans, \$2.50; Yellow Fans, \$3; Archangels, crested, \$3; White Jacobins, \$4; White Owls, \$2 pair. *862 H. B. VONDERSMITH, Lancaster, Pa.

T. H. & A. STRETCH, Ormskirk, England, winners of over 300 prizes in 1893 at all the big shows, have English Owls, Turbits, Magpies and show Homers to spare; many winners and others fit to win; same strain as all our champions. Send 2½d. for printed list of particulars. *1361

LOUIS G. MULLER, 335 South Woodyear street, Baltimore, Md., breeder of Black, Red and Yellow Magpies exclusively. A few birds for sale at reasonable prices. Write for prices; enclose stamp, no postal cards answered. *1358

GEO. EWALD, Box 501, Cincinnati, O., offers 1 Pair fine White Barred Blue Swallows, both 1st at Atlanta, for \$10; 1 Pair Blue Barless, \$7; a Pair fine Black at \$5; Reds, \$5; Blue Black Barred, \$4. Must go; need room. *52122

WINDSOR POUTER LOFTS.—To those in quest of show Pouters for exhibition purposes or stock birds for the breeding loft, I am now prepared to submit quotations. My annual catalogue of sale birds will be issued Dec. 1, when all are thoroughly moulted. State your exact requirements, thereby avoiding unnecessary correspondence. *52121 A. W. MCCLURE, box 287, Windsor, Ont.

FANTAILS, SWALLOWS and Jacobins.—Very good birds at prices that are moderate. Write soon as they must be sold. O. GROM, 365 Van Brunt street, Brooklyn, N. Y. *46r

I WILL SELL about 50 Pouters, bred by my father for pleasure and turned over to me for disposal, all having the Webster '94 band; also odd cocks in all colors and all ages. Correspondence cheerfully answered. *1357 JNO. E. REID, box 103, Sumter, S. C.

FRED C. WEISS, Evansville, Ind., breeder of Saddleback and White Fantails.—Have won the highest awards whenever shown. My entire lot of Crested White Fantails for sale at half their value. Winners at Louisville, Nashville, Charleston, Atlanta and World's Fair. *5253

FOR SALE.—Fine Booted Tumblers and Rollers at low prices. Also dealer in all kinds fancy Pigeons and Rabbits. Shipper of common pigeons. M. SCHEIN, 619 and 621 South Charles street, Baltimore, Md. *1356

SPRATTS PATENT POULTRY MEAL.

The Greatest Egg Producing Food. For getting fowls into exhibition form it has no equal. The best food for assisting fowls through the moult. The best and the cheapest food. It is a staple food, not a condiment, spice or medicine. For rearing young chicks it has no equal, reducing mortality to a minimum. Try a sample bag or write for circular.

The Common sense of Poultry Keeping, 10c. "Cardiac," a tonic powder for poultry; excites a healthy action of the stomach, strengthens and invigorates the young chicks; 50c. per packet, or \$1 for 5 lb. bag. Granulated Prairie Meat "Crissel," takes the place of Insect Life and Ants' Eggs. Bone Meal for poultry and chicks. Roup Paste, 50c. Tonic Condition Paste 50c. Gape Cure for chicks, 50c. For gratis pamphlet, etc., send to *5265

SPRATTS PATENT (America) LIMITED, 230 to 245 E. 56th St., New York, N. Y.

J. WILCOX, lock box 220, E. Chatham, N. Y.

Dr. Wiant & Beringer

MARION, O.,

Importer and Breeder of . .

Buff Leghorns

EXCLUSIVELY,

HAVE THE FINEST LOT FOR SALE WE EVER SAW OWNED OR RAISED.

They were sired by "JOKER," the World's Fair winner, and "BROTHER JONATHAN," the winner of more first prizes in England than any bird ever imported.

Remember, we are the only importer of the Geffcken strain in America, and have crossed them on the Kay, and the results, both in the show room and breeding pen, has been simply elegant.

The prices for fine breeding birds are, for Cockerels, from \$5 to \$20; Pullets, from \$3 to \$10. Exhibition birds a matter of correspondence. We guarantee every bird just as represented.

SPONGIA,

The great Roup Cure. Put up in 25c, 50c. and \$1.00 packages. *50w1361

OAKLAND FARM

Taunton, Mass.

BUFF COCHINS. Our American Standard Buffs are unsurpassed in this country, as their great record in the show pen will attest.

LIGHT BRAHMAS. Our Light Brahmas have won their full share of prizes wherever shown and we seek the keenest competition.

BUFF COCHINS. We have imported this season, as we have for the past three years, the best Cochins to be purchased in England. This year we have the winner of the LORD MAYOR'S CUP, the acknowledged champion cockerel; the champion pullet, winner of 1st DAIKY, CRYSTAL PALACE and BIRMINGHAM; also others of highest merit. We have probably the finest collection of these fowls in America.

We shall sell eggs from our English Cochins this season. Send for circular. Birds for sale at all times. *523

G. W. MARSHALL Manager.

SALEM POULTRY FARM.

Barred Plymouth Rocks

Silver Wyandottes.

The undersigned have formed a co-partnership for the purpose of breeding to a larger extent the two most popular and profitable of the American breeds of poultry. Hundreds of prizes won in the past at the Greatest Shows in America.

Proprietors: A. T. BECKETT, C. W. THOMPSON.

P. O. Address:—Salem Poultry Farm, Salem, New Jersey. *5253

ANDREW MUEHLIG,

Ann Arbor, Mich.

Ideal Strain of Turbits,

Combining the Purest Blood of England and America.

NOTED FOR THEIR BEAUTIFUL CARRIAGE, SMALL SIZE, AND WONDERFUL HEAD AND BEAK PROPERTIES.

The following recent winnings, in the keenest competition ever brought together in this country, attest their merits:

BALTIMORE, 1894.—Five Firsts, six Seconds, six Thirds, Special for best Young (1893) Turbit in Show. Also, Specials for Best Blue bred 1893, Best Red bred 1893, Best Yellow bred 1893. Winners of largest amounts of money of any exhibitor, viz., \$92 in prizes.

ATLANTA, 1894.—Seven Firsts out of possible eight.

NEW YORK, 1894.—Four Firsts, three Seconds, five Thirds (in standard colors only) Also, Grand Gold Special for best collection of Turbits.

Requiring the room, I will sell seventy-five pairs Turbits, in all colors, from above stock at prices to suit the times. Anyone taking several pairs will be liberally treated. Embrace this opportunity to get fine birds. On writing state most you will pay and I will try and suit you.

BLACK LANGSHANS

Dr. F. M. Robinson, Box 69, Pawling, N. Y.

At Madison Square Garden, New York, 1894, the largest show ever held in America, I was awarded the Grand Special Prize of Silver Cup, value \$100, for best exhibit. 1st, 3d and 4th cockerels; 2d and 3d cocks; 2d, 3d and 4th pullets; 2d and 5th hens; 2d and 5th breeding yards. 200 grand chicks, bred from "Gorden Champion," "Parnell," "Parnell, 3d," "Manhattan, 2d." Buy your birds from a race of prize winners; buy from a breeder who breeds his own birds, exhibits his own birds and advertises honestly what he wins, *not what someone else wins*. The above record has never been beaten in Madison Square Garden on Black Langshans. Illustrated circular on application, giving full list of awards for the past seven years at the largest shows in America. You need this stock to show; you need this strain for new blood. 52t25

PEDIGREED BARRED PLYMOUTH ROCKS

At New Haven, 1893, I won all firsts and 15 specials on my birds. Cockerel scored 95, weight added; cock, 92½; hens, 94, 93, 92½, 92½; pullets, 94½, 94, 93, 92½. At Shelton, 1894, first on cock, hen, cockerel and pen; also Silver Challenge Cup for largest and highest scoring collection. Eggs \$2 per setting. 52t25

THE GREAT ANGLO-FRANCO

COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Ganker, Colds, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. TESTIMONIALS ON APPLICATION.

PRICES:---In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

E. T. BLOOD, Kent, Ohio. 52130**MY BARRED PLYMOUTH ROCKS**

Have won and shall win again. At Canajoharie, N. Y., last year, in good competition, I was awarded 1st on cockerel, 1st on pullet, 1st on pen, and all specials offered. Two pullets scored 94 each. I have 30 fine grown cockerels for sale. Write for further particulars in regard to my strain. 52155 **W. E. JOHNSON**, Chadwicks, N. Y.

The Best Record

On the Breed

FOR TEN YEARS!

Was made by our **BARRED PLYMOUTH ROCKS** at New York Show, 1894, where we won 1st, 2d, 3d and 4th on cockerels; 2d and 3d on pullets; 1st and 2d on cocks; 1st and 3d on hens; 1st and 2d on pens; and all the specials.

AT NEW YORK SHOW, 1892, our last previous exhibit, we won all the first prizes competed for, except one, and all the five cockerel prizes, except 2d, a record on cockerels not equalled for seven years.

For five years our breeding has taken first prizes at the leading shows.

Breeding and Exhibition Stock for sale from the five males which sired our winning cockerels and pullets at the last New York show; also from the 1st prize cockerel, 1st prize pen male, 1st and 2d cocks and 1892 1st pen male, all winners at New York.

CIRCULAR FREE. 52153

F. W. MANN & CO., 26t53 Milford, Mass.

HATCHED 100 PER CENT!
THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889 and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the Incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method do away with the bottom heat. This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$3.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

... IN PRESS! ...

The American Fancier's Poultry Book.

ANNOUNCEMENT.

The need of a practical American book on poultry raising has long been obvious. It is true there are numerous cheap books, and a few higher priced books, but there is no book that is at the same time first-class and reliable in every respect and reasonable in price.

During the past year George E. Howard, of Washington, D. C., who is not only an artist in delineating the feathered race, but a practical poultry and pigeon fancier as well, has been busy preparing a complete poultry book, which will be the first of a series of publications issued through THE AMERICAN FANCIER office.

This book will be handsomely illustrated with over TWO HUNDRED ORIGINAL ENGRAVINGS by Mr. Howard. The beautiful cover page reproduced in this "ad." is a sample of the fine illustrative work to be found through the book. In addition to these, the heading of each chapter will be of handsome design.

**Price, Fifty Cents Each, Postpaid.
Special Discount to the
Trade.**

The publishers expect to issue the first edition by February 1st, 1895, and would call the attention of all breeders of thoroughbred stock to the following: A limited number of first-class advertisements will be inserted in THE AMERICAN FANCIER'S POULTRY BOOK at the following rates:

One page,	\$ 15 00
One-half page,	10 00
One-fourth page,	6 00

The first edition will be two thousand copies, guaranteed. All subsequent editions will be printed from electrotypes, and it is safe to estimate that over fifteen thousand copies will be sold in the next few years. *All advertisements appear in every edition.* There is no charge for future editions. This means that an advertisement has a permanent value not afforded by any other publication. As we state above, the space will be limited and copy for "ads." should be sent in promptly with the coupon on this page.

Geo. E. Howard, box 54, West Washington, D. C., will also receive orders for advertising, and will be pleased to make arrangements for illustrating advertisements.

TABLE OF CONTENTS.

Chapter 1—The Poultry Industry.
Chapter 2—General Management: a. Poultry House and Yard; b. Selecting a Breed; c. Regular Feeding; d. Exercise; e. Supply of Water and Fountains; f. Oyster Shells and Grit; g. Over Feeding; h. LIGHT BRAHMAS.

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition, with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price. \$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price. \$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price. \$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth. \$1.00
Paper. 40c.

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price. \$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 66 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price. 50c

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price. 50c

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price. 50c

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price. 50c

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price. 25c

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price. 25c

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper. 50c

PET STOCK.

Birds and Bird Keeping in Cage and Aviary.

A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price. 15c

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price. 25c

English Books in Stock.

THE LANGSHAN FOWL. A Complete Treatise on the History and Characteristics of this Popular and Profitable Breed. By Miss A. C. CROAD. \$1.00

HOW TO MAKE £50 A YEAR KEEPING DUCKS. By HENRY DIGBY. This is a nicely bound book, and contains in connection with the above an article on Geese and one on the Turkey. 1.00

THE HIGHFLYERS' GUIDE (SMITH), or How to Train Tipplers, Tumblers, Rollers, etc. Invaluable to pigeon men. 1.00

STUD REGISTER FOR PIGEONS. By RICHARD WOODS. Very complete. 25c

PIGEONS, Their Origin and Variation, with Illustrations on their Housing and Management. By Rev. W. F. LUMLEY. 50c

FANCY POULTRY, Breeding and Feeding. By ALEXANDER COMYNS, B. A., LL.B., Editor of *Poultry*. Bound in paper. 50c

VALE'S MANUAL OF POULTRY DISEASES. By W. VALE. Complete in every detail, with full description and cure for every disease. Bound in paper. 50c

THE TURKEY. Its Characteristics, Varieties, and Management. By Mr. WILLIS-HARRIS, Vice-President of the Turkey Club. 50c

THE LONG-FACED TUMBLER. A complete and comprehensive treatise on the different varieties of the Tumbler pigeon. By HENRY CHILDE. Price. 50c

THE JACOBIN. Its Breeding, Management and Exhibition. By JOHN WATERS. Price. 50c

THE MINORCA FOWL. By T. H. HARRISON. Complete and fully illustrated. Price. 50c

THE ANDALUSIAN FOWL. By L. C. VERREY. Price. 50c

TLE LEHORN FOWL (5d Edition). By L. C. VERREY. Illustrated by Ludlow and showing the difference between the American and English Leghorn. Price 50c

HOW TO BREED AND REAR BANTAMS. By L. C. VERREY. Price. 50c

FRENCH BREEDS OF POULTRY. By L. C. VERREY, assisted by the best French authorities; very complete. 50c

THE TURBIT PIGEON. By the Rev. W. F. LUMLEY. Fully illustrated and very complete. Price. 50c

BANTAMS. By W. F. Entwistle. The best and most valuable book on this subject ever printed. Handsomely bound in cloth. Price. 2.00

INCUBATION and REARING of CHICKENS, Artificial and Natural. By WM. HAY. Price. 50c

CLUBBING LIST.

Feb. —Cape Ann, Mass. Geo. E. Merchant, secretary.

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of Perfection

This is the only authorized publication giving a complete description of every breed of fowls recognized by the American Poultry Association, the only representative body of poultrymen in this country. Remember this invaluable book is fully protected by the United States, it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar, but

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24 page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it

For Nothing

By simply sending the amount to

POULTRY.

From the Editor's Perch.

The premium list of the New York
Poultry and Pigeon Association came to
hand on New Year's day. It differs but
little from those issued in past years.
The premiums remain the same, viz:
Five dollars for first and two dollars for
second prize bird in either cock, hen,
cockerel or pullet of each variety. Entry
fee \$2 for each bird. Birds entered in
the open classes cannot compete in the
breeding yards. Entries for the latter
are to consist of birds mated for produc-
ing the best results, in other words, *breed-
ing* not *exhibition* pens. It will cost five
dollars entry fee for each breeding pen.
A limited number of large cages for dis-
play of collections not for competition
will be rented at ten dollars each. Be
sure to send for premium list promptly
as entries close January 16th. You can-
not afford to miss exhibiting at New
York.

We publish the list of judges at the
New York show in another column of
this issue of THE AMERICAN FANCIER.
There are several changes of importance.
George W. Weed who gave excellent
satisfaction as a judge of Pit Games in
1894, has been dropped, and Robert A.
Colt given the same classes. Mr. Colt
also takes Indian Games, always judged
in the past by Irving Crocker. A new
addition to the list is J. T. Cothran, who
takes all the varieties of Hamburgs,
breeds he is thoroughly qualified to judge.
We miss Irving Crocker's name from the
list, Dr. Deyo taking all the Wyandottes
this year. Frank Gaylor tackles the
turkeys, Guinea fowls, dressed poultry
and eggs, while Ferdinand Beagle Zim-
mer will be in his element judging Ban-
tams Other Than Game. T. K. Bennett
will judge Games and Game Bantams in
place of B. C. Thornton and F. B. Zim-
mer, who did the work last year. R. G.
Buffington will judge Buff Leghorns,
having been selected by the American
Buff Leghorn club for the position.
Sharp Butterfield will judge all Light
Brahmas this year.

Dr. J. C. Maple of Trenton, N. J., one
of the oldest fanciers and exhibitors of
Bantams in the United States, offers his
entire collection of birds for sale. In the
latter are a number of very rare varieties,
as well as nearly all the known standard
breeds of Bantams. Dr. Maple will ex-
hibit no more in the future, and we are
certain the old gentleman will be missed
at all the great state shows. The death
of his daughter last year, followed by the
death of his wife a few weeks since, has
completely broken up Dr. Maple's home.
Under such saddening circumstances our
old friend is compelled to give up the
breeding of his feathered pets and com-
panions.

For the benefit of a few publishers and
scribes who have not heard the news, we
will state that an association composed of
publishers of poultry journals was formed
at Kansas City, Mo., December 21st, '94.
B. Holmes, Jr., of Albany, N. Y., was
elected president, and W. W. Richards of
Cedar Rapids, Iowa, will serve as secre-
tary. It will be a protective association,
based on laws in vogue among men in
mercantile pursuits. It will no doubt
prove advantageous to all publishers, and
at the same time sound the death knell of
the crooks, dead beats and frauds that
creep in the advertising columns of the
poultry press.

Among the visitors at the Mid-Conti-
nental show was Harry St. John, who
came all the way from Oklahoma City to
see the feathered collection and meet
with some of the "boys." Mr. St. John
is not only one of the prominent lawyers
and political lights of the new territory,
but enjoys the unique distinction of being
the only breeder and fancier of thorough-
bred fowls there. He should do grand mis-
sionary work in the poultry line, for he
has the pluck, enthusiasm and business
capacity to make a success of poultry
raising. The next thing we will hear
will be of a show in Oklahoma.

George W. Weed of Lenox, Mass.,
writes to the *American Stock-Keeper* as
follows:

"In remarks at the Providence banquet
you quote a party as saying, 'that 50 per
cent. of the exhibits at the New York
show were from New England, and that
New York breeders got 90 per cent. of the
profits.'

At the last New York show out of 1780
single entries in fowls, ducks, etc., 344
were from New England; less than 20 per
cent. They were shown in 96 classes, of
which New England exhibitors received
45 first and 42 second prizes, or nearly 50
per cent. of the profits. Of 150 breeding
pens 18 were shown from New England,
or just 12 per cent. with less than 25 per
cent. of pigeons and no displays.

It seems to me that the truth would
answer just as well, in this particular
case, as anything else."

We agree with Mr. Weed that the truth
regarding the New York shows of the
past be told. Misrepresentation is as
nauseating to honest New England ex-
hibitors and fanciers as it is to those living
in the Empire state.

The New York show welcomes New
England exhibitors in the same hearty
way as it does all others. It is not a sec-
tional show, and the silly attempt to
make it appear as dependent on New
England, is due to some covert en-
emy, who stoops to falsehoods in order
to injure the most important exhibition
of poultry in America.

The list of specials offered at the com-
ing New York show, is the largest and
best we have ever seen. The American
Cochin Club, the Game Club and the
Leghorn Clubs have certainly done
wonders in this direction. Entries should
be large in all the classes fostered by the
above clubs.

We should like to see both the Wyand-
otte and the Plymouth Rock Club take
more interest in offering specials. The
chief value in a specialty club is to en-
courage and stimulate the breeding of
the variety it professes to be devoted to.
Liberal cash specials do the trick every
time. We do not know what the finan-
cial condition of the Wyandotte Club is,
but we do know that the Plymouth Rock
Club has a very neat surplus, and every

year it grows larger. Why not get up a
challenge cup to be competed for annu-
ally? President Brown and Secretary
Marshall please answer this question.

Those 2,500 turkeys at the Mid-Conti-
nental show did not materialize. "Uncle
Tom" Rackham claims he wrote "Si
Twist" that there might be 250 turkeys
there, and thinks the frisky Southerner
added another goose egg. To tell the
exact truth both Rackham and "Twist"
missed the mark by considerable distance
from the bull's eye. Rackham probably
saw so many turkeys on his trip through
Missouri to Kansas city, that his imagi-
nation became greatly enlarged. The
fact is, Missouri is alive with turkeys
even if but few were shown at the Mid-
Continental. Conductors, porters and
trainmen on the east bound Rock Island
train were liberal purchasers of dressed
turkeys, at a station called Altamont, in
Missouri. When nice, clean, sleek look-
ing hen turkeys, weighing 7 to 10 pounds
dressed, can be bought for one dollar
each a few days before Christmas, it
forcibly demonstrates the fact that Mis-
souri is a turkey state.

This is the season of poultry and pigeon
shows, and we must necessarily devote
much space every week to the publica-
tion of the awards and reports. This
naturally crowds out much other interest-
ing matter, but THE AMERICAN FANCIER
must have the news first, and show re-
ports are news that is eagerly read by
thousands of fanciers in all parts of the
United States and Canada. The show
season will soon be over, and then for
many weeks our columns will be devoted
to subjects of general interest and value
to amateurs and professionals who care
but little for reports of poultry and pig-
eon exhibitions.

The New York State Poultry Society
will hold its annual meeting in Agricul-
tural Hall, Albany, N. Y., on Wednes-
day, January 16, at 5 P. M. Officers for
the ensuing year will be elected, and an
attempt made to draft a bill to be placed
before the legislature of this state, which
will ask for annual appropriations for
the benefit of the poultry industry of
New York. It will be well for the above
society to call a special meeting during
the week of the New York show, also, as
many new members could be obtained
and the matter of securing an appropri-
ation be more fully discussed. At all
events let every member attend the
annual meeting.

American Cochon Club.

TO THE AMERICAN FANCIER:

What's the matter with the specials
offered by this club in New York this
winter? For one, I feel very proud not
only of the large list of specials, but at
the enthusiasm exhibited by all the
members of the club. From what I can
learn through correspondence with the
various members, many of whom have
never exhibited or attended an annual
meeting of the club before, they all will
show up at New York. The annual
meeting of the club will be held Friday
afternoon, February 1st.

It is now talked of giving a regular
club dinner, and all members who intend
to be at the meeting will confer a favor
upon the secretary by writing him
whether they could be present and
willing to attend such a dinner or not.

GEORGE E. PEER,

Sec'y and Treasurer,
Rochester, N. Y.

Imported Dorkings.

The above illustration shows two truthful portraits of Silver Gray and Colored Dorking cockerels, imported by Henry Hales, Ridgewood, New Jersey. The fine, delicate work of this picture has never been excelled by an American artist. The original pencil drawing is a very fine work of art, by Franklane L. Sewell.

It does not take a very critical eye to see in these birds ideal form, massiveness and beautifully pencilled plumage. Their deep, solid breasts, short legs, broad bodies and comparatively small bones show but little waste. It is not to be wondered that Dorkings make an attractive feature in the show room. Few breeds of fowls have stood their ground with so little change for so long a period as Dorkings, during which time many varieties of poultry have become greatly changed if not extinct. The greatest change has been merely in the selection of lighter colored birds of the simple Gray Dorkings and called *Silver* Grays, all other points having been left undisturbed for the last fifty years. But this does not apply to the variety called Colored Dorkings, seen in the lower part of the illustration. These are bred darker than they were years ago, making the distinction between the two varieties more defined. In the upper part of the picture, White Dorkings are seen above the Silver Grays. Of course, since poultry shows have become popular uniformity in markings, size, etc., has been more regarded.

Dorkings are becoming more appreciated every year. More birds are shown at our exhibitions than in former times. There is no doubt they will be still more appreciated when better understood.

They do not stand confinement like the Asiatics, but with a fair run and proper care few birds can compare with them as layers, and they are par excellence for the table. They are a long-lived breed, continuing their laying to an advanced age; they are also careful mothers, caring for their broods longer than most fowls.—Henry Hales in *Poultry Monthly*.

The Cause.

TO THE AMERICAN FANCIER.

In an article in THE AMERICAN FANCIER of September 29, entitled "The Effect—But What Causes It?" Mr. Zimmer recounts various experiences that doubtless struck a sympathetic chord in many a fancier's breast. There is food—yea, a square meal—for reflection in that contribution; which to my mind was quite eloquent, for I have been attracted to it repeatedly. And now, after a lapse of several weeks, no abler writer having given it due notice, I feel impelled to offer for publication my reflections called forth by that article. Theories, they deserve to be called, no doubt. But in the present undeveloped stage of the science of breeding, there is need of theory. Many things are constantly happening in the yards of fanciers, too generally kept out of sight as reflecting upon one's stock or management of it, which, if boldly brought to light and discussed, might result in useful theory that would bridge the way to accurate knowledge. I believe that all the mysteries of breeding will some day be explained. There is a cause for everything. We may not always hit the mark first off, but by keeping up a shrewd guessing we may eventually blunder upon some vital truth unawares.

The fact that Mr. Zimmer remembers these off-color occurrences in his yards, and has finally told them to the public, to my mind indicates strongly that he has pondered much upon possible causes. Like our noted Guy Fawkes who would blow up the hen parliament, Mr. Zimmer is a "thinker." But unlike said Guy in attempting to exhaustively account for the advent of white sports by the question-begging explanation of "reversion to some remote white ancestor," he seems to think there must be some good reason why certain chicks "took after" that hoary progenitor when the rest didn't—a point well taken.

First, in regard to that Langshan hen which produced three pure white chicks—long ago, before the craze for white fowls began to hold out special inducements in that direction. I have great admiration for one who braves the opposition of the conservatives in advocating some cause that promises better things for the complaining millions of men. And so, instead of condemning this innocent creature as a blamed Populist, I insist she was a good hen, a pioneer, a reformer—one who had the hardihood to resist oppression when the balance of her race were practicing meek submission.

I believe it to be a fact, though at this date it is only theory, that the removal of the red from the plumage of the natural or black red type of color—which is the origin of solid black color—gives the first impulse towards the production of the white sport. It seems fair to assume that the dropping of one pigment from the natural schedule of color would have a certain disturbing effect upon the fowl's economy, namely, the tendency to drop the remaining pigment, upon a sufficient provocation. The chickens of a black hen following a white sire in color is self-explanatory, the white chickens naturally following the plainer of two roads, it being easier to the chick's system to shirk than to produce color. For we must bear in mind that, while white seems like color, it is simply the negative of color—both the red and the black pigment being absent. But in the case at hand, Mr. Zimmer's statement sets the mind at rest concerning a white parent, or indeed any probability of white ancestry in an uninterrupted line of descent through many generations. Indeed, this point is attested by a letter from Miss Croad recently published in these columns. Suppose we assume that these colors natural to fowls are evolved from the food consumed, and their production is then dependent upon proper action of the forces which direct bodily growth, which turn food into muscular strength, the production of eggs, or any similar function. The production of color, then, being dependent upon vital strength, would naturally be affected by any cause disturbing the health; too long continued egg-production might thus easily leave the system unable to produce color, the descending albino chick, then, inheriting such pre-natal condition. It has been

shown that feathers originally black, have lost color during some ailment, to be restored later upon health being regained. It is my own experience that chickens lacking in vigor are attended by a corresponding loss of the color common to their type. In a strain of buff fowls in which hardly one in fifty shows any appreciable tendency toward white, the occasional spook is invariably fatter than the others, after leaving the flock to follow me about the garden. And I long since learned to connect his want of proper color with the same conditions which made him weakly. The plumage resembling hair; that Mr. Zimmer relates appeared upon bantams being bred down from the larger Polish, I believe is directly traceable to impoverishment of vigor. In this case there is no new thing ushered in, but simply the disappearance of a certain portion of each feather, which we might easily imagine would attend upon an enfeebled condition of health. In-breeding after results in these silky specimens. Mr. Hartwell once showed me a good shaped Partridge Cochin hen of this description, which had followed a systematic course of breeding within a strain.

Mr. Zimmer tells us of a mating of Silver Laced Wyandottes—the darkest mating he ever made—which produced three pure white chicks. Did the extreme darkness of that mating contribute to that end? Perhaps. The parent stock were presumably nearly black in color, and therefore conformed closely to the coloration which sports most frequently emerge from. The small amount of white in their plumage may have been sufficient to give the impulse to reversion—the little leaven which leaveneth the whole lump. After all, the wonder attending the appearance of these sports disperses before we reach that point where we can say that we understand it clearly. We know enough to see that nature in their genesis has not gone deliberately to work to do a thing before unaccomplished, but has simply failed to do the customary thing. We see the hair of people about us constantly growing gray—always others, never our own—and intemperate piety, or some blamed thing, even resulted in the hair itself following the color out of existence. These cases are not so rare that we marvel at their occurrence; nor should we, at albinism among fowls. The greatest source of wonder is that the timely axe so invariably disposed of all evidence concerning these sports—until fashion veered about, and the days of hereditary albinism were ushered in.

Mr. Zimmer's experience in crossing black upon white, with a view to perpetuate the latter color, is interesting as corroborating the popular belief that the sire exerts a greater influence than the dam in controlling the color of the progeny. Mr. Zimmer found in two distinct trials, that the descendants of a white male upon black hens bred white without difficulty; but a cross of black male with white hens after a five years' trial was finally abandoned, the black sire having apparently impressed his characteristic of color away down the whole line of descent, sufficiently to taint the plumage. This lesson is certainly suggestive to the breeder of mottled varieties. This rule of the sire's control of color should be appended by the additional one that a parent's influence is more strongly marked upon offspring of the opposite sex; so that, if we wished to exactly reproduce all the features of a certain fine male, a chicken bred from a pullet of his get will often be found to more strongly favor him than do his own sons. If this rule were kept in mind, it would often serve our purpose better than inbreeding, with its attendant evils.

Now, had I read this article previous to last spring, I could have saved myself some unnecessary trouble, for I would not have attempted a similar mating—a black sire upon white hens, expecting to get white plumage and white shanks. There were plenty of males with the desired color, having been their mother's sons; but the pullets were decidedly all their father's own daughters, having blue legs and plumage splashed with occasional black feathers. Theory indicates that these pullets would, if bred, reproduce their ebony sire's character as to color, sufficiently to spoil them for white fowls.

Perhaps a cockerel bred back to the white hens might do better. However, I shall discard the product of this mating in favor of another, in which a white sire was used. My experience here, too, may be of interest. A cross of Rose Combed White Leghorn cockerel, upon a Black Langshan hen, gave four chicks, all pullets, following the sire in comb, earlobes and plumage, but with shanks flesh-colored and slightly feathered. Last spring these were mated to a cockerel sent me from Ohio, purporting to be a White Hamburg, and apparently an all-round typical specimen. Of the resulting chicks, while the cockerels were all white legged, with some tendency to yellow in plumage, the pullets invariably came with pure white plumage, but with rich yellow legs, a feature I had not counted upon, so I began to study the cause. When hot weather came on the sire began to turn yellow, and by August would have passed for Leghorn but for his shanks. The conclusion I finally reached was, that while the Rose Combed White Leghorn was formerly said to have been manufactured from the Hamburg, this modern White Hamburg would appear to have been evolved from the Leghorn. Before leaving this topic, I will give an exception which may assist in proving our rule; at least it was what led me astray as to my expectations of white chicks from a black sire. A Black Hamburg was bred to White Leghorns with a view to establish better shape of body, comb and earlobes. I would explain that he was of a strain not typical Hamburg shape, but ideal for Leghorn. His chicks came pure white with flesh colored legs, the second generation bred to Leghorns, most yellow legs, and the third uniformly yellow. There has been no difficulty about black in plumage.

Of quite a different nature from changes due to the failure to produce color, it is, when chickens unexpectedly show a color quite foreign to that of their parents and ancestors for generations. Such an instance was the occasional appearance of buff chicks from Mr. Zimmer's White Polish Bantams. Now, let us theorize a little as to the cause of this. We will start with the assumption that, the black red being the natural type of color, nature would in time, if unmolested, restore that coloration to all our breeds. And we will consider the question. In what order would this take place with colorless or white varieties? Black would not be apt to first appear, the habit of albinism holding that pigment in strict subjection. If black did not first appear, then red must. It would not be confined to those parts where we find red in Piles, because there has been no Black Red parentage to locate it there. The habit of ancestors having been solid, or the entire plumage alike, that tendency would be still retained, and the red pigment would inevitably color all portions alike, resulting in buff color. It is well known to breeders that if the darkest buff specimens are persistently used as breeders, black finally appears in wings and tail. From these, selection would soon result in the original color of the race, black red.

As to the question of the inciting cause which led the Buff chicks to appear in the White Polish Bantams, my answer from its shortness shall be emphatically suggestive that I do not know. I will simply propose that, if the theory be tenable, that vital degeneracy is the origin of disappearance of color, why would it not follow, conversely, that the reappearance of lost color may be referred to an accession of vigor, the result of better food or care than they had been accustomed to, such enhanced vital strength rendering these Buff chicks chosen vessels through which nature makes the attempt to claim her own again?

F. W. PROCTOR.
Spencer, Mass.

Correction.

Mr. E. C. Fritch, Prospect, Ohio, makes the following correction in his winnings at the Cleveland show: Silver Wyandottes, cock, 1st 914, hen, 4th, 904, pen, 2d 1824. Black Wyandottes, cock, 1st 934, hen, 1st 954, cockerel, 1st 93, pullets, 1st 96, 2d 96, 3d 954, 4th 944, pen, 1st.

INCUBATORS.—Prairie State, 200 egg machine, 1st, Samuel A. Mathes.

Abbeyville, S. C., Show.

To THE AMERICAN FANCIER:

The Abbeyville and Anderson County Poultry and Pet Stock Association held its first annual show at Abbeyville, S. C., December 11th to 14th. About 500 birds were on exhibition, and the show in every way was a grand success. G. O. Brown of Baltimore did the judging, which was entirely satisfactory to all. President, E. C. Connor, did not exhibit any of his fine birds, but devoted his entire time to looking after and caring for birds entrusted to the care of the association. Editor Lea of the *Tar Heel Poultryman* was on hand taking notes for his paper.

Below are the awards:

ROBERT S. LINK, Secretary.

LIGHT BRAHMAS.—Cock, 1st, M. E. Daniels, Simpson's Mills.

BLACK LANGSHANS.—Cock, 1st, Mrs. G. A. Neuffer, Abbeyville. Hen, 1st, D. L. C. Boland, Prosperity. Cockerel, 1st, W. D. Harrill & Co., Ellenboro, N. C. Pullet, 1st, Mrs. Neuffer; 2d, Boland. Pen, 1st, Harrill & Co.

G. S. BANTAMS.—Cock, 1st 94%, Hendrick & Reynolds; 2d 93%, Catlin. Hen, 1st 94%, Hendrick & Reynolds; 3d 93%, Catlin. Cockerel, 1st 95, pullet, 1st 95, pen, 1st 189%, Kendrick & Reynolds.

S. S. BANTAMS.—All to Hendrick & Reynolds.

B. PEKIN BANTAMS.—Hen, 1st, Weaver. Cockerel, 1st, pullet, 1st, 2d, John Morris, Seymour.

W. C. W. POLISH BANTAMS.—All to Jordan.

BLACK TAIL JAPANESE BANTAMS.—Hen, 1st 92, 2d 90%, Blake. Cockerel, 1st 94%, Hendrick & Reynolds. Pullet, 1st 95, Hendrick & Reynolds; 2d 93, 3d 97, Blake. Pen, 1st 186%, Hendrick & Reynolds.

WHITE GUINEAS.—Pair, 1st, Farnham.

PIGEONS.—Blue Dragons, 1st, H. Brown, Ansonia. White Wonders, 1st, Foster Bros. Seymour. Red Checker Homers, 1st, Foster Bros.; 2d, S. M. Beach, Seymour. White Homers, 1st, J. Swan; 2d, Beach. Blue Homers, 1st, Regan & Coleman, Seymour; 2d, Beach. Silver Dun Homers, 1st, Gregory; 2d, Regan & Coleman. Homers, best pair, 1st, Swan; 2d, Regan & Coleman.

DUCKS.—Pekins, 1st, Farnham; 2d, Chatfield. Aylesburys, 1st, Farnham. Rouens, 1st, Farnham; 2d, N. Mansfield, Bethany. Crested Whites, 1st, Farnham. White Muscovy, 1st, Farnham. Colored Muscovy, 1st, Farnham.

GEES.—White China, 1st, Toulouse, 1st, Embden, 1st, Wild, 1st, Farnham.

TURKEYS.—White, 1st, Farnham.

INCUBATORS, BROODERS AND BONE CUTTERS.—1st, Monitor Incubator, Bristol. 1st, Simplex Hatchers for exhibition. 1st, Manus Bone Cutter; 1st, Simplex Bone Cutter; 2d, Daisy Bone Cutter. 1st, Enterprise Shell and Grain Mill. 1st, Monitor Brooder. 1st, Gem Clover Cutter.

Awards at the South-Eastern Nebraska Poultry Show, Held at Beatrice, Neb., Dec. 24th to 29th.

B. P. ROCKS.—Hen, 1st 8½, 2d 8, Miss Hattie Cowles, Fairburg, Nebraska. Cockerel, 1st 90½, A. Gazier, Tecumset, Neb; 2d 90, 4th 80½, Miss Cowles. Pullet, 2d 89½, 3d 87½, Miss Cowles. Pen, 1st 181½, A. N. Daffoe, Tecumset; 2d 178½, W. A. Irwin, Tecumset; 3d 177½, Gazier.

W. R. ROCKS.—All to W. O. Southwick, Friend, Nebraska.

WHITE WYANDOTTES.—Cockerel, 1st 91, 2d 80, E. E. Greer, Beatrice, Neb. Pullet, 1st 95½, 2d 94, P. Wertenberger, Cortland, Neb.

SILVER WYANDOTTES.—Hen, 1st 90½, 2d 90½, cockerel, 2d 86, G. W. Ebenhart, Liberty, Neb. Pen, 1st 184½, E. H. Lann, Beatrice, Neb; 2d 177½, Beatrice.

BLACK JAVAS.—All to W. H. H. Benford, Beatrice, Neb.

LIGHT BRAHMAS.—Hen, 2d 80½, C. B. Berton, Beatrice; 4th 84, F. Crats, Beatrice. Cockerel, 2d 88½, Christ Stotts, Bremen, Kas. Pullet, 1st 92, Stotts; 2d 88½, Berton; 3d 85, Crats. Pen, 1st 183½, J. C. Gerspacher, Grand Island, Neb; 2d 180, F. Crate, Beatrice; 3d 179½, Irwin.

S. C. BUFF LEGHORNS.—Cockerel, 2d 89½, A. N. Daffoe; 3d 87½, E. E. Greer, Beatrice. Pullet, 2d 89, Daffoe; 3d 87, 4th 86, Greer. Pen, 2d 179½, Daffoe.

S. C. W. LEGHORNS.—All to Benford.

S. C. B. LEGHORNS.—All to Greer.

K. C. B. LEGHORNS.—Hen, 1st 92, 2d 91, Eberhart.

S. C. W. LEGHORNS.—Cock, 1st 93, hen, 1st 95½, 2d 94½, Benford. Cockerel, 1st 94, pullet, 1st 92, pen, 1st 183½, Greer.

R. C. W. LEGHORNS.—All to Greer.

S. C. BLACK LEGHORNS.—All to Greer.

BLACK MINORCAS.—Cock, 2d 90½, hen, 2d 87½, Benford. Cockerel, 1st 92½, Stotts; 2d 89, Clapp. Pullet, 1st 95, 2d 93½, Stotts; 3d 88, Clapp. Pen, 1st 180½, Clapp.

W. C. BLACK POLISH.—All to R. H. Cropper, Washington, Kas.

HOUDANS.—All to F. G. Schwank, Beatrice, Neb.

S. G. DORKINGS.—Pullet, 1st 93½, pen, 1st 174½, H. R. Pyle, Beatrice, Neb.

CORNISH INDIAN GAMES.—Cock, 1st 178, J. F. Miller, Beatrice. Cockerel, 1st 90, pullet, 1st 90, pen, 1st 187½, H. H. Halladay, Beatrice.

BLACK LANGSHANS.—Hen, 1st 93½, Berton. Cockerel, 1st 94½, 2d 94, Halladay; 3d 93½, M. F. Wolf. Pullet, 1st 95, Halladay; 2d 95, Wolf; 3d 94, Daffoe, 4th 94, Clapp. Pen, 1st 187½, Daffoe.

BUFF PEKIN BANTAMS.—Cock, 1st 93, Greer. Hen, 1st 94½, 2d 94, Cropper; 3d 93, Greer.

TURKEYS.—White, cock, 2d, J. E. Blodgett, Beatrice. Hen, 2d 87, cockerel, 1st 97½, pullet, 1st 96½, 2d 96, E. W. Doie, Beatrice, Neb.

PIGEONS.—Black Jacobins, cock, 1st, hen, 1st, Clapp; 2d, Chas. Hager, Beatrice. Outside Tumblers, cock, 1st, Hager; 2d, Greer. Hen, 1st, Hager; 2d, Greer. Yellow Outside Tumblers, cock, 1st, hen, 1st, 2d, Hager. White Pouters, cock, 1st, Greer. Black Fantails, cock, 1st, hen, 1st, Greer. Carriers, hen, 1st, Wm. Tibbets, Beatrice. White Jacobins, cock, 1st, hen, 1st, 2d, Tibbets. Black Fantail cock, 2d, Mrs. Dobbie. Spotted Fantail hen, 2d, Mrs. Dobbie.

DUCKS.—Rouen, cock, 1st 96½, hen, 1st 95½, Berton. Pekin, cock, 1st 96, 2d 95½, Greer. Hen, pair 1st 184½, Greer. Cockerel, pair 2d 190, E. H. Lann, Beatrice.

SWEETSTAKES.—Solid color, subject to weight, all to Daffoe. Part color, subject to weight, Linn. Solid color, not subject to weight, E. E. Greer. Paste color, not subject to weight, R. H. Cropper.

Ottawa County Poultry Show, Minneapolis, Kansas.

LIGHT BRAHMAS.—Cock, 1st 91, Frank Slater, Delphos, Kansas; 2d 86½, J. H. Stribling, Delphos, Kansas; 3d 86, Cord Smith, Minneapolis, Kansas; 4th 82½, D. Collister, Wells, Kansas. Hen, 1st 92½, Slater and Gage, tie; 2d 91½, 3d 89½, 4th 89, Clarence Gage, Minneapolis, Kansas. Cockerel, 1st 92½, J. E. Crosson, Minneapolis, Kansas; 2d 91½, A. P. Riddle, Minneapolis, Kansas; 3d 90½, 4th 90, Slater. Pullet, 1st 94, 2d 93, 3d 92½, 4th 92, Riddle.

DARK BRAHMAS.—All to E. E. Crosson, Minneapolis, Kansas.

G. WYANDOTTES.—All to F. E. Hurley, Minneapolis, Kansas.

W. WYANDOTTES.—All to M. E. Potts, Glasco, Kansas.

S. WYANDOTTES.—Hen, 1st 92½, J. W. Lyons, Minneapolis, Kansas. Cockerel, 1st 90, Charles West, Minneapolis, Kansas; 2d 89, Attridge Bros., Minneapolis, Kansas; 3d 83, Lyons. Pullet, 1st 92½, West and Lyons tie; 2d 92, Attridge Bros.; 3d 91½, Attridge Bros. and West tie; 4th 90½, West.

BARRED P ROCKS.—Hen, 1st 86, Charles Johnson, Minneapolis, Kansas. Cockerel, 1st 92½, S. J. Agnew, Minneapolis, Kansas; 2d 91½, 3d 91, 4th 90, Slater. Pullet, 1st 91, Agnew; 2d 90½, Agnew and Slater tie; 3d 90, 4th 88½, Slater.

W. P. ROCKS.—All to Jos. Smith, Minneapolis, Kansas.

BLACK COCHINS.—All to Jacob Campbell, Minneapolis, Kansas.

BUFF COCHINS.—All to D. Collister, Wells, Kansas.

PARTRIDGE COCHINS.—Cock, 1st 90½, hen, 1st 88, 2d 88, Albert Johnson, Minneapolis, Kansas. Cockerel, 1st 92, Perry Thomas Brown, Minneapolis, Kansas; 2d 90½, Johnson. Pullet, 1st 93, Johnson; 2d 91½, 3d 91½, Brown; 4th 91, J. E. Crosson.

LANGSHANS.—Cock, 1st 89½, hen, 1st 93½, J. E. Johnson, Minneapolis, Kansas; 2d 93, Collister; 3d 90½, Johnson. Cockerel, 1st 93½, O. L. Kinsey, Delphos, Kansas; 2d 92, 4th 90, Johnson; 3d 91½, pullet, 1st 94½, 2d 93½, 3d 93, 4th 92, Kinsey.

HOUDANS.—All to W. A. Roberts, Minneapolis, Kansas.

BLACK MINORCAS.—All to Geo. Walbright, Minneapolis, Kansas.

R. C. B. LEGHORNS.—Cockerel, 1st 93½, J. Huntsinger, Minneapolis, Kansas; 2d 89½, E. Butler, Glasco, Kansas. Pullet, 1st 92, 2d 91½, 3d 91, Huntsinger; 4th 90½, Butler.

R. C. W. LEGHORNS.—Cockerel, 1st 95, 2d 94½, 3d 94, 4th 93½, pullet, 1st 94, 2d 93½, 3d 92½, Kinsey; pullet, 4th 91, T. A. Cordry, Minneapolis, Kansas.

S. C. B. LEGHORNS.—Cockerel, 1st 92, 3d 90½, Collister; 2d 91½, 4th 89½, Brown. Pullet, 1st 92½, 4th 90½, Collister; 2d 91½, 3d 91½, Brown.

S. C. W. LEGHORNS.—Hen, 1st 93½, cockerel, 1st 92½, J. L. Steel, Minneapolis, Kansas.

INDIAN GAMES.—All to Lord Bros., Minneapolis, Kansas.

S. S. HAMBURGS.—All to Lord Bros.

B. G. POLISH.—Cock, 1st 90½, Gage; 2d 88, Gage and Campbell, tie. Hen, 1st 93, 2d 92, 3d 92, 4th 91½, pullet, 1st 93, 2d 92, Gage; pullet, 2d 92½, Campbell; 4th 89½, Butler.

B. S. POLISH.—All to Butler.

W. C. B. POLISH.—Hen, 1st 94½, Johnston.

TURKEYS.—Bronze tom, 1st 95½, hen, 1st 82½, C. H. Clark, Delphos, Kansas.

New England Light Brahma Show.

To THE AMERICAN FANCIER:

It may be of interest to you and your many readers in New England, and perhaps elsewhere, to learn of the plan to be pursued by the New England Light Brahma Club at the exhibition to be held in Faneuil hall, Boston, January 15-18.

Instead of confining ourselves to a competitive class alone, as in the last four years, we have arranged to have a sales department, with an entry fee of 25 cents, hoping thereby to induce breeders to send in their birds for disposal, thus affording anyone desiring good sound stock a chance to buy at reasonable prices without the expense of travelling round to different yards at so disagreeable a time of year. We expect that the best yards in New England will be represented in this department, and it seems as though it would be a splendid opportunity to find some most excellent breeding stock.

In our competitive class we have usually had from three hundred to four hundred birds shown. This year we have doubled the entry fee, making it \$1.00, and do not expect to have so many, and we would look on some decrease in the number somewhat of an advantage, as the judging could be accomplished so much sooner. The club offers this year, in addition to the usual regular prizes, five dollars each on the most typical shaped cock, hen, cockerel and pullet; also five dollars each for the best cock, hen, cockerel and pullet.

The awards for most typical shaped birds are to be decided by all the judges, Messrs. Philander Williams, J. F. Watson and C. S. Newell. The executive committee of the club has also decided to suggest to these gentlemen that they jointly designate the best cock, hen, cockerel and pullet.

A. JULIAN ROWAN,
Sec'y N. E. Light Brahma Club.
Box 7, Boston, Mass., Dec. 28, '94.

The Ionia, Michigan, Show.

To THE AMERICAN FANCIER:

On visiting this show the morning of the opening day, (Christmas) I was greatly surprised to find the indications promising for a large and successful exhibition. Of the 700 entries, nearly all were classified and in position at this early hour, and by noon everything was ready for Mr. Felch, but owing to some railway detentions, that gentleman failed to put in an appearance until late in the afternoon. Too much credit cannot be given the secretary, Mr. A. F. Herbert and his assistant for the thoroughness and the dispatch with which the arrangements were made and carried out. As soon as the judge had finished a class the cards were sent to the secretary, and in an almost incredible short space of time, were copied and ready for the exhibitor and the prize cards with scores attached, tied to the coop, a condition of things that was no doubt appreciated by exhibitors who have often had to wait several days for their score cards and until the last day of a show to know whether they had won or lost. The association was unfortunate in not being able to secure as commodious quarters as formerly, but this circumstance was not as bad as it might have been, the coops were large and roomy, some of them containing 5 or 6 birds. Smaller coops or more of them, and fewer specimens in each coop, would have added very much to the general appearance of the exhibits. Every good bird shows to a better advantage if cooped singly.

For various reasons it is impossible for me to go into detail as to the merits of each individual prize winner. Owing to the short time at my disposal, I was able to take in a few of the more prominent features only, and no doubt overlooked many birds worthy of special mention. This under the circumstance was unavoidable. Without knowing the exact number of entries in any particular class, I think it is safe to say that the Leghorns outnumbered and outranked any other. A breeder who could not be suited in either of the five varieties represented, would be hard to please. Mr. Goodell of Lowell, Mich., had some wonderfully fine R. C. Whites, and was an easy winner with scores ranging from 94 to 95½ on females, while his second prize cockerel was a good one. Mr. Mason, also of Lowell, had some very rich Brown's which brought him in a number of prizes.

Geo. S. Barnes made a fine show of Buffs. A pullet scoring 94½ and a cockerel 94 in this new variety, is something to be proud of. I am very glad to be able to speak a good word for Mr. Barnes' birds from the fact that four years ago I had occasion to criticize his exhibit at Kalamazoo rather severely. The progress he has made since that time is a great credit to him as a breeder, while it shows what pluck and perseverance will accomplish in the development of a new breed or variety. Fine as was the display of Leghorns, the Light Brahmases were close upon them. I was greatly disappointed in not seeing a larger representation of Wyandottes. Ten or twelve Silvers were obliged to represent the entire breed, no Goldens, Whites or Buffs to share with them the honors. M. F. McNaughton had the finest collection, two of his pullets would make a mark for themselves in any show. I shall be very much surprised if he did not win nearly everything.

The B. P. Rocks were more numerous than the class last mentioned, and among them were some very fine specimens. C. H. Clement showed some very evenly barred and nicely colored birds, but I imagine they were too small to win over their larger though darker competitors. White Rocks showed up well, one cock bird being especially fine. The display of Houdans would have done credit to a much larger show, both as regards num-

ber and quality. The different varieties of Polish were well represented, especially the W. C. B. variety Hamburgs showed up well, and if I were a game fancier I might have gone wild over the high stationed representatives of that breed. I was assured that they were "away up in G," and they certainly looked as high as that if not higher. Now for Jackson, Jan. 8th to 11th!

IRVING CROCKER.

Poultry at Peoria Show.

The poultry exhibition at our late show was not very large, but what it lacked in quantity it made up in quality. Mr. David Finch of Peoria, judged the Plymouth Rocks and Mr. Chas. S. Proctor, also of Peoria, the other varieties, and everybody seemed to be well pleased with their decisions. The following are the awards:

LIGHT BRAHMAS.—Cockerel, 1st, C. W. Brown, N. Peoria, Ill. Pen, 1st, Brown.

S. WYANDOTTES.—Cockerel, 1st, J. G. Goetz, Harkers Cor., Ill.; 2d, M. J. Kavanaugh, Peoria, Ill.; 3d, Robert Davis, Peoria. Pullet, 1st, J. G. Goetz; 2d, Kavanaugh; 3d, Davis. Pen, 1st, Max Koenig, Peoria; 2d, Davis.

S. S. HAMBURGS.—Cockerel, 1st, hen, 1st, Joseph Wombacher, Peoria.

BUFF LEGHORNS.—Hen, 1st, F. H. Jordan, Peoria. Pen, 1st, Jordan.

R. C. BROWN LEGHORNS.—Pullet, 1st, pen 1st, Henry Schimpff, Peoria.

S. C. BROWN LEGHORNS.—Hen, 1st, cockerel, 1st, Wombacher; 2d, 3d, W. H. Koch, Peoria. Pullet, 1st, 2d, pen, 1st, Koch.

INDIAN GAMES.—Cock, 1st, Schimpff; 2d, Brown. Hen, 1st, Brown; 2d, Schimpff. Cockerel, 1st, 2d, Brown. Pullet, 1st, pen, 1st, Brown.

B. P. ROCKS.—Cock, 1st, J. P. Lenallen, Peoria; 2d, S. F. Flint, Peoria. Hen, 1st, 2d, 3d, Flint. Cockerel, 1st, Flint; 2d, Brown; 3d, Lenallen. Pullet, 1st, 2d, Flint; 3d, Brown. Pen, 1st, Lenallen.

PARTRIDGE COCHINS.—Hen, 1st, 2d, 3d, G. W. Kunsman, Peoria. Cockerel, 1st, G. O. Gable, Peoria; 2d, 3d, Kunsman. Pullet, 1st, 2d, 3d, Gable.

BLACK LANGSHANS.—Pullet, 1st, F. Roszell & Bro., Peoria; 2d, 3d, Brown.

BUFF COCHINS.—Pullet, 1st, Fred Peters.

B. B. R. GAMES.—Cock, 1st, hen, 1st, Schimpff.

B. B. R. GAME BANTAMS.—Cock, 1st, hen, 1st, Lenallen.

PIT GAMES.—Cock, 1st, hen, 1st, Peters.

SPECIALS.

Largest entry, Brown. Best Indian Game cock, Schimpff. Best Light Brahma pullet, Brown. Best Langshan cockerel, Roszell. Best Buff Cochins pullet, Peters. Best Partridge Cochins cockerel, Gable. Best B. P. Rock cock, Lenallen. Best S. Wyandotte hen, Koenig. Best S. C. Brown Leghorn cockerel, Wombacher. Best S. S. Hamburg hen, Wombacher. Best B. B. R. Game Bantam cock, Lenallen. Best Asiatic, Kunsman.

Practical Pointers.

BY GEORGE E. HOWELL.

[Address all Communications for this department "Practical Department," AMERICAN FANCIER, Johnstown, N. Y.]

Have you mated your breeding yards? The early hatched chick wins the plums at the fall shows.

Keep the floors covered with straw, chaff, or other litter; bare floors never yet aided egg production.

And, I might add, inactivity does not produce fertile eggs in January. Good health, plenty of exercise, and congenial surroundings sends the blood coursing through the veins of man or bird.

The poultryman who sojourns in the land of alligators and orange blossoms knows nothing of the vigor of our northern climate. Last July many a good citizen was kicking, continually kicking, about the beastly weather. Before spring there will be many occasions, with the mercury running down so far that it is impossible for the average thermometer to record it, when a little of that same beastly weather would come in very acceptable, but as one can't have the weather made to order, the next best thing is to make all snug and tight and as warm as possible.

Some heat their poultry houses. I cannot say I favor the idea. The birds get tender and need lots of coddling. A nice coop, double lined throughout, is more to my liking.

Numbers go a great way toward maintaining a living temperature in a house. I have noticed where only a wire partition separated two pens they would roost near the partition, instinctively knowing they generated warmth for each other; no fools, those hens.

Then, again, some fanciers have a false partition, hung on hinges to the roof, which can be let down against the board platform under the roost, making all snug. The smaller the flock the smaller the roosting room is a good rule to follow.

A single bird will often perch on a pole by itself, with the result of having some frozen toes next morning, whereas if no perch had been supplied or the company larger he would have defied old Jack. Use common sense and nineteenth century intelligence and my word for it, when spring comes you will be richer as far as health of the flock is concerned.

I never visit "ye true born fancier" and notice the pride, almost veneration, with which he handles his favorites without acknowledging to myself the worth such a fancier is to the ranks. There is a certain feeling of satisfaction that pervades the air about such a person as he gazes fondly on the result of his labors and notes the perfection of his fowls. He goes over each, section by section, and imagines he has nearly or quite reached the goal he seeks, the Mecca of his ambition. Let one feel only the interest the trotting horse owner accords to the runner; he unconsciously bows down and worships. He knows he is in the presence of a thoroughbred, the conqueror of others, a king of his kind. So it is with a poultryman. He may not breed the favorite variety of his brother fancier, but he sees one as much in earnest to breed the champion of that variety as he is to perfect his own, and first admires, then loves them because of their breeding and perfections.

What's the matter with having some system in the way of arranging and running poultry shows? Twenty years since a poultry show was an experiment; to-day they are *en vidence*, so to speak, but do they get the full appreciation from the public they deserve, and do they serve the interest of the poultry fraternity to the extent they are capable of? A show is held in Hayville to-day.

The boys send their birds, and count themselves lucky if they get them judged before it is time to pack up for home and go away plus the prize card, minus their cash. The public can see chickens anywhere, but would go in a show were the ribbons up, so they could see which was which. They may have friends exhibiting, and would be glad to go in and see if they were winners or got scooped. Take the school system, for example. It is run on a graded schedule; a scholar starts at the bottom and works up. For another illustration, note the method of the Homing pigeon flyers. They start at 25, 50, 75 miles, and work up to three hundred and over.

New York State is well equipped to run her shows on this plan. The New York State Poultry Association is organized, and has been for several years. Each county is supposed to have a vice-president. It only needs a little shaking up to throw off the stupor into which it has fallen. The State gives to the people large appropriations to carry on the work of educating the farmers; it would give just as lavishly to help the poultry interest if asked. We have a poultryman in the Governor's chair with the incoming administration. Let the New York State Poultry Association arouse itself. Let others join the organization and arrange for a show in the counties recognizing the fancy, that is, having poultrymen within the borders. Hold these shows in the largest city or town, and make them of interest to the people—a lecture on poultry and an exhibit calculated to draw a crowd. Let the winners go to larger cities, such as Rochester and Troy, with increased entry fee and prizes. Then, as a grand finale, let the winners meet all comers at New York, Boston, Cincinnati, Kansas City, Denver, and Los Angeles. It can be done, for both the fanciers and people will support it.

Leghorn Club Specials.

TO THE AMERICAN FANCIER:

The American Leghorn Club will hold its first annual show and meeting at Madison Square Garden, New York City, January 30th to February 2d, 1895. The meeting will be held on Friday, February 1st, at 2:30 P. M.

The following specials are offered for competition:

\$25 in gold for the best display of S. C. Brown Leghorns, by James Forsyth. Competitors must enter in all classes cock, hen, cockerel, pullet and pen.

\$10 in gold for the best ten S. C. Brown Leghorn cockerels, by James Forsyth.

\$10 in gold for the best ten S. C. Brown Leghorn pullets, by James Forsyth.

\$5 in gold for the best S. C. Brown Leghorn cockerel having best stripe in saddle, by James Forsyth.

\$5 in gold for largest Standard S. C. Brown Leghorn cockerel and pullet, by James Forsyth.

\$5 in gold for the best breeding pen of R. C. Brown Leghorns, by James Forsyth.

\$5 for best exhibit of Brown Leghorns, by W. T. Brace.

Poultry Monthly one year for best R. C. Brown Leghorn cockerel, by C. W. White.

\$5 for best pair of S. C. W. Leghorn cockerels, by Ezra Cornell.

\$5 for best ten S. C. W. Leghorn pullets, by Ezra Cornell.

\$5 for best breeding pen of S. C. W. Leghorns, by Ezra Cornell.

\$5 in gold for best breeding pen of R. C. W. Leghorns, by James Forsyth.

\$5 for best exhibit of White Leghorns, by the Club.

\$5 for the best breeding pen of Black Leghorns, by the Club.

\$5 for the best exhibit of Dominique Leghorns, by the Club.

\$5 for the best breeding pen of Buff Leghorns, by the Club.

\$5 for the best Buff Leghorn, male or female, by Ezra Cornell.

\$5 for the best exhibit of Buff Leghorns, by the Club.

Poultry Monthly one year for best Silver Duckwing Leghorn, by C. W. White.

\$5 for the best Leghorn female, weighing four pounds or over, of any Standard variety, size to be given preference over weight above the four pound limit, by Wm. P. Wheeler.

\$10 for best Leghorn male or female, any variety, by the Club.

\$20 for the largest and best display of Leghorns, by the Club.

EZRA CORNELL, Secretary.
Ithaca, N. Y., December 29, 1894.

New York State Poultry Society.

The annual meeting and election of officers of the New York State Poultry Society will be held at Agricultural Hall, Albany, N. Y., on Wednesday, Jan. 16th, 1895, at 5 P. M. The following amendment to Section V. of the Constitution will be voted upon: "The annual meeting and election of officers of this society shall be held on the first Tuesday evening during the State fair at Syracuse, and a special meeting may be called during the winter in connection with any poultry show held in this state."

F. E. DAWLEY, Sec'y.
Syracuse, N. Y., Dec. 17th, 1894.

Correction.

In your report of the Cleveland show, it reads in Black Langshans, "pullets all to Todd." Now, as both my name and the report is wrong, would ask that you kindly make correction in your next issue and correct name, Power, instead of Porrer, and 1st, 2d and 3d pullets to Power instead of Todd. I am sorry this has occurred, and have seen it in several papers the same way. C. M. POWER.
Kent, Ohio, Dec. 31st, 1894.

PIGEONS.

Editorial Squibs.

We are indebted to Theo. O. Taubert, of Sandusky, Ohio, for a most excellent photograph of his pigeon loft. The camera caught the Pouters and Fantails in fine style.

Major F. M. Gilbert had an easy time judging the pigeons at Kansas City, as the entries were not large. We were glad to note the excellent health and spirits of the Major, but cannot account for his mysterious and sudden departure from the scene of action. As there were no excited pigeon exhibitors hankering after his scalp, and as everybody seemed pleased to shake with him, he had no just cause for vamoosing the ranch. Perhaps the thought of being asked to deliver a speech caused him to pack his belongings and fly the coop. "Si Twist" is still looking for the Major. He wants that Atlanta speech delivered.

The election of F. M. Gilbert as president and of P. F. Hager as secretary of the American Columbarian Association should meet with universal approval in the fancy. Both are live, progressive, and thorough fanciers.

George N. Crockett, of Concord, N. H., has purchased the entire collection of Archangels belonging to Wm. Broemer, of Baltimore, Md. No finer loft exists in America. Mr. Crockett offers a number of pairs for sale at tempting prices.

Keep an eye on Cincinnati. There will be a great lot of pigeons there. The classification is the most liberal we have ever seen.

George Ewald writes us that he will not exhibit his pigeons for competition at Cincinnati, but for exhibition only, not wishing as an officer to compete against his friends. He will, however, enter for competition at the great New York show, bringing a large team of birds.

Transfer.

Mr. Wm. Broemer's entire collection of Archangels to George N. Crockett, Concord, N. H.

Cincinnati's Great Show.

TO THE AMERICAN FANCIER:

The outlook for one of the best shows ever held west is that of the one to be held by the Cincinnati Poultry & Pigeon Association. Everything is in shape and by the time this reaches the eye of all your readers the hall will be ready to receive all stock. We trust that every fancier interested in the same has by this time got a premium list, if not send for one at once. We will hold entries open until 11 A. M., January 8th, when our list closes and the official catalogue goes to the printer in order to be in readiness on the morning of the 10th. This is the 26th of December and our list is hardly in all fanciers' hands, but this morning's mail brings in all told, 177 entries in pigeons, 65 in poultry, besides a few ducks and geese. The interest taken here among our citizens and business men is of the most flattering kind. Our daily papers are doing all in their power to aid us and taken all in all this is a sure sign of success. Every pigeon and poultry fancier in this country knows that Cincinnati stands in the top rank as a show town. Go back to 1891 when it put the first pigeon show ever held in America in the field. It was a grand success in every way. There were more fanciers out then than any two shows put together. Fanciers, we are going to repeat this show, so those who missed it then, should be with us now, only we have taken in the poultry fanciers, so it will be a double header in the way of a show. Every mail is bringing in stacks of letters so that we have been compelled to call in help to answer some. The poultry fanciers will be out in full force. As to the pigeon fanciers, they will stand by the best conducted show in the country. Again we say, be with us. The American Fantail Club will be out in full force. The American Pouter Club will be organized. Many of the members of the specialty clubs write that if the latter don't meet at Cincinnati they will be there. It is expected that the American Owl Club and the American Jacobin Club will meet with us, as promises are made to that effect. Come boys, get in line, be with us; we trust we may meet you all at our great show January 10 to 16. A Happy New Year to all is the wish of
GEO. EWALD, Sec'y.
Cincinnati, Ohio, December 26, 1894.

Seamless Bands.

TO THE AMERICAN FANCIER:

Mr. G. A. Fick, our secretary, had an article in THE AMERICAN FANCIER of Dec. 22d in regard to seamless bands, and which band the Magpie club should use. I am in favor of the bands made by T. Willet. They are the right thing for a Magpie and can't be put on an old bird, like some of the other bands in use at the present time. I heard that some of the Magpies entered in the young bird classes at Boston were old birds with 94 bands. The Webb band is too large for a small Magpie, and can be taken off or put on very easy. If there is a bird in the young bird class in New York that has a band on that can be taken off, I will protest if the bird should win a prize, so fanciers take note of this. It was done once before, but the birds that had them on did not receive anything and it did no harm. The Willet band is very neat and light, keeps bright, and the principal thing about it is, it don't cost much. You know bands that cost five or six cents apiece, are worth as much as some of the birds that have them on. These bands can be had at about two cents apiece, and if the club would take a large number they could be bought far less than two cents each. If the club intends using bands of one kind, we must make up our minds at once, as the first of the year is past and some of the members will have their birds mated very early.

GEO. W. SPOHN.
Member of Magpie Club.
Philadelphia, January 3d, 1895.

Stray Homers.

TO THE AMERICAN FANCIER:

Please state in your paper that I have in my loft a stray Homer banded A. S. H. C., 832, 94.
F. C. BRUNNER.
Westfield, N. J., Dec. 27th, 1895.

Massachusetts Columbarian Association.

To THE AMERICAN FANCIER:

The semi-monthly meeting of the above association was held on Friday evening, December 28, at 133 Blackstone street, Boston, with President Gavin in the chair, some 30 members being present. The minutes of the previous meeting were read and approved.

The absence of the financial secretary was much to be regretted, as I noticed several members put in an appearance on this evening, no doubt, at the call of the corresponding secretary, and I believe came fully prepared to pay up their dues, had the financial secretary been present. On this account no business could be done financially.

Some 14 Black Checkered Homers were exhibited by Messrs. Harris, Cooke and Carpenter, and the president appointed Mr. Henry Wagner to judge the birds, who made the following awards: Black Checkered Cocks, 1st, J. C. Harris; 2nd and 3rd, Fred C. Cooke. Hens, 1st, 2nd Cooke. Cocks of same color, 1894 hatch, 1st, Cooke, and George Carpenter.

The next meeting will be held on Friday evening, January 11th, and a full attendance of members is earnestly requested. The varieties to be exhibited are Red and Yellow Pied Pouters, Red and Yellow Jacobins, Black and Blue Turbits and Black Magpies, cocks and hens of each variety, and all the same in young birds of 1894 hatch. Members please take notice and avoid mistakes.

Motion to adjourn was carried at 9:30 P. M.

GEORGE FEATHER,

Corresponding Secretary.

Mattapan, Mass., Dec. 31 '94.

Correction.

To THE AMERICAN FANCIER:

A few typographical errors have crept into my critical report of Boston's exclusive pigeon show, which are of little importance, as from the context the errors can be easily detected. There is one matter, however, that I should like to have righted.

It occurs in my remarks on any color Barb, hens, 1893 bred, where I say both belonged to Newell, whereas, first prize bird is owned by W. W. White, of Baltimore. I appear to have been misled owing to a misprint in the catalogue. I note, however, the matter is right in the prize list.

In the catalogue opposite pen No. 122 a Mr. White's name does not appear, although the pen contained the winning bird, and I am informed was owned by Mr. White.

JOHN GLASGOW.

Corrections.

To THE AMERICAN FANCIER:

In Yellow Pied Pouter hens, it should read 2d Reid instead of Wagner. Dun Carrier hens, 1st Pearson, not Sweeney. C. P. L. White Fan cock, 2d, hen, 1st, Suter, not Inter. Best 1894 White Fan, 1st, Robison; 2d, Weiss, not Robison. Best 1894 Saddle Fan, 3d, Robison, not Weiss. Yellow Magpie cock, 3d, Joos, not Tieman. Self-Colored B. Flying Tumbler cock, 1st, Peacock & Smith. Self-Colored C. L. Flying Tumbler cock, 1st and 2d, Schimpff, not Schimmel. Self-Colored C. L. Flying Tumbler hen, 1st and 3d, Schimpff.

Omitted.—Yellow Magpie hens, 1st and 2d, Joos; 3d, Tieman. Snip Swallow hens, 1st, Weick. Wing Trumpeter cock, 1st, Tieman.

ROBERT JOOS.

Peoria, Ill., January 2d, 1895.

American Columbarian Association.

To THE AMERICAN FANCIER:

The American Columbarian Association will meet at Cincinnati, Saturday, January 12th, 1895. A full attendance is requested, as business of great importance to the fancy will come up. Will also elect vice-presidents, finance committee and treasurer; also, adopt a band for 1895. The officers for 1895 are as follows: F. M. Gilbert, president; P. F. Hager, secretary.

Executive Committee—Dr. F. W. Tugle, Geo. F. Peer, Sam. Casseday, An-

drew Muehlig, H. V. Crawford, W. T. Levering, T. Farrar Rackham.

W. F. LEVERING, Pres't.

P. F. HAGER, Sec'y.

American Fantail Club

To THE AMERICAN FANCIER:

There will be a meeting of the American Fantail Club, at Cincinnati, Saturday, January 12th, 1895. The officers for the year will be elected, and applications for membership to the club will be acted on. It is earnestly requested that all members be present.

F. M. GILBERT, Pres't.

P. F. HAGER, Sec'y.

Pigeon Flying.

Homing Gossip and Echoes From the Flying Fancy.

BY "FRITZ."

I am asked by a correspondent whether I deem it unwise and hurtful to the birds if one enters the loft after dark with a lantern, which he frequently does, owing to his business at this season of the year calling him away early in the morning before daylight, and it is dark when he returns home at night, and wishing to enjoy the company of his pets he invariably spends some time with them every night by lantern light, and finds no ill effect among them from the practice.

My correspondent is not the only fancier with whom I have come in contact who is given to the practice of entering the loft at night, and I know many who constantly do so. While no apparent ill effect may result from the practice, yet I am firmly opposed to any such unreasonable and unnatural disturbance of the birds.

When darkness has set in, and the inmates of the loft have sought the seclusion and rest on their favorite perch which their loft affords, I deem it both unwise and unreasonable for the fancier to intrude any such lantern-light disturbance upon his birds.

I'll be bound that they view such unreasonable visits in much the same light that their owners would, were a friend to throw open the door of their bedroom several hours after they had retired for the night, light the gas, wake them up from a sound sleep, sit and stare at them for half an hour or so, and then suddenly turn down the gas and retire.

Every reflective fancier cannot but condemn such practice, and the mere gratification to be derived in looking at one's pets by lantern-light after dark, should certainly be sacrificed by the fancier who really loves his pets for the more humane and fancier-like desire to give them as much comfort and natural night's rest as possible.

How can any possible good and well being accrue to the birds when their rest and quiet is so suddenly disturbed, and their sight now at rest and ease in the darkness, blinded and dazzled by the sudden flash of the lantern or light in the loft?

The birds need no food or water at this hour, for nature has taught them to so supply themselves before going to rest, and yet my correspondent also remarks "they so enjoy a handful or two of hemp seed" which he gives to them (no doubt as an apology for the intrusion) and he says further that "the birds have become so nice and tame."

Oh no, young fanciers, never disturb your birds after they have gone to rest, unless it is absolutely necessary to enter the loft to ascertain whether a missing favorite has returned during the day—which the best of us no doubt occasionally does, or for some other important reason—but by no means let the mere idle curiosity of looking at your pets, or exhibiting them to any friend take you there after dark, and particularly with a light.

Such visits unquestionably cannot be beneficial to them, and may yet have an unhealthy influence, if not immediately

discernible, perhaps later on. The practice is entirely wrong, and one I strongly condemn.

In connection with this correspondent's letter, I will touch upon the subject of tame birds which now occurs to me.

The fancier of racing Homing pigeons needs none such in my judgment. I never cared for them, and never will. Perhaps those who possess such, may advance by way of argument that the tamer the bird, the less possibility there exists of startling him on his return from a race, and less liable to lose time in going in, that these tame birds are so much easier to handle, are more at home in the baskets, will move readily, feed and water in transit to the race station than the wild, restless chap, and will altogether more readily acquire his teachings to home, and do what his owner expects from him.

My experience has taught me differently. Give me the wild restless chap that is never really at home or contented unless in his own loft, or his own perch and box. I have had tame birds in my time, but never yet one that hurried to get home. Reliable? yes, but speedy? no. The working Homer is not a bird to handle often and fondle as a pet. I rarely take my birds in hand, if they pass muster day by day, as is my custom to run my eye over them each morning, to see that all are well, and only handle them a few times in the year when absolutely necessary. It is rare that I hand them to my visitors to examine and ruffle. To observe the working Homer critically and at his best, you must look at him standing bold and upright on his perch in the loft, not as a mass of struggling and disturbed feathers in your hand, with his fine lines hidden and distorted. My birds don't fear my presence in the loft, and are not disturbed by my entrance much, yet can readily detect when strangers are present, yet the most of them are hard to catch, and I want them so.

Constant handling and fondling of one's birds undoubtedly renders them tame, and the tamer they become the less restless and active is the temperament. They become in a measure subdued, and lose that determination, snap and vigor which characterizes the successful and speedy worker, and so essential to a racer when battling against contrary winds or hard weather. Furthermore these tame birds are far more difficult to get into fit racing condition, and as a rule less inclined to go up and work when sent out of the loft for exercise at the early stages of the training season. It is the wild and untamed chap that at the click of the opening of the trap is at once out and up, and stays there, because he is in his right element, but your tamed pet enjoys the inside of the loft, looks for your presence, and customary relishes of hemp seed, and evinces altogether a natural dislike for work. It is extremely difficult to condition such birds, and without condition, racing Homers are useless in competition against crack flying stock.

Of course there are always exceptions, and no doubt many of my readers may be able to instance certain fine workers in their loft who were exceptionally tame and gentle, but I am quite sure from my observation and personal experience, that the average successful worker is a wild, fiery, restless and quarrelsome bird difficult to catch and hold in hand, and quite unaccustomed to being handled and fondled, with a natural dislike to being tamed or subdued in any way. The great majority of my best birds, old and young, of that now pass through my mind, were of this wild type, and I have in late years never attempted in my handling, matings and breeding, to counteract, or in any way lessen or subdue this wild, restless quality, in fact, I endeavor to cultivate it.

I am quite sure that such birds are far less inclined to enter strange lofts, are not to be caught by chaff, and will respond to certain work that the tame bird will shirk, and furthermore, I think that in reproduction, the type of bird I favor transmits a more sound and vigorous constitution to its young.

During the interval between the ratifi-

cation meeting held in the afternoon and the annual meeting of the National Federation in the evening at Odd Fellows' hall, Philadelphia, on the 13th ult., the Quaker City flying fanciers entertained themselves and visitors right royally. It was indeed a veritable love feast, and the greatest harmony prevailed. Very many prominent flying men sat down to the dinner, and it was indeed refreshing, after so many seasons of discord, to see so thorough a unity and to listen to the many leading representatives from various flying sections in the after dinner speeches all speaking to the point, and with the one common object—the advancement of the flying sport and national organization. The American flying fancy cannot but be advanced by such social reunions, and a more healthful influence cannot be imagined.

Viewing the splendid array of flying talent present, hailing from Philadelphia, I almost wished I was a resident of the Quaker City, and for many reasons. There is no other flying section which can boast of so large a number of good flying men within so close a radius, and this means superb competition under equitable conditions and the fullest enjoyment of pigeon racing.

I feel deeply indebted to the Quaker City boys for the many courtesies extended, and apart from the honor conferred upon me by unanimously electing me to the presidency of the national organization, I shall for many years to come cherish with the pleasantest memories the annual meeting and dinner of 1894 in Philadelphia.

In recent notes I touched upon the question of keeping the loft and loft fixings neat and trim, and wrote at some length against the indifference of so very many fanciers upon this important subject, and how such slovenness in the loft and indifference to outward appearance influenced many votaries of the sport and non-fanciers most unfavorably. In delightful contrast to such shortcomings was a visit I made very recently to the loft of Mr. Louis W. Spanghel, of Brooklyn, N. Y., he of "Duffer" fame, the president of the Empire City Flying Club of New York and vicinity, to inspect the improvements and alterations in his loft which I knew he had been engaged in during the past few weeks, and to be candid I must confess that I was anything but prepared for such startling and novel features which were presented to my criticism.

Whatever the genial Louis does I know from long experience and association with him as a pigeon racing fancier he does well and liberally, and his present establishment is in full accord with such reputation. I now tell to my readers that here the *Fin de Siecle* homing loft of the homing fancy is to be seen. Neatness, cleanliness, perfect ventilation, situation, cheerfulness, non-overcrowding and perfect trapping facilities, with perfect accommodations for owner, timer and visitor, as well as occupant of the loft, at once strikes home to the critic.

A more perfect establishment I have never inspected, and I warmly recommend all flying fanciers when opportunity occurs to take it in. I have not the leisure nor space here to dwell at any length upon this model and up to date homing pigeon loft, but it will suffice to say that in its construction and arrangement every important point of advantage and comfort for bird and owner is fully covered. When I left the genial company I met there, and after spending several of the most pleasant hours in inspection and conversation that possibly falls to the lot of an enthusiastic flying man and scribe, I did not really know when asked by the owner of the loft for any possible improvements or suggestions that I could offer, whether to recommend silk fringe for the dado shades on spring rollers, which conveniently cover the numerous windows of the reception and timer's room on the roof, or whether additional camp stools and China cuspadors would be in order.

All I can say is, whenever flying men are in the Brooklyn vicinity they should not fail to inspect this model flying loft at 183 Penn St.

A Gloversvillian's Experience.

As I read of that wonderful flock of young birds owned by "Fritz" during the summer of 1885, which he supposed flew for so lengthy a time during their morning exercise, I laughed so heartily that my wife remarked: "Has Puck or Judge got something good; please read that I may laugh too," she never dreaming that THE AMERICAN FANCIER could produce such a ripple and create such laughter. Yes, this summer I flattered myself, such a flock was I possessor of. At club meetings I would relate of my birds flying so high and staying away from two to three hours, and I can recall the peculiar twinkle in the eye of A. C. Butts and his remarks of, "such I have never had," and the wistful look of Secretary Clark, wishing he had such a flock. These were moments of triumph for me, but, alas, this triumph was one of short duration. I had invited a number of my friends to see the homing of my birds from the 100 mile race of our club. It was an ideal morning for a flying race, and I flattered myself that the guests would have a surprise at the manner the birds would home and go through the trap and into the loft. Soon the birds were seen coming and they not being accustomed to see so many persons around their coits, alighted on the roof of my house. One of those present, not thinking of what he was doing threw at at them; they at once arose in the air and flew in the direction which they always went when they took their morning exercise. After waiting fully a half hour, I saddled my horse and rode about 4 miles in the direction they had gone, using my field glass continually. My search, at last, was rewarded, for half a mile farther on was a flock of pigeons circling round a farm house, and by the time I reached there they had alighted on the ground, and, to my chagrin, some of them were my flock of long flyers visiting common ones owned by the farmer, who, with a smile blandly said: "Yes, they are late this morning, they come and feed with mine, and Anna, my wife, looks for them as if they were our own." Now if any of my brother fanciers are blessed with 2 or 3 hour flyers, don't tell anybody. A. C. SAUNDERS.

Gloversville, N. Y.

Jacobin Club.

To THE AMERICAN FANCIER:

The American Jacobin Club will hold its next annual meeting at the New York Show, Madison Square Garden, Friday afternoon, February 1st, at 2 o'clock. Election of officers and other matters of importance.

M. B. BLAUCH, Sec'y.

Lebanon, Pa., January 2, 1895.

SACRIFICE SALE.—Owing to change of business, I am obliged to dispose of my poultry consisting of Buff Leghorns (genuine Lister Kay strain), Buff Wyandottes, Partridge Cochins, White Minorcas and Narragansett turkeys. I will sell them for half their value, as I have not the time to give them necessary attention. For further information, address D. C. HOFF, JR., 217 Academy street, Trenton, N. J. Poultry yards situate at Centreville, N. I. *468

R. C. B. LEGHORN and White Wyandotte chicks. Limited number of fine birds, result of eight years' careful breeding. Don't write for culis, none for sale. A few Homing pigeons, \$1 per pair. *1360

W. F. EVERITT, Westfield, Pa.

COCHINS.

FULL FEATHERED English Buff Cochins. I have still a few cockerels for immediate disposal, \$3 to \$7.50 each to clear. No better blood in the fancy, and to purchasers looking out for fresh blood a good opportunity. Those cockerels are from imported birds, sired by ad prize cock at New York, 1894. *tf71

JOHN GLASGOW, Mahwah, N. J.

I WILL BE READY TO SHIP, any time after July, '94, anything you want in Buff Cochins, Light Brahmas, and B. Langshans. The quality will be as fine as any to be found, and I will make the prices low enough to suit anyone. Send for circular; also send for catalogue of Monitor Incubator and Brooder and for the Famous Whitewasher and Vermin Exterminator. W. C. BYARD, Walnut Hills, Cincinnati, Ohio. (Ad. No. 7.) *tf38

LANGSHANS.

ATTENTION!—Thirty Black Langshan pullets, April hatched, \$1.50 each; fifteen yearling hens, \$1.50 each; six Black Langshan cockerels, \$2 each. Extra good breeders. *470

TIXBURY BROS., Amesbury, Mass.

OVERSTOCKED.—In order to make room, I will sell in lots of five or more, 25 Black Langshan pullets at \$2 and \$3 each; cockerels at same price, to go with them if you wish. The above are well matured; have some outs about them, of course, but good breeding birds all the same, and a snap bargain. *468

DR. F. M. ROBINSON, Pawling, N. Y.

DORKINGS.

SILVER GREY DORKINGS exclusively. Ten very choice cockerels for sale; descendants of imported stock; fine in form, size and color, all very valuable birds for breeding or exhibition. Prices on application; write me. *1360

WATSON WESTFALL, Sayre, Pa.

MINORCAS.

MARK SPENCER, North Salem, N. Y., breeder of high-class poultry. Black Minorcas (Northrup strain), Buff Cochins, Indian Games, Langshans, White Wyandottes and B. Plymouth Rocks. Eggs from above, \$2 per setting; three for \$5. Black Minorca cockerels, June hatch, \$2 each; very fine, large birds. All persons ordering \$10 worth of eggs at one time will be given a yearly subscription to THE AMERICAN FANCIER. *1368

SHOEMAKER'S BOOK
ON
POULTRY
And Family Almanac for 1895. 80 pages, 20 engravings, the finest work of its kind ever published. Gives recipes for making egg food; condition powders; remedies for all diseases of fowls; plans and diagrams for building poultry houses, tells you how to raise chickens profitably, gives full description with illustrations of 45 leading breeds of pure bred fowls. It is an encyclopedia of poultry information, worth many times its cost to anyone interested in poultry. You positively cannot afford to be without it. Sent postpaid on receipt of price lists. Address C. C. SHOEMAKER, Box 15, Freeport, Ill., U.S.A.

MY WHITE PLYMOUTH ROCKS
Won every 1st prize, except one, at the great Hagerstown Show (Md.) in 1894, in the hottest competition. Great size, small, fine combs, and absolutely pure white plumage are chief characteristics. A few young birds for sale yet. Eggs \$2 per 15, after February 1, 1895. 52160

96 HONEST POINTS

By Drevenstedt and Bicknell. That's the way my Standard

WHITE LEGHORNS

Run, after an experience of 30 years with them Judge Bicknell said to me at Reading Show "Geyer, you have the best shaped Leghorns I have seen for many a day." It's a fact they are grand. Just write for my Catalogue to find out more about them and other breeds I keep. Also the sole manufacturer of Geyer's Champion Egg Incubator and Condition Powder, and Champion Disinfectant and Vermin Destroyer. Sure death to all vermin, and for gapes. Agents wanted. 52132
G. A. GEYER, Florin, La. Co., Pa.

BUFF LEGHORN COCKERELS

Here is a few of those dark colored breeders so much sought after. Good under color, splendid combs, ear lobes, bright yellow legs. These birds are direct descendants of the finest breeding male Mrs. Lister Kay ever sent to America, known as "Joker," the World's Fair winner. The sire of these cockerels is a son of "Joker." In "head points" we claim them to be superior. The price for these fine breeders are \$5 to \$15.

A few exhibition cockerels on sale. We can sell you a few good yearling hens cheap, for reliable stock. We are one of the oldest breeders of Buff Leghorns in America. No one is more in love with the Buffs than I am. No handsomer bird grows; this, combined with a large egg yielding fowl, makes them the fowl.

G. W. RANDOLPH,

ram6163

Box 725, Palmyra, N. Y.

Leads the Procession

Our \$12 Power Green Bone Cutter, over all \$26 power cutters. Has been awarded the First Premium at all State, Industrial, County and Local Fairs in this and other States over all competitors. Stands without a peer. Is self-feeding. Superior quality. Is not complicated. Easily operated. And stock fed on its cuttings do not fill up in the crops and choke. No knives or screws to become loosened. Best results guaranteed. Try it and see how your stock will improve. Green bone cuttings discount grain. Purchase our Cutter and be convinced. Address

WEBSTER & HANNUM, Cazenovia, N. Y.

In writing mention this paper. ram216

We do not make ourselves ridiculous by running down our competitor's Bone Cutter. Our \$12 Hand Bone Cutter, running by power, in competition with a \$26 Power Cutter, was awarded 1st Premium at the great Inter-State Fair, Elmira, N. Y.; New York State Fair, Syracuse, N. Y.; and 1st and 2d at Western New York Fair, Rochester, N. Y. Write for circulars and testimonials. ramf12

THE GREAT ANGLO-FRANCO

COLUMBARIAN & GALLINARIAN CURE

The Only real preventative and cure for Roup, Canker, Galls, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. **TESTIMONIALS ON APPLICATION.**

PRICES:--In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 5458

BROOKLYN, N. Y.,

Breeder and Flyer of Reliable and Speedy Strains of

52t54 HOMING PIGEONS ONLY.

GEO. EWALD,

BOX 501,

CINCINNATI, OHIO.

BREEDER AND IMPORTER OF

Pouters, Fans, Jacobins, Owls, Salinettes and Blondinettes.

I have the largest and most extensive pigeon lofts in America, as to quality of birds; the winners in the keenest of competition at all the largest shows. My stud of Owls and Oriental Frills are the only recognized champions in America, having beaten all the so-called cranks ever shown, and winners of more prizes than all the others put together. Write for wants.

52t53

HEADQUARTERS FOR

Pouters, Jacks and White Fans

Having bred and sold at least 75 per cent. of all the Pouters shown in this country for the last fifteen years, I think I can claim to have the best. And in support of the claim I will make a match with anyone to show one pair or five pairs of each of the five colors for from \$200 to \$500 a side. My Jacks are up to my Pouters in quality. Have only bred them for six years and not many of my surplus have been shown. At Boston show they won 1st, 2d and 3d on White cocks; 1st and 3d on White hens; 1st on Yellow cock; 1st on Yellow hen; 2d on Red hen; 1st on any other color hen—pretty well for a beginning in such strong company. Have now about 200 Pouters and 200 Jacks for sale low to close out. No Fans for sale until fall of 1895.

17t70

Office, No. 118 Cliff Street, SCRANTON, PA.

MATTISON'S WYANDOTTES
WIN AT THE LARGE SHOWS.

During the past ten years his SILVER WYANDOTTES have won more premiums by far than any other strain at the principal American show—Madison Square Garden, New York. His BUFF WYANDOTTES are worthy the name, and in 1893 won all Firsts, except one, at New York; also all Firsts at Philadelphia. Circulars free.

MAGPIES.

GEO. W. SPOHN,

1310 W. Cumberland St., Philadelphia, Pa.

Breeder of American and English Magpies, all colors.

At Baltimore Show, 1893-'94, exhibited ten birds, won seven prizes—two 1sts on red cocks; 2d, red hen; 2d, black cock; 4th, black hen; 3d on each yellow cock and hen.

At New York, 1894, exhibited six birds—won 2d on black cock; 3d on black hen; 4th on black cock; 3d on any other color.

Have added to the above and been breeding the following prize winners at Baltimore Show—2d on black hen; 2d on red cock; 3d on red hen. Stock for sale at all times, at Reasonable Prices.

BLACK LANGSHANS

Dr. F. M. Robinson, Box 69, Pawling, N. Y.

At Madison Square Garden, New York, 1894, the largest show ever held in America, I was awarded the Grand Special Prize of Silver Cup, value \$100, for best exhibit, 1st, 3d and 4th cockerels; 2d and 3d cocks; 2d, 3d and 4th pullets; 2d and 5th hens; 2d and 5th breeding yards. 200 grand chicks, bred from "Gorden Champion," "Parnell," "Parnell, 3d," "Manhattan, 2d." Buy your birds from a race of prize winners; buy from a breeder who breeds his own birds, exhibits his own birds and advertises honestly what he wins, not what someone else wins. The above record has never been beaten in Madison Square Garden on Black Langshans. Illustrated circular on application, giving full list of awards for the past seven years at the largest shows in America. You need this stock to show; you need this strain for new blood.

THE HAMILTON LEG BAND

Put on in one minute.

Stays On.

No tools or cuss words required.

Samples, 5 cents; copper, 12 for 35 cents; 50 for \$1.25; 100 for \$2.00. Discount on larger orders. Nickel plated, 50 cents for 12.

SOLD ONLY BY **THE NEW ENGLAND FANCIER, Danielsonville, Conn.**

EDITOR FANCIER:—Your Hamilton Leg Band is the best thing of the kind I have ever seen; all the metal bands I have ever seen before have sharp edges that are very liable to cut your hands in handling the birds, and also to cut the leg of the fowl. The Hamilton is a decided improvement over all others in my opinion; they should find a ready sale. Yours Sincerely, A. A. HALLADAY.

BUFF COCHINS and BUFF COCHIN BANTAMS.

Blood tells in all stock raising, and in none more strongly than in thoroughbred poultry. The line of blood I am breeding has produced and is producing prize winning specimens. They have won highest honors at such noted shows as Columbus, Cleveland, Detroit, Findlay, Tiffin and North Baltimore. I have a grand lot of young and old stock, and can send you birds for the show room or breeding pen, at living prices.

My Cochins have real, deep, clear buff color, great size and true Cochin shape, profuse leg and toe feathering, and their line of blood makes them desirable for a breeder to select from. Ask for fine illustrated circular.

D. E. PETERS, North Baltimore, O.

First Prize Cock at New York, 1894.

The Best Record

On the Breed

FOR TEN YEARS!

Was made by our **BARRED PLYMOUTH ROCKS** at New York Show, 1894, where we won 1st, 2d, 3d and 4th on cockerels; 2d and 3d on pullets; 1st and 2d on cocks; 1st and 3d on hens; 1st and 2d on pens; and all the specials.

AT NEW YORK SHOW, 1892, our last previous exhibit, we won all the first prizes competed for, except one, and all the five cockerel prizes, except 2d, a record on cockerels not equalled for seven years.

For five years our breeding has taken first prizes at the leading shows.

Breeding and Exhibition Stock for sale from the five males which sired our winning cockerels and pullets at the last New York show; also from the 1st prize cockerel, 1st prize pen male, 1st and 2d cocks and 1892 1st pen male, all winners at New York.

HATCHED 100 PER CENT! THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889 and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method *do away with the bottom heat.* This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$2.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

The AMERICAN FANCIER

A WEEKLY JOURNAL DEVOTED TO
POULTRY, PIGEONS AND PET STOCK.

Vol. III, No. 20.

JOHNSTOWN, N. Y., JANUARY 12, 1895.

Whole No. 72.

Black Cayuga Ducks.

BOOKS FOR FANCIERS.

Now we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. \$1.50

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and market. One of the best books ever written for the amateur. Price \$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price \$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 5,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth, blue and gilt, 219 pages. \$1.00
Paper .40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 219 pages. Price \$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price .50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price .50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price .50

Poultry.

(G. A. McPetride). A most valuable little book by a practical and successful poultryman. Price .50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price .25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price .25

Artificial Incubation and Brooding.

(E. & C. Von Culin). The latest work on the subject; well edited, bound and profusely illustrated. Price \$1.00

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper .50

PET STOCK.

Birds and Bird Keeping in Cage and Aviary. A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Price .15

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price .25

English Books in Stock.

The FANCIERS' REVIEW

BOX R, CHATHAM, N. Y.

Large 16-page Monthly, 50 cents a year. Circulation, 10,000. Thirty word cards, four months, \$1.00.

It contains the most practical poultry matter published. No theories, no "back talk," no nonsense! But straight goods! Three issues 10 cents, for examination.

Popular Poultry Books.

A B C of Poultry Culture, 25 cents.
500 Questions and Answers, 25 cents.
Low-Cost Poultry Houses, 25 cents.
Pigeon Queries, 25 cents.
The Review 1 year and all of the books; \$1.

WHITE PLYMOUTH ROCKS

EXCLUSIVELY (STAUFFER'S STRAIN).

I won 1st on cock, hen, cockerel, pullet and pen, at Carlisle, Pa.; also won 2d on cockerel at Hagerstown, and raised 1st cockerel, 1st and 2d pullets. Two yards, headed by 2d cock at Hagerstown and another as good. Eggs \$1 per setting, after February 1, 1895.

M. J. BRUMBAUGH, State Line, Pa.

A GREAT COMBINE.

We have made arrangements with

AMERICAN POULTRY JOURNAL

The oldest monthly magazine of its kind in America, to club it with

THE AMERICAN FANCIER!

—FOR—

\$1.50 A YEAR.

This covers the entire field of poultry literature in America. The *American Poultry Journal* being a high-class magazine, containing articles on practical and fancy subjects by the best writers; THE AMERICAN FANCIER supplying a weekly budget of news, unexcelled by any similar publication in the world. A sample copy of the *American Poultry Journal* can be obtained by sending a five-cent stamp to AMERICAN POULTRY JOURNAL, Chicago, Ill. tf72

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of

This is the only authorized public complete description of every breed recognized by the American Poultry Association, the only representative book poultrymen in this country. Remember invaluable book is fully protected by the United States, it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar, but

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24-page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it!

For Nothing

By simply sending the amount to

BLUNCK & DREVENSTEDT, Publishers,
JOHNSTOWN, NEW YORK

BANTAMS.

Tickhin, Rotherham, England,

Breeder and Exhibitor of the Following Varieties of Bantams:

BLACK AND BROWN REDS,
PILES, DUCKWINGS
AND BIRCHEN GAMES,
BLACK AND WHITE ROSE COMBS,
PEKINS, AND WHITE BOOTED.

I have won more than 200 honors with my birds this season, including Palace, Dairy, Birkenhead, etc. Birds always on sale. Eggs 1s. each. 5267

D. F. TAYLOR'S

"EMPIRE STRAIN" OF

White Plymouth Rocks

—AND—

WHITE WYANDOTTES.

Have been winners since 1888, winning all firsts but one on W. P. Rocks at Amsterdam, in '91; N. Y. State Fair, '91, '92, '93; at the great Columbian Exposition, Chicago: 1st Pen; 1st Cockerel; 2d Hen; 4th Pullet. W. Wyandottes: 2d Cock; 2d Hen; 100 Chicks for sale. Write for wants. Eggs, \$2. Address

D. F. TAYLOR, De Ruyter, N. Y.

new and interesting book on a most fascinating subject. The authors have made a thorough study of artificial incubation which enabled them to write a book of more than average value. It is essentially practical and clearly written. It is handsomely printed and bound in cloth. Price one dollar, postpaid, or we give it to any of our readers sending us one new subscriber at \$1.50 each.

Facts and Fancies From the West.

BY THEODORE STERNBERG.

The Mid-Continental show is over and many are the lessons of value taught by it to our western fancy. One, and to my mind the most important of all, is this: The meeting of fanciers from all over the land, the acquaintances formed, the friendships made, has a direct tendency to unify the fancy, to nationalize it, and thus to dignify it. The getting together fowls from all over the land directly tends to uniformity of type in fowls of the same breed—tends towards uniformity in judging. These matters were so plain at the Mid-Continental that the fanciers present, George G. McCormick, of London, Canada, as chairman and Albert Lemon, of Lincoln, Neb., as secretary, passed resolutions commending this show and pledging the fanciers to its support in the future.

Another lesson of great value, particularly to our western fancy, was taught by William McNeil and George G. McCormick, of Canada. That is how essential it is to show birds properly fitted and trained for exhibition. I venture to say that in the future more care will be taken by our western fanciers in preparing fowls for the show-room. We had a grand object lesson when Mr. Sewell, in one of his interesting chalk talks, called for a Buff Cochin cock to illustrate on the black board. Mr. McCormick brought his 1st prize Buff cock. This bird stood in any position required for the taking of his picture. That the object lesson was full of immediate good was apparent, for next day many of the exhibitors were engaged in training their birds. Mr. Challis, of Atchinson, progressed so rapidly with his fine Light Brahma cockerel that before the end of the show the bird postured grandly while Mr. Sewell drew its portrait.

The features of the show were the exhibit of Polish, the Indian Game class and the Buff Cochin class. I wish to impress on all the fancy the lessons taught. Sid Conger and his bride were with us throughout the show. Attentive and gallant as Sid was he still found time to state the frozen truth when he looked over the small exhibit of Light Brahmas and said, "In the Asiatic class this is a buff show." So it was. As a Buff breeder I was delighted, as a fancier I was disappointed. Here at Kansas City is the center of a district full of grand Light Brahmas, Langshans and Plymouth Rocks; yet the classes for these breeds were not so large as they should have been. Conger told the reason. Said he, "The western boys were afraid of the eastern birds, and the eastern boys were afraid of the western birds, and so between them they have let this be a Buff show." This will never happen again. I look for an immense turnout in these classes at the next Mid-Continental. Many of our western breeders thought a dollar entry fee was too much and this feeling was encouraged by the few enemies the Mid-Continental has in Missouri and Kansas. Those who were present learned that the entry fee was not too high, for at shows of this magnitude it is quality that is desired and not quantity, and we had the quality there. Another matter I wish to impress is this. In all the breeds having a weight requisite the exhibitor is handicapped who has to ship a distance, for we well know how birds lose weight by reason of long shipments. This weight clause keeps many a fine bird at home which but for that would be sent to distant shows. Great national shows like the Mid-Continental must devise some means by which this real draw-

back to the exhibition of weight carrying birds from a distance can be obviated.

There was still another lesson taught Buff fanciers, and that is that the scanty feathered Cochin is no longer in it. The more feather, the more attractive is the bird and the higher price will it bring. In 1891 the Cochin controversy began, and now here in the west the Mid-Continental has given us the object lesson that the Cochin is a bird of feather. Short feather is no Cochin, and the great majority of Cochin fanciers recognize this and like it. The few so-called judges who have sought to hold the Cochin down to a short feathered bird may grind their teeth and swear and stay a moss-back, but the Cochin fancy will go on breeding more and more feathers, feeling that both beauty and profit unite in the Cochin with the crinoline.

Let me make a digression. *The American Stock-Keeper*, of which I am not a subscriber, occasionally—quite frequently, in fact—sends me a sample copy. The joke on me is, they never send me a copy containing any of its numerous references to myself, but are careful to send the occasional copies in which I do not serve as a text to its lime-light editorials. I don't kick about this. I am glad to be of service to any of our papers. I am a newspaper man myself and so feel kindly towards all the craft, but all this is by way of introduction. My friend Carl J. Weick has just handed me his copy of the *Stock-Keeper* for the 29th of December, wherein I am twice referred to editorially "to point a moral and to adorn a tale." I beg to be allowed to quote the scintillations:

"What is the use of the full feathered class in Cochins? It was only created to give a few a chance to win prizes when they thought there was no chance for them in the American class. But now that the great champion of the birds, Mr. Sternberg, has failed to enter any in this class at the show in Kansas City, which he has been booming so strong, it looks as if even Theodore was going back on them. Knock out the class and devote your energies to the grand old American Cochins."

"About 40 Buff Cochins competed in the American class and 16 in the full feathered class and the question naturally arises, where was the champion of these breeds, Mr. Sternberg? Not an entry from him in this class, but he has 3 in the American class. Why is it thusly, Theodore? Hast thou gone back on thy idol?"

I am quite sure the dog editor must have gotten over into the poultry department, for the poultry editor would have known that Theodore Sternberg judged the full feathered class at Kansas City, and he would have hardly entered a bird in the class he judged. But I agree with the dog editor that there is now no longer any use for a full feathered class in Buff Cochins. At Madison Square it has long been a distinction without a difference, and the Mid-Continental has wiped out the distinction in the west. There is but one Buff Cochin and that is the full feathered Buff Cochin, the Cochin of the revised standard. I entered, for exhibition only, at the Mid-Continental five Buff Cochins in the American class. Three were the descendants of English birds, but born in this country of pure English blood. I also showed in the same class, but not competing, two pullets bred by Henry Tomlinson, of Birmingham, Eng., received by me a day or two before the show. No one questioned the entry or said these fowls were wrongly classed. In the full feathered class McCormick's 1st cock and Mrs. Kimmel's 2d cock, bred by Tomlinson, the 1st and 2d hens, bred by Tomlinson, and McCormick's 1st pullet and others could all compete on even terms in the American class. In the American class was to be found amongst the winners birds of pure English blood of the strains of Proctor, Harris, Scriven, Lady Anson, etc. The great Buff breeder of the far east writes me that he has no use for two classes—his birds can all go into either or both. I have always exhibited my own birds in the American class. If the name of the breeder were required to be on the entry it would be found that

for each of the last three shows at Madison Square Garden in the American class of Buff Cochins birds bred by me—the despised English Buff—were in the money. I have in my desk quite a number of score cards of birds which have won that were bred by me and shown in the American class and signed by the great exponent of anti-English except in Langshans. The fact is that "full feathered Cochins" is a misnomer, and so is "American Cochin." Yes, I agree with the dog editor and say we now need but one class, and that is "Buff Cochin"—only this and nothing more. For American breeders now see, realize and feel the truth of the words of one who has bred Buff Cochins a longer time than any man now living. Henry Tomlinson says, "We breed Cochins now with more feathers than formerly, because they are more attractive in the show pen and sell for more money." Any visitor at the Mid-Continental will vouch for the attractiveness and any purchaser will vouch for their bringing more money.

Another lesson taught at the Mid—I mean made plain to the naked eye, for all shows teach the lesson—is this, if you come to push and sell fowls of any breed they must be out in force at the big, yes, at all shows. The purchasing public, God bless it, is very much influenced by the number of a breed shown. This is to it the ocular measure of a fowl's popularity. Until this show here in the west we never had a large exhibit of Indian Game. Persons read in the papers much of Indian Game, but failed to see many at the shows; but at the Mid-Continental the Indian Game class was grand in quality, and many of them. I predict a large increase in the demand for Indian Game here in the west and they are a most deserving fowl.

Here is the philosophy of it and the rule which must be observed—the pyramid, its base, its apex. The true fancier shows first of all things to advance the fancy. To this end he tries to get out a full exhibit in all the classes—this is the base. Second, he does his utmost to get out a large class in his own favorites. A big exhibit he knows helps the breed, and in pushing the breed he thirdly and lastly helps himself—this is the individual apex. No fancy, no sales. The whole business is in these few lines. And in narrow minded non-observance of these simple rules can be found the reasons why any breed has seemingly dropped behind, for there is room for all. If you, my friend, happen to be the only breeder in a locality of any particular breed, for once stop thinking of scores to sell by, but think of the breed and show as big a string as your yards and purse will permit. Come to the next Mid-Continental and show a hundred, if you have them, and your reward will be great. Your breed will boom.

Another thing that we learned at the Mid, is that it is the place to make sales. I venture to say that many, many more sales were made in the show room than at all our western shows put together for the last three years. I myself practically sold clean out to my breeding yards. The fact is I really contemplate holding everything I raise next year until the Mid-Continental, then entering every fowl and selling them at auction.

The Mid-Continental did another thing—everyone who won a dollar, if present, got it before the close of the show. Every absent exhibitor has had his check for prizes won mailed to him. The show paid out. It took in enough to pay expenses and leave something to the good. It never touched its reserve fund at all and has the means on hand to hold its next show. So highly does Kansas City and its business men regard our show that it will be a permanent institution in that live city and I feel quite safe in saying the premium list for next season will aggregate \$6,000. So at least that is the talk now.

Lastly, the success of this first great western national show is due solely to the energy and business ability of the executive committee, business men who have taught the fancy how to make a show pay its own way. Why, bless your

hearts, fanciers! this is the first show I ever attended where I paid my own way and brought home more money than I had when I went there. Other fanciers told me the same thing. So I wish success to all poultry shows and a happy new year to all fanciers and hope to meet you all at Kansas City next season.

Langshans Again.

TO THE AMERICAN FANCIER:

I think there must also be some apology due from me to "Zim" for I have no recollection of having written anything in your valuable journal concerning White Langshans. I thought the discussion had been over the relation of the Langshan to some popular made breeds, and I think the Plymouth Rock that appeared at the Dairy show sporting feathered legs *points my case well*. But I do not press this matter or any other; all I demand is fair play and "terms of speech," and that those who advertise Langshans should be careful to supply their customers with the real thing and not a mongrel.

Now, about these White Langshans. I feel sure any bird purchased of Mrs. R. W. Sargent would have been pure, for she was an ardent admirer of the breed. In my long correspondence with her I recognized in her a true and talented woman. But although I have never come across a White Langshan myself, and Mrs. Sargent never once reported receiving such a sport from my birds or eggs, knowing that white is the sport of black, I could not deny the possibility of such a bird, only up to the present time it is a matter of *faith and not of sight*. Here in England a "Variety" Langshan Club has recently been started, and I was invited to join it, but this my health and other considerations obliged me to decline, but when, later on, the hon. secretary, who, although we have never had any business transactions with each other, has for some time been a very pleasant correspondent of mine, when this gentleman wrote saying they purposed giving me an advertisement of my book and would like to place my name in their catalogue as hon. vice-president, I felt I could not refuse the proffered honor. The catalogue contains the letter I wrote to the hon. secretary in answer to the one I received from him intimating their gracious intentions towards me, and as it gives all I have to say regarding White Langshans I reproduce it.

I should add that I did not see the standard of this variety, Langshans, until the printed catalogue was sent me. I regret to see it repeats the error that appears in the Langshan club standard.

Dear Sir:—Your letter inviting me to become Hon. Vice-President of your "Variety" Langshan club has gratified me exceedingly, for I feel it is intended as a tribute to the honesty of purpose with which you believe I have acted in all matters relating to this useful and beautiful fowl. I have for some time ceased to be a member of the original Langshan club, and I should not care to take a prominent part in any new movement regarding the Langshan until I can see my way to rejoining my old friends; but I take it a Hon. Vice-President's duty is only to look on.

I have now bred Langshans for nearly twenty-three years, and during all that time I have never had a white sport in my yard; now and then white feathers have shown themselves, chiefly in the "flights," and I have also had cockerels with colored hackles—both these defects it is well known are common to all black breeds of poultry; but as I have, as far as possible, avoided breeding from such specimens, I rarely see any amongst my flock.

I was speaking to Mr. Harrison Weir about these sports a short time since, and he said "a White Langshan would be quite possible, for white is the sport of black, and having once established a white variety others would be likely to follow." I also remarked to Mr. Weir, that although I had often heard of "White Blackbirds," "White Ravens," and "White Crows," I had never known of a white variety of these birds being established. He replied, "the circumstances of the Langshan are totally different. It is a domesticated fowl, and therefore

under man's guidance and control—he could bring sports together, which in a wild state would rarely, if ever, congregate.

Leaving it under the shelter of so high and conclusive an authority, I can only add my hope that your club will go on and prosper on the right lines—that is to say, whatever new variety may in the future be adopted by its standard, will be able to show a clear descent from pure Langshans on either side.

A. C. CROAD.

Since commencing this letter, I have read an article on "The Origin of the Langshan" that has appeared in a contemporary. The writer tells us he does not believe the Langshan to have been of Chinese origin. He says they originated in England and some of them perhaps in America. He speaks of the breed as a mixture, and says many Langshans show yellow feet. He adds, "I have seen this yellow in the progeny of imported birds—birds supposed to have come from Miss Croad's yards. He continues: "She is still working on the original graft. Neither is she so foolish as to tell just how the Langshans were made." He says, "Thousands of Langshans have been made in England and shipped abroad." Of this latter fact there can be no doubt, and it is evidently these mongrels and not the true Langshan that this gentleman has become acquainted with, and even of these he writes, "There is no better fowl." What would he say of the pure bird, I wonder? It was on the 14th February, 1872, my uncle, the late Major Croad, received the first Langshans that were ever exhibited in England. I believe a cross with the Langshan and also a few pure birds had previous to this time found their way to our shores and probably also to America. We have received further importations of Langshans from the district. Sixteen have been shipped for us, but two came to grief. I never possessed a Langshan that showed any trace of yellow, and I feel sure Mrs. Sargent, who was truly the pioneer of the breed in America, never sent out any such. A gentleman holding a high appointment under our Government abroad visited my yard about a month ago. He told me that a day or two previously he had been to see — yards, naming a breeder of all kinds of poultry. My friend noticed a number of birds running about looking very like Langshans. "Those are my Langshans and Orpingtons," the proprietor informed him. On his remarking that mischief would most likely arise from birds of that age running together, the proprietor replied, "Not at all. We have only to separate the clean legged from the feathered legged; they are just the same." Now, I frequently see this yard mentioned as shipping fine Langshans to various parts—very many more than I have ever sent off. I have said all I know of the Langshan in my history of the breed. The following extract may be of interest to your readers:

The fact that some naval officers engaged in an exploring expedition had come across some Langshans elsewhere, and had afterwards met with them at Hangkow, and that another naval officer had brought some from Chusan where he had seen them in considerable numbers, led us at first to the belief that the breed was widely distributed, and the name a mere localism. But on sending our book to China, our friends there told us that in this matter we had been mistaken, that the Langshan was strictly limited to the district of that name and only found in other parts of China by importation. One gentleman with whom we opened a correspondence at that time, told us he had been in the Imperial Service of China ever since 1859, that he had travelled thousands of miles in the interior in all directions, and had never come across the Langshan in any other part except by importation. He told us Chinese names usually bore a signification, and that Lang should be translated two and Shan hills. He added that he and other residents in North China, well remembered the introduction of the Langshan to the European community, its date was fixed by the placing of a Lightship outside the Langshan crossings in 1862, the officers and crew of the Lightship landing to explore and forage, came across this fine breed of fowls, and as occasion offered would send

presents of eggs and birds to their friends in Shanghai. Mr. Keele who is another independent source of information had in the meantime narrated the circumstance of the lightship and of the Langshan being confined to the district to a lady correspondent in England, these facts were therefore generally known. But the order of things changes. A year or two since a correspondent well informed on the subject wrote: "The Lightship was stationed off the Langshan crossings in 1862, but it has long since been superseded by a double line of buoys. Steamers have frequently come to grief on these shoals, but I have never heard of but one total loss."

Mr. Keele I have never seen or corresponded with, and the first time I ever heard from the gentleman in the Imperial Service of China, was after he had read my book in 1877. I may add he is the only poultry fancier I am acquainted with in China. He came to see me in 1881.

A. C. CROAD.

Poling House, Poling, Arundel,
England, Dec. 8th, 1894.

New Hamburg, Ontario, Show.

TO THE AMERICAN FANCIER:

The twenty-first Ontario show, held at New Hamburg, was probably the largest and best show of the twenty-one, both as to quantity and quality, and I wish to note to your readers the deserving exhibits. Games were the first judged, and in old cocks two remarkable birds won 1st and 2d, both of them grand quality and lots of size. First cockerel just over from England, and will prove a valuable acquisition in the breeding yard, for he had a great many good things to recommend him, especially his grand straight legs and fine carriage. He did not require any training; the only position he could endure was the highest ideal we hope to see in an Exhibition Game. You could look at him fifty times a day and he was always standing, showing that he was a stylish exhibition bird. There were several more good cockerels; but not in grand show shape, and none had the commanding appearance of the 1st prize cockerel. In females there was the largest in quantity and quality that I have ever met at any show. First prize hen a remarkably grand, high standing, reachy hen, with grand head and tail, and very good in color; 2d hen was a really good hen also, excepting she did not cut away enough in stern, still she possessed a model both in shape and carriage of tail; 3d prize hen grand all over, excepting she did not stand as erect as one would wish; 4th hen grand all over, excepting her large comb. First prize pullet a grand mate for 1st prize cockerel, and they would make a desirable pair of birds for any good breeder; 2d prize pullet a little longer in back and rather long in tail, but carried it finely; 3d pullet not quite so large as the two just mentioned, but quite a gem, and I might say there were many left out which were good to win a first place perhaps anywhere but the Ontario show and New York, and to be candid with your readers, New York is where most of the champions meet, and no doubt a good many Game birds shown at the Ontario show will find their way to Madison Square Garden and do battle with the best the country affords. The Brown Reds were fairly good in cocks and cockerels, but in hens and pullets there were some really fine specimens, which will be heard of at other large shows. Duckwings were well represented both in quantity and quality, and the winners were very fine in both shape and color. First Pile a very fine upstanding bird, beautiful in color, but too slim in breast and body, but had grand style, and the very best of legs ever seen on a cock bird. Very few cockerels to be found with such grand, straight, faultless legs. Second cock a very clean, cut away bird, but too small for first-class company. Cockerels—None at their best, all of them wanting about a month more to develop. First and 2d prize hens very close for first place; what one lacked in color the other lacked in style. Balance of class good birds. Pullets—First pullet nearly perfect in color, except being a little dark in legs. Her tail was better. When I judged her two weeks ago at

Owen Sound it seemed to have got mused either in the coop or in transit. Second prize pullet a good bird, but colors not so well defined. Balance of class very fine.

In Black Red Game Bantams, first old cock was fine in carriage and tail all one could desire, and though very small in body he was on pretty high legs, worst fault being a little off in breast color; 2d a really good bird, and right up in G; 3d the best cock in the show if it had not been for his being under the weather, very small and fine in carriage and grand in length of leg, very short in feather, and would probably weigh 14 ounces; should have liked to have seen him at his best. Balance of class all good birds. Hens—First hen, a grand small hen, and description of third cock would be very appropriate; 2d hen a grand hen all over, and about the only thing against her she had to give way to smallness of size; 3d prize hen close up to the winners, but just a trifle softer in feather. All the hens were really good. First prize cockerel full of style and grand in color, tail very fine, an easy win; 2d cockerel a grand bird, but off in breast color; 3d very similar, but better in breast color, not quite so neat. Balance of class good, serviceable birds. Pullets, 1st prize a gem, both in color and style, and very neat in body shape; 2d a grand pullet, carries her tail nicely, but feathers a little broader than 1st prize pullet, a nice, reachy bird; 3d prize pullet another good one, but a little off in health. The balance of class good. In fact, the Black Reds were all first-class specimens, and many deserved recognition, but the prizes would not reach around.

Duckwings were a really grand lot, and as Silvers and Goldens competed together it was quite a hard matter to decide. I noticed one or two remarkably fine Silver females, but nothing turned up in Silver males.

Brown Red cocks fairly good specimens. First and second hens remarkably fine. Cockerels good in style, but not so good in color as one would wish, and I would like to see the same competition as there is in the Black Reds.

Piles.—First cock a grand colored bird, very fine and neat all over; 2d not quite as good in color, but a really good bird; 3d a good bird. Cockerels, 1st from British Columbia, a grand, reachy bird, with the finest of carriage, and very high on good straight legs; 2d and 3d very similar and very close. Hens and pullets, all the winners first-class specimens and deserving of mention equally with the Black Reds, and I have no doubt but that a great many of the Bantams shown at the Ontario show will do battle at New York, and it will take something grand to win over them.

Light Brahmas were not there in quantity, but quality was just about enough to take all the prizes, 1st, 2d and 3d cockerels good birds, and 1st, 2d and 3d pullets remarkably fine in tail coverts, especially 1st pullet with the very best of wing color. First hen, this is its third year win at the Ontario, a remarkably good hen; 2d, a good hen, just a little pinched on tail, but nice tail coverts. First cock a very good bird and well deserving of 1st prize; 2d, a fairly good cock, but lacks finish.

Dark Brahmas are good birds, and 1st cock and hen worthy of especial mention. First cockerel, 1st pullet, birds of very high excellence in shape and color.

Buff Cochins, the two giants met, and prizes very evenly divided. First prize cock a grand long feathered Cochin, 2d New York last year as a cockerel, 1st late Kansas City show, 1st prize cockerel at New York last year. Was not shown at the Ontario, but I noticed at Kansas City the 1st prize cockerel at New York, 1894, had to change places and give way to the 2d New York cockerel '94, and probably the reason why the 1st cock did not show up just as grand at the Ontario as at Kansas City was no doubt owing to the 1600 miles railroad travel he had had to endure. At Kansas City he was in great fit and looked remarkably fine, and was probably more admired than any other Buff Cochin male. While he is smooth in hock and nicely rounded, he has got a superabundance of side leg feathering, and perfect as one could wish in foot feathering; 2d cock, quite a nice bird, but not so heavily feathered on legs and

feet; 3d prize cock, a grand even colored bird, not quite as large as 1st and 2d, and not quite as good in cushion. Hens, 1st, New York last year in American class, 1st at the Ontario, she is better and even in color than last winter, and if she was a little heavier feathered on the extreme end of middle toe, she would be a hard hen to beat, she has got lots of cushion, lots of leg and toe feathering, and when standing at ease, you cannot see between her legs for feathers; 2d, a very sound good shaped hen, but hardly fit to show, wants two or three weeks more time to fit her; 3d, a good Cochin shape, but a little off in surface color. Cockerel, 1st, very nice in outer color but not so sound in flights, but all in all a good bird; 2d, has the soundest wing one may ever see, neither black nor grey to be seen, and if his outside color was as good as inside color, I think he would go through as perfect in all sections for color. The bird is just a little on the light lemon, but sound and even colored all over with the best colored tail one could desire, and the Kansas City ride had told upon him, for he looked a little tired, and not in real good show shape. I noticed the 2d prize Ontario cockerel won 1st at Kansas City, and there he was ripe to show, but we all know too much showing uses up the best of young birds; 3d, will be in grand fit in three weeks if all goes well with him, and we might have the pleasure of seeing him at Madison Square Garden. Pullets, 1st, a really good one both in shape and color; 2d, a little light in color; 3d, been to Kansas show, seemed to be pretty well tired; 4th, a grand pullet, immense length of feather, will make a good hen. She had that tired feeling also, and no doubt she had been to Kansas City.

White Cochins, about all the 1st went to McNeil, and his White Cochins looked as if they had been to Kansas City, and when one just comes to think that those birds could not get home before Friday, midnight, and then packed up again early on Monday morning and off to another show, one can quite understand how tired they must be, and when our old friend, McNeil, cannot keep them up in show shape, it's because it cannot be done, for he is certainly a marvel in keeping birds in show condition.

Partridge Cochins, quite a large class, and prizes fell to pretty good Partridge Cochins.

SHARP BUTTERFIELD.

The Hamburg Show.

TO THE AMERICAN FANCIER:

Was it a good show? Well, yes. More than that, it was a rouser—1,500 birds on exhibition, and as a whole they were of high quality. Almost anyone who has had an eye on the doings of this club for the past year expected it would be a good show, but nobody expected it would be as large as it was. Every member of this society is a worker. All of them had their coats off from start to finish and worked. Birds were in their coops promptly and at the time specified in their lists were ready for the judges to begin their work. The judges were J. Y. Bicknell and J. F. Knox, of Buffalo, and F. B. Zimmer, of Gloversville, N. Y. Birds were as well classified as could be expected at so large a show and judging was rushed along at a good rate. Cards were all up three days before the show closed. The Barred Plymouth Rocks were a strong class and many good birds were shown. The catalogue credits this class with 92 entries and I think it safe to say they were all present. There were 66 entries in White Plymouth Rocks and as a class it was above the average seen at most shows. Mrs. H. G. Parker, D. F. Taylor and one or two others showed some that were corkers. There were 21 Buff Plymouth Rock entries of about the average quality. Knox, of Buffalo, showing quite a good pullet. Not many of the others reached 90 points.

Silver and Golden Wyandottes were fair sized classes, but there were no cracks among the lot. There were 40 entries in White Wyandottes and we noticed some grand birds among the lot. One cockerel in particular took our fancy. He had grand shape and style, a good comb and was pure white. D. F. Taylor, John F. Tallinger and J. B. Huff were represented in this class, aside from several others whose names we have for-

gotten, which accounts for the quality. There were 18 Buff Wyandottes entered. There were no world beaters among them. Black, White and Mottled Javas and American Dominiques were small classes. There were 63 Light Brahmas entered and a great show they made. Some really good birds were shown by Dr. Robbins, president of the society, Hy Emrick, "Scotty" Jackson, the two latter named men of Canadian fame, and several other breeders. The Dark Brahma class was small, but represented by breeders like C. S. Jackson, J. B. Huff and Miss Jennie Vaissiere, a guarantee that they were a good average lot. The Cochins were really good; 48 entries in Buffs and some hummers among them. There were 38 Partridge Cochins entered and among them were some rather young birds shown by Secretary Pease that were very fine in shape and color. Hy Emrick, C. S. Johnson, Wm. Kronenberg, and Hamburg Poultry Yards also showed some good specimens. To sum it all up, it was a good class. A small class of fair Blacks was shown and some corking good White Cochins, some 25 specimens, far more of this variety than is generally seen at shows. There were 17 Black Langshans and some quite good birds. J. F. Knox had it all his own way on White Langshans and showed some good birds. There was a small class of Black Spanish of considerable merit. Also a class of 50 White Leghorns, and a part of the display of real merit, Mr. W. G. Taylor showing a corking pullet of true Leghorn shape, pure white and comb above the average. S. C. Brown Leghorns were a whole show of themselves, and as regards quality good enough to grace any show room in America and win their full share of honors. There were 100 birds in this class and but very few poor ones among them. The largest exhibitors were Brace & Walling with a wonderfully even lot. They were particularly strong in females and won the lion's share throughout the class. The beautiful special, the Richmond Cup, caused this big entry. It was offered for the highest scoring male in the class and the result was a tie at 94 between two of the Brace & Walling birds and one of George H. Burgott. This special must be won twice to decide ownership and as it now stands belongs to the society and in the event of either of these exhibitors winning it another year it is to be their property. Martin Gabriel, Jr., showed a grand old cock and Milo Canfield a great hen, and there were also good birds shown by several others, among them C. Hammer-schmidt and W. E. Richmond. The most serious defects in some of the birds shown is that in trying to increase the size of their stock some of our breeders are overlooking the fact that they are breeding birds with a back shaped like a Minorica instead of a Leghorn, as regards the standard description, and are also breeding combs and wattles approaching Minorica style, too large and coarse in appearance and texture to grace the head of a Leghorn, and consequently the specimen must suffer cuts in these sections. No one section, no matter how good, can make a bird great. They must be judged as they are and footed up on a score card as a whole. The Buff Leghorn class (40 birds) brought out some really good ones. The birds were of true Leghorn shape and buff under as well as outside color. Mr. T. C. Sherman showed a fine string and very nearly cleaned up the whole of the prizes. Dominique Leghorns were a small class and of very ordinary quality. Black Leghorns also a small entry. There were some 30 or 40 R. C. Leghorns of fair quality, and quite a nice display of Minoricas both Black and White with some good birds in the lot. THE AMERICAN FANCIER's representative, Miss Jennie Vaissiere, "swept the deck" on Andalusians. The Polish class was represented by W. C. Blacks, Goldens, plain and bearded, and Buff Laced. The last named, with two of Tallinger's W. C. Blacks, were the best in the class. Some fairly good Golden and Silver Spangled Hamburgs, some quite good Golden and Silver Pencilled, a few fair Whites and some good Blacks were shown. There was a small class of Red Caps and also a few quite nice La Fleche and quite a string of Houdans of fair merit.

The Game class, including all varieties, was small, with hardly any that would be fit to win at the New York show. The best in the class was a pullet in Golden D. W.'s shown by Miss Vaissiere and the Whites of Joe Spraker. I must not neglect to say that I saw a few quite nice Silver Gray Dorkings shown by Mr. Ralph. There was quite a large display of Bantams, including Black, Red Game of ordinary quality, Silver D. W.'s and quite a slick pair of White Game Bants shown by A. F. Haas. I think them the hardest, reachiest and best shaped of any seen in a long time. Golden Sebrights had quite a string, with birds from Canada, F. Lewis of Amsterdam, and others. There was quite an entry of Silver Sebrights, and some really good ones were shown by J. B. Huff, Jennie Vaissiere, F. D. Lewis and C. S. Whiting; some good Cochins Bantams in Buffs, Blacks and Whites, by Hy Emrick, and the Wild Cat Poultry Yards showed some good Black Rose Combs. W. S. Patterson showed a pair of Buff Rose Combs that were good as regards size and are true Rose Combs in shape. Several good Japanese Bantams were shown and among the lot was a White cock of merit shown by Whiting. Several Silkies of merit were shown; also Frizzles, Phoenix, Pheasants, Guineas, Peacocks, Capons from the New York Station and their famous Food Exhibit attracted much attention. Bronze, Buff and White Turkeys, Pekin, Muscovy, Rouen and Aylesbury Ducks and Brown China Geese and a large display of Pigeons and among them some really good birds of different varieties. I must not fail to notice the large showing of Indian Games which contained some quite good birds, and also the good class of Pit Games, nearly 40 specimens, and among them birds that appeared in condition to battle for life at any time. An incubator at work attracted the ladies' and children's attention, and was hatching a good percent. Thus endeth a good show of good birds in a good hall, with good light and run by good men in a good way, and this kind does the poultry interests good.

HASH FROM HAMBURGH.

By this time I presume the superintendent, gigantic W. E. Richmond, a man as large hearted as he is large in form, is nearly rested from the labors of the late show, and is thinking about and preparing for the next.

Secretary Pease and his able volunteer assistants, Geo. H. Burgott, C. H. Tillinghast, Dr. Robbins, Wm. Kronenberg and treasurer Salisbury have solved all the knotty problems of the office department and are undoubtedly looking calm and serene again.

Will there be another show at Hamburg? Sure! And a larger and better one still than the one this year. How do I know? Because the officers have decided it that way already. They are men with business ability, influence and wealth, and these qualities count as proof. Note the increase in size of their second show over their first one.

C. S. Jackson showed a pair of Buff Leghorn Bantams at Hamburg, and we heard talk of his having a strain of Light Brahma Pit fowls.

The success of T. E. Sherman with Buff Leghorns is only another instance of what ability, sound judgment and cash can do. He started with the best he could buy. He makes a specialty of them; raises them by hundreds, keeps his best for breeding, and knows a good one when he sees it.

A goodly number of sales were made, and at good living prices. The genial Nat E. Luce, the representative of the *Practical Poultryman*, bought several good birds. When his cash ran low he would take a few more subscribers and an advertisement or two, and then start in again. At times I began to fear he was altogether "tou-louse."

Almost everybody we met at Hamburg takes and reads THE AMERICAN FANCIER, and those that have not been taking it subscribed for it there. Miss Jennie Vaissiere was the representative of this paper there, and could be seen flitting around in the crowd with a paper in one hand and a roll of greenbacks in the other, showing plainly she was there for business, and attending to business.

Zim

Ontario Poultry Association.

TO THE AMERICAN FANCIER.

The annual meeting of the above association was held in the Town Hall, New Hamburg, on Thursday, Jan. 3d, the president, M. C. Ernst, in the chair. There was a very large attendance, the hall being entirely filled.

Many valuable papers were read, the contributors being T. A. Duff, Toronto; C. F. Wagner, Toronto; J. Dilworth, Toronto; J. E. Meyer, Kossuth, and others, and an interesting criticism of them was the result. Addresses were delivered by Prof. Mills, president of the Ontario Agricultural College, Guelph; C. C. James, deputy minister of agriculture; A. G. Gilbert, manager poultry department Central Experimental Farm, and others.

A lively fight ensued as to where the next annual show should be held. The vote stood a tie between Port Hope and Guelph and the president gave the casting vote in favor of Port Hope. The second full week in January was fixed upon as the date of holding the show.

The election of officers resulted as follows: Honorary president, F. Goebel, New Hamburg; president, H. White, Port Hope; first vice-president, Wm. McNeill; second vice-president, G. S. Oldrieve, Kingston; treasurer, George G. McCormick, London; secretary, Thomas A. Browne, London; auditors, J. Dilworth, H. B. Donovan, Toronto; delegates to Industrial Exhibition, J. Dilworth, W. Barber, Toronto; delegates to Western Fair, Geo. G. McCormick, J. H. Saunders, London; directors, Thomas A. Duff, Toronto; Jno. Crowe, Guelph; Jno. Cole, Hamilton; S. M. Clemo, Galt; C. Massie, Port Hope; S. C. Trew, Lindsay; T. Rice, Whitby; A. Bogue, London; W. O. Gibbard, Napanee.

In the evening an interesting meeting was held at which addresses were delivered by several members of Parliament and others. A musical program of high merit was also given. At the close of the meeting an impromptu "hop" was got up and it was quite evident to all that the poultrymen knew how to dance, especially when such beautiful ladies grace the occasion by their presence. Following is the program:

President's Address.....	Mrs. Hamilton, Miss McCallum
Piano Duet.....	Mrs. H. A. Ernst
Song.....	W. R. Plum
Address.....	L. G. Pequegnat
Song.....	J. A. Gilbert
Address.....	Miss Allie Ernst
Song.....	Hon. John Dryden
Address.....	Mrs. Hamilton
Song and Chorus.....	Miss Flowers, Mrs. Hamilton
Address.....	James Livingston, M. P.
Song.....	Mr. Barber
Address.....	George Clare
Song.....	Mr. Fox
Duet.....	Misses Hamilton

* * *

Black Minorcas were a nice class. Cock, 1st, a nice colored bird, but small; 2d, not so good in comb or face; 3d, a nice bird but out of condition—frosted. Hen, 1st, good color throughout, pure comb; 2d, a nice large bird; 3d, fair. Cockerel, 1st, a big fellow with grand comb, face and lobes, good color throughout, an easy win; 2d, another big fellow, good comb, wattles and lobes, not so good in color as first; 3d, another big fellow, good comb and color, will likely go white in face. Pullet, 1st, an immense big one, seven pounds weight, pure comb, wattles, lobes and color good legs; 2d, a nice bird, not so good on head as winner; 3d, tie, both good birds.

White Minorcas were nice classes. All the birds were excellent and were of good size, all of them being standard weight.

Our attention was particularly drawn to the large exhibit of high class pigeons, also the striking quality of most of the birds. Worthy of special notice was the exhibit of Russian Tumpeters of pure Russian qualities combining large circular rose, globular crest, and massive spread of foot feathering. The winners would be hard to beat in the most fashionable company. We notice the prizes all went to one breeder who makes a specialty of this variety whose lofts and residence are at Port Hope, Ont.

Among the new breeders to exhibit at the Ontario show was Mr. W. I. Gibbard, of Wapanee, Ontario, who showed some very fine White and Barred P.

Rocks, Golden and White Wyandottes and Indian Games. He is an enterprising breeder and intends, by pluck and enterprise, to be among the best in Canada.

THE BOYS' BEHAVIOR.

"Dick" lost the lantern last year, but "Jack" did the "cheating" this year. It is "hoss and hoss."

The big fellow's speech from the top of the bar was grand.

"Billy" appreciated the presentation of the cradle. He said he had eleven children and hoped to live to have eleven more.

"Plymouth Rock" Bennet talked the leg off every exhibitor in the show, but it was about a tie when he and "Sharpe" got together at 3:35 A. M.

Who broke down the bed?

Wonder if "Billy's" cap (?) will fit him.

It was most amusing to see English

"Game" Barber singing an Irish song.

Who put the "Limberger" and pretzels in "John's" pocket?

"Fritz" got his face well rubbed with Limberger.

Who was the man from St. Thomas that broke the fan light?

Who scored the crockery?

The man from Wapanee was taught a few pointers on chicken shows, and the boys' doings. He will be in good trim for Port Hope next year. He is going to the New York show.

"Grandpa" Main had a "wry tailed" gander.

The Leghorn man from Whitby wears no clothes in bed. This was demonstrated when he was "pulled" out.

Who was the judge that slept under the bed?

The big AMERICAN FANCIER man pulled every leg in the stable for a dollar. He is O. K.

Knapp Brothers' Great Poultry Farm.

TO THE AMERICAN FANCIER:

On November 1st I resigned my position as manager of the Rockwood Poultry Yards at Tarrytown, N. Y., where I was manager for over a year and a half for Mr. Wm. Rockefeller. I am now located at Fabius, N. Y., where I am assisting Messrs. Knapp Brothers in their extensive poultry business. Perhaps a description of this large poultry establishment will interest your readers. I will try and briefly describe the place and the work carried on here. Fabius is located in the southern part of Onondaga County, 20 miles south of Syracuse, in one of the finest farming sections in the State. A few minutes' walk from Fabius brings you to two farms, containing about 380 acres of land. Here we are met by Messrs. Knapp Bros., the proprietors of one of America's greatest poultry farms, the home of the White Wyandotte and White Leghorn fowls, which by their record in the show room for the past eleven years has won for them an enviable reputation. Here are annually raised many hundred of these two varieties of fowls. We find located in convenient places five large houses, which are models of convenience and comfort, supplied with running water and having a capacity of from 250 to 300 fowls each. In these buildings the breeding stock is kept; here also we find their choicest specimens, many of them with scores ranging from 93 to 98 Standard points. Orders for eggs are filled from the same pens from which they use from themselves. Besides these larger buildings, three of which are 100 feet long, we find many smaller, well built movable buildings located on different parts of the farm. These houses, 8 x 16 feet, are used principally for raising chicks, and are so arranged that the chicks have free range, insuring strong, vigorous birds when they are required in the fall. During my stay here we have shipped 94 fine birds of these two varieties, shipping to 15 different States, and have also made one shipment of show birds to Christchurch, New Zealand. Orders have also been booked for 87 settings of eggs. Visitors are always welcome here except on Sundays, and I extend an invitation to all my friends and old acquaintances to call and see me in my new location and inspect one of America's greatest poultry farms.

G. H. HILLIER.

Awards at Ionia, Michigan.

LIGHT BRAHMAS.—Cock, 1st 94, 3d 89½, M. F. Stellwagen; 2d, 91½, A. R. Carron. Hen, 1st 93, 3d 91, Carron; 2d, 92½, Stellwagen. Cockerel, 1st 92½, Ionia Poultry Club; 2d 91½, Carron; 3d, 91½, Concord Poultry Club. Pullet, 1st 94, 2d, 93½, 3d 93, Concord Poultry Club. Pen, 1st 184½, Concord Poultry Club; 2d 183½, Carron; 3d, 182½, Ionia Poultry Club.

DARK BRAHMAS.—Hen, 1st 91, 2d 89½, J. H. Nichols. Holly. Cockerel, 2d 91½, Nichols. Pullet, 1st 93½, Nichols; 2d 93, 3d 92, Mason's Poultry Farm. Pen, 1st 182½, Nichols.

PARTRIDGE COCHINS.—Cock, 1st 91½, R. E. Miller, New Haven. Cockerel, 1st, 2d, 92½, Smith & Gott, Ionia; 3d 86½, Miller. Pullet, 1st 2d, 94, 3d 93½; pen, 1st 186½, Smith & Gott.

BLACK LANGSHANS.—Hen, 1st 95, Mrs. L. N. Olmstead, Muir; 2d 90½, Mrs. I. D. Rouse, Eaton Rapids. Cockerel, 1st, 94½, 2d 94½, 3d 93½, pullet, 1st 95½, 2d 95, 3d 95, Olmstead. Pen, 1st 189½, Olmstead; 2d 183½, Rouse.

WHITE LANGSHANS.—Cockerel, 1st 92, 2d 89, pullet, 1st 94, 2d 92½, 3d 91½, Olmstead.

SILVER WYANDOTTES.—Cock, 1st 90, Homer Kriebler, Ionia; 2d 88½, W. F. McNaughton, Sheridan. Hen, 1st 91½, 2d 91, McNaughton. Pullet, 1st 93, 2d 93, McNaughton; 3d 93, Kriebler.

BARRED PLYMOUTH ROCKS.—Cock, 2d 89, Shaw & Flanders, Lansing; 3d 88½, A. S. Bacon, Muir. Hen, 1st, 2d 93, Bacon; 3d 92½, Geo. W. Pickett, Caledonia. Cockerel, 1st 92, Pickett; 2d 91½, Wm. M. Carroll, Onondaga; 3d 89, Bacon. Pullet, 1st 94½, 2d 94, 3d 94, Carroll. Pen, 1st 185½, 3d 182, Pickett; 2d 183½, Carroll.

W. P. ROCKS.—Cock, 1st 94½, 2d 93½, A. R. Carron, Clarkston; 3d 93, Ionia Poultry Club. Hen, 1st 95½, 2d 95, Bacon; 3d 94, Carron. Cockerel, 1st 94, Ionia Poultry Club; 2d, 91, Wm. Metz, Ionia. Pullet, 1st 96, 2d 95½, 3d 95½, Bacon. Pen, 1st 188½, Ionia Poultry Club; 2d 188½, Carron.

BUFF P. ROCKS.—Cockerel, 3d 88½; pullet, 3d 88, Stellwagen, St. Ignace.

HOUDANS.—Cock, 1st 92½, Ralph Hoge, Hubbardston; 2d 92, 3d 91, Concord Poultry Club. Hen, 1st 95, Mason Poultry Farm, Grant; 2d 94½, Concord Poultry Club; 3d 94, Hoge. Cockerel, 2d 90½, 3d 89½, Mason Poultry Farm. Pullet, 1st 94½, Concord Poultry Club; 2d 93½, Howard Frace, Saranac; 3d 93½, Hoge. Pen, 1st 185½, 3d 182, Concord Poultry Club; 2d 185½, Hoge.

W. F. B. SPANISH.—Cockerel, 1st 2d, 94; pullet, 1st 95½, 2d 94½, 3d 94½; pen, 1st 188½, N. B. Grosvenor, Ionia.

S. C. BROWN LEGHORNS.—Cock, 1st 92, Mason's Poultry Farm. Hen, 1st 93½, 3d 93, Mason's Poultry Farm; 2d 93, Mrs. Rouse. Cockerel, 1st 94, 3d 93, Ed. A. Yacht, N. Detroit; 2d 94, Clark Seymour, Ionia. Pullet, 1st 94½, 2d 94, 3d 94, Yacht. Pen, 1st 188, Yacht; 2d 186½, W. H. Tyler, Stockbridge.

S. C. W. LEGHORNS.—Cock, 1st 91½, George Seabrook, Muir; 2d 91, A. C. Goodwin, Ionia; 3d 91, Mason's Poultry Farm. Hen, 1st 95½, Miller; 2d 93½, Goodwin. Cockerel, 1st 93½, C. P. Reynolds, Owosso; 2d 93½, Mason's Poultry Farm; 3d 93, Goodwin. Pullet, 1st 96½, 2d 96, 3d 95½, Miller. Pen, 1st 187½, Goodwin; 2d 187½, Reynolds; 3d 186½, Mrs. Rouse.

R. C. BROWN LEGHORNS.—Cock, 1st, 2d, 92½, Ionia Poultry Club; 3d 92½, Mason's Poultry Farm. Hen, 1st 93½, Ionia Poultry Club; 2d, 3d 92, Mason's Poultry Farm. Cockerel, 1st 93½, 2d 92½, Ionia Poultry Club; 3d 92, F. R. Cuttini, Waters. Pullet, 1st, 2d, 94, Ionia Poultry Club; 3d 93, Cuttini. Pen, 1st 184, 1-5, Ionia Poultry Club; 2d 184½, Mason's Poultry Farm.

R. C. W. LEGHORNS.—Cock, 1st 91½; hen, 1st 93, 2d 91½, 3d 90, Dell Goodell, Lowell. Cockerel, 1st 93½, Morse & Carpenter, Ionia; 2d 93½, 3d 93, Goodell. Pullet, 1st 96, 2d 95½, Goodell; 3d 95, Morse & Carpenter. Pen, 1st 188½, Goodell.

BUFF LEGHORNS.—Cock, 1st 90½, George S. Barnes, Battle Creek. Hen, 1st 92½, 2d 91½, Barnes; 3d 91½, D. G. Mange, Lowell. Cockerel, 1st 93½, 2d 91, 3d 90½; pullet, 1st 94½, 2d 3d 93, Barnes. Pen, 1st 186, 5-6, 2d 183, Barnes; 3d 173½, Geo. Seabrooke.

BLACK JAVAS.—Cockerel, 1st 92; hen, 1st 96, pullet 1st 92, Concord Poultry Club.

BLACK MINORCAS.—Cockerel, 1st 94, 3d 89, Stellwagen; 2d 91, Carron. Hen, 1st 95, 2d 94, 3d 92½, Stellwagen. Pullet, 1st 95, 2d 94, 3d 95, Ionia Poultry Club; 3d 94½, Carron. Pen, 1st 183½, Carron.

WHITE MINORCAS.—Cock, 1st 91; cockerel, 3d 89; pullet, 2d 91½, Stellwagen.

SILVER POLISH.—Hen, 1st 92; 2d, 3d, 90½; pullet, 3d 89, Ionia Poultry Club.

GOLDEN POLISH.—Cockerel, 2d 90½, pullet, 1st 93, 2d, 3d, 92, Ionia Poultry Club.

W. C. W. POLISH.—Cock, 1st 91½; pullet, 1st 93½, 2d 90, Ionia Poultry Club.

P. C. W. P. ROCKS.—Cockerel, 2d 90½; pullet, 1st 92½, Grosvenor.

PIGEONS.—A. H. Doane, Winfield, 1st on display and all specials in that class.

Poultry at Roachdale, Ind.

The meeting of Indiana Fanciers' Association just closed at Roachdale, Indiana, was a "howling success," there being a very large number of birds on exhibition of a superior quality to those of their first annual show. The chief inducement held out to exhibitors was the score card and ribbons, although many valuable special premiums were contested for. Judge, F. J. Marshal, Middletown, Ohio, spent two days which were full of business to him in scoring the birds, and was assisted by Mr. Kurtz of the Indiana Farms, who did the marking for him.

Following are the awards:

B. P. ROCKS.—Cock, 1st 92, Sayhr Bros, New Market; 2d 87½, 3d 87½, F. A. Owen, Raccoon; 4th 87½, W. A. Craver, Fillmore. Hen, 1st 92½, 2d 92, Gentry & Son, Danville; 3d 91½, 4th 91½, Sayhr Bros.  BUFF COCHINS.—Cockerel, 1st 91, 2d 89, pullet, 1st 91, 2d 90½, 3d 90, collection, 1st 452½, C. J. Nesmith, Reading, Mass.
 PARTRIDGE COCHINS.—Cock, 2d 87½, hen, 1st 92½, 2d 92½, 3d 91½, cockerel, 1st 94½, 2d 92, pullet, 1st 93½, 2d 93½, 3d 92½, collection, 1st 462½, 2d 457½, N. A. Knapp, Winchester, Mass.
 BLACK LANGSHANS.—Cock, 1st 92½, 2d 90½, Nesmith. Hen, 1st 92½, Nesmith; 2d 92, A. B. Yeaton, Stoneham, Mass.; 3d 92, Miss C. Barrett, Malden, Mass. Cockerel, 1st 93, Yeaton; 2d 92½, Miss Barrett; 3d 92, F. E. Sprague, Stoneham, Mass. Pullet, 1st 93, Nesmith; 2d 93, Miss Barrett; 3d 92½, Willie Moore, Stoneham, Mass. Collection, 1st 462, Nesmith; 2d 459½, Miss Barrett; 3d 456½, Sprague.
 BARRED P. ROCKS.—Cock, 1st 90½, 2d 90, C. E. Cromack, Stoneham, Mass.; 3d 90, Nesmith. Hen, 1st 92½, Nesmith; 2d 92, 3d 91½, Cromack. Cockerel, 1st 92, 2d 92, Cromack; 3d 91½, Nesmith. Pullet, 1st 93, 2d 92, Geo. E. Fasset, Beverly, Mass.; 3d 91½, F. A. Quinby, East Rochester, New Hampshire. Collection, 1st 456½, 3d 451, Nesmith; 2d 456, Cromack.
 W. P. ROCKS.—Hen, 1st 93½, 2d 92½, 3d 91½, cockerel, 1st 93, pen, 1st 461½, Frank Peavey, Stoneham, Mass.
 BLACK LEGHORNS.—Cockerel, 1st 92, W. P. Hill, Stoneham, Mass.; 2d 91½, A. E. Davis, Reading, Mass. Pullet, 1st 94, 2d 93½, Hill; 3d 92½, Davis. Collection, 1st 462½, Hill.
 S. C. W. LEGHORNS.—Cock, 1st 91½, Davis. Hen, 1st 94, M. B. Baldwin, Stoneham, Mass.; 2d 93½, 3d 93½, Davis. Cockerel, 1st 92½, Baldwin; 2d 92, O. J. Haynes, Malden, Mass.; 3d 91, Davis. Pullet, 1st 94½, 2d 93, 3d 93, Haynes. Collection, 1st 464½, Haynes; 2d 463½, Baldwin.
 S. C. B. LEGHORNS.—Cockerel, 1st 91½, pullet, 1st 92, 2d 90½, 3d 90½, collection, 1st 453½, Haynes.
 HOUDANS.—Cock, 1st 90, hen, 1st 91½, Hill.
 W. F. B. SPANISH.—Hen, 1st 93½, 2d 91½, cockerel, 1st 90½, Davis.
 P. L. T. JAPANESE.—All to O. T. Phillips, Melrose, Mass.
 ENGLISH RED CAPS.—Hen, 3d 87½, R. C. Tuxbury, Amesbury, Mass.
 B. B. R. GAME BANTAMS.—Cock, 2d 87½, hen, 1st 91½, 2d 88, 3d 87½, cockerel, 2d 87½, pullet, 2d 89, 3d 89, W. A. Bartlett, Stoneham, Mass.
 BUFF COCHIN BANTAMS.—Cockerel, 1st 91, pullet, 1st 92, Clarence Wallace, Stoneham, Mass.
 INDIAN GAMES.—Cockerel, 1st 90, pullet, 1st 90½, 2d 90, 3d 88½, A. E. Snow, Melrose, Mass.

Awards at Nemaha Valley Poultry Show, held at Auburn, Neb., Dec. 18-21.

LIGHT BRAHMAS.—Cock, 3d 86½, E. C. Worden, Auburn, Neb. Cockerel, 1st 90, Geo. Masters, Auburn, Neb.; 2d 89, W. A. Irwin, Weumsch, Neb. Pullet, 2d 88½, Irwin; 3d 88, Masters. Pen, 1st 179½, Irwin; 2d 169½, F. Childs, Douglas, Neb.
 BUFF COCHINS.—Cock, 2d 88½, P. P. Davel, Auburn, Neb. Cockerel, 2d 88½, Irwin. Pullet, 1st 95, A. Gaiser, Weumsch, Neb.; 2d 90, Irwin. Pen, 1st 183, Gaiser; 2d 181½, Irwin.
 PARTRIDGE COCHINS.—Hen, 1st 92½, Gaiser; 2d 92½, Irwin. Cockerel, 1st 92, Irwin; 2d 91, Gaiser; 3d 86, Elton B. Stewart, Weumsch, Neb. Pullet, 1st 90½, Irwin; 2d 90, Gaiser; 3d 85½, Stewart. Pen, 1st 185½, Gaiser; 2d 183½, Irwin.
 WHITE COCHINS.—Hen, 2d 87½, cockerel, 1st 89½, pullet, 1st 90, R. Stewart, Bratton, Neb.
 BLACK LANGSHANS.—Hen, 1st 95, A. N. Defoe, Weumsch, Neb.; 2d 95, 3d 94½, G. Van Houten, Auburn, Neb. Cockerel, 1st 94½, Van Houten; 2d 92½, Defoe; 3d 92½, Van Houten. Pullet, 1st 96½, Ella Van Houten, Auburn, Neb.; 2d 94½, Don Denvare, Auburn, Neb.; 3d 94½, H. J. F. Wert, Auburn, Neb. Pen, 1st 187, Defoe; 2d 183½, Chas. Kite, Howe, Neb.
 WHITE LANGSHANS.—Cockerel, 2d 89, E. E. Mendenhall, Salem, Neb.; 3d 87½, O. P. Dovel, Auburn, Neb. Pullet, 2d 88½, Dovel; 3d 88, Mendenhall.
 BARRED P. ROCKS.—Hen, 2d 87½, T. J. Cummings, Howe, Neb. Cockerel, 1st 94, Gaiser; 2d 90, Irwin. Pullet, 1st 91, 2d 89, 3d 89, Cyrus Milam, Stella, Neb.; 3d 89, 1-2, Williams Bros., Stella, Neb. Pen, 1st 182, Irwin; 2d 181, Gaiser.

W. P. ROCKS.—Hen, 1st 93 1-2, Nancy Watson, Lincoln, Neb.; 2d 92 1-2, W. O. Southwick, Friend, Neb.; 3d 91, Mendenhall. Cockerel, 2d 88, Wert; 3d 88, August Seigneur, Auburn, Neb. Pullet, 1st 92, Wert; 2d 91 1-2, 3d 90 1-2, J. C. Zenney, Auburn, Neb. Pen, 1st 186 1-2, 2d 183½, Watson.
 S. WYANDOTTES.—Cockerel, 1st 90 1-2, W. B. Ward, Burr, Neb. Pullet, 1st 92 1-2, T. E. Wheeler, Bennett, Neb.; 2d 91 1-2, 3d 91, Ward. Pen, 1st 182½, Ward; 2d 180½, C. A. Cook, Salem, Mass.
 G. WYANDOTTES.—Cockerel, 2d 87 1-2, 3d 87, Cook. Pullet, 2d 86 1-2, M. H. Carman, Johnson, Neb. Pen, 1st 181½, Cook.
 W. WYANDOTTES.—Pullet, 1st 92, Wheeler; 2d 92, 3d 90 1-2, Gaiser. Pen, 1st 181½, Wheeler; 2d 177½, S. Feather, Parrama, Neb.
 S. C. B. LEGHORNS.—Pullet, 1st 94 1-2, E. E. Greer, Beatrice, Neb.; 2d 93 1-2, 3d 93, Standard Leghorn Company, Omaha, Neb. Pen, 1st 189½, Irwin; 2d 187 1-2, Standard Leghorn Company; 3d 184½, L. L. Alspaugh, Auburn, Neb.
 R. C. B. LEGHORNS.—Hen, 1st 92 1-2, Mrs. R. S. Wood, Auburn, Neb. Cockerel, 1st 95 1-2, pullet, 1st 95 1-2, 2d 95, E. C. Blowers, Edgar, Neb.
 S. C. W. LEGHORNS.—Hen, 1st 93 1-2, Amy Worden, Auburn, Neb.; 2d 93, E. C. Worden. Cockerel, 1st 95 1-2, 2d 93 1-2, E. C. Worden; 3d 88 1-2, pullet, 1st 95 1-2, 2d 94, 3d 93 1-2, pen, 1st 180, Amy Worden.
 BUFF LEGHORNS.—Hen, 1st 91, Geo. H. Lee, Exeter, Neb. Cockerel, 1st 93, Lee; 2d 92, Defoe. Pullet, 1st 93, 2d 90 1-2, Defoe. Pen, 1st 181½, Defoe; 2d 179½, Lee.
 C. I. GAMES.—Hen, 1st 92 1-2, Mendenhall. Cockerel, 1st 93 1-2, Irwin; 2d 89 1-2, Carman. Pullet, 1st 93 1-2, Carman; 2d 93 1-2, Irwin; 3d 87, Mendenhall. Pen, 1st 183½, Irwin.
 S. S. HAMBURGS.—Cock, 2d 89 1-2, Cook. Hen, 1st 93 1-2, Cook; 2d 89 1-2, Gadd & Andre, Lincoln, Neb. Cockerel, 2d 89, Gadd & Andre; 3d 87 1-2, D. D. Adams, Johnson, Neb. Pullet, 1st 93, Gadd & Andre; 2d 92 1-2, Cook. Pen, 1st 185, Gadd & Andre; 2d 182½, Feather.
 BLACK MINORCAS.—Cockerel, 1st 95, E. C. Blowers, Edgar, Neb.; 2d 94, Gadd & Andre. Pullet, 1st 93, 2d 92 1-2, J. K. Camden, Crete, Neb.; 3d 92 1-2, Gadd & Andre.
 W. F. B. SPANISH.—Hen, 1st 94 1-2, cockerel, 1st 94 1-2, pullet, 1st 95 1-2, Wm. Toggart, Omaha, Neb.
 WHITE WONDERS.—Cockerel, 2d 86, pullet, 1st 90 1-2, 2d 89 1-2, August Seigneur, Auburn, Neb.
 M. B. TURKEYS.—Cock, 1st 95, Cummings; 2d 92, Cook. Hen, 1st 91 1-2, Cook; 2d 86 1-2, Geo. Wager, Talmage, Neb. Cockerel, 1st 95, pullet, 1st 92, Cook.
 Daisy Bone Cutter, manufactured by Wilson Brothers, Easton, Pa., was awarded first premium in competition with three others.
 The Reliable Incubator and Brooder was awarded first premium, and was admired by all. Second premium to the "None Such," manufactured by the Forest Manufacturing Company, Forest, Ohio.

Awards at the New Mexico Poultry Show, held at Al- buquerque, Dec. 24-30.

BARRED P. ROCKS.—Cock, 1st 90, H. B. Furgesson, Albuquerque; 2d 85 1-2, A. F. Overmann, Albuquerque. Hen, 1st 90 1-2, 2d 89 1-2, 3d 86 1-2, Mrs. C. Lowenberg, Pena Blanca. Cockerel, 1st 93 1-2, 2d 91 1-2, J. W. Talcott, Denver, Colo.; 3d 90 1-2, Overmann. Pullet, 1st 93, Talcott; 2d 90 1-2, 3d 89 1-2, Mrs. Lowenberg. Pen, 1st 176 1-2, Furgesson; 2d 175½, Elmore Chase, Santa Fe; 3d 175, Overmann.
 W. P. ROCKS.—Cockerel, 1st 91 1-2, pullet, 1st 93, 2d 92, 3d 91, pen, 1st 183, all to Mrs. A. R. Lowe, Albuquerque.
 BLACK LANGSHANS.—Cock, 1st 92 1-2, J. L. McDowell, Denver, Colo.; 2d 92, Mrs. Hatch, Albuquerque. Hen, 1st 93, 2d 90 1-2, McDowell. Cockerel, 1st 91, F. L. Pearce, Albuquerque. Pullet, 1st 93 1-2, McDowell; 2d 89, Pearce.
 DARK BRAHMAS.—Hen, 1st 90 1-2, cockerel, 1st 89 1-2, Chas. Schroeder, Albuquerque.
 BUFF COCHINS.—Hen, 1st 96, 2d 93, cockerel, 1st 91 1-2, pullet, 1st 95, 2d 90, pen, 1st 185, all to F. C. Swartz, Gallup, New Mexico.
 S. C. B. LEGHORNS.—Cock, 1st 90½, J. W. Anderson, Albuquerque. Hen, 1st 91 1-2, Anderson and C. E. Winslow, Albuquerque, tie; 2d 90 1-2, Winslow; 3d 88, Anderson. Cockerel, 1st 95, 2d 94 1-2, 3d 94, pullet, 1st 95, 2d 94 1-2, 3d 94, pen, 1st 189½, 2d 187, Winslow; pen, 3d 179½, Anderson.
 BLACK MINORCAS.—Cockerel, 1st 91, E. H. Stagg, Albuquerque; 2d 88 1-2, E. K. Sulzer, Albuquerque. Pullet, 1st 93 1-2, Stagg.

 HOUDANS.—Cock, 1st 94, hen, 1st 95 1-2, 2d 94 1-2, cockerel, 1st 94, 2d 92, pullet, 1st 92, 2d 91 1-2, pen, 1st 187 1-2, all to H. B. Hersey, Santa Fe, New Mexico.
 S. S. HAMBURGS.—Hen, 1st 91, 2d 90, A. E. Dennet, Albuquerque.
 B. B. R. GAMES.—Cockerel, 1st 91 1-2, pullet, 1st 95 1-2, 2d 94, J. P. Koster, Albuquerque.
 C. I. GAMES.—Cockerel, 1st 90, pullet, 1st 93, 2d 90 1-2, 3d 90, pen, 1st 180½, all to Dennet.

The Worcester Show

The Central Mass. Poultry Club will hold its annual show at Worcester, Mass., in Horticultural hall, Front street, January 22nd to 25th. We have one of the best halls in the State to hold a show in, and have engaged men of honor to do the judging. We shall pay \$2.00 first, \$1.00 second, on single birds of both fowls and chicks. Pen prizes are \$5.00 first, \$3.00 second. Also a grand combination special of \$5.00 on the best bird in each and all classes. The lists are now out. Send a card to C. A. Ballou, Worcester, Mass., and you will get a list.
 C. A. BALLOU, Cor. Sec'y.

Poultry at Sanatoga, Pa.

The Schuylkill Valley Poultry Association arranged a very pretty poultry show in the upper hall of the Kurtz building, and managed it so well that it came out of the affair with all premiums paid and a balance in the treasury, at least so Secretary Kurtz says. The coops were new and well arranged, the light fair, and the exhibit good. The judges, John E. Diehl and Jesse G. Darlington, began work in the morning, and all of the awards in the regular classes were known before sundown. The winners, as officially announced, are:

LIGHT BRAHMAS.—All to John Sellers, Pottstown, Pa.
 DARK BRAHMAS.—All to F. D. Blimline, Mohn's Store.
 BARRED P. ROCKS.—Cock, 1st, J. G. Werner, Mohn's Store. Hen, 1st, Mahlon R. Shaner, Pottstown. Cockerel, 1st, Sellers; 2d, Shaner. Pullet, 1st, 2d, Shaner. Pen, 1st, Shaner; 2d, W. W. Kulp, Pottstown.
 W. P. ROCKS.—Cock, 1st, Kulp; 2d, S. J. Kurtz. Hen, 1st, Kulp; 2d, Kurtz. Cockerel, 1st, Kulp; 2d, E. C. Espenship. Pen, 1st, Kurtz.
 PARTRIDGE COCHINS.—All to Blimline.
 BLACK LANGSHANS.—All to Miller Brothers, Douglasville.
 BLACK MINORCAS.—All firsts to E. C. Espenship, Worcester, seconds to J. B. Krouse, Sanatoga.
 G. WYANDOTTES.—All to Mrs. L. K. Drumheller, Sanatoga.
 S. WYANDOTTES.—All to E. M. R. Rhoads.
 R. C. B. LEGHORNS.—Cock, 1st, hen, 1st, 2d, Kulp. Cockerel, 1st, J. B. Kerlin, Schenkles. Pullet, 2d, Kulp.
 WHITE LEGHORNS.—Cock, 2d, hen, 1st, 2d, Kulp. Cockerel, 2d, pullet, 2d, Drumheller. Young pair, 1st, A. C. Nester, Pottstown. Pen, 1st, Kurtz; 2d, Kulp.
 S. C. B. LEGHORNS.—All firsts to Drumheller.
 BLACK LEGHORNS.—Fowls, 1st, 2d, Kurtz.
 PIT GAMES.—Cock, 1st, O. C. Grube, Sanatoga.
 G. S. BANTAMS.—All to S. J. Kurtz.
 S. S. HAMBURGS.—All to Arch L. Mayo, Pittston, Pa.
 RED CAPS.—All to J. H. Burley, Reading.
 SHERWOODS.—All to Carman & Donnelly, Doylestown.
 GUINEAS.—1st, J. G. Miller.
 TURKEYS.—Bronze, first for young, second for old male, first for old hen, second for young, E. M. Hahn, Cedarville. Gobbler, 1st, W. Oberholzer, Limerick. Buff, cock, 1st, hen, 2d, Kurtz. Largest gobbler, J. Newland, Sanatoga.
 GEES.—White, all to Kurtz.
 DUCKS.—Brazilian, 1st, 2d, Miller. Pekin, 1st, 2d, Henry Scheffley, Sanatoga.

BARRED PLYMOUTH ROCK COCKEREL.
 "New York Champion's Grandson,"
 winner of first at New York in 1894.

The above bird represents the third generation of a noted line of winners at the great New York show. He scored over 94 points and weighed over 9 lbs. at the show last winter, winning in a class of 41 cockerels. He is owned and was bred by Bradley Bros., of Lee, Mass., whose reputation as breeders of fine Plymouth Rocks is world famous.

Correction.

TO THE AMERICAN FANCIER:

In the Cleveland show report please correct: First prize S. C. Brown Leghorn pullet should read Gerald Clapp, Chatham Center, O., instead of Zerold Clapp, Lodi, O. Lodi was the express station shipped from.
 GERALD CLAPP.
 Chatham Center, O. Jan. 4, 1895.

Plan of Greenwood Poultry Yards

TO THE AMERICAN FANCIER:

Oftentimes when looking over my nine different journals and as many more of sample copies, I can find many giving their plans of building poultry houses and a general description throughout of their plans which I think is a very good idea. I have been a breeder of thoroughbred fowls for several years and have never written anything for publication before, except by the way of advertisements. I, like some other breeders, have spent my leisure time in studying out where I could improve in breeding better points, and I find out that any honorable breeder can improve his stock very much by so doing. Now I will give the readers of your journal a brief sketch of the Sidney Greenwood Poultry Yards. I have a poultry house on a side hill facing the south, the building is sixteen by fifty feet and three stories high instead of one as most breeders have. I have yards all around the building. The front yards are used for breeding purposes, with a hall the entire length next to the back wall. I have a large sheet iron stove that will burn large chunks of wood, standing in the center of basement for warming it in very cold weather, or in case dampness gathers, I start a fire, but no more than is necessary. The second floor is well lighted, the hall running the entire length through the center and pens on each side of hall, nest boxes open into the hall and feed troughs under nest boxes and are fed from the hall on each side. On this floor I have a cooking kettle holding a barrel with steam pipe for carrying off the steam out of the building. The third floor is on the same plan as the second floor with hall through the center and pens on each side of hall. This floor is lighted by skylights and is kept comfortably warm from the heat below, so much so I do not have the large combs and wattles of my Leghorns and Minorcas freeze the least. The fowls from this floor go out on the ground from back side of building. The ventilator is a single tube at each end of basement, a 5 by 10 inch tube within about twenty inches of the ground. In this tube I have a shut-off slide to control the ventilation as I wish. On second floor is a double ventilator, and on third floor is a triple ventilator on same plan of the first one, all leading to cupolas on the roof of building. Have twenty-five rooms in the building for fowls, with folding roosts. The height of roosts is eighteen inches from the floor and are hung on hinges so they can be raised up and fastened to side of building while cleaning out. I also have a cook and feed room on second floor, and water on each floor. The partitions are of poultry netting. I have another basement 26 by 36 feet I use for fowls, also another small building three stories high, 14 by 16 feet in size. The basement is used for breeding Pekin ducks, the second and third floor is used for fowls. I also have another small building built of poultry netting, expressly for pet stock, such as rabbits and Guinea pigs. I have five hundred fowls at present time, but as usual thing when I sell off my surplus stock, I intend to keep three hundred fowls. I breed twenty-five varieties of fowls. I think very likely you will hear from me again in the future in regard to feeding and caring for poultry.

J. J. WATERS.

Golden Penciled Wyandottes.

TO THE AMERICAN FANCIER:

This subject has been written upon to considerable extent in the late issues of many of the poultry journals under both the name of "Golden Penciled" and that of "Partridge" Wyandottes, the latter being selected by Messrs. McKeen and Theim, and the former by Mr. Sarr and the writer. Mr. Sarr and I had both of these names under consideration at one time. Every time a meeting to compare notes occurred at either his home or mine, this question would come before us until a final decision was rendered in favor of "Golden Penciled" Wyandottes. Our reasons for thus deciding were, that a "Silver Penciled" counterpart could and most surely would be produced, and would here state that a few prelimi-

nary and experimental matings have been made to produce a foundation stock upon which to breed the penciling of the Dark Brahma. So the public may expect a Silver Penciled Wyandotte, for they can surely be produced. I would like very much to have some person assist me in producing them. Anyone so disposed will please write to me.

During the past few weeks several letters have been passed between Mr. McKeen and the writer regarding the name. It was deemed advisable that we unite upon either one or the other of these names. As a final result of this correspondence I have just received a letter from Mr. McKeen, stating that "In consideration of the facts, that a silver penciled counterpart of the variety under discussion is already projected, having the same markings as the Dark Brahma, and believing that both should have the same name with a prefix of 'Golden and 'Silver,' and also that there should be harmony among those who are interested in them, we will consent to call them Golden Penciled Wyandottes, the name you and Mr. Sarr first gave them."

Mr. McKeen and myself are both of the opinion that the publicity that has been given them as Partridge Wyandottes will do them no harm, but rather act as an educator as regards color and appearance of this variety. We wish it distinctly understood that while Mr. McKeen has finally rendered a decision favorable to the name selected by us, he is still one of the originators of Golden Penciled Wyandottes. The other gentlemen interested in their origin are Mr. E. O. Theim, Vail, Iowa, B. D. Sarr, Marcellus Falls, N. Y.

GEO. H. BRACKENBURY.

Auburn, N. Y.

Poultry Show Made Money.

The board of directors of the Mid-Continental Pet Stock and Poultry Association met at the Midland hotel last night to talk over the poultry show recently held in this city and to arrange plans and fix dates for the show next season. It was conceded by all that the show would have been more successful had it been held earlier or later in the season—any time but the holiday season—as business men were so engaged in their own affairs at this time. The show was a success financially, however, there being a neat sum in the treasury to begin the show next season.

The exhibition will be held nearly a month earlier next winter, opening November 27, and continue until December 2. Several local dog fanciers are making an effort to have a dog show in connection with the poultry show hereafter.

The directors do not all favor the Exposition building for the show, and it is probable that some building nearer the center of the city will be secured next season.

The treasurer and secretary have not yet reported the exact financial condition of the association since the show, but they give assurance that there remains in the treasury a very neat sum after all debts are paid.—The Kansas City Star, Jan. 3d, 1895.

Nebraska Fanciers Organize.

TO THE AMERICAN FANCIER:

The poultry fanciers of Wayne, Neb., and the surrounding country met at Wayne December 18th and organized an association. The association was named the North-East Nebraska Poultry Association, and the following officers were elected: President, W. H. Bradford, Wayne, Neb.; vice-president, C. D. Martin, Wayne, Neb.; secretary, H. Gregory, Wayne, Neb.; assistant secretary, B. Cook, Wayne, Neb.; treasurer, E. P. Olmsted, Wayne, Neb.; superintendent, Thos. J. S. Hughes, Wayne, Neb.; executive committee, C. D. Martin, F. Hood, A. Crue. The next show is to be held at Wayne, Neb., the third week in December, 1895. The judge has not been decided upon yet, but the idea is that L. P. Harris, of Lincoln, Neb., will be the man, as he gave splendid satisfaction during the last show.

WAYNE READER.

Re Cochins at Madison Square Garden.

TO THE AMERICAN FANCIER:

Please say that the American Cochin Club specials are for American Standard Cochins only, and the following should read:

Geo. E. Peer, Rochester, N. Y., offers the "Peer Crp," \$50 in gold or plate for the best collection of Buff Cochins, to consist of 2 cocks, 2 hens, 2 cockerels and 2 pullets.

A. E. Olshausen, of Los Angeles, Cal., offers the "Olshausen Cup," \$25 in gold or plate, for the two best Buff Cochins cockerels and pullets.

Theo. Sternberg, Ellsworth, Kas., offers \$5 in gold for the Buff Cochins with the best under color.

And not as in premium list.

H. V. CRAWFORD.

Montclair, N. J., Jan. 8, 1895.

Notice to Subscribers.

Owing to a large demand for the several show reports appearing in the issue of December 22nd and the inconvenience caused the mails during the recent heavy snowstorms, we have exhausted the issue of that date. To those of our readers who have written us owing to non-arrival of their paper, we make this explanation. If any have the issue of December 22 and do not file their copies, will they return same to us?

Pittston, Pa., Poultry Show.

Pittston, Pa., show claims January 22 to 25 as dates for holding their coming exhibition. It is expected 1,500 birds will be in the coops, many prominent breeders signifying their intention of exhibiting. Bicknell does the judging. W. R. Allen, Pittston, is secretary.

PIGEONS.

Pigeon Notes.

BY JOHN HOPEWELL.

[ALL RIGHTS RESERVED.]

Continued from December 20th.

THE PRIEST.

This pigeon, although a great favorite in Germany and France, has never become a general favorite in this country, why, it is hard to account for, as it is a pretty and attractive variety and a good breeder. It derives its name from the peculiar marking of the head, it being white to a line passing from the corners of the mouth and so around the head. This suggests the shaven head of some Catholic priests. At the back of the head is a shell which also suggests the cowl or hood worn by such priests, and from it all the pigeon gets its name. The standard for it is:

Size.—About that of a stout common pigeon.

Carriage.—Upright but not bold.

Color.—Solid, or self-colored, with exception of the white head, and these colors Black, Blue, Red, Yellow and Silver, clear bright and glossy. There is also a sub-variety with the shoulders marked in spangles; these are known as Spangled Priests.

Head.—Medium in size, rather inclined to be long and narrow. The upper part from the corners of the mouth and on a line just below the eye passing around the back of the head should be white. Forehead, quite high.

Shell.—This is a tuft of feathers rising from the base of the skull, curving forward, and reaching in height just above the crown of the head, and from a point just back of the ears, the whole forming the arc of a circle. Color same as neck and body.

Tuft.—A group of feathers rising from the base of the back and curving from the center backwards and forwards. The back portion rather upright.

Beak.—Thin, upper mandible a trifle heavier than the lower. In color, flesh color.

Eyes.—Dark or Bull with very little cere.

Neck.—Medium in length and tapering neatly from body up.

Breast.—Narrow and not prominent.

Body.—Narrow and tapering to the tail.

Wings.—Medium. Flights carried on a level with the tail. A sub-variety of Priests have white wing bars, in other respects they are like the solid colored Priests.

Tail.—Medium and same color as the body and closely folded. There is also a sub-variety having white tails.

Legs.—Medium in length, and with the feet, should be covered with a growth of feathers, making them what is known as grouse feathered.

Common Defects.—Bad color, tuft turning wholly to the front, uneven shell, bars in the Barred varieties mixed with reddish tinge and irregular in shape, scantily feathered legs.

Disqualifications.—Absence of tuft, crested one sided and not well developed. In Barred variety, wing bars not well developed, bare legs and foul feathers in tail or any part of plumage. Deformity or disease of any kind.

Most Rank.

TO THE AMERICAN FANCIER:

Have noticed in Glasgow's comments on the Boston show that he says my birds were out of condition. Perhaps they were, and perhaps they were not, but as I am not a veteran fancier I am willing to learn, and would like to ask him, through the columns of this paper, what more I could have done to have put them in better condition, as I have as good authority and from better fanciers than he is or ever will be. I give my birds and fowls, at all times, my whole attention and the best of care. I also noticed in the same class as my birds were, there were birds from one of the best Carrier and Barb fanciers in the country. He also says his birds were out of condition. It seems very strange to me that such a fancier as Newell would send birds to a show when out of condition, thinking perhaps mine might have been, but perhaps there are others that know a good bird in condition as he does, and there are others that know a good bird as well as he does. If my birds were not in condition, why should they be awarded 1st premium in very good company. I also noticed the article in last week's number, written by E. J. Campbell, which I think drove the nail home, and in the right place. If Glasgow can throw any light on this subject, he will help a fancier willing to learn, if from the right source.

I think as long as the show was a success, and every one was pleased, and all had a good time, it would have been well to have left "good enough" alone without these rank comments, which some fellows are always looking after, and to see where they can find some fault, regardless of the best judge in the country.

G. S. BOLLER.

Cherry Creek, N. Y., Jan. 3, 1895.

Pets.

TO THE AMERICAN FANCIER:

This is not an unfamiliar subject to all fanciers, so I came to the conclusion that it was not right to miss an opportunity to refer to some of our friends—pets. First comes the Hon. John H. Kuhn, of Louisville, Ky., which he calls the home of southern pigeondom. Now, there never was a more jovial, bigger hearted man than John H., but somehow or other thieves took a dislike to him and at a single stroke bagged several hundred of his best pigeons, so John is short of pets. In this respect he is unlike Edward T. Hazeldine, the Pouter breeder, of Terre Haute, Ind., for "Hazel" has a pet. It transpires that "Hazel" is a mechanic of no little ability and operates an architectural ironworks. Recently he was superintending some forging, and received an unwelcome cinder in his eye; that was not enough, so he took a train immediately for the Peoria show, it being then in full blast, and he wishing to leave behind him no criticism or any intimation of a pugilistic reception. The train conveyed him as far as Danville, a transfer station, where he missed the Peoria train, and was

compelled to return home and nurse his pet.

Everybody that is a Fantail crank knows Saddleback Weiss, of Fred. C. Weiss, of Evansville, Ind. He also is a mechanic, and holds a responsible position as foreman for a contracting firm. A few days ago, just after his dissipation at the Peoria show, he having returned home, was building a castle in the air, when he fell severely injuring a leg and breaking his heart. He has written that his pet will set him back two months. That is a funny statement, and I have taken it that he is going to take in the Peoria, Nashville, and Kansas City shows again in his mind.

Word was received from Mr. Zinnemaker, of Chicago, that during his absence, when attending the Peoria Poultry and Pigeon Show, that a servant in his employ who was left in charge of his pigeon lofts just turned on the steam heating apparatus in the lofts, and neglected turning same off, and now Mr. Zinnemaker has no pets. Chas. W. Robinson, of Peoria, Ill., the Fantail crank has for a long time been laying for a cur dog with the hope of winging him with a rock. The day after Christmas, Charley as usual made a short cut for a street car, going directly by his friend, the dog's home, but previously collecting a few select stones to antagonize Mr. Dog. Mr. Dog started out upon first sight; after a warm reception he retired in hot haste. Charlie thought nothing more of it until he had sighted his car coming, and started upon a run for same, when to his surprise and amazement he received a bite from the dog upon the hand. This pet is somewhat painful, but is rapidly recovering.

Major Frank M. Gilbert, of Evansville, Ind., took a southern trip recently to Evergreen, Ala., all for his pet stomach. There he found no help for it, but after judging a grand lot of Fans at Nashville and Kansas City shows he finally recovered.

It would take too much space to mention all the fanciers' pets so I will saw off with one more.

Recently I met "Big George," sometimes called George Ewald, of Cincinnati, Ohio. He has a pet that is a pet. It is the largest pet of the season. To appreciate the magnitude of George's pet you should hear him tell about it; he simply tells it by the yard, with emphasis every half foot. At the Peoria show he took dinner with three friends; they allowed him to talk, and, if not reminded, he would have forgotten to eat, he was so wrapped up in the story of his pet, the Cincinnati show. Well he did good work as a judge at Peoria, and made many friends who promised to help him with his pet and enter their best in competition at the Ewald exhibition.

The Cincinnati show promises to be the best show given this season, outside of the Grand New York Show, and I feel convinced that in pigeons it will equal it in every respect. I. L. NOYSE.

Transfers.

From the loft of A. B. Hoskins, Glen Riddle, Pa., to that of L. D. Holmes, Syracuse, N. Y., the following well bred Jacobins: One pair of Reds, one pair of Blacks, one pair of Blues, and one Yellow and one White hen, all good birds, and should improve his stock very much.

From the lofts of Dr. J. J. Hanselman all my Short-Face Antwerps or Show Antwerps, including Boston prize winners, to G. R. Jones, Allentown, Pa.; all my Tail Owls, including Boston prize winners, to John Graves, Winfield, Long Island, N. Y.; one pair of White Fans to H. N. Holbrook, Avon, Mass.; one pair of Yellow Pouters and one pair of White Fans to Geo. H. Leh, Allentown, Pa.

Notice to Owl Fanciers.

Please state in the next issue of THE AMERICAN FANCIER that the Owl Club by a majority of votes will meet at New York during their coming show, and as this is the American Owl Club's first meeting, it is very desirable that as many of the members as possible attend. A full meeting is hoped for.

H. T. KLUSMEYER, JR., Sec.
Easton, Pa., Jan. 8, 1894.

An English Opinion.

"Pigeon Keeping—Hints to Beginners." (America—THE AMERICAN FANCIER'S Office, Johnstown, N. Y.) The third revised edition, with additional chapters, of this practical little work is just to hand, and is, we feel sure, one of the best of its kind that has ever been written in America. Major F. M. Gilbert, the author, is well-known in Pigeon circles as a breeder and fancier of Fantails, besides being a clever writer on pigeon topics. The book is capably gotten up, nicely printed and of a handy size, and is published for 50 cents. In the introduction the author states: "I want to say in closing that it is strictly an American work, as I am one of those who hoot at the idea that to get any good birds we must import them. I want to go on record as believing that we have better birds in America than they have in England, and a far better climate in which to breed them." We admire the gallant major's patriotic sentiment, but at the same time would remind him that American fanciers are greatly indebted to England for their original stock.

We are glad to learn that the author has recovered from his late serious indisposition.—*Poultry*, England.

Mr. Ingram Explains.

TO THE AMERICAN FANCIER:

I wish to correct the statement made by Mr. Campbell in last issue of your paper wherein he says I told him that I could have done better judging in Jacks without Mr. Glasgow's help. I never told him any such thing. I did say that Glasgow was too positive in his assertions referring to some of the other classes, notably Pouters and Owls. I asked Mr. Glasgow to help me judge the Jacks which he readily did and will at once admit that he was a great help to me and it shows on the face of Campbell's letter that Glasgow could not have rattled me very much when he says I made but few mistakes in such large classes. I did say that I considered the 2d prize White Pouter cock the best, but Campbell acted in such a manner round that Pouter that he would tax the patience of Job. The owner of 2d bird told him repeatedly to keep still and give the man a chance.

A. M. INGRAM.
Quincy, Mass., January 3d, 1895.

Magpie Club.

TO THE AMERICAN FANCIER:

The majority of members favor giving the following club specials at New York show: For best Black cock, \$2; hen, \$2. Red cock, \$2; hen, \$2. Yellow cock, \$2; hen, \$2. Any Other Color cock, \$2; hen, \$2. 1894 American bred cock, \$2; hen, \$2. Total, \$20.

In addition to above, our president, Wm. Ehinger, Jr., of Philadelphia, Pa., will give \$2.50 in gold for best collection. Geo. W. Spohn of Philadelphia, 1 pair Magpies for best display Black Magpies. As I could not get more than eight classes at New York show, we will give the best 1894 bred cock or hen \$2 each; but the young birds can not compete in same class with old birds. It has also been suggested that members try to arrange to meet either Friday or Saturday, Feb. 1st or 2d, to discuss matters for the benefit of the club at our annual meeting.

G. A. FICK, Sec'y.
Baltimore, Md.

His Birds Were Not at Boston

TO THE AMERICAN FANCIER:

In looking over your report of the Boston Pigeon show, I see you give me 2d on Satinettes, '94. As my birds were not there it certainly is not me. Please give the honor where it belongs. My birds were ready to ship, but when I asked what time they would get there, I found they would be too late so unpacked them.

R. S. GROVES.
Prospect Park, Moore, Pa.

Correction.

TO THE AMERICAN FANCIER:

In your report of the late Boston show you fail to credit me with winning special

for best Long-faced Tumbler in the show, also special for best display of same.

FRANK W. GORSE.
Highlandville, Mass., Jan. 6th, 1895.

Pigeon Flying.

Philadelphia News of the Doves of the Members Flying under American Rules for Pigeon Flying.

TO THE AMERICAN FANCIER:

The interest with pigeon flyers to the close of the year is in the competition for the prize offered for best speed from one distance and the Bellview clock offered for four journeys, one to be from 540 miles. The one distance honors are held by "Blue Cloud" of Louis Mehler, Philadelphia, for 1,584.8 yards for the 100 miles distance, won from "Coxey" of the same loft early in November.

The four journey contest, in its condition that one shall be from 540 miles, has as fixed figures 996 yards for "Trainer," of Charles Hehler, and 1,057 yards by "F. L. Glosser," of Elwood Sanderling, the contest having narrowed to these two birds.

Up to November 14, "Trainer" held the record for the beginning of the year without the average being 1,321.9. But with the opening of the month "Glosser" was put upon the road and in the fortnight following made five journeys from 100 miles, the speeds being 1,347, 1,154.1, 1,299.6, 1,407.6. The best three of these with the 1,067 yards of the distance journey made the average for four, 1,366.5 yards.

On Thursday, December 13, the ball was opened again with the fly of "Trainer" from 100 miles, the speed 1,419 yards. This brought his average to 1,336.2 yards, the difference being lessened to 30.3 yards. Sent again to fly the same station on Friday, his speed was 1,439.1 yards, bringing the average up to 1,341.3 yards and lowering the margin 5.1 points.

On Saturday, "Glosser" was sent away for a trial on Sunday. The start was at 9:30 A. M., the bird in the loft at 11:41.40 A. M.; speed 1,377.1 yards. This being better speed than in a previous journey, brought the average for four up to 1,373.8 yards, widening the distance for "Trainer" even beyond the figures of Thursday. In the fly of Sunday there were also the two birds, "Miss Nancy" and "Daisy Bell." Neither was home at evening.

A new series was begun December 15, engaging the birds of W. H. Prawl, 153 Rittenhouse street, Germantown, and of John R. Hunsberger, Chestnut Hill. By reason of bad weather the birds were in the baskets for several days, but were so well cared for that they apparently lost nothing by it. Let go at 10:40 A. M., "Little Fritz," of John R. Hunsberger, was home at 1:18 P. M. The air line distance 123 1/2 miles, average speed 1,375.1 yards; giving the bird the record for the 123 mile distance in the world's flying for the year, previously held by "Bishop," of the Boman loft, with 1,314.4 yards. The first return to the Prawl loft was only a trifle later.

Imports—From the loft of Charles Duerinck, St. Gillis, Belgium, by A. J. Maper, Gordon, Pa., birds with record from Dax, 550 miles, from a lot of 70 birds making the distance in the day in 1892.

Transfers of stock reported for registry for the period ending December 31, are: From the American Lofts (Louis A. Mehler), Philadelphia, Pa., to Thos. J. Weissenberger, McKeesport, Pa., Reg. Nos. 99, 126, 137, 149, 150; to T. T. Mather, Philadelphia, Reg. Nos. 122, 136; to Peter Schamlein, Ashland, Pa., Reg. Nos. 147, 152, 161, 162.

From the Ellwood Sanderling Loft, Philadelphia, to Howard B. Lang, Philadelphia, Reg. Nos. 51, 56; to Geo. Linsenmaier, Philadelphia, Reg. No. 68.

From the Camac Cote (W. Thornton Innes), Philadelphia, to Cornelius Collins, Philadelphia, Reg. Nos. 7, 184, 7, 184; to Norman Longaker, Philadelphia, Reg. No. 7, 164; to P. Moore, Philadelphia, one pair unbanded youngsters.

From the Frank D. Read Loft, Fall River, Mass., to F. W. King, Ansonia, Conn., Reg. Nos. 2, 288, 353, 11, 708; to Jas. Waller, Sterling, Conn., Reg. Nos. 12, 70, 13, 16; to Wm. Meek, Fall River, Reg. No. 2; to Joseph Deshay, Fall River, Reg. Nos. 11, 701, 140.

From Henry G. Thurston Loft, Fall River, Mass., to Dr. Niver, Cambridge, Mass., Reg. Nos. 402, 422, 424, 357; to Dr. Aldrich, Fall River, Reg. Nos. 353, 354, 355, 361; to John Ousley, Pawtucket, R. I., Reg. Nos. 402, 405; to P. H. Schotshauer, San Francisco, Cal., Reg. Nos. 403, 413, 416; to H. S. Pierce, Wilmington, Del., Reg. Nos. 410, 417; to Thomas Calaghan, Valley Falls, R. I., Reg. Nos. 458, 464, 465; to W. H. Finney, Columbia, Pa., Reg. Nos. 372, 373, 374, 375, 489, 490; to Samuel Hunt, Fall River, Reg. Nos. 466, 467, 468, 469, 450, 473, 474, 467, 468, 469, 487, 488; to Frank D. Read, Fall River, Reg. Nos. 358, 362, 444, 457, 500; to Enoch Anderton, Fall River, Reg. Nos. 453, 454, 462, 463, 475, 366, 477, 482, 483, 486.

From the Mantua Lofts (Charles Mehler, Jr.), Philadelphia, Pa., to Wm. Maubury, Pittsburg, Pa., Reg. Nos. 32, 37, 14, 25, 36, 38; to J. J. Hurst, Toledo, Ohio, Reg. Nos. 77, 114; to Howard Balm, York, Pa., Reg. Nos. 21, 22; to Edward Wall, Phoenixville, Pa., Reg. Nos. 178, 198; to A. J. Mayer, Gordon, Pa., Reg. Nos. 28, 47; to H. A. Bridge, Columbus, Ohio, Reg. Nos. 29, 58, 64, 75, 51, 63; to Hon. James E. Romig, Philadelphia, Reg. Nos. 33, 50, 62, 76; to W. H. Llewellyn, Pittsburg, Pa., Reg. Nos. 60, 71, 77, 82, 83, 91; to A. M. Dunn, Columbus, Ohio, Reg. Nos. 16, 68, 12, 67, 182.

From the Suburban Lofts (Fred. Bowers), Fall River, Mass., to Queen City Homing Club, of Toronto, Reg. Nos. 708, 711, 709, 714, 703, 728, 731, 721, 740, 748, and open bands 34, 35, and 37; to Wm. R. Badger, Lynn, Mass., Reg. Nos. 715, 658, 738, 712, and 713; to H. A. Bridge, Columbus, Ohio, Reg. Nos. 737, 74; to H. W. Beck, Reg. No. 315.

Philadelphia, Pa., Dec. 2, 1894.

Fulton County Pigeon Flying Club.

The annual meeting of the No. 1 Fulton County Pigeon Flying club was held Wednesday evening, Jan. 2d, 1895, and elected the following officers: President, Mr. A. C. Saunders; vice-president, Hallock C. Alvord; secretary and treasurer, Chas. W. Clark. The club starts the season of 1895 in good condition, and we hope to be in it with the rest of the boys this season. We are glad to learn that the Troy boys are talking of forming a Flying club, and our wish to them is "good luck." CHAS. W. CLARK, Sec'y.
Gloversville, N. Y., Jan. 7th, 1895.

East Side Flying Club.

At the annual meeting of the East Side Flying Club of Newark, N. J., held January 2nd, 1895, at their rooms, No. 426 Walnut street, the following officers were elected for the ensuing year: Fred. Heiss, president; H. Kirsch, vice-president; Thos. Schroeck, secretary; Alb. Hartung, treasurer; Chas. Metzger, sergeant-at-arms.

THOS. SCHROECK, Secretary.
Newark, N. J., January 3, 1895.

The Band Killed It.

A resident of East avenue picked up a Carrier pigeon the other day which fell dead before him on the lawn. An examination showed the cause of death to be a small brass ring which had been put on the pigeon's leg when young. As the bird grey, the ring cut deep into the flesh, until finally the bone itself was too large for the ring and the poor bird died as the result of rupture of the blood vessels of the leg. The ring in question, which was taken from the bird, contained the inscription, "S. 16657," evidently the mark and registry number of some Carrier loft.—*Rochester Post-Express*, Dec. 28th, 1894.

Pleasant, Iowa. *6168

PIGEONS.

MAGPIES.—For want of room, must sell fine lot of Crested Magpies, well marked and in all colors. Having made the breeding of this variety a specialty for years, my stock has been carefully selected. Anyone buying the lot of fifty-five will get a bargain seldom offered. JOHN H. LAMMERS, 39 South Caroline street, Baltimore, Md. 1372

C. I. NASH, Lawrence, Mass., offers White Crested Fantails with extraordinary style and circular spread, bred from the finest birds and blood in the fancy, from \$5 to \$25 each. A few pairs of grand stock, birds bred from the winners at Boston, at \$5 and \$8. *472

BANDS, enameled, for pigeons, with year and loft numbers raised; always plain to see; very light and durable. When ordering state breed they are wanted for. Price, 60 cents per dozen; sample, five cents. Send for circular. Remittances must accompany all orders. A. J. MCLEAN, 12 Prospect Street, Charlestown, Mass. 272

FRED. C. WEISS, Evansville, Ind., breeder of Saddleback, Tailmarked and White Fantails. My stock is of the best obtainable in England and America, and have won at all the leading shows this season. Ten pairs for sale reasonable, considering quality. *5253

R. S. GROVES, Prospect Park, Moore, Pa., offers thirty odd birds, Satinettes, Bluettes, Barred and Laced Blondinettes, cheap to anyone taking the lot. Also five pair Black Winged Turbits, imported. Selected birds from \$10 per pair upwards. Inclose stamp for reply. 472

A. W. COOMBS, West Medway, Mass., offers 1 pair Yellow Jacobins, good stock, \$2; 1 Black Jack hen, \$2.50; 2 Blue Pied Pouter hens, \$1.50 each; Red and Black Wing Turbit hens, 75 cents each; 1 White Fan cock, \$1, great style. *172

FRED R. PHILLIPS, 1434 Wolfram Street, Chicago, Ill., breeder and flyer of Homing pigeons only. Have the best strains. Won nine diplomas in '94: six firsts and three seconds. Several pairs of breeders and '94 hatch for sale. *26167

HOMERS.—The "Homestead" strain; how obtained and work accomplished, also list of matings for 1895 sent to any address upon receipt of stamp. We are booking orders for a few very fine youngsters at reasonable prices. Address Homestead Lofts, lock box 28, Leeburg, Va. eow*470

1895 PIGEON BANDS.—Webb's improved seamless nickel bands; year and loft numbers and your initials, 55 cents dozen. Open aluminum bands, marked to suit, two cents each. Send a piece of paper the size you wish, or state breed, if plain leg or booted. *1371 E. F. WEBB, Charlestown, Mass.

FOR SALE.—At half value, 10 pairs Inside Tumblers, very close performers, all colors; 10 pairs Jacobins, all colors; 5 pairs Russian Trumpeters; 5 pairs Blue Pied Pouters; 6 pairs Splashed Pouters; 3 pairs White. J. H. WIGGER, 75 Cannon St., Charleston, S. C. *471

J. H. MEHRING, Littlestown, Pa., offers in odd birds and pairs, English and Pigmy Pouters, Carriers, Satinettes, Jacobins, Fantails, Turbits, Trumpeters, Archangels, Nuns, Magpies, Swallows, Dragoons, Barbs, Owls, Tumblers, Moorcaps and Homers. Also fine bred poultry and Pea Fowls. *471

GEORGE N. CROCKETT, Pleasant View Lofts, Concord, N. H.—The highest point. The acme of perfection in Archangels, Turbits and fancy pigeons. Won 12 prizes with 20 birds at Boston, 1894. Have recently purchased the entire collection of Archangels of Wm. Broemer, of Baltimore, Md. You can buy my birds and good ones, at prices that are consistent with the times. Enclose stamp. All birds as represented. *1371

JACOBIANS.—One pair long feathered blacks, \$15; two black hens, \$5 each; one pair extra whites, \$15; two white cocks, \$5 and \$10 each; one pair rich yellows, \$10; one pair reds, \$10; five red cocks, \$3 to \$5 each. Two pairs Mottled Russian Trumpeters, \$10 per pair. No better stock anywhere. CHAS. MASSIE, box 232, Port Hope, Ontario, Canada. *1367

BARGAINS.—One pair Blue Pied Pouters, \$6; cock 18½ inches, hen 18 inches, both are extra fine in limb, slender and blow fine crops. Another pair, \$10; cock 19½ inches, hen 18½ inches, extra long limbs, good girth and extra large crops. Also White Fans. *471 THEO. O. TAUBERT, Sandusky, O.

DRAGOONS and Oriental Frills.—Of an entry of 53 birds at the Boston show, December 12-15, 1894, they won the following: Seven specials, sixteen 1sts, fourteen 2ds, ten 3ds, two 4ths and silver cup for best 1894 Oriental Frill in the show. Write me for wants. J. C. NORRIS, 11 South State St., Concord, N. H. *1371

1895 BANDS, aluminum, for pigeons and poultry, will not tarnish, always the same color, with year and numbered 1 to 100, \$3 per 100; with year only, \$1.50 per 100; with initial, 25c. per 100 letters. Send 2c. stamp for circular and sample. Remittances must accompany orders. T. WILLETT, 180 Lawrence Street, Lowell, Mass. 1371

FOR SALE.—Three pairs Smooth-head White Fans, \$5 and \$7; also two odd hens, \$2 each. Gilbert strain. Will make a good price to anyone taking the lot. FRED. S. ROBINSON, 970 N. Del. St., Indianapolis, Ind. *471

TURBITS from the celebrated Michael church Lofts.—MR. GEO. TURNER, breeder of winners at the most important Turbit shows in England and America, has birds for sale of various colors for successful show and stock purposes, at reasonable prices. Catalogues may be obtained from John Glasgow, Mahwah, N. J., or direct from the lofts, Michaelchurch, Ross, Herefordshire, England. 1171

MISS ETHEL G. HINES, 1509 Bolton street, Baltimore, Md., has for sale pair of Red Short-faced Tumblers, a pair of Red Agates, Red Rosewings and Yellow Agate, all 1894 (Gaddeh stock); excellent head and beak, good color and carriage. Also pair of Long-faced Mottles, beautifully marked and rich in color. Pair Medium-faced Kites, from Almonds; almost as lustrous as Archangels. Prices moderate. 1362

TUMBLERS, Booted and Inside, also Rollers, in all colors; very fine birds at low prices. Dealer in all other varieties of Fancy Pigeons. Write what variety you want and get my prices. M. SCHEIN, 610-621 S. Charles St., Baltimore, Md. 1370

I HAVE, for immediate disposal, fifty White Fantails at very reasonable prices, quality considered. P. F. HAGER, 101 Public Square, Nashville, Tenn. 170

FOR SALE CHEAP.—Three White and six Blue Fantails, stock birds; fifteen Antwerps, excellent feeder for short-faced varieties. Satmp for reply. OTTO C. ENGELL, 111 Horner street, Elmira, N. Y. *470

BARGAINS.—Surplus stock of Black, White, Yellow and Red Fantails; Black and Blue Saddles; Tail Fans in Yellow and White and Black and White; Silver Owls, Jacobins, Mooreheads, Archangels, Magpies and Performing Tumblers. Must sell; require room. *470 GEO. A. RAWSON, Newton, Mass.

SATINETTES and WING TURBITS, out of best strains in the country. Lop-eared Rabbits, out of best stock; all measure over 20 inches. Price low, considering quality of stock. J. LOEFFLER, 1504 Harford Avenue, Baltimore, Md. 1369

GEORGE FEATHER, breeder of prize winning English Owls and Turbits, has for sale 50 pairs, same strain as his recent winners at Louisville, Nashville, New York, World's Fair, Baltimore, Boston and many other place, at prices abreast with the times. Birds sent on approval to responsible parties. Write for wants. Satisfaction guaranteed. Address Ballou Ave., Mattapan, Mass. *469

400 PIGEONS MUST GO, in order to make room for my 600 breeders; will sell at almost any price: Pouters, Carriers, Fantails, Barbs, Jacobins, Swallows, Owls, Turbits, Tumblers, Pigmy pouters, Nuns. Also Poultry and Pets. Stamp for catalogue. BARTLETT'S POULTRY YARDS, Jacksonville, Ill. *1369

DESIROUS OF GIVING my whole attention to the Pouter fancy, I offer the following stock at lowest prices: Archangels, medium and dark bronzed, 20 birds, all good in color and shape; Helmets, red crested, clean marked, 5 birds; Yellow Booted Tumblers, fine in color and boots, 4 pairs; Blue Crested Magpies, 2 pairs; Russian Trumpeters, blacks, red mottles and dunn, 12 birds; Barbs, all colors, old and young, about 40 birds, of good head properties. I will also sell a few good specimens Heroux's stock of Pouters, in white, yellow and red. 1368 FRANK ERDELMAYER, Indianapolis, Ind.

JACOBIANS, OWLS, Archangels, Priests, Tumblers and Antwerps. Being overstocked, will sell at reasonable prices, considering quality of stock. White Jacobins, \$6, red, \$4, black, \$4 per pair; Owls and Archangels, \$3 per pair. State what variety you want and get my prices. CHAS. ENGLAND, 316 South Castle St., Baltimore, Md. 1368

ROLLERS.—I am going to sell all of my birds at once, including my prize winners, about twenty-five pair, all heavy booted, good flyers and nice performers. Write for prices; correspondence cheerfully answered. Address GEO. RAIBLE, 14 Dalton Ave., Cincinnati, O. *1367

FOR SALE.—Lot of White Tumblers, bare legs; also few pairs each of Black, Blue, Yellow and Red Booted Tumblers, to make room. All good performing birds. H. L. WICKLEIN, 1205 William St., Baltimore, Md. *1362

BARBS.—A grand lot of Barb cocks for sale from \$8 to \$25 each. These birds are strictly high-class and of the same strain that won for me in New York and Baltimore. J. S. RITTENHOUSE, 38 South 4th St., Reading, Pa. *1367

FOR SALE.—Eleven Jacobins, black, white, red and yellow; pair Black Pouters, pair Blue African Owls, pair Blue Swallows, pair Red Homers, 1 yellow Barb cock, fine bird, 3 Archangels; all good birds, and the lot at \$25. *1363 L. D. HOLMES, 125 Beacon St., Syracuse, N. Y.

T. H. & A. STRETCH, Ormskirk, England, winners of over 300 prizes in 1893; at all the big shows, have English Owls, Turbits, Magpies and show Homers to spare; many winners and others fit to win; same strain as all our champions. Send 2½d. for printed list of particulars. 1361

GEO. EWALD, Box 501, Cincinnati, O., offers 1 Pair fine White Barred Blue Swallows, both 1st at Atlanta, for \$10; 1 Pair Blue Barless, \$7; a Pair fine Black at \$5; Reds, \$5; Blue Black Barred \$4. Must go; need room. 5212

WINDSOR POUTER LOFTS.—To those in quest of show Pouters for exhibition purposes or stock birds for the breeding loft, I am now prepared to submit quotations. My annual catalogue of sale birds will be issued Dec. 1, when all are thoroughly moulted. State your exact requirements, thereby avoiding unnecessary correspondence. 5212 A. W. MCCLURE, box 287, Windsor, Ont.

FANTAILS, SWALLOWS and Jacobins.—Very good birds at prices that are moderate. Write soon as they must be sold. O. GROM, 365 Van Brunt street, Brooklyn, N. Y. 1364

GEO. EWALD, Box 501, Cincinnati, O., offers 2 Pairs fine Red Fantails at \$5 a pair; 2 Pairs Yellow Fans, \$5 pair, good color; 2 Pairs Blues, \$5 pair; 1 Pair fine Blue Booted Fans for \$7; 1 Pair White Booted for \$6. 5212

GEO. EWALD, Box 501, Cincinnati, O., offers 5 fine Red-Pied Pouter Cocks at \$5; 3 fine Black Pied Pouter Hens, \$3 each; 2 Yellow Hens, \$7 each. For further description write. 5212

PET STOCK.

A. PETERS, Lenox, Mass., will sell a few very fine Lop-eared Rabbits at reasonable prices, from the best imported stock. I have some nice youngsters and breeding stock to dispose of. Will exchange for poultry and pigeons. Write what you want. *470

FOR SALE.—Belgian Hares, genuine breed, from three to six months old. For particulars, address *470 G. RILEY, Leonia, Bergen Co., N. J.

GEO. EWALD,

BOX 501,

CINCINNATI, OHIO,

BREEDER AND IMPORTER OF

Pouters, Fans, Jacobins, Owls, Satinettes and Blondinettes.

I have the largest and most extensive pigeon lofts in America, as to quality of birds; the winners in the keenest of competition at all the largest shows. My stud of Owls and Oriental Frills are the only recognized champions in America, having beaten all the so-called cracks ever shown, and winners of more prizes than all the others put together. Write for wants.

52553

HEADQUARTERS FOR

Pouters, Jacks and White Fans

Having bred and sold at least 75 per cent. of all the Pouters shown in this country for the last fifteen years, I think I can claim to have the best. And in support of the claim I will make a match with anyone to show one pair or five pairs of each of the five colors for from \$200 to \$500 a side. My Jacks are up to my Pouters in quality. Have only bred them for six years and not many of my surplus have been shown. At Boston show they won 1st, 2d and 3d on White cocks; 1st and 3d on White hens; 1st on Yellow cock; 1st on Yellow hen; 2d on Red hen; 1st on any other color hen—pretty well for a beginning in such strong company. Have now about 200 Pouters and 200 Jacks for sale low to close out. No Fans for sale until fall of 1895.

Ferris Pub. Co., Albany, N. Y.

BLACK LANGSHANS

Dr. F. M. Robinson, Box 69, Pawling, N. Y.

At Madison Square Garden, New York, 1894, the largest show ever held in America, I was awarded the Grand Special Prize of Silver Cup, value \$100, for best exhibit. 1st, 3d and 4th cockerels; 2d and 3d cocks; 2d, 3d and 4th pullets; 2d and 5th hens; 2d and 5th breeding yards. 200 grand chicks, bred from "Gorden Champion," "Parnell," "Parnell, 3d," "Manhattan, 2d." Buy your birds from a race of prize winners; buy from a breeder who breeds his own birds, exhibits his own birds and advertises honestly what he wins, not what someone else wins. The above record has never been beaten in Madison Square Garden on Black Langshans. Illustrated circular on application, giving full list of awards for the past seven years at the largest shows in America. You need this stock to show; you need this strain for new blood.

BUFF

COCHINS and
... BUFF COCHIN BANTAMS.

Blood tells in all stock raising, and in none more strongly than in thoroughbred poultry. The line of blood I am breeding has produced and is producing prize winning specimens. They have won highest honors at such noted shows as Columbus, Cleveland, Detroit, Findlay, Tiffin and North Baltimore. I have a grand lot of young and old stock, and can send you birds for the show room or breeding pen, at living prices.

My Cochins have real, deep, clear buff color, great size and true Cochins shape, profuse leg and toe feathering, and their line of blood makes them desirable for a breeder to select from. Ask for fine illustrated circular.

D. E. PETERS, North Baltimore, O.

TORAM CUP, Madison Square Garden, N.Y. 1893 AND 1894. **BUFF COCHINS.** LORD MAYOR'S CUP, "The Dairy," London, Eng., 1893—"HELSTON."

We are prepared to sell Exhibition Birds, fit to win in any company. Our Buffs have won at more important shows, both in England (imported) and America, than any yard in this country. Choice breeding stock for sale at all times.

... LIGHT BRAHMAS.

Madison Square Garden, New York, 1894—1st and 3d on cocks; 1st and 5th on hens; 5th on cockerels; 1st, 2d and 4th on pullets; besides specials. This was probably the finest exhibit of Light Brahmases ever held in America. Our Brahmases have also won at the most important shows in the country, both for us and in the hands of our customers. Exhibition birds, that fear no competition, and choice breeders for sale.

WE DO NOT SELL EGGS. OAKLAND FARM, Taunton, Mass.

North Side Poultry Yards. **SILVER WYANDOTTES**

HARVEY SEED CO., BUFFALO, N. Y.

INCUBATION

— AND ITS —

NATURAL LAWS,

— BY —

CHARLES A. CYPHERS.

Is an elaborate non-advertising treatise on Artificial Incubation, that is exciting unparalleled interest. All express surprise at the broad, thorough, and unbiased manner in which the subject is handled. It is thoroughly practical, as well as scientific, bringing into view many facts heretofore unobserved, and throwing light on many obscure points. The chapters on heat and ventilation are each alone worth many times the price of the book. No incubator user can afford to be without a copy, as the knowledge it imparts will save him many hundred chicks.

From Farm-Poultry.

"A NOTABLE BOOK."

"This modest little volume marks a new era in the study of the phenomena of incubation. It is at once so broad, so comprehensive, so exhaustive of the subject—setting forth the results of years of experiment and careful painstaking research, and is at the same time so plain and easy of understanding, adapted to the intelligence of the every-day reader, it may fairly be called a distinct departure from anything heretofore attempted. It goes to the root of the phenomena of embryonic life, popularizing such scientific volumes as Foster & Balfour's 'Elements of Embryology,' and balancing that scientific knowledge by the results of years of patient experiment and observation. So far as we are aware, it is the first time a thoroughly scientific study of the subject has been attempted, and we heartily congratulate the author upon his success. We heartily congratulate the author, and we more heartily congratulate the poultry men who will read it, finding in it the answers to many a puzzling question of artificial incubation. This book distinctly, literally fills a long felt want; and we cannot do our readers a better service than by advising that they obtain a copy, and study it carefully. It lifts one to a high level, as to a summit from which a broad stretch of country is spread to view; and a mastering of these pages is a liberal education in that field."

From American Poultry Journal.

"The demand for an impartial non-advertising treatise on incubation has been met by Charles A. Cyphers of Boston, in his new book entitled 'Incubation and its Natural Laws.' It is an exhaustive consideration of the interesting theme, told in a readable manner, and covering the several phases, historical, scientific, and practical. It is one of the most elaborate of the kind yet issued, treating exclusively of the subject, and should be in the hands of every poultry raiser, whether he employs incubators or hens to produce chicks."

From The American Fancier.

"We have no hesitation in pronouncing it the most thorough book on the subject ever written. Notwithstanding the fact that it is full of science and the laws governing artificial hatching, it is so well written that any intelligent reader can grasp the meaning of the author. It is not a book that will be carelessly read and thrown down to become dusty with age; on the contrary, it is a book that will be read again and again. Many old theories are exploded, and many new ones advanced with convincing proof of their stability. It is invaluable; and as it costs but 50 cents, no progressive poultry man can be without a copy."

The whole work is new matter, and in no instance has the author given as facts merely old views which have long passed current, but a digest of results obtained by independent observation and experiments; winnowing away the chaff of old speculative theories; bringing out the remote and broader analogies connected with this most interesting phenomenon of organic life; appropriating the advanced results of collateral science, and making practical use of them in elucidation of the subject.

THE GREAT ANGLO-FRANCO

COLUMBARIAN AND GALLINARIAN CURE

The Only real preventative and cure for Roup, Ganker, Colds, Asthma, in Pigeons, Poultry, Ornamental and Song Birds, that has ever been put onto the market.

This is a liquid which, by constant use in the drinking water, positively prevents the breaking out of above diseases so common in changeable weather. It has many advantages over all other so-called Roup cures, besides being a preventative. As a liquid it is so easily administered, diluted (as per directions on all bottles) in the drinking water; does not stain the feathers and does not meet the drawback of dirtying the hands as the pastes do. **TESTIMONIALS ON APPLICATION.**

PRICES:—In Bottles, 50 Cents and \$1; in Stone Jars, \$2.50.

The 50-cent bottles are sufficient for six gallons of drinking water; the \$1.00 bottles for sixteen gallons; the \$2.50 jars for eighty gallons. Address 52t58

First Prize Cock at New York, 1894.

The Best Record

On the Breed

FOR TEN YEARS!

Was made by our BARRED PLYMOUTH ROCKS at New York Show, 1894, where we won 1st, 2d, 3d and 4th on cockerels; 2d and 3d on pullets; 1st and 2d on cocks; 1st and 3d on hens; 1st and 2d on pens; and all the specials.

AT NEW YORK SHOW, 1892, our last previous exhibit, we won all the first prizes competed for, except one, and all the five cockerel prizes, except 2d, a record on cockerels not equalled for seven years.

For five years our breeding has taken first prizes at the leading shows.

Breeding and Exhibition Stock for sale from the five males which sired our winning cockerels and pullets at the last New York show; also from the 1st prize cockerel, 1st prize pen male, 1st and 2d cocks and 1892 1st pen male all winners at New York. CIRCULAR FREE. 5253

BOOKS FOR FANCIERS.

Below we give a list of the best and most practical books published on poultry, pigeons, dogs and pet stock. It will pay every breeder of stock to possess any or all of these publications. Any book will be sent by mail postpaid, at price named.

POULTRY.

American Standard of Perfection.

No breeder of thoroughbred fowls can dispense with this comprehensive manual. Every recognized breed is described, with scale of points and glossary of technical terms added. Latest Edition. \$1.00

Poultry Culture.

How to raise, manage, mate and judge thoroughbred fowls. By I. K. Felch. Third edition with supplemental chapter on the preparation of poultry for exhibition. Every poultry raiser should have this book. It contains the ripest results of thirty years' experience and observation. Treats upon chickens, turkeys and ducks. This volume contains 438 pages, profusely illustrated, beautifully bound in cloth. Price \$1.50.

Wright's Practical Poultry Keeper.

A complete and standard guide to the management of poultry for domestic use and Market. One of the best books ever written for the amateur. Price \$2.00

Book of Poultry.

(Lewis Wright). The most comprehensive treatise on poultry extant. Nearly 600 pages beautifully illustrated. Price \$5.00

The Business Hen.

A condensed practical encyclopedia of profitable poultry-keeping. By 25 practical poultrymen. Fully answers more than 3,000 questions about poultry for profit. Carefully edited by H. W. Collingwood. Cloth \$1.00 Paper .40

Philosophy of Judging Fowls.

(Fish, Babcock & Lee). A manual upon scoring of exhibition fowls. Intended to meet the wants of the general breeder and exhibitor, as well as the professional judge. Should be in the library of every fancier. Cloth, blue and gilt, 210 pages. Price \$1.00

Barred and White Plymouth Rocks.

(By Joseph Wallace). Their history, characteristics and standard points; how to mate and rear them for exhibition and commercial purposes, with a chapter on their diseases and treatment. 60 pages. Illustrated with several engravings and two five colored plates of Barred and White Plymouth Rocks. Every breeder of these two varieties should have this book. Price .50

Wyandottes.

(By Joseph Wallace). A treatise on the Silver, Golden, White and Black Wyandottes. Their origin, history, characteristics and standard points. How to judge, mate and rear them for exhibition and commercial purposes, with a chapter on the treatment of poultry diseases. Illustrated with colored plates and engravings. Price .50

Duck Culture.

(Jas. Rankin). A complete treatise on the duck, hatching, management, varieties. Illustrated with cuts of different varieties, eggs in all stages of incubation, also, buildings for old and young. The author, who has perhaps made more money out of ducks than any one man in America, here gives his experience covering 30 years. Price .50

Poultry.

(G. A. McFetridge). A most valuable little book by a practical and successful poultryman. Price .50

All About Broilers.

(M. K. Boyer). A compact and practical compendium, giving the methods of successful broiler raisers in Hammon, N. J. Price .25

Profitable Poultry Farming.

(M. K. Boyer). A practical little book of interest to market poultrymen. Price .25

Artificial Incubation and Brooding.

(E. & C. Von Culin). The latest work on the subject; well edited, bound and profusely illustrated. Price \$1.00

PIGEONS.

The Book of Pigeons.

R. Fulton. Illustrated by Ludlow and others. 50 colored plates and numerous wood engravings. The handsomest and most complete book ever published. \$8.00

Hints to Beginners.

F. M. Gilbert. New edition, 1894, revised with additional chapters. A most practical, timely and comprehensive work. Indispensable to the amateur. Price Paper .50

PET STOCK.

Birds and Bird Keeping in Cage and Aviary. A large pamphlet of sixty pages, containing a description of birds, cages and appliances, together with how to manage, feed and care for feathered pets. This is a most valuable publication. Postpaid. .20

The Rabbit.

How to select, breed and manage the Rabbit for pleasure or profit, by W. N. Richardson. A concise and valuable little book. Price .25

English Books in Stock.

THE LANGSHAN FOWL. A Complete Treatise on the History and Characteristics of this Popular and Profitable Breed. By Miss A. C. CROAD. \$1.00

HOW TO MAKE \$50 A YEAR KEEPING DUCKS. By HENRY DIGBY. This is a nicely bound book, and contains in connection with the above an article on Geese and one on the Turkey. 1.00

THE HIGHFLYERS' GUIDE (SMITH), or How to Train Tipplers, Tumblers, Rollers, etc. Invaluable to pigeon men. 1.00

STUD REGISTER FOR PIGEONS. By RICHARD WOODS. Very complete. .25

PIGEONS, Their Origin and Variation, with Illustrations on their Housing and Management. By Rev. W. F. LUMLEY. 50

JUST PUBLISHED

"INCUBATION AND REARING OF CHICKENS, ARTIFICIAL AND NATURAL."

By W. HAY, Schoolhouse, Corrie, Arran, Scotland. Price 1s. 6d. post free.

Press.—"We have not read a book of this nature for a long time which gave us so much pleasure, being thoroughly practical and full of sound sense."—Canadian Poultry Review.

MY WHITE PLYMOUTH ROCKS

Won every 1st prize, except one, at the great Hagerstown Show (Md.) in 1893; again in 1894 all 1sts except one. At Reading (Pa.) Show, '95, made 3 entries, won five 1sts and three 2ds (two ties). Ten birds average 93% to 95%! See! Eggs \$2.00 per 15.

DANIEL L. STAUFFER, SPRING CITY, PA.

A Wise Man

Is a careful one. He does not trust in luck or in careless methods when carrying on a business of any kind. Just so with the intelligent and progressive poultry breeder; he

Wants

Something to guide him in mating, breeding, and showing thoroughbred fowls. That something is the

American Standard of Perfection

This is the only authorized publication giving a complete description of every breed of fowls recognized by the American Poultry Association, the only representative body of poultrymen in this country. Remember this invaluable book is fully protected by the United States, it is copyrighted, and no portion of it can be used by any other society, clique, or clan. The Standard costs one dollar, but

A Shrewd Man

Who is up to date and keeps posted, reads a weekly poultry paper like THE AMERICAN FANCIER, price \$1.50 a year, which is a large 20 to 24 page paper, giving reports and awards of all the great poultry and pigeon shows in the United States, Canada, and Europe. When such a man wants a Standard he

Gets It

How? By sending two new subscribers at \$1.50 each, or five new subscribers at \$1.00 each, to THE AMERICAN FANCIER. That's how he gets it

For Nothing

By simply sending the amount to

BLUNK & DREVENSTEDT, Publishers, JOHNSTOWN, NEW YORK.

A GREAT COMBINE.

We have made arrangements with the

AMERICAN POULTRY JOURNAL

The oldest monthly magazine of its kind in America to club it with

THE AMERICAN FANCIER!

—FOR—

\$1.50 A YEAR.

This covers the entire field of poultry literature in America. The American Poultry Journal being a high-class magazine, containing articles on practical and fancy subjects by the best writers; THE AMERICAN FANCIER supplying a weekly budget of news, unexcelled by any similar publication in the world.

A sample copy of the American Poultry Journal can be obtained by sending a five-cent stamp to AMERICAN POULTRY JOURNAL, Chicago, Ill. tf72

"The Possum Creek Poultry Club"

A new book by J. H. DAVIS. Written in pure negro dialect and the funniest poultry book on earth. The club discusses a great many questions and holds a show. Lots of fun! Lots of "chicken sense"! Finely illustrated! Price 50 cents.

Other Poultry Books.

A B C of Poultry Culture, 25c. 500 Questions and Answers, 25c. Low-Cost Poultry Houses, 25c. Pigeon Queries, 25c. Send a dime for a number of the FANCIERS' REVIEW, Box R, Chatham, N. Y.

SHOEMAKER'S POULTRY ALMANAC

MAMMOTH FOR 1895. Is positively the finest work of the kind ever published. Others advertise the finest (but they have not got it). If you want something that is just as you find it advertised here or even better, you will get it by sending your order to me. I PROVE ALL I CLAIM. Geo. F. Pilling & Son, Philadelphia, Pa., write:—

"It is a thing of beauty and without a peer. It shows unsparring pains and bristles with valuable information on every page." It contains 88 pages, best paper, in colors, photo engravings of the largest poultry farm in the Northwest. Also other fine engravings, besides illustrations of 45 of the leading varieties of Pure Bred Fowls, with full description and prices of them, and eggs. Gives recipes for the best egg food Condition Powder, sure remedies for all known diseases of fowls best plans with illustrations to build cheap and convenient Poultry Houses. Sent to any address for 15 cents, postpaid. Address G. C. SHOEMAKER, Box 75, Freeport, Ill., U. S. A.

THE WORLD DO MOVE!

In the Great West they are all talking about it. We refer RELIABLE POULTRY JOURNAL, a 48-page, finely illustrated 50c. monthly poultry Magazine, that is to publications of its class what the Ladies' Home Journal is, as compared to other household papers. A postal card will bring you a sample copy. You can then see for yourself. Address, Reliable Poultry Journal, Quincy, Ills.

The Southern Fancier Is the Great Southern Poultry Journal.

Each number is worth a year's subscription. Abreast of the times, full of practical articles and suggestions, replete with beautiful and original illustrations, teeming with information on every subject of interest to the poultry breeder. It is just what you want to aid you. Try it. As an advertising medium it is unsurpassed. Subscription 50 cts. a year. Sample copy free. tf4

CUT CLOVER HAY

Ready for Use. HARVEY SEED CO., BUFFALO, N. Y.

A WEEKLY JOURNAL DEVOTED TO
POULTRY, PIGEONS AND PET STOCK.

Washington fanciers are making the liveliest kind of effort to start the great

international show to be held in their city next December in great shape. Another enthusiastic meeting was held February 14, many new members being enrolled, including a number of very prominent business men of the city. Complete organization will be effected at Baltimore early in March, when the Maryland Fanciers' Club and District of Columbia Society will be amalgamated.

A Talk On Wyandottes.

BY GEORGE E. HOWELL.

Several days since a prominent judge said to me: "If you Wyandotte breeders do not wake up, your breed will be more dead than a mackerel. The birds shown to-day are not a bit better than they were ten years ago."

This severe but none the less merited comment has caused me to do some tall thinking. I do not believe in blowing one's own horn too loudly, and have waited, hoping something would eventually turn up, but I have come to the conclusion that if we Wyandotte breeders want our horns blown we need not wait for others to do it. It is a common habit when a writer brags about his favorite breed, to yell free advertising.

I have modified my version of it to read in this case, "say all the good you can about your own breed, but don't run down some other fellows." To get right down to hard pan facts, there is enough Wyandotte breeders to form more than a passive body, and brother breeders it is time to wake up. I admire all Wyandottes, but I am an out and out admirer for all true Silver, and to them particularly will I confine much of my contemplated future articles on the breed, leaving the others to their admirers.

To return to the judges assertion, that the Wyandottes had not improved a particle in ten years, the Silvers to which he more particularly alluded have lost caste with many breeders, who became disgusted with their lack of uniformity of breeding and dropped them, but on the other hand, others have stood by them, they saw success in the distance, away off to be sure but visible not withstanding. They recognized the matchless beauty of the open centered female untarnished by smokiness or moss, and the silvery hackle and beautiful black and white breast of the best males, and hung on and labored to produce their ideal, and some day success will be theirs, they will have accomplished the great feat of rescuing from the depth of indifference a good and noble pioneer of a foremost American production.

The standard by the latest revision has more than half won the battle for us, the rest will be easy. I have seen a cockerel this season which is perfection personified in shape, the richest of clean yellow legs, small neat curved comb nicely serrated over the entire top surface, solid black tail, in fact an ideal Wyandotte, having all the merits and none of the faults of his kind, yet he had a right to all his graces, he was bred in line and was a compromise of all his ancestors good points moulded in one bird, which goes to show we are progressing if only slowly.

The White Wyandotte reached a perfection early in its career that would trouble one to equal, and keeps the breeders of them hustling to equal.

The Golden will reach the highest state of perfection earlier than did the Silvers, and while to-day there are just as high scoring Golden as Silvers, as a breed in its entirety they would come in second on an equal start, because there are certain Wyandotte traits more firmly seated by longer existence in the Silvers than in the Golden.

The Blacks need but a passing mention here, the champions of all, Black, White and Golden should respond and do them justice, like the Whites they are solid colored and have to acquire breed characteristics only. The Buffs need these and deep seated color besides. I am quite taken up with the name decided upon by the four originators of the Part-ridge Wyandotte, renamed Penciled by unanimous consent.

Now for a Golden and Silver Penciled Wyandotte and then shut down the gate.

Symmetry Abstractly Considered.

TO THE AMERICAN FANCIER:

The able articles on this subject which you published last month over the well known signatures of F. W. Hitchcock and J. Y. Bicknell respectively, seemed to me to go deeper into it in the right direction than anything I had previously seen on the same question. Probably nothing but a personal acquaintance with both these judges and a good knowledge of their liberal views, would tempt me to try, and expand the subject a little, especially along the line taken by Mr. Bicknell.

It is not necessary to go outside of the word itself in order to get a clear idea of what "symmetry" really is. From its derivation ("sun," meaning "together," and "metron" meaning "a measure") perfect symmetry is essentially the result obtained when the parts of an object or the members of a collection of

in addition to those so effectively chosen by the judges already named. Suppose you have a Cochin absolutely perfect, except in having the wings of an equally perfect Cochin Bantam grafted on to him. Where would you cut him? Cut him on symmetry? Certainly, because the wings are parts out of proportion. Abolish the symmetry section, and where would you cut him? Echo must answer, because the wings are perfect in shape. Again, suppose you have a bird with shanks much too flat and a crooked keel bone, but in all other respects a model specimen? You would cut him of course on "shape of legs" and on "shape of body" without ever giving a thought to the perfect "symmetry" that is not disturbed by either of the defects named.

If this is decently good reasoning, it must be apparent that there need be no equalizing of cuts on symmetry and cuts in the shape sections, for the simple reason that there need be no connection whatever between the two. So, a bird may quite properly be cut three on sym-

the score card to give some such information, but imagine the perplexity of the absent exhibitor, under the present system if the card of his winner came home showing a cut of three on symmetry, one on shape of comb, one-half each on shape of wattles and earlobes, one for crooked keel, and one-half on shape of legs, nothing else. He might know that the birds wings were absurdly small, and that his tail was too large, but would he give the judge credit for having considered "size" and "shape" abstractly, i. e. independently, and for having punished the glaring "size" defects of both in a single cut (symmetry)? Or would he feel inclined to smile quietly as the thought struck him, that the judge, or his clerk, forgot the heavy cuts that were due on wings and tail? Or, lastly, would he make a downright kick and call the judge a gentleman in disguise, and argue that all the thumb-marked combs, creased wattles, round earlobes, crooked keels and flat shanks in the world, wouldn't justify a three point cut on symmetry? In most cases, such an exhibitor would simply be perplexed, would resolve to ask the judge about it, or would possibly write him, but in every case he would become a less ardent supporter, or a more bitter enemy of the present score card, and perhaps less friendly to the scoring system itself. Mr. Hitchcock alludes to this feeling of perplexity and uncertainty, and points out the extreme effect it tends to produce, though I think there is no one more loyal to the scoring system than himself. Above all, he lays the blame on the card, where it belongs.

From some little experience, both in the east and on the Pacific coast, I am led to believe that comparison judging has many warm supporters everywhere; score card judging also has thousands of advocates, but the great army of fanciers consists of those who don't like one system, and are not quite satisfied with the other. The remedy should not be slow in coming.

S. W. LOBB.

Toronto, Canada.

Southern Langshan Club.

At the meeting of the Southern Langshan Club, held at Augusta, Ga., it was decided to call for the vote of officers from each member by mail. The club also adopted a constitution and by-laws. The following are the officers elected: President, Dr. Stephen T. Lea, Cokesbury, S. C.; vice-president, W. T. Levering, Baltimore, Md.; secretary and treasurer, F. E. Hege, New Berne, N. C. Executive committee, J. R. Kirkpatrick, Knoxville, Tenn., E. C. Connor, Cokesbury, S. C., R. O. Campbell, Atlanta, Ga., J. C. Bissell, Charleston, S. C., I. I. Ambrose, Nashville, Tenn. Committee of Complaints and Standard, I. Alwyn Ball, Summerville, S. C., Dr. S. T. Lea, Cokesbury, S. C., C. B. Hodgkins, Knoxville, Tenn.

The annual dues will be two dollars payable on the first day of March each year. Members may be elected at any regular or special meeting, or proposals for membership may be made to the secretary at any time, and shall be submitted to the executive committee. The president, vice-president, secretary and treasurer will be ex-officio members of the executive committee. The club will offer as many liberal prizes as the funds will permit, at such leading southern shows as the executive committee may select, and that a notification of such shows be sent to each member.

Any Langshan breeder wishing to become a member and help to encourage the interest of breeding the Langshan fowl as first introduced from Langshan China into England in 1872 and from there into the U. S. in 1878 as well as to protect, by co-operation, the interests of the breeders of this most popular and useful fowl should send to the secretary, F. E. Hege, New Berne, N. C., for a copy of the constitution, by-laws, etc. The following are the members to date, and, as will be seen, comprise the cream of the southern Langshan breeders, and still they come. We expect to have 50 members before our first show. Send in your names brother Langshan breeders.

S. B. Cook, Chatanooga, Tenn., A. I. Smith, Atlanta, Ga., R. O. Campbell, Atlanta, Ga., A. T. Lea, Atlanta, Ga., Loring Brown, Bolingbroke, Ga., I. N.

Rose Comb Black Minorcas.

Owned and Bred by Theodore Campbell, Lexington, Ky.

objects, are found to be in correct proportion one to another when measured together. In other words the term "symmetry" as applied to a fowl, has regard, first of all, to the relative size of its various parts when taken collectively. Primarily, it has nothing to do with the shape of the wings, tail, or any other section, when the term is applied to the bird as a whole, and of course it is so applied when a general cut is made, as under the present system of scoring. True "symmetry" may apply to a badly shaped part, but in that case it applies to the symmetry of that part, and not to symmetry of the whole fowl, though the latter will suffer in a secondary way, if the proportionate size of the said part is seriously affected by its faulty shape. Just here consider the point at which symmetry merges into shape, pure and simple, and loses its collective force altogether.

Now, let us take an illustration, or two

metry, and either cut or left alone on shape sections, as circumstances may warrant, and he may be cut quite freely on shape (of parts) without any sufficient grounds being found for even the minimum cut on symmetry (of the whole bird.)

Mr. Bicknell's suggestion to substitute the term "carriage" for "symmetry" would meet the case if it did not, unfortunately, leave this "relative sizes of parts" unprovided for. He says, and proves by illustration, that one real defect in carriage need not be confused with another imaginary defect in shape if the two things are "abstractly considered." In those two words lies the key to the whole question.

At present, however, as Mr. Hitchcock clearly shows, judges are driven to the extremity of trying to indicate, in the shape column, what was the nature of the defects that called for a cut on symmetry. Exhibitors know this, and expect

From Ole Virginny.

TO THE AMERICAN FANCIER:

Have you missed anything up your way? We have been having for the last fifty days some weather that we think has either strayed or been stolen from your section, and if you will send and get it home you will put joy in the hearts of our hens as well as the owners. The mercury has no hesitation about getting down to 8, 10, or 15 degrees below zero, but seems to have the greatest antipathy to the other end of the tube.

My hens have only been out of the house three or four days since the 26th December, and at that time the ground was partially covered with snow. I understand the local trade is now paying 25 cents per dozen for eggs. Of course, only hens that have the run of large horse or cattle barns in this section are laying, as we do not contemplate having more than eight or ten days in the season that fowls cannot be out of their houses. Those who have houses have them more for protection from thieves and varmints than anything else. The larger portion of the poultry in this country either roost in the barns and stables or in the trees. Of course, some are lost by owls, hawks, &c., but I am almost inclined to the belief that the fowls are healthier than if kept in very close houses. Of one thing I am sure, that roup is rarely ever known. My own practice is, to let my fowls roost out until the first snow, and then get them in the house, but the houses are all open slats on south side. I must acknowledge the corn, however. I believe they would lay better in warm houses if properly fed. I have never cared much for winter eggs from my breeding stock, as I use all the eggs for hatching, and would prefer that the hens do not lay until about 13th of February.

That was a well deserved compliment the Indian Game Club paid my old friend and neighbor, A. M. Bowman, of Salem, Va., when they elected him president of the club. He was one of the few men in the south who had the nerve to pay \$1 each for eggs of an untried breed, and take them in four setting lots at that. He has stood by them, too, ever since, and writes me in the last few days "that the honor was totally unexpected, but that as it has been conferred I shall do my best to push the Indian Game Club to the front. I intend to work up the club, so that by next year it will be heard from in the way of handsome specials at some of the shows."

Good. Drevenstedt is going to have some more chickens. He can call on me for the best pair of Indian Games I have if he decides on that variety.

The turkey trade was pretty heavy, but birds only realized 5 to 5½ cents live weight for the stock. I think about all have been shipped. "BUCK."

Delay in Mailing Standards.

TO THE AMERICAN FANCIER:

The delay of transfer of Standards and subsequent delay of editors in filling their orders has been caused by the severe illness and final death of a railway superintendent, to whom I referred the bonded company for reference. I was not aware of this matter until to-day, and at once straightened out the kink so that the transfer can be made, and all orders can be filled, likely, by March 1. The superintendent, above referred to, was not able to give the matter his personal attention; thus delay. Please give this space in your first issue, as many are wondering what to make of the way business is being transacted.

THEO. HEWES, Sec'y A. P. A.
Trenton, Mo., Feb. 14, 1895.

Game Notes.

[Written for THE AMERICAN FANCIER.]

Considering the evident general information of authors of poultry books regarding other breeds, it is somewhat singular that so many inaccuracies regarding Game fowls find place in the average "treatise on poultry." The majority of poultry authors don't seem to have discovered but that the Show Game and Pit Game are one and the same. I was just reading a chapter on Games in C. B. Thorne's "New and Complete Poultry Book," published as late as 1891. He says, "There are two races of Game fowls, the English and the East Indian, both having originally been bred for the purpose of cock fighting, and that in fowls bred for such a purpose we should expect to find compactness of form and great courage." Following this piece of startling information, Mr. Thorne goes on to say that there are many sub-varieties of the English Game based upon size or color of plumage, but all these have a generally recognized and uniform type of form and carriage. Then follows descriptions of the Black and Brown Breasted Reds, Ginger Reds,

wishes to appear very wise. There are too many "sages" in the poultry fraternity for its welfare.

Malays are going to be more plentiful, I believe. I know of a number of breeders who have lately taken up the variety. At one time Malays had nearly disappeared in England, until the number of breeders there "could be counted on the fingers," according to English authority. After the Cornish Indian boom, Malays seemed to get a fresh start, so to speak, and now respectable numbers of them are seen at nearly all the largest English shows. In Australia, too, this breed has quite a foothold on popular favor. The breed has been comparatively unknown at American shows, and though a description—more or less inaccurate—of the fowl has always occupied a place in the American Standard, the average judge had never the pleasure of passing upon it. Now, not only Malays, but Malay Bantams, both red and white, are sometimes exhibited here, and I have faith that both the large breed and its miniature counterparts will become popular. The Malay is really an excellent meat

Buff Cochon Bantam Cock, "Ned,"

Winner of 1st at NEW YORK, 1895, also winner of first as cockerel in New York, 1894. Owned and bred by R. A. HOMEYER, Middle Village, L. I., New York.

Yellow and Silver Duckwings, Red and White Piles, White, Black, Blue, Gray, Spangled and Henny Games. In his "preface," Mr. Thorne remarks that "of English and American poultry books little can be said. They are often mere compilations from Tegetmeier's work, only departing from his text to admit gross inaccuracies and to advertise the compiler's egotism." With the number of "works" like Mr. Thorne's that constitute the entire "library" of hundreds of American fanciers, it is not particularly surprising that breeders of Show Games receive orders for fighting cocks and Pit breeders are called upon for birds that "score 97½ points."

Wonder what has happened to Uncle Felch's Utility nondescripts? The poultry fraternity, and especially the Game boys, don't seem to take kindly to this latest scheme evolved by the "Sage." The Game journals, big and little, advise Game breeders to have nothing to do with the Utility folder-rol, as there is nothing in it except for Felch, who

fowl and very interesting from a fancier's standpoint. They go as far toward making variety at the poultry show as any breed I know. I have bred them "off and on" for many years, and consider them entitled to as much consideration as any other fowls. Next season I have a mind to experiment on producing some Black Malays. I have some very large Black Jap hens (the pure Jap is almost identical with the Malay, except in gameness, which the former possess and the Malay lacks), and from these and a very dark Malay cock I hope to get the color for the foundation stock. Some of the Japs have even longer necks and heavier "brows" than most Malays, and it is in these points that many of our Malays are deficient. In Japs black is one of the common colors, and I have wondered that some of the Malay breeders didn't resort to these to produce a Black variety. Of course, the Standard recognizes only the Black Reds, but that don't prevent a Black Malay from being a pretty fowl. A black fowl of the Malay build, size, gloss and closeness of feather

can't help but be attractive. There was a strain of Black Malays out in California a few years ago, but I don't know what became of them. They were of an importation from Australia. I have understood.

The January number of the *Game Fowl Monthly* contains an interesting contribution on "Spanish cocks and cocking." The contributor states that the Spanish Game cock is a cross between English and the Canary Island birds, and range in weight from 2-8 to four pounds, seldom the latter. When as large as four pounds the Spaniards make sneering remarks about them. They call such birds "English" and bet heavily against them. The Spaniards breed alone for the pit, regardless of color, and always, if possible, from spurred hens. They have a saying that "English cocks have fluid blood; Spanish cocks blood of fire." All Spain goes into rhapsody over cocking. The Spanish cock is a marvellously game, quick and skilful fighter. They are also more martial looking than English or American cocks, and possess that "raging pride" which few other cocks have.

The Cuban Game fowls are, as a rule, a mixture of Spanish and American blood. They are also small fowls, full feathered, handsome, very active and very game. In Cuba cocks are usually fought in naked spurs, though sometimes with knife blades called "slashers."

F. H. GRAVES.

American White Wonder Club.

TO THE AMERICAN FANCIER:

An enthusiastic meeting of members of the American White Wonder Club was held January 17th, 1895, in the parlor of the Avenue hotel, St. Johnsbury, Vermont, William N. French, president, presiding. The following officers were elected for the ensuing year: President, Wm. N. French, New Haven, Vt.; vice-presidents, A. C. Bennett, Farmer, N. Y.; J. S. Mason, Medina, Ohio; H. T. Corning, Hartford, Conn.; directors, H. W. Heath, Piermont, N. H.; Henry E. Voigt, Hansan, Wis.; S. J. Andrus, Canada; A. E. Manmor, Bristol, Vt.; Geo. F. Hewett, Saluda, Va.; Wm. Stellwagen, Garden, Mich.; D. J. Butler, Springvale, Me.; Wm. Walker, Upton, Mass.; E. F. Starkey, Lyndonville, Vt.

A very able and interesting letter was read from the secretary, W. G. Smith, expressing regrets at being unable to attend the meeting, but declaring his hearty sympathy with any actions taken by the members to promote the best interests of the club, and in which he also said the White Wonders were no longer an experiment, but had proven themselves to be a most noble and meritorious breed.

His official report shows the club to be in a flourishing condition, with 50 members and \$50 in the treasury. No expenditures were reported.

A resolution was offered, and unanimously passed, thanking the secretary for services rendered.

It was gratifying to those present when the names of the two judges, H. B. May, a prominent New England judge and breeder of B. P. Rocks, who has thoroughly tested the White Wonders, and E. F. Starkey, also a White Wonder breeder, were added to the list of members, making 52 in all.

Several letters were read from White Wonder breeders in the western states, also from breeders in Canada, New York, Connecticut and Massachusetts, expressing their determination to do all in their power to promote the best interests of the breed. Considerable discussion was had and plans were adopted in regard to the constitution and by-laws of the club, which are to be submitted to the members for their approval and adoption.

It was also decided to have a small ideal cut made, suitable for envelopes and letter heads, which should be for the use of club members only. It will be for the advantage of every breeder of White Wonders to join the club and assist in perfecting one of the best breeds ever introduced, and in every honorable way to work for their advancement. To enable all to join, the admittance fee has

been placed low; membership fee \$1, yearly dues 50 cents. Those wishing to join may do so by sending their names with initiation fee to A. V. Roscoe, treasurer, New Haven, Vermont.

W. G. SMITH, Sec'y.
Mansfield, Ohio, Feb. 16th, 1895.

Cheap Poultry Farms.

While the south offers great chances for the man with more or less money, the same chances prevail in many parts of the north. In the southern counties of Ohio are improved farms, near railroads and towns, to be had at eight to twelve dollars per acre, that are finely adapted to poultry farming, combined with tobacco raising and general farming. Of course, such farms are often "hard run." They need clovering and manuring. Yet for poultry culture this rolling limestone land is superbly adapted. While I would not decry the cheap lands and great opportunities of the south in certain sections, yet these northern localities afford a splendid opportunity for the man of small means without changing the society and customs to which he is used.

While speaking of the opportunities of the south, I cannot refrain from speaking of a region in western North Carolina which I recently visited, and which impressed me with the possibilities it offered for the young man of push and a little capital. Look in the map and find Cranberry, near the border of Tennessee, and in western North Carolina. Cranberry is a strictly mining town, but the northern men, who practically own it and the railroad running to Johnson City, have begun to wake up to the possibilities of their section for farming and fruit and stock growing. This section is about the highest altitude in the south, and yet the mountain sides and tops possess a soil equal to the best land in Ohio. This most remarkable soil is peculiar to a limited section, and must prove very valuable in the future. It is mostly covered with fine timber, with small cleared farms to be occasionally seen. A ranch of 1,600 acres, which would be a grand stock farm, all the land being finely adapted to grass and grain, can be bought at \$6 per acre. Four hundred acres of this ranch has been "deadened," and at once was covered with a splendid growth of grass which grows in wonderful quantity and quality. For a stock farm such land is superb, and needs only the blood and brain of the north to develop it.

The native population has no energy or talent for business. They make good day laborers under proper direction, and hold their labor very low. I saw men working hard at clearing up land and burning logs at 60 cents a day. They consider such wages a bonanza.

One young college bred man from the north has gone into sheep raising and farming, and is making it pay. He keeps an accurate account of expenses and receipts. The crops of potatoes he raises on this land would startle the average northern farmer. This region is becoming a great resort for northern people, and especially for those suffering with lung and throat troubles. Many of these will settle permanently there when they discover the possibilities of the country. For poultry raising small farms already cleared can be purchased near the towns and railroads for what looks like a mere song. Five dollars an acre for a farm half cleared is not uncommon. This region is not far from the poultry markets of the east, and it offers cheap lands on which the necessary poultry supplies can be grown, a climate healthy for both the poultryman and the poultry and an opportunity for the immigrant to increase his profits by the natural increase in the value of the land which is sure to come. If the young man of energy does not succeed amid the boundless opportunities afforded in the various sections of north and south, he should not lay the blame of his failure on Uncle Sam or join the "industrial army." We have a country full of undeveloped resources, and we may flatter ourselves that an industrial awakening is at hand. Such an awakening must follow a depression such as we have recently experienced. The poultry industry must and will profit by this awakening.

F. M. CLEMANS, JR.

Awards at Minnesota State Poultry Association Show, Held Jan. 15th-22d.

BARRED P. ROCKS.—Cock, 2d 90, Thos. Slater, St. Paul; 2d 80, Franklin Benner, Minneapolis. Hen, 1st 92½, Benner; 2d 92, W. H. Avery; 3d 92, W. A. Gordon. Cockerel, 1st 92½, F. E. Bone Cutter, 1st, Drinking Fountain, 1st, Clover Cutter, 1st, Parlin. Incubator, 1st, Brooder, 1st, W. W. Albro, Minneapolis.

Awards at Ottawa, Canada.

To THE AMERICAN FANCIER:

The eleventh annual exhibition of the Eastern Ontario Poultry Association, was held in Ottawa, Jan. 22d to 25th. Mr. Sharp Butterfield judged the poultry and W. R. E. McKinstry of Ottawa the pigeons. Both gave general satisfaction. The entry was not quite as large as last year, but the quality on the whole was better. On Thursday evening, a number of fanciers from Almonte presented Mr. E. A. Connell of Ottawa, with a gold headed cane, as a mark of appreciation for his kindness in judging their show held January 1st last.

Following is the list of winners:

C. J. DANIELS.

Toronto, Canada.

COLLECTIONS.—1st, Albion Poultry Yards; 2d, Miller; 3d, Myers; 4th, Mrs. Osborne.

BONE CUTTERS.—1st, Mann & Co.; 2d, Webster & Hannum.

The Pittston, Pa., Show.

TO THE AMERICAN FANCIER:

Pittston's great poultry show held Jan. 22d to 25th was an all around success. The number of entries was not so large as was expected owing to the severe weather previous to the time stated that the entries closed, but the quality of stock entered more than compensated for the lack in numbers.

The members of the association got possession of the hall Monday night at 9 o'clock and by 5 o'clock Tuesday morning the hall was ready for the reception of birds. Judge Bicknell was on hand and by the lively way in which he handled the birds showed that he was an expert hand at the business. The few complaints made against his decisions prove his work to have been very satisfactory to exhibitors and to the association. President A. O. Farnham was at his post superintending the arrangement of the show room, and although he had been sick the week previous, stuck to his post until the show closed. Secretary Allan was handicapped by a felon on his right hand, and although not a green hand at the work, this made the placing of awards slower than it would otherwise have been.

The association will pay all premiums in full as it has heretofore done, to deserving exhibitors, and promises that the next show will far eclipse the past in arrangement. The Pittston Breeders' Association is now a stock company and is the owner of a large number of folding coops well adapted for the show room.

The largest entry was in the B. P. Rock class and some fine specimens were shown. H. S. Bandow was the largest exhibitor. Second in number was the Buff Cochins class. In this some crack birds were shown. Third in number came the W. P. Rocks. Noticeable among these was a pair of chicks shown by Francis A. Buck, of Meridian, N. Y., which received highest honors in this class. In Silver Wyandottes although few entries were made, some excellent birds were exhibited. Among these a fine cockerel shown by W. E. Samson & Son, was declared by Judge Bicknell to be a model specimen.

The Golden Wyandottes were fairly represented and some fine specimens were shown. The White Wyandotte class was very good, some fine birds being exhibited. Miss Kate Geddis, the only lady exhibitor, showed three fine birds with scores ranging from 91½ to

93, yet with these high scoring birds she failed to receive a prize. This goes to show that it required high scoring birds to take first honors in this class.

Buff and Black Wyandotte classes were not large in numbers, but the quality was fine. Some high scoring birds were displayed by C. S. Davis. S. C. W. Leghorns a fine class of high scoring birds. Miss Kate Geddis showed a fine cockerel and pullet. The gem in this class was a pen exhibited by S. K. Wilcox, which was the highest scoring pen in the hall, and was the chief attraction of the show room. Crowds of visitors stood around this coop, filled with admiration. The S. C. B. Leghorn class was not as well represented as it should have been. Is this grand old breed of birds losing ground? I think not. This is too valuable a breed to fall off. The R. C. Black and Brown Leghorn classes made a good display, some fine birds being shown, which proves that the R. Combs are gaining in popularity here, as the combs are not so apt to get frozen.

There was a nice display of Black and White Minorcas with the Blacks leading in point of numbers. The S. S. Hamburg class was out in full force and a large number of fine birds were shown. James Hazard had some fine birds on exhibition, but his pen was debarred owing to the fact that the cock was sick. James Mayo, Otto Budweskye and W. R. Allan showed some handsome birds in this class. The Black Hamburg class was not so large in numbers but excellent in quality. In Houdans, J. J. Bryden had a large and handsome display. Geo. A. Hobart's entry, though not large, contained some fine birds. The B. B. R. Games were fairly represented, R. E. Westlake of Scranton, exhibiting a select lot of birds. Indian Game classes made a good showing. The largest entry was made by M. E. Walker & Son, of Shick-shinny. The Bantams made up a very interesting class, and some high scoring little birds were to be found.

The Pittston show is gaining in popularity every year and will soon rank with the largest shows in the country, as the number and quality or stock exhibited is equal to any to be found, so says Judge Bicknell. A number of sales were made at good prices, and a large number of eggs engaged for hatching.

LIGHT BRAHMAS.—Cockerel, 1st 97, 2d 88 1-2, John Callaghan, Pittston, Pa. Pullet, 1st 92, E. F. Tiffany, Brooklyn, Pa.; 2d 88, R. E. Westlake, Scranton. Pen, 1st 175½, Callaghan.

DARK BRAHMAS.—Cock, 2d 85, Wallace Griswold, Montrose. Hen, 2d 88, Tiffany; 3d 87, Griswold. Cockerel, 2d 89 1-2, pullet, 2d 86 1-2, Tiffany.

BUFF COCHINS.—Cock, 1st 90, S. J. Tidd, Rendham; 2d 86½, N. S. Davis, Clark's Green. Hen, 1st 92, R. Presser, West Barre; 2d 91, Tidd. Cockerel, 1st 93, Tidd; 2d 91, Presser. Pullet, 1st 91, Wm. Wucher, Scranton; 2d 91, Presser. Pen, 2d 176, Wucher.

PARTRIDGE COCHINS.—Cock, 1st 90, hen, 2d 89 1-2, cockerel, 2d 87, pullet, 2d 89, Tidd.

BLACK LANGSHANS.—Cockerel, 1st, Peter Kaschenbach, Wilkes Barre.

BARRED P. ROCKS.—Cock, 2d, Farnham. Hen 1st 90 1-2, Brandon; 2d 90 1-2, F. G. Werner, Cockerel, 1st 90 1-2, Brandon; 2d 89 1-2, Werner. Pullet, 1st 90, Werner; 2d 88, Alfred Gingell, Pittston. Pen, 2d 171½, F. P. Casper, Pittston.

BUFF P. ROCKS.—Cockerel, 2d 89 1-2, Wm. Howe, Loflin. Pullet, 1st 91 1-2, 2d 90 1-2, Chas. Hurt, Loflin.

WHITE P. ROCKS.—Hen, 1st 95½, F. L. Rodgers, Whitney's Point, N. Y.; 2d 94, C. W. Brockway, Scranton. Cockerel, 1st 95, F. A. Buck, Meridian, N. Y.; 2d 92½, Tiffany. Pullet, 1st 96, Buck; 2d 95, Rodgers. Pen chicks, 1st 186½, F. L. Rodgers; 2d 181½, Brandon. Fowls, 1st 183½, Brandon; 2d 177½, Kite.

SILVER WYANDOTTES.—Cock, 2d 86, Presser. Hen, 2d 88, Griswold. Cockerel, 1st 91, 2d 90, pullet, 1st 90, W. E. Samson & Son, Pleasant Mount, Pa.

GOLDEN WYANDOTTES.—Cock, 1st 90½, hen, 2d 86½, M. K. Kresge, Pittston. Cockerel, 2d 89½, Griswold. Pullet, 1st 92, Kresge; 2d 89½, Griswold. Pen, 1st 180, Alden; 2d 176½, Oliver Herron, Pittston.

WHITE WYANDOTTES.—Cock, 1st 92½, Kate Geddis, Pittston; 2d 90½, M. E. Walker & Son, Shickshinny. Hen, 1st 94 1-2, 2d 94, Walker & Son. Cockerel, 1st 92, Walker & Son. Pullet, 1st 94, Ruhs; 2d 93, Walker & Son.

BLACK WYANDOTTES.—Cockerel, 1st 93 1-2, 2d 92, pullet, 1st 94, 2d 91 1-2, Davis.

BUFF WYANDOTTES.—Hen, 1st 91, cockerel, 2d 88 1-2, pullet, 2d 89, Farnham.

AMERICAN DOMINIQUE.—Hen, 2d 87, C. S. Davis, Allis Hollow, Pa.

W. F. B. SPANISH.—Cock, 1st 91; hen, 1st 93, 2d 92½, all to W. R. Allan, Pittston, Pa.

S. C. W. LEGHORNS.—Cock, 2d 88½, Chas. Hurt, Loflin, Pa. Hen, 1st 91, F. P. Cosper, Pittston, Pa. Cockerel, 1st 93½, Kate Geddes, Pittston; 2d 93 and 3d 93, Hurt. Pullet, 1st 96, Miss Geddes. Pen chicks, 1st 190, S. K. Wilcox, Smyrna, N. Y.; pen fowls, 1st 184½, Cosper.

S. C. BROWN LEGHORNS.—Cock, 2d 85, Allan. Hen, 1st 90, Otto Budwesky, Pittston. Cockerel, 1st 91½, W. Howe, Loflin, Pa.; 2d 89, Chas. Ruhs, Harding, Pa. Pullet, 1st 92, Ruhs. Pen, 1st 182, Budwesky.

BLACK LEGHORNS.—Cockerel, 1st 92½, 2d 92½;

pullet, 1st 94, 2d 92; pen, 2d 179½, all to Chas. Fritsch, Pittston.

R. C. W. LEGHORNS.—Cockerel, 1st 91; hen, 1st 91½, all to Wallace E. Griswold, Montrose, Pa.

R. C. BROWN LEGHORNS.—Cock, 1st 90, 2d 86½, hen, 1st 91½, 2d 86, Geo. Neilson, Pittston. Cockerel, 1st 91, pullet, 1st 91½, Ruhs. Pen, 1st 184½, Ruhs; 2d 182½, Neilson; pen chicks, 1st 182½, Neilson.

BUFF LEGHORNS.—Cock, 2d 86½, Cosper. Cockerel, 2d 85½, Cosper; 3d 85½, B. Downing, Pittston. Pullet, 1st 90, Downing; 2d 87, Cosper. Pen chicks, 2d 177½, R. F. Alden, Montrose, Pa.; 3d 173½, Cosper.

DOMINIQUE LEGHORNS.—Pullet, 2d 85, Sanford Geddes, Pittston.

ANDALUSIANS.—Cockerel, 1st 90½, pullet, 1st 94½, 2d 93, all to Griswold.

W. MINORCAS.—Cock, 2d 86, hen, 1st 90, 2d 88, pullet, 2d 89½, M. E. Walker, Shickshinny, Pa.

B. MINORCAS.—Cock, 1st 91½, Arthur Trethaway, Wilkes Barre, Pa.; 2d 89½, C. W. Brockway, Scranton. Hen, 1st 92½, J. W. Wilcox, Wilkes Barre; 2d 90½, Brockway. Cockerel, 1st 92, Wilcox; 2d 92½, pullet, 1st 94, 2d 92½, Brockway. Pen chicks, 2d 177½, N. S. Davis, Clarks Green.

S. S. HAMBURG.—Cock, 2d 89½, James E. Hazard, Elmira, N. Y.; 3d 89½, W. R. Allen, Pittston. Hen, 1st 92½, Hazard; 2d 91½, Allen. Cockerel, 1st 90, James Mayo, Pittston. Pullet, 1st 93, Hazard; 2d 90½, Mayo. Pen, 1st 180½, Mayo; 2d 176½-16, Chicks, 2d, Mayo.

G. S. HAMBURG.—Hen, 2d 89½, Pullet, 2d 89½, Wallace E. Griswold, Montrose.

B. HAMBURG.—Cock, 1st 93½, E. D. Kite, Pittston. Hen, 1st 95, Griswold. Cockerel, 1st 91½, Kite. Pullet, 1st 95, Griswold; 2d 91½, Kite.

HOUDANS.—Cock, 1st 91½, J. J. Bryden, Pittston; 2d 90½, Geo. A. Hobart, Chitenango. Hen, 1st 95, 2d 92, cockerel, 1st 92½, 2d 91½, pullet, 1st 91, 2d 86, pen, 2d 178, Bryden.

BUFF LACED POLISH.—Cock, 2d 87½, hen, 2d 89½, pullet, 2d 88½, Griswold.

RED CAPS.—Cockerel, 1st 90, pullet, 1st 92, Geo. Rowley.

B. B. R. GAMES.—Cock, 1st 91½, Geo. Newitt, Dorrantown, Pa. Hen, 1st 93, 2d 93, cockerel, 1st 91, pullet, 1st 92½, 2d 91½, pen, 1st 184, R. E. Westlake, Scranton, Pa.

INDIAN GAMES.—Cock, 1st 90½, 3d 89½, Walker; 2d 89½, E. D. Kite, Pittston, Pa. Hen, 1st 94½, 2d 93½, Walker. Cockerel, 1st 92½, Walker; 2d 87, Wm. Ross, Miner's Mills, Pa.

Pullet, 1st 93, 2d 92½, Walker. Pen chicks, 2d 177, pen fowls, 1st 182, Walker.

B. B. R. GAME BANTAMS.—Cockerel, 1st 93, pen chicks, 1st 188, Westlake.

W. PEKIN BANTAMS.—Cock, 2d 89½, hen, 2d 89, cockerel, 1st 92½, pullet, 1st 94½, Walker.

BUFF COCHIN BANTAMS.—Cock, 1st 92, Tom C. Hill, Shickshinny, Pa. Hen, 1st 94, Hill; 2d 89, Walker. Cockerel, 1st 93, 2d 91½, Walker.

Pullet, 1st 92, 2d 91½, Hill.

BLACK COCHIN BANTAMS.—Cockerel, 1st 94, 3d 91, pullet, 1st 93, Walker.

TURKEYS.—All to Tiffany, Brooklyn, Pa.

GEES.—All to Griswold, Montrose, Pa.

DUCKS.—All to Griswold, Montrose, Pa.

WHITE GUINEAS.—1st, Tiffany; 2d, N. S. Davis, Allis Hollow, Pa.

They Show the People Their Goods.

The Reliable Incubator and Brooder Co., of Quincy, Ill., believe in going before the public with their line of goods. During the present season they have exhibited their Improved Self-regulating Incubators and Brooders (in operation) at the following leading western fairs and poultry shows, winning highest honors in every case, the competition at some points being keen:

Special written commendation at the Illinois State Fair, Springfield (the State capital), September 24-29, 1894. No premium offered.

First premium, silver medal, at the thirty-fifth annual St. Louis fair, October 1-14, 1894.

First premium at the great Mid-Continental poultry exhibition, Kansas City, Mo., December 18-26, 1894.

First premium at the Illinois State poultry show, Bloomington, Ill., January 12-18, 1895.

First premium at the Erie, Pa., annual poultry exhibition, January 29 to Feb. 2, 1895.

For 112 page Illustrated Incubator Catalogue and Poultry Guide and 48 page Illustrated Poultry Catalogue send six cents in stamps to Reliable Incubator and Brooder Co., Quincy, Ill.

Transfer of Stock.

I have sold M. S. Pratt, Fayetteville, N. Y., without reserve my entire stock, near one hundred birds, "Lister Kay" Buff Leghorns, including my mated yards for this season's breeding, which I believe to be the best matings ever made for results. I take this opportunity to thank customers for their liberal patronage and bespeak for Mr. Pratt a continuance of the same. H. S. BURDICK, Rome, N. Y., Feb. 10, 1895.

I find THE AMERICAN FANCIER very interesting. E. A. WESCOTT, Malcolm, Neb., Feb. 20, 1895.

The Sanatoga and Skuykil Valley Poultry and Pigeon Association.

TO THE AMERICAN FANCIER:

At our last regular meeting the above association chose the following dates for their show of 1895: Dec. 31 and Jan. 1st, 2d, 3d, 4th, 1896. The association was organized last fall, held its first fair Dec. 18 to 22nd 1894, and with its many friends and exhibitors, feels highly pleased, and has already determined to far eclipse its first show in holding the second on the above dates. Readers, breeders and fanciers remember these dates.

S. J. KURTZ, Sec'y.
Sanatoga, Pa., Feb. 11th, 1895.

Corrections.

TO THE AMERICAN FANCIER:

In looking over the report of the New York show in your paper we see you have made the report read, on Buff P. Rocks, Forsyth, 1st and 3d. We took 1st on Buff P. cockerel, and Forsyth 2d. No 3d prize being given. Please correct.

SANTÉE & CUNNINGHAM,
Chenango Bridge, N. Y., Feb. 14, '95.

In your report of the Mid-Continental show you gave the score of my pen at 186½, when it should be 188½. I won pen by two whole points, quite a margin. If you can consistently do so, I wish you would correct this. E. H. HASLET, Atchison, Kansas.

PIGEONS.

Queries and Answers.

Query.—Will you please answer through your paper the following questions: 1. What is the best remedy for growing light and for colds in pigeons? 2. What is the address of the *Homing Exchange*? I think your pigeon department is worth all other papers together. D. D.

Hollidaysburg, Blair Co., Pa.

Answer.—This affliction of pigeons termed growing light arises from various causes. It may be from lung disease or consumption, from worms, from lack of exercise, from insufficient food, and from a disordered condition of the digestive organs in which the food is not properly prepared for assimilation by the general system. The first thing I should recommend would be to pluck out all the feathers of the tail. This sometimes affects a cure alone. If consumption is suspected give small cod liver oil capsules once a day, or the homoeopathic remedy, calcaraca carbonica, six globules dissolved in a cup of water for them to drink from. For worms give a piece of garlic the size of a pea once or twice a day till worms are removed. For a disordered condition of the liver a Carter's liver pill or six pellets of Hom. remedy Podaphylum in a cup of water letting them drink at will. Colds should be treated with Hom. Remedy Spongia in same manner as prescribed in other cases. 2. The *Homing Exchange* is published at Germantown, Pa.

J. C. LONG.

Barbs at New York.

TO THE AMERICAN FANCIER:

In the special report of the award of prizes at the late New York show, your correspondent has misplaced the premiums in several Barb classes. In the class for cocks, bred in 1893, I had no entry, but in the class for hens, bred in 1893, I had two entries, taking 1st and 2d prizes in that class. In the class for cocks, bred in 1894, I had three entries, taking 1st, 2d, and 3d prizes. In the class for hens, bred in 1894, I had three entries, taking 1st, 2d, and 3d prizes. This class was reported correctly. I also won the special prize of ten dollars in gold for the best display of Barbs. By making the correction you will oblige, WALTER W. WHITE, Baltimore, Md., Feb. 11, 1895.

Norwich Croppers.

Our editor has asked me to give my views of that happy little pet the Norwich Cropper, and I had better commence by stating that I am quite aware that my ideas of the perfect Norwich Cropper will not meet with unanimous approval from the fanciers of this variety; at the same time I believe they will be endorsed by the majority. One hears an endless variety of opinions from fanciers or this bird, and, although agreed pretty well on the main points, when we come to the final settlement we all seem to agree to differ only. I fully expect to draw a hornet's nest around my ears by stating my views fairly and as clearly as possible, and can only plead as justification that I have kept a large stock of these birds for several years and with a fair amount of success when exhibiting, and I believe I can honestly say there are few who have devoted so much time and attention to the variety as I have.

The Cropper is a small pouting variety of pigeon which was, from what we can trace, first brought to this country by those persecuted Protestants who brought us a great portion of the woollen trade from the Continent, and proved themselves good citizens, and, what is just now more to our purpose, good fanciers, as there is no doubt to these people and their descendants we owe a great measure of progress towards perfection in many branches of the fancy. There seems to be some confusion in the minds of some fanciers about this bird and the Pigmy Pouter, some looking on the Norwich Cropper as a poor imitation of the Pigmy. This I certainly do not agree with, as the two birds are vastly different in shape, make and carriage.

When describing the shape of the perfect Norwich Cropper one must bear in mind the bird is often kept quite at liberty, and should be made so that it is likely to be able to fly well, the proper flight being a great point with many fanciers, and as I myself keep some at liberty I must say their flight is a pleasure to watch, not only to those who are fanciers of the variety, but to fanciers of all alike. I have ever found a Runt fancier admiring their graceful motions in the air, for they are really graceful, and I would suggest to all, not only fanciers, but others, if you have a place where you can safely turn a few pigeons loose, try some Norwich Croppers, and I can assure you it will be worth your while spending a few minutes each day watching them.

The head is of the common or House Dove shape, with a bright fearless look in the eyes. The crop should be large in proportion to the bird, although not so large as to prove unmanageable to the bird itself, which it very seldom is, they being able, in spite of their size, to carry a crop that would be an adornment to many of the slack-winded Pouters we see in the show pen at the present day. In shape it should be as nearly as possible a perfect globe, showing the least bit of fulness at the back of the neck; many have in the front of the crop a gentle break just below the beak, something in size like the break in the top of an apple. This I rather prefer myself. Body not too narrow across the breast, and flight feathers which should finish about an inch from the end of the tail, should never be crossed at the tips; these feathers I prefer to be broad and powerful, the wings being tightly clipped up to the sides, the tail just long enough to carry it clear of the ground when the bird is standing perfectly upright; the legs nicely covered with feathers down to the hocks; then (here a vital difference of opinion comes in) some prefer them perfectly clean, others prefer a slight fringe of feathers down the outside of the shank, extending down to the end of the outer toes, the feathers on the feet to be extremely small. This is a point on which it seems impossible to get fanciers of the variety to agree, as I find it almost the invariable rule for those who prefer one type to consider it rank heresy to admit the other into the prize list at all. For myself I certainly prefer the slight fringe, which seems to me to give a kind of finish to a bird, and I believe was originally considered correct by the old fanciers, although under the present circumstances I should certainly put a clear-

legged bird on even competition with the others. The legs should be almost straight, not showing so much bend at the hocks as the Pouter; feet rather small and when playing up the ball of the foot to be almost off the ground, the bird putting the greater part of the weight on the toes. I have purposely not given my idea of the correct measurements of a Cropper, as there are so many different sizes, some preferring a small bird, others a larger one. I prefer myself a medium-sized bird, but would infinitely rather see a small specimen win than one large enough (and I have seen some shown) to give one the idea the bird is after all only a half-bred Pouter. The colors are (and I prefer the first four in the order named) black, yellow, cinnamon, and blue. The cinnamon is the same color as red in Pouters; yellows and cinnamons are hardly ever seen at all, and when seen seem to fail in shape. Beside these there are whites and white birds with black tails. Here, if I had my way, I should like to stop and say these are the standard colors, and these only; but so many will include duns, called mouse color, silvers, which are called cloth colored, and mealies, which are divided in shade still further by calling them red-duns—not red mealies, or even cinnamon duns, which seems rather a contradiction to me—or miller duns. Then there are creams which are a kind of pale yellow mealy, with a white tail and a cream cloth (which is a color hardly darker,) with a colored tail, I had almost forgotten the cloth tails, which, in spite of being in my eyes not a standard color, are, when in good form, a really pretty color for a bird. Each and all these colors seem to get their turn at the head of the prize list, and I regret to say I fear most fanciers have for a long time paired together the two best shaped birds they had without respect to color at all. I believe this is greatly different now, but it was, and I regret to say still is, an aggravation to breed blues from pairs of blacks, and pure whites from reds, and really there was some time ago hardly a color that would breed true but cloths, and there was no need to breed for them, as one got quite enough cloths from other birds without breeding especially for them. Those who have kept these for long will remember how scarce blue hens were a short time since, and at the present time there are few good ones to be seen; these were produced in a comparatively short time because there was a demand for them, and I do ask fanciers to set to work like fanciers and see if good yellows and cinnamons cannot be produced. I feel sure it is possible, and am doing all I can towards it myself, but don't let them think they will succeed in one or even two years, in getting a good stud of either of these two colors together. It will require some patience and perseverance, and what better school for patience and perseverance is there than the pigeon fancy, which will, with its little worries, disappointments and trials give us many a lesson of how to be patient and persevere when everything does not go just straight with us.

I remember also another variety which I have seen, which I believe is kept a good deal in Scotland, that is a whole-colored bird. I saw some blues once and must admit they seemed to me to be, without exception, the ugliest pigeon I ever saw. What can be the idea of breeding these birds without the markings I do not know. By-the-bye, I find I quite forgot to say the colored birds were pied as in Pouters, with a small white crescent in front of the crop and (I quote the Pouter standard drawn up by the National Peristeric society; as these birds are the same in marking I do not think a better description could possibly be drawn up) the horns of which reach to about an inch from each eye; a few white feathers, about a dozen, on the shoulders in the shape of a rose, and white primary flights; white on all the body behind a line encircling the centre of the waist, the color otherwise to cover the whole of the bird except in blacks and blues, the tails of which are colored, and blues must have black wing-bars. With respect to the marking the difficulty has been to get birds not swallow-throated, as almost all birds have a tendency to this, which detracts immensely from a bird's appearance.

I fear there is much more could be said about this pretty little bird and that this will be taken as a rather rambling statement. Such, however, are a few of my views on the subject, and I can only say in conclusion, if you want recreation turn "Cropper fancier," have patience and persevere, and you will find you will be well rewarded.—Tom Simonds, in *The Feathered World*.

Pigeons at Cincinnati.

(Continued from February 16.)

TO THE AMERICAN FANCIER:

TURBITS.

Black Wing cocks, 1st, John G. Orr, short thick bullfinch beak, good skull, fine eye, good gullet, fair color, well marked and clean thighs, is low in beak; 2d, Tanner, very short beak, good gaps, large, well shaped skull, fine gullet and frill, grand build and carriage, little shelly in peak and slatey in color; 3d, Levering, good beak and skull, fine peak and mane, clean thighs and excellent color, lacks gullet, has foul white feathers in shoulders and shows his Oriental breeding by feathers down the legs; 4th, Tanner, a fine Turbit, 2d Boston and New York, well finished all over but not so stout in head as winners.

Black Wing hens, 1st, Levering, fine front and down face, beautiful peak and mane, grand eye, rich color, thin beak and hollow face, very foul in right thigh and has too much white in wings; 2d, Orr, good stout beak, little straight, good peak and mane, fine eye, good gullet, fails in frill and weak in face; 3d, Levering, a sweet little well trained Turbit, grand color, good skull, peak and mane, full gullet and nice frill, is weak in beak, pinched in face and foul on rump; 4th, Tanner, should have been an easy winner, grand color, perfect markings, thick beak and good skull, magnificent gullet and frill, fine peak and mane; 5th, Tanner, grand beak, eye and skull, good color and markings, lacks gullet.

Black Wing cock, '94, 1st, Orr, an easy win, a grand Turbit for his age and well marked, has a wonderful stout beak and front, lacks gullet; 2d, Orr, another same type, is bishoped on wings and foul on thighs; 3d, Levering, beautiful color, grand frill, good beak, face and skull, lacks gullet and is very foul underneath.

Black Wing hens, '94, 1st, Levering, good skull and eye, weak in beak and face, rich color, correct size and good shape; 2d, Tanner, a grand little hen, is out of condition; 3d and 4th, Orr, both very much alike, stout beaks, but long, not so good in skull as winners and fail in gullet.

Blue Wing cocks, 4 grand ones all very close, 1st, Orr, should have been beaten on account of size as he is a regular Jumbo and very long in feather, is otherwise a grand bird, wonderful short thick downfaced beak, good mouth and cheeks, good skull but not so broad or large as his competitors, fine gullet and frill, good peak and mane and is well marked; 2d, Levering, an old stager, has won many victories, wonderful beak, short thick face and stout neck, good gape of mouth, fine peak and mane, fails in markings, excellent gullet and frill and fine frontal; 3d, Levering, a grand styled bird, short face but weak in mouth, fine skull, excellent peak and mane, nice gullet and fair frill, good color and bars, very foul on thighs; 4th, Tanner, the best head in the class, very short, thick beak, grand eye, lacks gullet, fine frill, excellent shape and carriage.

Blue Wing hens, 1st, Levering, a little gem, very short, downfaced beak, beautiful front, grand eye, frill, color, size and shape, lacks gullet and a bit shelly in peak; 2d, Levering, another grand Turbit, bolting eye, beautiful front and down face, fine peak and mane, nice gullet and frill, lacks markings and beak shows signs of manipulation; 3d, Orr, grand skull and beak, little straight in face, fine gullet and frill, well marked and clean thighs, is shelly in peak; 4th, Tanner, stout beak, good skull, nice peak, mane gullet and frill, fails in front to winners.

Blue Wing cocks, '94, bred, 1st, Orr, short, thick beak and good skull, fair frill, fails in gullet, is hollow in cheeks and decidedly too long in feather, is a bit shelly in peak; 2d, Orr, same type,

has nice gullet and frill, good eye, kitey bars; 3d, Levering, where disqualification was not the penalty for grouse boot-ed limbs, this bird should have been an easy winner, the most perfect head I ever saw on a Turbit, grand front and downface, full in cheeks, fine, bolting eye, nice gullet and correct body formation, grand color and well marked, short face but weak in beak; barring the latter fault and the feathered legs is the best Turbit for its age I ever saw and miles ahead of the winners in general quality; would love to own him.

Blue Wing hens, '94, 1st, Levering, the best head in the class, wonderful beak, grand gullet and frill, shelly peak, foul in left wing and colored thighs; 2d and 3d, Orr, nice Turbits, but not so short in face or so broad in skull as winner; 4th, Tanner, only ordinary.

Red Wing Turbit cocks, 1st, Levering, a fine shaped little bird, but color too dead, approaching the strawberry order, has short, thick face and good front, fails in peak and is thin at point of beak; 2d, Tanner, grand skull, thick beak, bolting eye, beautiful frill, fine rich color, fails in gullet and is shelly in peak, but should have won; 3d, Levering, a mean one, should not have been in it, is oversized, sunken in eye, shelly peak, poor color, coarse in wattle, has only 3 points to commend him, down face, fine gullet and frill; 4th, Tanner, a much better one, grand in all points except length of face and breadth of skull.

Red Wing hens, 1st and 2d, Levering, 1st is a gem, beautiful down face and wonderful profile, rich color, fine gullet and frill, excellent peak and mane; 2d is too thin in beak and face.

Red Wing Turbit cocks, '94, 1st, Levering, beautiful profile, full gullet and good frill, bolting eye, needle peak and fine mane, rich color, very weak in beak; 2d and 3d, Orr; 2d is a nice Turbit, thick beak, good skull, full cheeks, grand eye, is poor in color and might have more gullet, peak a little wry; 4th, Tanner, a very fine one for the color, but has no peak.

Red Wing hens, '94, 1st, Levering, very rich color, fine front, good gullet and frill, very weak in beak and face; 2d, Orr, I preferred to winner, grand beak, stout in head, fine gullet and frill, poor in color; 3d, Orr, rather indifferent quality, not in it with the winners.

Yellow Wing cocks, (6) 1st, Levering, beautiful front and down face, grand bolting eye, rich color, nice gullet and frill, fails in markings and is weak in beak; 2d, Tanner, thick bullfinch beak, tremendous gull-t, fine frill, good skull, nice peak and mane, fair color, over-flighted; 3d, Orr, the best head in the class, also possesses a good stout beak, nice frill, fair color, bit shelly in peak and straight in face, but in need of more gullet; 4th, Levering, nice front and head, fair color, good markings, is weak in beak and fails in gullet; 5th, Orr, thick beak, nice peak and mane, fair color, pinched face and sunken eye.

Yellow Wing hens, 7, rank judgment here. 1st, Levering, good color, nice marking, excellent front, fine gullet and frill, but is hollow cheeked and very weak in beak; 2d, Levering, same type, good short downface, foul on thighs and rump and deficient in wing markings; 3d and 4th, Farmer, miles ahead of the winners; 3d in particular is the best Yellow Turbit hen I ever saw, very short thick downfaced beak, grand skull, fine peak and mane, rich color, beautiful frill, bolting eye, a model in size, shape and carriage, had she a little more gullet she would be a gem; 4th is also a grand Turbit, though not so chubby and stout as 3rd, has good color, fine gullet and wonderful frill, and also is perfection itself in peak and mane; 5th, Orr, might have been higher, has good stout beak, short face, full cheeks, good head, nice gullet and frill, is light in color.

Yellow Wing cocks, '94, 1st, Orr, stout beak, good skull, thick face for a yellow, good bolting eye, nice peak and mane, but lacks gullet and is foul on breast; 2d, Orr, nice little Turbit, not so stout faced as winner, lacks gullet and might have given way to 3d, Levering, beautiful front, nice color and marking, though weak in beak.

Yellow Wing hens, '94, 1st, Orr, good stout beak, fine skull, good eye, nice gullet and frill, fair in color, hollow in

cheeks; 2d, Levering, nice shape, good profile, fine eye, sound color, very weak in beak and cheeks; 3d, Orr, only fair.

Any other color cock, 1st, Tanner, a grand little Strawberry, very short face and fine gape, grand skull, full gullet and fine frill, wonderful build and grand style, fine bolting eye, needle peak and full mane; 2d, Orr, another corker, a Blue Chequer, grand Bullfinch beak, short broad skull, fine eye, fails a little in gullet, has fine frill and possesses grand style and nice peak and mane; 3d, Levering, a Strawberry, grand beak and downface, a little flat in cheeks, fails in gullet and peak.

Any other color hens, 1st, Tanner, a Strawberry, a sweet little bird, very short thick downfaced beak, fine gullet and frill, beautiful front, grand eye, nice peak and mane, good shape and style; 2d, Tanner, a Chequer, grand shape, fine beak and skull, good peak and mane; 3d, Orr, a Dun, nice frill and gullet, good eye, too long in face and narrow in skull.

Any other color cock, '94, 1st, Tanner, a Blue Chequer and a corker, 1st, Boston, special, Peoria, etc., has good Bullfinch beak, grand front, bolting eye, fine peak and mane, correct body build; 2d, Levering, a grand little Strawberry, excellent skull, good thick neck, fine peak and mane, beautiful frill, short beak, but weak and is bishoped on wing; 3d, Rommel, a Red Chequer, nice skull and good eye.

Any other color hen, '94, 1st, Orr, a sweet little Dun.

Solid Turbit cocks, 1st, Buttles, "Frost King," the New York winner of last year, in fine show form, a wonderful skulled bird with a very massive beak; 2d, Rapien, inferior quality.

Tail Turbits, 1st, Buttles, a Blue Tail, a nice bird of the variety.

To Pouter Fanciers.

TO THE AMERICAN FANCIER:

Now that the Pouter Club has been organized, I wish to beg of those who are not members to join us, and help to make this America's specialty club, not alone in point of membership, but activity also.

The annual dues being one dollar should enable all fanciers to join, and it will surely benefit the breeders of the Pouter. If we can get the membership away up, it may be possible to offer cups at other recognized shows, besides those offered at the annual club meet. It shall give me much pleasure to put before the public the affairs of the club that they may keep posted on its doings.

The membership now numbers 15, among them some of America's foremost Pouter breeders and exhibitors, consisting of Andrew Muehlig, Ann Arbor, Mich., E. J. Campbell, Centredale, R. I., Chas. Hosey, Lick Run, Cin., O., Chas. Rinke, Lick Run, Cin., O., G. M. Martin, Middletown, O., E. T. Hazeldine, Terre Haute, Ind., J. M. Wall, Atlanta, Ga., Frederick Tudor, Boston, Mass., Geo. Ewald, Ed. Ward, Cincinnati, O., Chris. Wagner, Detroit, Mich., F. Erdelmeyer, Indianapolis, Ind., J. W. Acton, Eaton, O., F. E. Shippen, E. B. Page, Louisville, Ky.

We want all the Pouter men we can get, and I am anxious to hear from John H. Kuhn, McClure, Ingram, Hanselman, Taubert, Erede, McMahon, Fred Sauer, Waldron, Chas. Wagner, Reid, Snyder, Budde, Pearson, L. Korb, Scoville, Myer and all those I cannot now recall their names.

All those who have not paid their annual dues will please do so as early as possible. All those wishing to join will please send application and one dollar for a years membership. I assure them a hearty welcome, and trust the club may be a source of benefit to the member and to the fancy.

EDWARD B. PAGE, Sec'y.

2125 Preston St., Louisville, Ky.

WAY ON TOP.

THE AMERICAN FANCIER, with New York show report is a corker. It is way on top.

GEORGE H. BURGOTT,
Lawton's Station, N. Y., Feb. 13, 1895.

THE BEST.

THE AMERICAN FANCIER is the best paper I ever advertised in, receive enquiries from all over the United States.

A. P. GROVES,
Philadelphia, Pa., Feb. 19, 1895.

Turbit Illustrations.

TO THE AMERICAN FANCIER:

Some months ago I criticised a cut of a Turbit which you published as a frontispiece, and the artist, in defense of the portrait, published a letter which he had received from the owner of the bird expressing satisfaction with the work. I do not consider myself competent to judge Turbits in opposition to Mr. Tanner, and if he considers that an accurate portrait of the best headed Turbit he ever owned, why I will have to discard all my present stock of Turbits and begin again. All the fault I found with the picture was that it represented a bird *down in the mouth* as well as *down faced*. I have looked at all my best Turbits, or those I call my best, and in each of them a line drawn from the tip of the beak through the angle of the mouth bisects the eye, but in the picture referred to such a line would come out low down on the back of the neck. The *beak wattle* on all the good Turbits I have seen reaches to, and sometimes, in old birds, overhangs, the angle of the mouth, while in the picture it reaches just about half-way down to the angle of the mouth, and still the wattle came low enough in my opinion. If the bird was built that way, of course he should be so depicted. I should not have mentioned the subject again had not Mr. Gavin, in the first number of *Pigeon News*, referred (presumably) to this same picture as representing a bird worth \$50 to any breeder of Owls of a certain variety. I will sketch from memory the features of the portrait that I think objectionable and also a similar head conforming to my idea of symmetry, and if you can set me straight as to which is right, or whether the point is "immaterial, irrelevant, and incompetent," I shall be obliged to you.

FIGURE 1.

Figure 1 shows the mouth to which I object, perhaps slightly exaggerated.

FIGURE 2.

Figure 2 preserves the relative position of the three points in a straight line.

CHAS. L. LANG, M. D.

A Pouter Club.

TO THE AMERICAN FANCIER:

A notice in THE AMERICAN FANCIER of January 26th heralds the news to the Pouter Fanciers of the United States that such a club was formed at the Cincinnati show. If such is the fact, keep the ball rolling, let every fancier join, exchange ideas as to rules, regulations and by-laws of the club, get into good working order this next season, and when the next Cincinnati show comes off, in Nov. 1895, there will surely be an array of fine Pouters that will surpass even the elegant display of the show just passed. Pouter fanciers wake up.

J. H. BREDE.

Middletown, O.

Mr. Campbell's Answer.

TO THE AMERICAN FANCIER:

I did not mean to have any more to say about Glasgow, but he has made so many mistatements that I will have to answer him. He says I tried to influence him in his judging Pouters, well, I did give him to understand which I knew was the best bird, but I did it publicly before a good many others. As I said before, he gave 1st to a white cock that I sold for just one-fifth for what I got for the 2d premium bird. I knew I bred four out of the five white cocks in the show, and the other four premiums were bred from my stock, but he says I told him afterwards that I was satisfied. What I was satisfied of was, that he was no judge. He says I interfered in several of the Pouter classes. He knows I never spoke to him about any others except the Black hens. He called me to him and asked me which was the best but I would not tell him. He says I interfered also in the Jacobin classes. I saw him helping Ingram judge, and went over to find what right he had to do so, and while there Ingram asked me to pick out any bird I cared to and he would award it the prize. Talk about being rattled, he did not know what to do, but I refused to do any such thing. Well it took them just 30 minutes to judge the Jacobin class, but after all I did not see many mistakes. I would like to know right here, who gave Glasgow permission to help judge the Jacobins? I never heard or saw such a thing before. I will speak of the article Ingram had in your paper a week or two ago, denying that he told me he was rattled with Glasgow hurrying him. He did say so, and I have two witnesses who heard him. He says I dare not make affidavit that I did not have a catalogue in my hand when I judged Fans, I can do that very easily, for when I consented to judge the Fans, secretary Twombly agreed to help carry the birds from their cages to the judging pen, and he was with me all the time, and he knows I did not have a catalogue and that I did not know the birds either, for I made it a point to keep away from them until they were judged by someone. I made a mistake in judging the young bird class, I ought to have thrown out the whole lot as not being worthy of anything. Maybe the White cock was not wry tailed, only badly crooked, as a good many saw besides myself, let Glasgow ask Mr. Twombly. I am still willing to make a match with anyone on Pouters, and will also back up the statement that I bred 75 per cent of all the Pouters at the shows in this country for the last 10 years, and about Pouter breeders not breeding so much for themselves, I would like to know what he has ever bred with the big chance he has, that ever won anything in close competition, especially in White S. H. Fans? It is easy enough to win in classes without competition. I see the White cock that was 2d at Boston, was 1st at New York, and the one that was 1st was 2d, and I think that bears me out in good shape. I never said that Mr. Waldron's cock was the best, for I have six at my coops that can easily beat him. Now, brother fanciers, I will leave it to you what kind of a man Glasgow is, and what I am? I never care much for showing these late years, but may make a few entries next year just to show what I have, but would rather make a match for a cup or for money, as it will allow of three judges passing on the birds, and not so much chance of mistakes. Now some fanciers out west say they would rather have George Ure's stock, little short birds instead of fine, long, slender, upright birds. But I will tell them that my stock is nearly all Ure's stock, also with some of Robert Fulton's with it. George Ure himself bought heavily of Fulton. I think I can tell anyone about Pouters in this country and how they were all bred, and anything anyone wants to know about Pouter breeding or raising, I will gladly tell them all I know. I breed about 200 Pouters every year from 30 or 35 pair of breeders, and I would like to hear of anyone able to do it. Every bird in coops in Pouters, Jacks, Fans and feeders I bred myself.

When I judged Pouters and Jacobins at New York in '93 and '94, I wrote to all of my customers that showed birds, and asked them if they objected to my doing

so. They all wrote me that they would be glad to have me judge their birds. Glasgow knows this also. I never took a cent for judging, and always paid all my expenses. Two years ago when Glasgow judged Barbs at New York, he told me that all the birds he knew thoroughly were Barbs, and now he knows how to criticise a whole show. Where did he learn so much so quickly? It satisfies me that he does not know anything about pigeons, and anyone reading his criticisms will be awfully misled. When he judged Barbs in New York in '93, he called me to look at a few of them and I told him which had ought to win. I thought I would help him a little although I had no right too, and he did not do as I told him, and a big Barb breeder laughed at his awards, but as they were all his he did not care.

ELISHA J. CAMPBELL.

Greystone Woolen Mill,
Centredale, R. I.

A Plucked Bird.

TO THE AMERICAN FANCIER:

As it has come to my notice through private correspondence that there is some talk going the rounds *re* a bird I showed at New York and was disqualified, I take this opportunity of informing the fancy at large the facts in the case. The bird is from the loft of Mr. Bly, of Birmingham, England, and was sent to me as a sure winner at the late English show. Upon receiving him I noticed feathers had been removed from rump, and wrote saying that the bird could not win here in that condition if he could in England, but would show him and see what would be done with him. At New York I notified Mr. Crawford in writing of the facts *re* the bird so far as I knew, and he said he would notify the judge, to which I made reply that I thought it should not be done until after judging, as there were other birds plucked and I wanted to see how they were handled. I have written the party in England *re* the result, and expect some recompense on the misrepresentation of the bird to me.

FRANK W. GORSE.

Highlandville, Feb. 13, 1895.

Meridian Mentionings.

TO THE AMERICAN FANCIER:

The great New York show is already only a memory, but what a fund of memories it will prove to some of us who do not have the opportunity to attend many shows. Two days spent in a careful analysis of the exhibits and awards and in conversation with the famous fanciers of America are sufficient to convince one that we are slowly but surely gaining ground. Perhaps the time will come when England will send to us yearly for prize winners in the same classes in which she now excels. The quality of the birds in the pigeon classes was unusually high, especially in Jacobins, Turbits and Tumblers. I noticed a Red Jack cock, No. 2323; shown by M. B. Blauch, that ought to win many a special when thoroughly in condition. In Tumblers the Black Mottle shown by F. W. Gorse attracted general admiration and should have had the special over the Solid Black Muffed if they competed together.

CHAS. L. LANG, M. D.

Traced by a Glove.

John Kulb, of 2026 Niagara street, Buffalo, N. Y., is a fancier of pigeons, and he was naturally grieved upon going to the barn in the rear of his house Saturday night to find that someone had broken in and stolen a half-dozen of his well-bred birds. He found a glove on the floor, and after puzzling his brains for a few minutes he remembered having seen similar gloves on the hands of James Slair, of 10 Hoffman alley. A small boy was sent to Slair's house with the glove, and when the lad told him he had picked it up on the street Slair accepted it and thanked the boy. Having thus acknowledged its ownership, he was arrested by Specials Cornish and Coon. He admitted his guilt and restored the stolen pigeons.

A Note of Warning.

TO THE AMERICAN FANCIER:

I want to warn all the boys not to monkey with the deadly coal oil stove. We have had a blizzard every night, and I have been worried for two weeks over my White Fans. I finally, against my better judgment, started my coal oil stove every night and warmed up the loft before I went to bed, not daring to let it run all night, as I am "shady" on coal oil at best.

Last evening I put in a new wick, filled the stove, and started a nice heat, and went in to my supper. In about half an hour I went out, and found the whole building full of a nasty black smoke, the cause of which I have not yet found out. The consequence is that my beloved birds, which were white as snow yesterday, look to-day like a cross between White Fans and Ravens, and my heart is broken. How long it will take them to assume a normal aspect, the Lord only knows. I send you this, so that no other fancier may have the same bitter experience.

Evansville, Ind., Feb. 10.

Pigeon Flying.

Empire City Flying Club.

TO THE AMERICAN FANCIER:

At the regular monthly meeting of the Empire City Flying Club of New York and vicinity held at the rooms at 5 Park Place, N. Y. City, on the evening of February 12th, the following race schedule for old and young birds, southwestern course, season of 1895, was adopted:

OLD BIRDS.—Sunday, May 12, Wilmington, Del., 100 miles; Sunday, May 19, Washington, D. C., 200 miles; Sunday, May 26, Charlottesville, Va., 300 miles; Sunday, June 9, Rocky Mount, Va., 400 miles; Saturday, June 22, Statesville, N. C., 500 miles.

YOUNG BIRDS.—First series, March and April hatch.—Sunday, September 1, Wilmington, Del., 100 miles; Sunday, Sept. 8, Magnolia, Md., 150 miles; Sunday, Sept. 15, Washington, D. C., 200 miles; Sunday, Sept. 22, Washington, D. C., 200 miles.

YOUNG BIRDS.—Second series, June and July hatch.—Sunday, Oct. 6, Wilmington, Del., 100 miles; Sunday, Oct. 13, Magnolia, Md., 150 miles; Sunday, Oct. 20, Washington, D. C., 200 miles; Sunday, Oct. 27, Washington, D. C., 200 miles.

In all flights with old birds and in the first three races of the first series with young birds the membership of the New York and Brooklyn section and the Newark, N. J., section of the club unite in competition for district honors of the "New York and Vicinity District" of the National Federation of Homing Pigeon Fanciers, including club honors and prizes. The club also flies in united competition from 400 and 500 miles with old birds, and the second 200 mile race in each series with young birds, for club honors and prizes, all other flights arranged being independent competitions by each of the two sections of the club.

T. FRED GOLDMAN, Secy.
1694 Dean St., Brooklyn, N. Y.
Feb. 16, 1895.

A New Club.

TO THE AMERICAN FANCIER:

We have recently organized a new club under the name of "The West Side Homing Club of Newark, N. J." Although we are but boys fifteen years of age we will try and make a successful homing in the coming spring. We have some good birds in our possession, some of which have flown from 100 to 200 miles and some others which though untried are excellent breeders. The officers elected at this meeting are as follows: Harry Butcher, president; Eugene Geiser, vice-president and secretary; Carroll H. Hoagland, race secretary; William Jacobus, treasurer.

CARROLL H. HOAGLAND, Race Sec'y,
152 Elizabeth Avenue,
Newark, N. J., Feb. 8th, 1895.

RANDALL'S

GOLDEN WYANDOTTES!

Are the result of years of careful mating. They are what they ought to be—pure gold, not reddish brown or dark bay. In richness of color they are unexcelled.

They have been shown for the first time during the past season. At the Great

HAGERSTOWN Show, October, '94, they were awarded 1st on cockerel, 1st and 2d on pullet and 1st on pen, in strong competition. At

TROY, N. Y., in December, they were awarded 1st on cock, 1st on pullet and 2d on pen, in one of the hottest classes ever known. At

MADISON SQUARE GARDEN, New York, 1895, America's Greatest Show, the crack birds of the country competing, the great prize, first on cockerel, was awarded this strain.

The winner, "Gold Dust," was pronounced by the judges and fanciers present to be the richest colored bird ever exhibited. The pullet "Buttercup" is conceded to be the most perfect laced Wyandotte in the country. These birds are not the result of haphazard matings, but are strictly bred in line to a standard type. They are of large size and true Wyandotte shape.

A few very choice breeding cockerels, brothers to "Gold Dust," for sale. Eggs from best pens, headed by cock "Golden Gem" and cockerel "Gold Dust," \$5.00 per 13; from other grand pens, \$3.00 per 13. \$5.00 per 26. Orders are limited and will be filled strictly in rotation. No circulars. Write for wants. tf76

WHITE PLYMOUTH ROCKS

Bred for Laying and Prize Winning.

Grand shape, pure white plumage, low, fine combs, orange yellow legs and right up to the standard. They will take the prizes "and don't you forget it." Eh! Winning at Salem, Va., December, 1894, cock 1st, 2d tie; hen 1st; breeding pen 1st and 2d; J. H. Drevenstedt, judge. At Roanoke, Va., January, 1895, Geo. O. Brown, judge: Cock, 1st and 2d, hen, 1st and 2d, cockerel, 1st, pullet, 1st, breeding pen, 1st and 2d, scoring 90 to 96. First cock, hen and pullet at great Hagerstown show, 1894, are in my yards by purchase, with many others just as good. My stock is guaranteed first-class in every respect; the culls I kill and eat. "An honest, square deal" to every purchaser. Eggs, fresh and fertile, \$2 for 13; two extra for mention of "ad." Write for card and tell your wants, stamp or no stamp. Some nice birds for sale.

1775 "OLD" BOB WHITE, Roanoke, Va.

ALWAYS WINNERS!

MY BAR. PLYMOUTH ROCKS

AT HAGERSTOWN, MD.,

1893, won FIVE FIRSTS. Birds from my yards won highest honors at leading shows in 1894. Stock mated every season by Mr. G. O. Brown. Eggs from my best birds, \$3 per 13. Send for circular.

Miss Anna E. Brennen,
722 York Road, Baltimore, Md.

How Can You Beat It

MY SILVER AND GOLDEN PENCILLED AND BLACK HAMBURGS

Have won every 1st and special prize in their class the past fall and winter. At Troy my fowls won the special for the highest scoring fowls in the show. At Providence they scored the highest in the show and made a clean sweep, as they did also at New Haven.

All my breeding yards are made up of my highest scoring hens, mated with males to produce exhibition stock.

After February 15 I will be pleased to fill orders for eggs.

CHAS. ELDREDGE,
BOX 166, RYE, N. Y.

Wyckoff's White Leghorns.

America's Business Hen.
A sixty acre farm devoted exclusively to this magnificent breed, which for the past fourteen years has received my especial care and attention in mating and breeding, with the result that they stand to-day without a rival in all that goes to make up the most valuable strain of White Leghorns. In addition to their grand show qualities, especial attention has been given to size, vigor and superior laying qualities, in all of which their superiority stands unquestioned, as only the choicest specimens selected from a stock of 800 to 1,200 carefully bred birds are ever selected. Purchasers of eggs for hatching can depend upon getting those from the very best stock. **EGGS**—\$2 per 15; \$3.75 per 30; \$5 per 45; \$10 per 100. Illustrated and descriptive circular free. 5273

A Few Comments

From the PRESS on

Hamilton's POLISH.

W. C. Black,
Buff Laced,
Golden Bearded,
Golden Plain,
Silver Bearded.

At HAGERSTOWN, Md., October 9-12, 1894.—
Showed 35 birds, won 35 premiums.

Polish were remarkable in point of numbers, about 200 birds being shown. Col. Hamilton showed a superb string and won nearly everything in sight, except on Buff Polish cock, the 1st prize going to a beautifully laced bird shown by Wallace Griswold. It was a rare and beautiful sight. I do not blame the Colonel for spending nearly all his time near the Polish coops. He knows a beautiful fowl when he sees one and sticks to a breed after he has adopted it.—*The American Fancier*, Oct. 20, '94.

Among the attractions in the poultry department was a fine display of Polish fowls of Col. R. J. Hamilton, of Springfield, Mass. These birds are the best specimens of their kind and win over all competition. The Colonel confines himself entirely to breeding Polish, and he is authority for the fowls that wear the crest.—*American Farmer*, Washington, D. C., Nov. 1, '94.

At PROVIDENCE, R. I., December 11-14, '94.—
75 birds, 40 for competition, 35 for exhibition, 35 premiums.

The Polish class, too usually but slimly represented, was filled with 75 birds from the yards of Col. R. J. Hamilton, and the class was full. EGGS from this stock, \$3 per 13. 52t25

ther augmented by a number of entries from various local breeders. Such a class of Polish would do credit to any exhibition, American or English.—*American Fancier*, Dec. 27, '94.

Col. Hamilton's fine Polish, ~5 birds in the coops, was the prominent feature of the show.—*Farm-Poultry*, Jan. 1, '95.

At NEW HAVEN, Conn., Jan. 10-14, 1895.—100 birds, 60 competition, 40 exhibition, 53 premiums. The largest number of Polish ever shown by any one breeder at any one time in this or any other country. Every one of them a show bird.

There isn't a class of birds that attract more attention than the different varieties of Polish, and the showing here was equal to anything we ever saw anywhere. Col. R. J. Hamilton, easily the king breeder of all varieties in the U. S., showed over 100 birds and they were grand specimens.—*New England Fancier*, Jan. 1895.

The Polish varieties were well represented, Col. Hamilton alone having brought 100 birds and carried off fifty odd prizes with them.—*Farm-Poultry*, Feb. 1, '95.

Col. R. J. Hamilton, with 150 [should read 100] of the best Polish ever shown in this country.—*American Fancier*, Jan. 26, '95.

COL. R. J. HAMILTON, Springfield, Mass.

Stock and Eggs From yards of Single Comb Brown Legorns, White and Buff Wyandottes, Houdans, Rose Comb Brown and White Leghorns, and Buff Plymouth Rocks. I own the LARGEST STOCK of the above varieties to be had in this country, and the records will substantiate me in my claim of SUPERIORITY AS TO QUALITY. The line of blood I am breeding and exhibiting has produced and is to-day producing prize-winning specimens in every section of the United States and Canada. Our unparalleled record at New York for the past four years proves that we have nowise departed from our old established rule that "LIKE BEGETS LIKE." New York, 1890, '91, '92: Thirty-three Firsts, 10 Gold Specials, 7 Association Silver Medals, 3 Silver Cups. New York, 1893: Twenty-four Firsts, 6 Association Silver Medals, 10 Gold Specials, and Silver Cup. MADISON SQUARE GARDEN, NEW YORK, FEB., 1894, 25 FIRSTS, 13 SPECIALS. "LIKE DID BEGET LIKE." Send for illustrated circular. Satisfaction is guaranteed. 52t55 JAMES FORSYTH.

AMERICA'S BEST

BLUE ANDALUSIANS

ARE OWNED AND BRED BY

A. C. KEYSER, Lower Providence, Pa.

I can justly claim the BEST, with the following awards to substantiate my claim:

... IN PRESS! ...

The American Fancier's Poultry Book.

ANNOUNCEMENT.

The need of a practical American book on poultry raising has long been obvious. It is true there are numerous cheap books, and a few higher priced books, but there is no book that is at the same time first-class and reliable in every respect and reasonable in price.

During the past year George E. Howard, of Washington, D. C., who is not only an artist in delineating the feathered race, but a practical poultry and pigeon fancier as well, has been busy preparing a complete poultry book, which will be the first of a series of publications issued through THE AMERICAN FANCIER office.

This book will be handsomely illustrated with over TWO HUNDRED ORIGINAL ENGRAVINGS by Mr. Howard. The beautiful cover page reproduced in this "ad." is a sample of the fine illustrative work to be found through the book. In addition to these, the heading of each chapter will be of handsome design.

**Price, Fifty Cents Each, Postpaid.
Special Discount to the
Trade.**

The publishers expect to issue the first edition by July 1st, 1895, and would call the attention of all breeders of thoroughbred stock to the following: A limited number of first-class advertisements will be inserted in THE AMERICAN FANCIER'S POULTRY BOOK at the following rates:

One page,	\$ 15 00
One-half page,	10 00
One-fourth page,	6 00

The first edition will be two thousand copies, guaranteed. All subsequent editions will be printed from electrotypes, and it is safe to estimate that over fifteen thousand copies will be sold in the next few years. *All advertisements appear in every edition.* There is *no charge* for future editions. This means that an advertisement has a permanent value not afforded by any other publication. As we state above, the space will be limited and copy for "ads." should be sent in promptly with the coupon on this page.

Geo. E. Howard, box 54, West Washington, D. C., will also receive orders for advertising, and will be pleased to make arrangements for illustrating advertisements.

TABLE OF CONTENTS.

Chapter 1—The Poultry Industry.
Chapter 2—General Management: a. Poultry House and Yard; b. Selecting a Breed; c. Regular Feeding; d. Exercise; e. Supply of Water and Fountains; f. Oyster Shells and Grit; g. Over Feeding; h. BREEDER AND IMPORTER OF

Pouters, Fans, Jacobins, Owls, Satinettes and Blondinettes.

I have the largest and most extensive pigeon lofts in America, as to quality of birds; the winners in the keenest of competition at all the largest shows. My stud of Owls and Oriental Frills are the only recognized champions in America, having beaten all the so-called cracks ever shown, and winners of more prizes than all the others put together. Write for wants. 52t53

HEADQUARTERS FOR

Pouters, Jacks & White Fans

Having bred and sold at least 75 per cent. of all the Pouters shown in this country for the last fifteen years, I think I can claim to have the best. And in support of the claim I will make a match with anyone to show one pair or five pairs of each of the five colors for from \$200 to \$500 a side. My Jacks are up to my Pouters in quality. Have only bred them for six years and not many of my surplus have been shown. At Boston show they won 1st, 2d and 3d on White cocks; 1st and 3d on White hens; 1st on Yellow cock; 1st on Yellow hen; 2d on Red hen; 1st on any other color hen—pretty well for a beginning in such strong company. Have now about 200 Pouters and 200 Jacks for sale low to close out. No Fans for sale until fall of 1895.

k First Prize Winners.

The Best Record ... On The Breed ... FOR TEN YEARS

Was made by our BARRED PLYMOUTH ROCKS at New York Show, 1894, where we won 1st, 2d, 3d and 4th on cockerels; 2d and 3d on pullets; 1st and 2d on cocks; 1st and 3d on hens; 1st and 2d on pens; and all the specials.

AT NEW YORK SHOW, 1892, our last previous exhibit, we won all the first prizes competed for, except one, and all the five cockerel prizes, except 2d, a record on cockerels not equalled for seven years.

For five years our breeding has taken first prizes at the leading shows.

Breeding and Exhibition Stock for sale from the five males which sired our winning cockerels and pullets at the last New York show; also from the 1st prize cockerel, 1st prize pen male, 1st and 2d cocks and 1892 1st pen male, all winners at New York.

One hundred pullets for practical purposes, at low prices. CIRCULAR FREE. *sat53

Valley View Poultry Farm, ITHACA, N. Y.

Our S. C. W. Leghorns Are still in the lead. At Madison Square Garden we have just won first on Pen, first on Cock, first on Cockerel, American Leghorn Club specials for best cockerel, best pair of cockerels, best ten pullets, best pen and best exhibit; besides many second, third and fourth prizes. In short, we won more firsts than all competitors, besides every special offered. This in addition to our sweeping record for the past two years at Madison Square Garden, substantiate us in claiming our strain to be in the lead.

ON MINORCAS AND BUFF LEGHORNS we have also won many firsts, seconds and specials.

All interested in any of these grand varieties should send for our catalogue. 5257

Breeder of B. P. Rocks, Silver, White and Golden Wyandottes.

At the great WORLD'S FAIR, October 16th to 21st, in competition with the world, my Barred Plymouth Rocks again show their superiority, being awarded the principal prize of First on Breeding Pen, First on Pullet, and Second on Cockerel. This with my previous winnings at Madison Square Garden, N. Y., for past four years, certainly place my stock in the front rank. Choice Breeding and Elegant Exhibition Stock for Sale. Eggs \$1 per 13, \$5 per 25, \$10 per 65. Circular free. 5248

BUFF COCHINS.

At MADISON SQUARE GARDEN, New York, 1893, 1894, 1895, our Buff Cochins have won these years in the regular open classes more prizes than all other breeders combined. Our COCKERELS and PULLETS have never been defeated at New York. These prizes were won in the largest classes and hottest competition ever seen in America.

LIGHT BRAHMAS.

Our Light Brahmas have won highest honors at the largest shows in this country. At MADISON SQUARE GARDEN, New York, 1894, 1895, we have won more prizes than any other breeder, having won fifty per cent. of all 1st prizes, 37½ per cent. of all 2d prizes and 50 per cent. of all 3d prizes awarded in the open classes, besides specials. Choice breeding stock of both varieties from \$5 to \$10 each. High-class exhibition birds a matter of correspondence.

We do sell eggs at any price, neither do we sell scrubs.

HATCHED 100 PER CENT!

THE CHALLENGE

Is the Best Manufactured and Remains Undeclared.

Won First Prize at Boston, 1889 and '90; First at Worcester, 1890; First at great New York Show, Jan., 1891, hatching more chicks than all other machines combined; First and Special at Worcester, 1893; First at Portsmouth, N. H., 1893. At great Worcester Show, 1893, hatched over 99 per cent.—or 618 chicks out of 623 eggs.

OUR GUARANTEE.—We guarantee that each and every one of our machines shall be made in a first-class manner, from good, sound, kiln-dried stock, handsomely finished in oil and varnished, unless otherwise ordered; and that the tanks, boilers, etc., shall be made from the best galvanized iron and copper. The regulator, being the best ever used, never fails to work, and never varies. They will hatch more fertile eggs than any other incubator in the world; and they are easier to run than any other and less liable to get out of order. We guarantee the safe arrival of all goods, and take all risks of transportation. We guarantee that if the incubator is not as represented, after a fair trial, we will take it back and refund money in full.

BROODERS. Are you going to pipe your brooder house? Our HOT WATER SYSTEM is the only practical system in use, as hundreds of testimonials will prove. We also have the best HOT AIR BROODER ever invented; and by our new method do away with the bottom heat. This Brooder is made for either out or in-door use. We guarantee it to give satisfaction; price \$6.00. We also furnish the "CHALLENGE" THERMOMETER, made expressly for us, and BROODER LAMPS that run one week without filling or trimming; price 75 cents each.

OUR HYGROMETERS are made especially for incubators, and no person operating incubators can afford to be without one. Price \$2.00. We warrant them to give satisfaction or money refunded.

OUR HOT WATER HEATER. In this heater every particle of heat is utilized, the water pot being cone shaped, is all heating surface. The heat after being used within, passes out over the water pot again, thereby heating both outside and within. It has a fine revolving grate, and a good dumping arrangement. This heater is warranted to give satisfaction or money refunded. For illustrated catalogue, etc., write to

WOOD & PAIGE, 31 Sewall St., Lynn Mass.
